(5) Section 936.143 sets forth the requirements with respect to the inspection and certification of shipments of fruit covered by this section. Such section also prescribes the conditions which must be met if any shipment is to be made without prior inspection and certification. Notwithstanding that shipments may be made without inspection and certification each shipper shall comply with all grade and size regulations applicable to the respective shipment.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: June 21, 1956.

### Subchapter A—Marketing Orders

[Lemon Reg. 646, Amdt. 1]

## PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

### LIMITATION OF SHIPMENTS

*Findings.* 1. Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 19 F. R. 7175; 20 F. R. 2913), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice and engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended, is insufficient, and this amendment relieves restriction on the handling of lemons grown in the State of California or in the State of Arizona.

*Order, as amended.* The provisions in paragraph (b) (1) (ii) of § 953.753. (Lemon Regulation 646; 21 F. R. 4256) are hereby amended to read as follows:

(ii) District 2: 604,500 cartons.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: June 20, 1956.

[SEAL] FLOYD F. HEDLUND,
*Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

[Lemon Reg. 647]

## PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

### LIMITATION OF SHIPMENTS

§ 953.754 *Lemon Regulation 647*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 20 F. R. 8451), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on June 20, 1956, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the de-

clared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., June 24, 1956, and ending at 12:01 a. m., P. s. t., July 1, 1956, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 511,500 cartons;

(iii) District 3: Unlimited movement.

(2) As used in this section, "handled," "District 1," "District 2," and "District 3" have the same meaning as when used in the said amended marketing agreement and order; and "carton" means the standard one-half orange, grapefruit or lemon box set forth as standard container number 58 in section 828.83, as amended, of the Agricultural Code of California.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: June 21, 1956.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

[F. R. Doc. 56-5024; Filed, June 22, 1956; 8:56 a. m.]

[Avocado Order 9, Amdt. 3]

## PART 969—AVOCADOS GROWN IN SOUTH FLORIDA

### CONTAINER REGULATION

*Findings.* 1. Pursuant to the marketing agreement, as amended, and Order No. 69, as amended (7 CFR Part 969; 20 F. R. 4177) regulating the handling of avocados grown in South Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and upon the basis of the recommendations of the Avocado Administrative Committee, established under the aforesaid marketing agreement and order, and upon other available information, it is hereby found that the limitation on the handling of avocados, as hereinafter provided, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than July 1, 1956. The Avocado Administrative Committee at its meeting on June 12, 1956, considered the effects of the container regulation during the marketing of the 1955-56 crop; such meeting was held after due notice of such meeting and growers and handlers were given an opportunity to submit views and data concerning such regulation; on the basis of the information presented at such meeting, it was concluded that the marketing of avocados weighing less than 20 ounces in containers with inside dimensions 11 x 16¾ x 10 inches has adversely affected the marketing of avocados in the smaller containers; the recommendation and supporting information for container regulation subsequent to June 30, 1956, and in the manner provided herein, were promptly submitted to the Department after such meeting and information concerning such recommendation was disseminated among handlers of avocados; it is necessary, in order to effectuate the declared policy of the act, to make this amendment effective at the time hereinafter set forth; and compliance with this amendment will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

b. *It is therefore ordered,* That the provisions in paragraphs (b) and (c) § 969.309 (Avocado Order 9, as amended; 20 F. R. 5627, 6571, 9173) are hereby amended to read as follows:

(b) *Order.* (1) Beginning at the effective time of this section, no handler shall handle any variety of avocados unless such avocados are packed in a container or containers meeting the following specifications:

(i) Wooden boxes and fiberboard cartons with inside dimensions 11 by 16¾ by 10 inches: *Provided,* That the individual avocados in such a container shall weigh at least 20 ounces, except that up to 10 percent, by count, of the individual fruit in each lot may weigh not more than 2 ounces less than 20 ounces. Such tolerance shall be on a lot basis, but not to exceed double such tolerance shall be permitted for an individual container in a lot;

(ii) Fiberboard cartons with inside dimensions 13½ by 16½ by 3¼ inches;

(iii) Fiberboard cartons with inside dimensions 13½ by 16½ by 3¾ inches;

(iv) Wooden boxes with inside dimensions 13½ by 16½ by 3¾ inches; and

(v) Wooden boxes with inside dimensions 13½ by 16½ by 4½ inches.

(2) The terms "handler," "handle," and "avocados" shall have the same meaning as when used in the amended marketing agreement and order.

(c) *Effective time.* The provisions of this section shall become effective at 12:01 a. m., e. s. t., July 1, 1956.

(Sec. 5, 49 Stat. 753; 7 U. S. C. 608c)

Dated: June 20, 1956.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

### Subchapter B—Prohibition of Imported Commodities

[Lime Reg. 1, Amdt.]

## PART 1069—LIMES

### IMPORTATION

Pursuant to the provisions of section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), paragraph (a) of § 1069.1 (Lime Regulation No. 1; 20 F. R. 6245) is hereby amended to read as follows:

(a) On and after the effective time of this section, the importation into the United States of any lot of limes which in the aggregate exceeds 250 pounds, net weight, is prohibited unless:

(1) Such limes grade at least U. S. No. 2: *Provided,* That the requirement of such grade that the limes shall have good green color shall be applicable only to limes known as large fruited or Persian limes (including Tahiti Bearss, and similar varieties); and

(2) Each such importation is made in conformance with the general regulations (Part 1060 of this chapter; 19 F. R. 7707, 8012) applicable to the importation of listed commodities and the requirements of this regulation: *Provided,* That the provisions of § 1060.4 (c) of this chapter shall not apply.

It is hereby found that it is impracticable, unnecessary, and contrary to the public interest to postpone the effective time of this amendment beyond that hereinafter specified (5 U. S. C. 1001 et seq.) in that (a) the requirements of this amended import regulation are imposed pursuant to section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), which makes such regulation necessary; (b) such regulation imposes the same restrictions on imports of limes as the grade restrictions applicable to the shipment of limes grown in Florida under Lime Order 1, as amended (§ 1001.301 of this chapter; 20 F. R. 4711, 4897, 6676; 21 F. R. 1819, 2650, 3872, 4256); (c) compliance with this amended import regulation will not require any special preparation which cannot be completed by the effective time hereof; (d) notice hereof in excess of three days, the minimum that is prescribed by said section 8e, is given with respect to this amended import regulation; (e) such notice is hereby determined, under the circumstances, to be reasonable.

(Sec. 401, 68 Stat. 907, as amended; 7 U. S. C. 608e-1)

Done at Washington, D. C., this 20th day of June 1956, to become effective at 12:01 a. m., e. s. t., July 15, 1956.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

# TITLE 36—PARKS, FORESTS, AND MEMORIALS

## Chapter I—National Park Service, Department of the Interior

### PART 20—SPECIAL REGULATIONS

### OLYMPIC NATIONAL PARK

On April 18, 1956, notice of proposed rule making was published in the FEDERAL REGISTER (21 F. R. 2529) concerning the proposal to amend Part 20 of the rules and regulations of the National Park Service by adding a new paragraph making mandatory compliance with standards concerning health and safety and forest practices established by or pursuant to the laws of the State of Washington on privately owned lands within Olympic National Park over which the United States exercises exclusive jurisdiction. After due consideration of all relevant matters presented in regard to the proposed amendment, it has been determined that the proposed action is necessary and appropriate in the public interest and for the better administration of Olympic National Park for the purposes for which it was established. Therefore, the following amendment is hereby promulgated under authority contained in section 3 of the act of August 25, 1916 (39 Stat. 535; 16 U. S. C., 1952 ed., sec. 3), National Park Service Order No. 14, 19 F. R. 8824; Regional Director, Region Four, Order No. 2, 19 F. R. 8823:

Part 20, Special Regulations, is amended by adding a new paragraph (k) to § 20.28 *Olympic National Park,* reading as follows:

(k) *Privately owned lands*—(1) *State health and safety laws.* Owners of privately owned lands and occupants of private lands (including business establishments) in that portion of Olympic National Park over which jurisdiction has been ceded by the State of Washington to the United States of America shall comply with the standards concerning safety and health established from time to time by or pursuant to the laws of the State of Washington which would apply to such lands, owners, and occupants if such lands were not located in Olympic National Park and personnel of the Park will consult and cooperate with State officials in the administration of this regulation. Although safety and health standards established from time to time by or pursuant to the laws of the State of Washington shall apply, such owners, and occupants of privately owned lands (including business establishments), shall not be required to obtain permits or licenses from the State of Washington or its political subdivisions, but shall submit plans for public use structures to the Superintendent, Olympic National Park, for approval.

(2) *State forest practice laws.* Any person, firm, or corporation harvesting or cutting timber on privately owned lands within that portion of Olympic National Park over which jurisdiction has been ceded by the State of Washington to the United States of America shall comply with the standards concerning forest practices established from time to time by or pursuant to the laws of the State of Washington which would apply to such operations if they were not being conducted in Olympic National Park and personnel of the Park will consult and cooperate with State officials in the administration of this regulation. Although forest practice standards established from time to time by or pursuant to the laws of the State of Washington shall apply, no person, firm, or corporation harvesting timber, on such privately owned lands shall be required to obtain permits or licenses from, or pay fees to, the State of Washington or its political subdivisions in connection with the harvesting or cutting of timber on such lands. Prior to the initiation of harvesting or cutting of timber on privately owned lands over which jurisdiction has been ceded to the United States, such operations shall be registered with the Superintendent of Olympic National Park.

(3) *Conflict with Federal laws.* If the standards established from time to time by or pursuant to the laws of the State of Washington, specified in subparagraphs (1) and (2) of this paragraph, are lower than or conflict with any established by Federal laws or regulations applicable to privately owned lands within Olympic National Park, the latter shall prevail.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

The foregoing paragraph shall become effective upon publication thereof in the FEDERAL REGISTER.

Issued this 5th day of June 1956.

[SEAL] FRED J. OVERLY,
*Superintendent, Olympic National Park.*

[F. R. Doc. 56-4949; Filed, June 22, 1956; 8:45 a. m.]

### PART 20—SPECIAL REGULATIONS

### LAKE MEAD NATIONAL RECREATION AREA

1. Section 20.48 *Lake Mead National Recreation Area,* is amended by adding paragraph (b) as follows:

(b) *Fishing.* Fishing from or within 200 feet of any public boat dock or any public raft or float designated for water sports is prohibited.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C., 3)

Issued this 31st day of May 1956.

[SEAL] CHARLES A. RICHEY,
*Superintendent, Lake Mead National Recreation Area.*

[F. R. Doc. 56-4950; Filed, June 22, 1956; 8:46 a. m.]

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

[7 CFR Part 906]

[Docket No. AO-210-A7]

### MILK IN TULSA-MUSKOGEE, OKLA., MARKETING AREA

### NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS THERETO WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to a proposed marketing agreement and a proposed order, amending the order as amended, regulating the handling of milk in the Tulsa-Muskogee, Okla., marketing area.

Interested parties may file written exceptions to this recommended decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 10th day after the publication of this recommended decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

*Preliminary statement.* The public hearing on the record of which the proposed marketing agreement and order were formulated was held at Tulsa, Oklahoma, November 29-30, 1955, pursuant to notice thereof issued on November 1, 1955 (20 F. R. 8294).

The material issues of the hearing related to:

1. The respective allocation of producer milk and other source milk to the classes of use in a handler's plant:

(a) When changes in the relationship of producer receipts to Class I sales occur within a month;

(b) When producer receipts are less than 115 percent of Class I sales for the month; or

(c) As affected by the classification and allocation of milk in inventory; and

2. The volume of milk for which a handler should receive location adjustment credit.

No evidence was presented in support of proposals contained in the notice of hearing to (a) delete the payment provisions applicable to handlers subject to other orders who distribute milk on routes in the marketing area and (b) provide location adjustments or differential pricing to handlers and producers

with respect to milk received at plants in certain portions of the marketing area.

*Findings and conclusions.* The following findings and conclusions are based on evidence received at the hearing and the record thereof:

1. *Allocation of other source milk.* The Tulsa-Muskogee order presently uses a monthly accounting period for classification, pricing, and pooling a handler's receipts of milk from producers. When a handler has both producer milk and other source milk in his plant the specific use made of milk from each source cannot be determined and it is necessary to determine the total classification of all of his receipts (including that milk on hand at the beginning of the accounting period). Because order class prices apply only to producer milk it is then necessary to allocate this gross classification among the receipts from various sources to determine the quantities of milk in each class to be charged the handler for current receipts of producer milk.

Except for an allowance in Class II for plant loss, the Class I sales for the month are, so far as possible, assigned to receipts of producer milk during the month and it is only as producer receipts exceed Class I sales that Class II uses, other than allowable shrinkage, are allocated to producer milk. Class I sales in excess of producer receipts are allocated first to milk on hand in inventory at the beginning of the month and then to current receipts of other source milk. Since milk on hand in inventory was classified as Class II milk in the preceding month, an additional charge to the handler is made whenever Class I sales are allocated to such milk for which producers were paid the Class II price in the preceding month. The order requires no compensatory payment with respect to other source milk (either as current receipts or in inventory) to which Class I sales are allocated under this system. The classification of producer milk in the preceding month determines whether milk in inventory is producer milk or other source milk.

Handlers proposed three changes in the order that would affect the allocation procedure and the resulting classification of and obligations for producer milk. These proposals were as follows:

(a) That under certain specified conditions a handler might have his monthly obligation computed on the basis of more than one accounting period within the month;

(b) That other source Grade A milk priced as Class I milk under another Federal order be allocated pro rata with producer milk whenever receipts of producer milk were less than 115 percent of a handler's route sales of Class I milk for the month; and

(c) That the provisions with respect to milk in inventory be deleted, and that only changes in the volume of milk in inventory be classified as Class II milk.

The first of these proposals would provide means whereby a closer time relationship might be required between receipts of producer milk and the Class I sales for which they are given priority of assignment; the second would require producers to supply a handler with a minimum proportion of Class II milk to maintain prior claim on the handler's Class I sales; and the third would afford current receipts of other source milk prior claim over producer milk in inventory to Class I sales in excess of current receipts of producer milk.

Handlers' testimony in support of the need for provision for shorter accounting periods related principally to situations prevailing in November 1954 and in April and August 1955 as a result of the failure of certain handlers and the cooperative association representing a majority of Tulsa-Muskogee producers to agree upon the conditions (including prices in excess of the minimum prices of the order) under which milk of member producers was to be delivered. In November 1954 some association milk was withheld for a time from certain handlers; from April 7, 1955, through August 9, 1955, no milk of association members was received by the largest handler in the market. For April 1955, all producer receipts (other than shrinkage) of this handler were classified as Class I milk, whereas during April 1–6 when only producer milk was received, some 240,000 pounds were used or disposed of for Class II purposes. In August 1–9, this handler received some 450,000 pounds of other source milk, but all Class I sales in August were allocated to producer milk. Another handler claimed that in November 1954 it was necessary for him to purchase more than 180,000 pounds of other source Grade A milk when milk was withheld, but that producer receipts for the month exceeded Class I sales by over 500,000 pounds so that all Class I sales were assigned to producer milk. This handler also cited November 1952 as a month in which some 57,000 pounds of other source milk were purchased but none of it was assigned to Class I. This was the only instance cited in which disruption of deliveries or their resumption was not involved.

Handlers proposed that a handler might have his obligations computed on the basis of a separate accounting period within a month upon request within 3 days following the close of such separate accounting period, and finding by the market administrator that the ratio of producer receipts to Class I sales changed from more than 115 percent to less than 115 percent, or vice versa, with use of at least seven-day periods to compare such ratios. In the course of testimony possible need was developed for a variety of other conditions applicable under certain specific circumstances.

The limited number of incidents cited by proponents of the proposal indicates that under normal conditions there is little or no need for shorter accounting periods. In fact, the testimony indicates that the proposal was designed to meet unforeseen situations of such gravity and complexity that it is impossible to establish in the order the appropriate conditions which would qualify a handler for computation of obligations on a short accounting period without making such provisions equally applicable to situations for which they are not appropriate. Should severe marketing disturbances arise wherein order provisions well adapted to normal operations become oppressive, an emergency action based on the facts then existing would appear to provide the best means for consideration of the problem in the light of existing circumstances. The order should not be amended to provide separate accounting periods on the basis of contingencies the precise nature of which cannot now be foreseen.

The proposal for pro rata allocation of other source milk priced as Class I milk under another Federal order when receipts from producers are less than 115 percent of a handler's route sales should not be adopted. Such a provision could require local producers to supply up to 12.5 percent of their milk as Class II milk at all times. Handlers claim that the proposal would enable them to operate with a generally lower annual supply of producer milk in that there would be less inducement for them to assure themselves of a supply of producer milk fully adequate at all times to provide the reserve supplies necessary for carrying on their Class I business. Despite the fact that the conditions under which the proposed provision would operate (producer receipts less than 115 percent of a handler's Class I sales) were identical with those contained in their companion proposal for separate accounting periods, the proponents claim that the two proposals were not intended to operate concurrently; nevertheless, the specific times cited in support of need for such a provision were those cited in support of the need for separate accounting periods, plus the experience of the major handler in the months of May through July 1955 when no association member milk was received. The principal proponent witness advocated the proposal on the basis of its applicability to period of generally short supply, but insisted that the determination of supply should be on an individual handler basis rather than on a marketwide basis.

In periods of generally short supply, the adoption of the proposal could serve to reduce the uniform price of the order from that resulting under present provisions. These are conditions under which the supply-demand adjustment of Class I prices is designed to increase price incentive to producers as a means of providing an adequate supply of milk for the market. Producers receive Class II prices for any reserve milk in excess of actual sales; in return they are assured under the order of prior claim on the handler's Class I sales. This record would indicate that Tulsa-Muskogee handlers wish to modify this priority for producer milk because they cannot secure other supplies on terms as favorable. The proposal should not be adopted.

The proposed changes with respect to the classification and allocation treatment of inventories would seek to reinstate the provisions effective in the Tulsa and Muskogee orders prior to August 1953 when these separate orders were merged into the present Tulsa-Muskogee order.

Class I products are classified on the basis of the form in which disposition is made. Class II products are accounted for on the basis of the milk used to produce certain products or disposed of under specified conditions. Unprocessed milk, skim milk, and cream and named Class I products on hand but not yet disposed of do not fall into either of these categories because use or disposition has not yet been established. The volume of such inventories on hand at the end of each month (or accounting period) varies considerably due to such factors as daily variations in sales or plant operating conditions.

Under the present order such inventories on hand at the end of the month are temporarily classified as Class II milk in order that proper accounting may be made to producers. Such inventories are then accounted for finally in the following month in which final use or disposition is in all likelihood established. Since specific use of such inventories cannot be established, final classification is a part of the allocation procedure. Basically, the allocation procedure assigns current receipts of producer milk first to Class I use and then to Class II use, current receipts of other source milk first to Class II use and then to Class I use; opening inventory is allocated to the remaining uses in either class. If Class I sales exceed producer receipts, some milk in inventory is thus allocated to Class I milk; if an equal volume (in addition to shrinkage) of the preceding month's receipts of producer milk were paid for as Class II milk a reclassification charge is made at the difference between the price charged for the temporary classification (the Class II price of the preceding month) and the current Class I value as used. If producers were not paid a Class II price for milk in volume equal to the inventory it is considered other source milk and no charge is made, since no payments are required with respect to current receipts of other source milk allocated to Class I.

The proposal would merely adjust the volume of milk accounted for as Class II milk by any difference between the volumes of the opening and closing inventories. Under this system the allocation of current receipts of other source milk to Class II use (as so adjusted) results in giving such receipts of other source milk prior claim to Class I sales over producer milk in inventory, whenever Class I sales exceed current receipt of producer milk.

Since under both systems prior claim on Class I sales is given current receipts of producer milk no difference in final results occurs except when such receipts are less than the Class I sales. When this occurs under the inventory variation classification proposed, not only are current receipts of other source milk given prior claim over producer milk in inventory for such excess sales, but also in many fluid milk handlers' plants reduction in the volume of inventory may exceed Class II milk uses, resulting in a negative volume of Class II milk, which in the past in some markets has resulted in reclassification charges without distinguishing whether producer milk or other source milk was involved.

Proponents alleged that under the disturbed marketing conditions outlined heretofore, the present provision had been inequitable. Reclassification charges were assessed with respect to inventories of October 31, 1954 and March 31, 1955. The record fails to substantiate, however, that these inventories of producer milk were not available for Class I use in the respective periods immediately following. The alleged costs incurred with respect to inventories of December 1, 1954, and August 1, 1955, are incident to the priority of allocation afforded current receipts of producer milk in these months and would not have been changed by the proposal.

2. Location adjustment credit to handlers should not be changed to apply to all milk moved from a country plant to a bottling plant in the marketing area without regard to the need for Class I milk at such plant.

A handler proposed that location adjustment credit apply to the entire volume of milk moved from a receiving plant in the country to a bottling plant in the marketing area. The order currently restricts eligibility for location credit to the volume of milk so moved which is not in excess of Class I disposition from the transferee plant less 95 percent of receipts from producers at such plant. Such provisions became effective October 1, 1955, on the basis of a public hearing held March 28–30, 1955.

This record fails to show any reason why location adjustment credit should be given on movement of milk not associated with Class I use. The 5 percent "leeway" provision of the Tulsa-Muskogee order provides recognition of the problem of adjustment of movements to Class I needs beyond that provided in many orders. In order to provide a uniform total "leeway" or cushion in relation to Class I sales this should be expressed as a percentage of Class I sales rather than of producer receipts at the transferee plant. Otherwise, no change should be made in the location adjustment credit provision on the basis of this record.

*General findings.* (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Rulings on proposed findings and conclusions.* Briefs were filed on behalf of the Pure Milk Producers Association of Eastern Oklahoma and handlers subject to the proposed marketing agreement and order, as hereby proposed to be further amended. The briefs contained proposed findings, conclusions, and arguments with respect to the provisions of the proposed amendments. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the findings and conclusions proposed in the briefs are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusions in this recommended decision.

*Recommended marketing agreement and amendment to the order.* The following order, amending the order, as amended, is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The proposed marketing agreement is not included in this decision because the regulatory provisions thereof would be identical with those contained in the order, as amended, and as hereby proposed to be further amended.

Amend the proviso appearing at the end of § 906.53 to read as follows: "*Provided*, That for the purposes of calculating such adjustment transfers between approved plants shall be assigned to Class I milk in a volume not in excess of that by which 105 percent of Class I disposition at the transferee plant exceeds the receipts from producers at such plant, such assignment to transferor plants to be made first to plants at which no adjustment credit is applicable and then in the sequence at which the lowest location adjustment credit would apply."

Filed at Washington, D. C., this 20th day of June 1956.

[SEAL] ROY W. LENNARTSON,
*Deputy Administrator.*

## [ 7 CFR Part 980 ]

[Docket No. AO-182-A6]

### MILK IN TOPEKA, KANS, MARKETING AREA

### NOTICE OF HEARING ON PROPOSED AMENDMENTS TO MARKETING AGREEMENT AND ORDER, AS AMENDED

Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and in accordance with the applicable rules of practice and procedure, as amended (7 CFR Part 900), notice is hereby given of a public hearing to be held at the Kansan Hotel, Topeka, Kansas, beginning at 10:00 a. m., local time, July 10, 1956.

The public hearing is for the purpose of receiving evidence with respect to proposed amendments hereinafter set forth or appropriate modifications thereof, to

the tentative marketing agreement as heretofore approved by the Secretary of Agriculture and to the order, as amended, regulating the handling of milk in the Topeka, Kansas, marketing area (7 CFR Part 980.0 et seq.). The amendments proposed have not received the approval of the Secretary of Agriculture.

The proposals relating to the enlargement of the Topeka, Kansas, marketing area raise the issue as to whether the provisions of the present order would tend to effectuate the declared policy of the act if applied to the marketing area as proposed to be extended and, if not, what modifications of the provisions of the order, as amended, should be made to effectuate the declared policy of the act.

Amendments to the order, as amended, for the Topeka, Kansas, marketing area have been proposed as follows:

By Shawnee County Milk Producers Association of Topeka, Kansas:

1. Amend § 980.5 to read as follows:

§ 980.5 *Topeka, Kansas, marketing area.* "Topeka, Kansas, marketing area" hereinafter called "marketing area" means the city of Topeka and all the territory in Shawnee County, Kansas, and the city of Emporia and all the territory in Lyon County, Kansas.

2. Amend § 980.8 to read as follows:

§ 980.8 *Approved plant.* "Approved plant" means any milk plant or portion thereof which is:

(a) Approved by the health authorities of any municipal or state government for the handling of milk for consumption as Grade A milk and from which Class I milk is disposed of on routes within the marketing area, or

(b) Used to receive milk from approved dairy farmers and to prepare such milk for transfer to another approved plant from which a route is operated in the marketing area, or

(c) Supplying Class I milk to any Agency of the United States Government located within the marketing area.

3. Amend § 980.9 to read as follows:

§ 980.9 *Pool plant.* "Pool plant" means any approved plant other than that of a producer handler:

(a) During any delivery period of March, April, May or June within which such plant disposes of as Class I milk an amount equal to 40 percent or more of such plant's total receipts of milk from approved dairy farmers and disposes of as Class I milk on routes in the marketing area an amount equal to 20 percent or more of such plant's total receipts of milk from approved dairy farmers.

(b) During any other delivery period within which such plant disposes of as Class I milk, an amount equal to 50 percent or more of such plant's total receipts of milk from approved dairy farmers and disposes of as Class I milk on routes in the marketing area an amount equal to 25 percent or more of such plant's total receipts of milk from approved dairy farmers.

(c) During any delivery period of July through December within which such plant transfers in bulk to a plant described in paragraph (b) of this section an amount of milk equal to 70 percent or more of the excess of such plant's receipts from approved dairy farmers over such plant's Class I sales outside the marketing area and disposes of an amount of milk equal to 70 percent or more of such plant's receipts of milk from approved dairy farmers as Class I milk. Any such plant which is a pool plant in each of the delivery periods of July through December shall be a pool plant for each of the following delivery periods of January through June regardless of the quantity of milk then disposed of to other pool plants, if a written request for pool plant status for such six months period is received from the operator of such plant by the market administrator before January 1. For the purposes of this definition, during the year 1956, the month of September will be substituted for the month of July wherever it appears hereinabove and such plant may qualify as a pool plant for the first six months of 1957, by qualification in each of the delivery periods of September through December, 1956.

(d) For the purposes of the definition the following shall apply:

(1) Milk diverted from an approved plant to another milk plant for the account of a cooperative association which does not operate a plant shall be deemed to have been received by such cooperative association at a pool plant.

(2) Milk diverted from an approved plant for the account of the handler operating such approved plant shall be considered a receipt at the approved plant from which it was diverted.

By Beatrice Foods Co.:

4. Amend § 980.66 by adding a new paragraph (b) as follows:

(b) The daily average base of each producer for whom no daily base may be established pursuant to paragraph (a) of this section shall be computed by the Market Administrator as follows:

(1) Multiply such producer's daily average deliveries of milk during the current month by the percentage that total deliveries of base milk in the current month by producers for whom daily bases are computed pursuant to paragraph (a) of this section are to total deliveries of milk in the current month by all producers.

5. Make such changes in other sections of the order so as to make the entire order conform with Proposal No. 4 above.

By Fairmont Foods Company:

6. To include Morris County, Kansas, in extension of the marketing area.

By the Dairy Division:

7. Make such other changes as are necessary to make the order conform to any amendments thereto that may result from the hearing.

Copies of this notice of hearing and of the order as now in effect may be obtained from the Market Administrator, Room 297 Plaza Theatre Building, 231 West 47th St., Kansas City 12, Missouri, or from the Hearing Clerk, Room 112 Administration Building, Washington 25, D. C. or may be there inspected.

Issued at Washington, D. C., this 20th day of June 1956.

[SEAL] ROY W. LENNARTSON,
*Deputy Administrator.*

HAY, STRAW, AND SIMILAR MATERIALS FOR IMPORTATION INTO THE UNITED STATES

SANITARY CONTROL

Notice is hereby given in accordance with section 4 of the Administrative Procedure Act (5 U. S. C. 1003) that, pursuant to the provisions of section 2 of the act of February 2, 1903, as amended (32 Stat. 792, as amended; 21 U. S. C. 111), it is proposed to amend Part 95 of of Title 9 of the Code of Federal Regulations in the following respects:

1. The introductory paragraph of § 95.21 would be amended to read:

§ 95.21 *Hay and straw; requirements for unrestricted entry.* Except as provided in § 95.28, hay or straw which does not meet the conditions or requirements of paragraph (a), (b), or (c) of this section shall not be imported except subject to handling and treatment in accordance with § 95.22 after arrival at the port of entry.

* * * * * *

2. The introductory paragraph of § 95.22 would be amended to read:

§ 95.22 *Hay and straw; importations permitted subject to restrictions.* Except as provided in § 95.28, hay or straw which does not meet the conditions or requirements of § 95.21 shall be handled and treated in the following manner upon arrival at the port of entry.

* * * * * *

3. A new paragraph (d) would be added to § 95.26 to read:

(d) *Permitted disinfectants against ticks.* The disinfectants permitted for use against tick infestation are liquefied phenol (U. S. P. strength 87 percent phenol) in the proportion of at least 6 fluid ounces to one gallon of water; or chlorinated lime (U. S. P. strength 30 percent available chlorine) in the proportion of one pound to three gallons of water; or any one of the cresylic disinfectants approved by the Agricultural Research Service in the proportion of at least four fluid ounces to one gallon of water; or through application of boiling water if the treatment is against rinderpest or foot-and-mouth disease and tick infestation; or other disinfectants or treatments approved by the Chief of Branch.

4. A new § 95.28 would be added to read:

§ 95.28 *Hay or straw, and similar material from tick-infested areas.* Hay or straw, grass, or similar material from tick-infested pastures, ranges, or premises may disseminate the contagion of splenetic, Southern or Texas fever when imported for animal feed or bedding; therefore, such hay or straw, grass, or similar material shall not be imported unless such material is first disinfected with a disinfectant specified in § 95.26 (d).

Any person who wishes to submit written data, views, or arguments concerning the proposed amendments may do so by filing them with the Chief, Animal Inspection and Quarantine Branch, Agricultural Research Service, United States Department of Agriculture, Washington, D. C., within 30 days after publication hereof in the FEDERAL REGISTER.

Done at Washington, D. C., this 20th day of June 1956.

### [ 9 CFR Part 131 ]

[Docket No. AO16-A5]

HANDLING OF ANTI-HOG-CHOLERA SERUM AND HOG-CHOLERA VIRUS

NOTICE OF HEARING ON PROPOSED AMENDMENTS TO MARKETING AGREEMENT AND ORDER, AS AMENDED

Pursuant to the provisions of the Anti-Hog-Cholera Serum and Hog-Cholera Virus Marketing Agreement Act (7 U. S. C. 851 et seq.), and the rules of practice and procedure governing formulation of marketing agreements and marketing orders applicable to anti-hog-cholera serum and hog-cholera virus (9 CFR Part 132), notice is hereby given of a public hearing to be held in the United States Courts Building, Court Room, Division No. 2, 811 Grand Avenue, Kansas City, Missouri, beginning at 10:00 a. m., c. s. t., July 23, 1956, for the purpose of receiving evidence with respect to proposed amendments hereinafter set forth or appropriate modifications thereof to the Marketing Agreement and Order, as amended, regulating the handling of anti-hog-cholera serum and hog-cholera virus in interstate commerce or so as to directly burden, obstruct, or affect interstate commerce (9 CFR Part 131). The proposed Marketing Agreement and Order provisions hereinafter set forth have not received the approval of the Secretary of Agriculture.

Amendments to the Marketing Agreement and BAI Order No. 361, as amended, have been proposed by the Control Agency adminstering the provisions of such order, as follows:

1. Amend § 131.8 to read as follows:

§ 131.8 *Wholesalers.* That class of buyers comprising (a) persons or agencies who do not administer serum or virus but are regularly engaged in purchasing and maintaining stocks of serum or virus in sufficient quantities to supply dealer demand, who are properly located and equipped with proper storage and distributing facilities to supply dealer demand, who resell principally to dealers, and who shall have been found by the Control Agency on submitted evidence acceptable to said Control Agency to perform in good faith the usual functions of a wholesaler, including, but without limitation, the storing of all serum or virus marketed, the absorbing of all expenses incidental to the advertising and selling of serum or virus, after receipt by them, to other trade groups, together with the providing of field or veterinary service necessary to determine whether the products sold have served their purpose in specific cases, and (b) any State or Federal Agency, or any farmer cooperative association who regularly purchases, for delivery within a definite period of time and pays for at seller's posted prices at time of delivery serum or virus in specified quantities adequate, in the opinion of the Control Agency, to justify such classification.

2. In § 131.23 delete the first sentence and substitute therefor the following:

§ 131.23 *Selection.* Each of the 12 members of the Control Agency and their alternates shall be selected by the Secretary from the individuals in each of the four groups comprising the nominees for membership and/or alternates who receive the highest numbers, successively, of votes cast by handlers entitled to vote for nominees in each group. The Secretary may designate an individual to serve as an alternate for more than one member of the same group. * * *

3. Amend § 131.46 to read as follows:

§ 131.46 *Reports and records.* (a) On of before March 15, 1957, and on or before March 15 of each year thereafter, each manufacturer and wholesaler handler shall furnish the Secretary, through a disinterested agency to be selected by the Control Agency and approved by the Secretary, a report, which shall be sworn to, setting forth the dollar volume of serum and virus marketed in domestic and foreign commerce by such handler during the preceding calendar year. On or before June 15 of each year, each manufacturer handler shall file a report with the Secretary, which shall be sworn to, setting forth the cubic centimeter volume of serum marketed by such handler during the preceding calendar year and the quantity of completed serum such handler had on hand May 1 of such year.

(b) The disinterested agency shall make reports to the Secretary with respect to the marketings of serum and virus and collections of assessments under this part upon request therefor by the Secretary, and shall promptly transmit to the Control Agency all sums of money received by it from handlers in payment of assessments. The Secretary shall inform the agency concerning the total amount of the pro rata share of manufacturer handlers and the total amount of the pro rata share of wholesaler handlers of the expenses of the Control Agency.

(c) Each handler shall keep and maintain for a period of two years accounts and records showing, to the extent that he is concerned therewith, the manufacture, receipt, delivery, sale, prices, and disposition of serum and virus in sufficient detail as will enable the Secretary to ascertain and determine the extent to which such handler is complying with the terms and provisions of this part; and each handler shall, upon the request of a duly authorized representative of the Secretary, permit him at all reasonable times to have access to and copy such records. Any information furnished to or acquired by the Secretary or his representative pursuant to this paragraph shall be subject to the provisions of section 8 (d) (2) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 608 (d)).

4. Delete the following sentence from § 131.51: "All filed prices to dealers and wholesalers shall be on a delivered basis where the amount sold is 3,000 cc. or more."

5. Amend § 131.53 to read as follows:

§ 131.53 *Open prices.* Each handler shall make no sales unless he has an effective price list, including discounts and terms of sale, as set forth in § 131.51, filed with the Control Agency. No handler shall make any bid, or offer to sell, or enter into an agreement or contract to sell serum or virus, or in any manner sell serum or virus at prices, discounts, or terms of sale different from those set forth in his filed price list which is effective at the time any such bid, offer, agreement, contract, sale, or delivery is made. No handler shall file a new or amended price list until his most recently filed price list for any class of buyers becomes effective, and no handler shall withdraw any filed price list prior to the effective date of such price list.

6. Add a new § 131.60 to read as follows:

§ 131.60 *Agents and distributional outlets.* Whenever the Control Agency by regulation requires that manufacturer and wholesaler handlers list with the Control Agency such handlers' agents and distributional outlets, any movement or transfer of serum or virus by a manufacturer or wholesaler handler to any person not so listed as such handler's agent or distributional outlet shall, for the purpose of this part, be considered to be a sale of serum or virus to such person.

7. Delete §§ 131.71, 131.72, 131.73, 131.74, 131.75, 131.76 and 131.77, and substitute therefor a new § 131.71 to read as follows:

§ 131.71 *Unfair methods of competition and unfair trade practices.* The following are unfair methods of competition and unfair trade practices, and are prohibited:

(a) The payment or allowance of rebates, refunds, commissions or unearned discounts, either in the form of money or otherwise, or extending to certain purchasers special services or privileges not extended to all purchasers under like conditions;

(b) Selling serum or virus at less than reasonable market value;

(c) The giving away or selling other products at less than reasonable market value to a purchaser or user of serum or virus, for the purpose or with the

effect of influencing the sale of serum or virus;

(d) Maliciously enticing away the employees of competitors;

(e) Defamation of competitors by falsely imputing to them dishonorable conduct, inability to perform contracts, questionable credit standing, or by any other false representation of character or conduct or of the serum or virus handled by them;

(f) The sale or offering for sale of any serum or virus by any false means or device;

(g) Shipping of serum or virus on consignment;

(h) Withholding from or inserting in an invoice information which makes the invoice, in whole or in part, a false record of the transaction covered by the invoice;

(i) The making, causing, or permitting to be made, or publishing of any false, untrue, misleading, or deceptive statement by means of advertisement or otherwise, concerning the grade, quality, quantity, character, nature, origin, preparation, or use of serum or virus.

8. Add a new § 131.59 to read as follows:

§ 131.59 *Manufacturer and wholesaler handlers.* Only manufacturer and wholesaler handlers shall be required to post prices, make the required reports, keep and maintain records, pay assessments and be eligible to serve on the Control Agency.

9. Delete the words, "in the current of interstate or foreign commerce, or so as directly to burden, obstruct, or affect interstate or foreign commerce", and words of similar import wherever found in this part.

10. Amend § 131.28 (b) to read as follows:

(b) To make rules and regulations to effectuate the terms and provisions of this part.

11. Add a new § 131.97 to read as follows:

§ 131.97 *Compliance.* No handler shall handle serum or virus except in conformity with the provisions of this part and the rules and regulations issued pursuant thereto.

12. Make such other changes as may be required to make the entire marketing agreement and order conform with any amendments thereto that may result from the Hearing.

13. Recodify the marketing agreement and order.

Copies of this notice of hearing may be procured from the Hearing Clerk, Room 112, Building A, United States Department of Agriculture, Washington 25, D. C., or may there be inspected.

Done at Washington, D. C., this 20th day of June 1956.

[SEAL] M. R. CLARKSON,
*Acting Administrator,*
*Agricultural Research Service.*

## [ 9 CFR Part 131 ]

[Docket No. A016-A6]

### HANDLING OF ANTI-HOG-CHOLERA SERUM AND HOG-CHOLERA VIRUS

### NOTICE OF HEARING ON PROPOSED AMENDMENTS TO MARKETING AGREEMENT AND ORDER, AS AMENDED

Pursuant to the provisions of the Anti-Hog-Cholera Serum and Hog-Cholera Virus Marketing Agreement Act (7 U. S. C. 851 et seq.), and the Rules of Practice and Procedure governing formulation of marketing agreements and marketing orders applicable to anti-hog-cholera serum and hog-cholera virus (9 CFR Part 132), notice is hereby given of a public hearing to be held in the United States Courts Building, Court Room, Division No. 2, 811 Grand Avenue, Kansas City, Missouri, beginning at 10:00 a. m., c. s. t., July 24, 1956, for the purpose of receiving evidence with respect to proposed amendments hereinafter set forth or appropriate modifications thereof to the Marketing Agreement and the Order, as amended, regulating the handling of anti-hog-cholera serum and hog-cholera virus (9 CFR Part 131). The proposed amendments to the Marketing Agreement and Order hereinafter set forth have not received the approval of the Secretary of Agriculture.

The Control Agency administering the provisions of the order has requested that a hearing be held on the following proposals in order that interested persons in the industry may be afforded the opportunity to introduce evidence to support what they consider to be the best method of resolving problems that have arisen with respect to inter-producer sales of serum and virus; duality of operations of handlers with respect to the classifications defined in the order and financial interests held in business units coming within the different classifications defined in the order.

1. Amend the order so that "manufacturer handlers" purchasing serum or virus for use or resale shall be classified under the order as "wholesalers" with respect to such purchases but shall be assessed for expenses of the Control Agency only as "manufacturer handlers".

2. Amend the order so that it shall specifically provide that (1) no person or firm shall act in a dual capacity, either individually or as an agent for others, with respect to the classifications of manufacturer, wholesaler, dealer, and consumer defined in the order, except as specifically provided for therein, and (2) no person shall have a substantial financial interest in business units, either directly, indirectly or through close family relationship, which come within different classifications of the trade defined in the order.

Copies of this notice of hearing may be procured from the Hearing Clerk, Room 112, Building A, United States Department of Agriculture, Washington 25, D. C., or may there be inspected.

Done at Washington, D. C., this 20th day of June 1956.

## Commodity Stabilization Service

## [ 7 CFR Part 814 ]

### MAINLAND CANE SUGAR AREA

### NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO ALLOTMENT OF 1956 SUGAR QUOTA

Pursuant to the provisions of the Sugar Act of 1948, as amended (7 U. S. C. 1100 et seq., hereinafter referred to as the "act"), and the applicable rules of practice and procedure (7 CFR 801.1 et seq.), notice is hereby given of the filing with the Hearing Clerk of the Recommended Decision of the Administrator, Commodity Stabilization Service, United States Department of Agriculture, with respect to a proposed order of the Secretary of Agriculture for the allotment of the 1956 sugar quota for the Mainland Cane Sugar Area. Interested persons may file written exceptions to this recommended decision and proposed order, together with supporting reasons therefor, with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., within 10 days after the date of filing of the recommended decision with the Hearing Clerk, which date shall be the date of publication of this notice in the FEDERAL REGISTER. The date of filing of written exceptions with the Hearing Clerk by mail shall be the postmark date of submission of such exceptions.

*Preliminary statement.* Section 205 (a) of the act requires the Secretary to allot a quota whenever he finds that the allotment is necessary, among other things to (1) prevent disorderly marketing of sugar or liquid sugar and (2) afford all interested persons an equitable opportunity to market sugar or liquid sugar. Section 205 (a) also requires that such allotment be made after such hearing and upon such notice as the Secretary may prescribe.

Pursuant to the applicable rules of practice and procedure (7 CFR 801.1 et seq) a preliminary finding was made that allotment of the quota is necessary, and a notice was published on December 31, 1955 (20 F. R. 10167), of a public hearing to be held at New Orleans, Louisiana, in the International House on January 19, 1956, at 10:00 a. m., c. s. t., for the purpose of receiving evidence to enable the Secretary, (1) to affirm, modify or revoke the preliminary finding of necessity for allotments, and (2) to establish fair, efficient and equitable allotments of the 1956 quota for the Mainland Cane Sugar Area for the calendar year 1956.

The hearing was held at the place and time specified in the notice.

*Basis for findings and conclusions.* Section 205 (a) of the act reads in pertinent part as follows:

• • • Allotments shall be made in such manner and in such amounts as to provide a fair, efficient, and equitable distribution of such quota or proration thereof, by taking into consideration the processings of sugar or liquid sugar from sugar beets or sugarcane to which proportionate shares, determined pursuant to the provisions of subsection (b) of Section 302, pertained; the past marketings or importations of each such person and the ability of such person to market or import that portion of such quota or proration thereof alloted to him • • •.

The record of the hearing indicates that the prospective supply of mainland cane sugar available for marketing in 1956 exceeds the quota for that area to an extent that allotment of the quota is necessary (R. 9, 10).

All three factors specified in the provision of law quoted above have been considered and each is given a percentile weighting by the formula on which this recommended allotment of the 1956 Mainland Cane Sugar Area quota is based. That formula follows the proposal made by the Government witness in the record as to the measures and weightings of factors to be used for determining allotments (R. 18, 19).

In addition to the Government proposal two alternative methods for determining allotments were proposed by a representative of 40 of the 46 Louisiana processors (R. 70, 80; Ex. 14), and another method was supported by 3 Florida processors (R. 101, 102; Ex. 18). All proposals were similar in the following respects: (1) an allotment of 100 short tons, raw value, would be made to the Louisiana State University and the balance of the quota would be allotted to the other processors; (2) the factor "processings" would be measured by the total production from 1955-crop cane; (3) the factor "past marketings" would be measured by the 1951–55 average marketings within allotments and weighted 20 percent; (4) the factor "ability to market" would be measured in part by January 1, 1956, effective inventories exclusive of quantities contracted to the Commodity Credit Corporation and, in part, by some other measure and (5) each factor would be expressed, for each processor, as the percentage that his tonnage for the factor represents of the total tonnage for that factor. No testimony in the hearing record was in disagreement with the above and all allottees agreed and recommended for the record that an allotment of 100 short tons, raw value, be made to Louisiana State University (R. 87, 113).

The proposals differed in the following respects: The proposal supported by the Florida processors weighted the factors "processings," 40 percent; "ability to market," 40 percent and "past marketings," 20 percent, the same as proposed by the Government, while the Louisiana processors' proposals would weight the factors "processings," 60 percent; "past marketings," 20 percent and "ability to market," 20 percent. Varied proposals for measuring the factor "ability to market" were made, differing, however, only with respect to the quantities to be added to January 1, 1956, effective inventories (exclusive of quantities contracted to CCC) to complete the measure of "ability to market".

The method of allotment adopted gives recognition to the importance of having allotments in line with recent crop production levels by giving 1955-crop production a weight of 40 percent. A greater weight to this factor is deemed inappropriate under present circumstances in view of the wide variations for individual processors between their 1955-crop production and that for other recent years, and in view of the method proposed for measuring and weighting "ability to market".

The method adopted to measure the factor "ability to market" gives recognition to the extent sugar production of the past four crop-years exceeded marketings during the past three calendar years (including quantities contracted to CCC). Consequently, it recognizes the increments of current inventories traceable to the restrictions of marketings in the entire sequence of recent years in which quotas have been allotted. The quantity of sugar represented by the measure is substantially the same as the quantity of sugar which, from a supply or availability standpoint, will depend upon allotments for a fair, efficient and equitable opportunity to be marketed in 1956 (R. 21).

Expressed in other terms, but with identical results, this method of measuring the "ability to market" factor represents the quantity of sugar in effective inventory on January 1, 1956 (exclusive of quantities contracted to CCC), plus the quantity of new-crop sugar marketed in 1952. Effective inventories on January 1, 1956, represents the physical quantity of sugar held by processors on that date, plus the quantity of 1955-crop sugar produced in 1956.

Viewing "the ability to market" factor in terms of these two components supports its applicability. For most processors, new-crop marketing in 1952 fairly reflected their capabilities to market sugar in the closing months of that year, the most recent year without marketing restrictions. To the extent some failed to fully demonstrate their potential marketing abilities in late 1952, their January 1, 1953, inventories were increased accordingly. Such inventory increases, except as offset by subsequent marketings, continue to be reflected in January 1, 1956, effective inventories (R. 22). The component January 1, 1956, effective inventories, from a supply standpoint, reflects the entire ability of processors to market sugar in 1956 prior to October when processing of the 1956-crop begins, and the component new-crop marketings, as demonstrated by processors in the most recent period of unrestricted marketings, reflects the relative abilities of processors to market sugar in the last quarter of the year.

In 1956 the processors continue to fall into the same groups as in 1952 based on the percentage of the crop they process in the last quarter of the year and their tendencies to market all of the crop as it is produced or to distribute marketings over a longer period. Consequently, 1952 new-crop marketings, when added to January 1, 1956, effective inventories, provides a measure of ability which recognizes both the current and normal sizes of inventories and the length of time such inventories are normally carried.

Thus, this measure of "ability to market," described initially as the difference between the production of sugar from the four most recent crops and the marketings (including quantities contracted to CCC) for the three most recent years when marketings have been restricted, and gives recognition to current inventories, and gives appropriate consideration to differences between processors in their customary marketing and storage patterns and is, therefore, a suitable and acceptable measure of ability.

Comparisons have been made between the allotments resulting from giving consideration to the three statutory factors as proposed herein, and production from crops in various years, inventory and new-crop situations as an aid in gauging whether such allotments result in a fair, efficient and equitable distribution of the quota (R. 26–30; Ex. 9, 10). Such analysis supports the conclusion that the allotments as proposed are fair, efficient and equitable.

All processings of sugar from 1955-crop sugarcane are used as a measure of the factor "processing of sugar or liquid sugar from • • • sugarcane to which proportionate shares • • • pertained," although total processings may include negligible quantities of sugar processed from sugarcane to which proportionate shares did not pertain since such quantities have insignificant effect in the formula used for fixing allotments (R. 19–20). It was proposed that contract quantities of sugar purchased by the Commodity Credit Corporation be used in computing final allotments (R. 18). No exception was taken to such use of total processings and contract quantities, and no evidence to the contrary was offered at the hearing. Final data have been made a part of the record subsequent to and as provided for in the hearing and are reflected in the proposed allotments (R. 16–17).

As the hearing record shows that the Department has received satisfactory evidence that Glenwood Coop., Inc., is the successor in interests to the E. G. Robichaux Company, Ltd., for allotment of quota purposes including pertinent history of production, marketings and inventories, such change has been reflected accordingly in the findings and allotment order (R. 32).

It was proposed in the record that in the event of any deficits in allotments of individual allottees, and any increases in quota due to deficits in other areas, that such quantities be allotted without further notice or hearing to such allottees as can supply the additional quantities in proportion to the allotments then in effect made pursuant to the record of this proceeding (R. 33). Written notification to the Sugar Division by an allottee that he is unable to fill a part of his allotment, and any regulations issued by the Secretary which allots deficits in quota of other areas to the 1956 quota for the Mainland Cane Sugar Area are to be considered a part of the record of this

hearing for the purpose of official notice to be taken thereof (R. 33).

The findings and the allotment order include provisions similar to those included in the 1955 order (S. R. 814.21; 20 F. R. 7126), paragraphs (b) Restrictions on Marketing, and (c) Transfer of Allotment, and also include a provision similar to that included in the 1954 order (S. R. 814.21; 19 F. R. 1337), paragraph (d) Exchanges of Sugar Between Allottees. The need for including these provisions was supported by the Government witness (R. 31) and by a representative of many of the processors (R. 87) and there was no testimony or argument opposed to their inclusion.

In recommending the findings, conclusions and regulatory provisions of the order set forth hereafter, all proposed findings and conclusions were carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that findings and conclusions proposed by interested persons are inconsistent with the findings and conclusions recommended herein, the specific or implied request to make such findings and reach such conclusions are denied on the basis of the facts recommended to be found and the conclusions recommended to be reached as set forth herein.

*Recommended findings and conclusions.* On the basis of the record of the hearing, I hereby find and conclude that:

(1) January 1, 1956, effective inventories of mainland cane sugar approximate 400,000 short tons, raw value. With a quota of 500,000 tons, such inventories limit 1956 marketing of 1956-crop mainland cane sugar to about 100,000 tons. New-crop marketings during 1948–1952, the most recent five-year period without marketing restrictions, ranged from a low of about 274,000 tons to a high of about 435,000. Thus, the supply of sugar available for marketing in 1956 is expected to greatly exceed the statutory quota of 500,000 short tons, raw value.

(2) Prospects in other domestic areas and Cuba are such that no increase in the Mainland Cane Sugar Area quota through proration of deficits is likely.

(3) The supply situation makes necessary the allotment of the 1956 sugar quota for the Mainland Cane Sugar Area to assure an orderly flow of such sugar in the channels of interstate commerce, to prevent disorderly marketing of sugar, and to afford all interested persons equitable opportunities to market sugar within the quota.

(4) Total processings of all sugar from 1955-crop sugarcane by each processor is a fair, efficient and equitable measure of processings of sugar from the 1955-crop of sugarcane to which proportionate shares pertained.

(5) An allotment of 100 short tons, raw value, should be established for the Louisiana State University and the balance of the quota, 499,900 short tons, raw value, should be allotted in accordance with the method set forth in (6) and (7), below.

(6) For processors other than the Louisiana State University each of the three factors specified in section 205 (a) of the act shall be measured and weighted, and allotments determined as follows, based on final data in the hearing record:

(a) The factor processings from proportionate shares should be measured by each processor's production of all sugar from 1955-crop sugarcane, in short tons, raw value, expressed as a percentage of the total of such processings for all processors, and weighted by 40 percent;

(b) The factor past marketings should be measured by each processor's average annual marketings within his allotment for the years 1951 through 1955, in short tons, raw value, expressed as a percentage of the total of the measure for all processors, and weighted by 20 percent.

(c) The factor ability to market should be measured for each processor by subtracting (1) his total marketings in the calendar years 1953, 1954 and 1955, plus-contract quantities of his sales to the Commodity Credit Corporation from (2) his total production of sugar for the crop years 1952 through 1955. The result of subtracting (1) from (2), above, in short tons, raw value, expressed as a percentage of the total of the measure of all processors should be weighted by 40 percent.

(d) The total of the percentages resulting from (a), (b) and (c), above, for each processor should be multiplied by 499,900 to determine his allotment in short tons, raw value.

(7) The quantities of sugar and the percentages referred to in paragraph (6), above, based on final data, are set forth in the following table:

| Processor | Processings of sugar from 1955-crop cane | | Past marketings average within allotments 1951–55 | | Ability to market | | | | | Processor's percentage share of 499,000 tons (column 2 x 40 percent plus column 4 x 20 percent plus column 9 x 40 percent) |
|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | Total processings 1952–55 crop years (tons) | Total marketings 1953–55 calendar years (raw value) | Contract quantities of sales to CCC (tons) | Measure used | | |
| | | | | | | | | Column 5 less columns 6 and 7 (tons) | Percent of total | |

(8) The Glenwood Cooperative, Inc., successor to the interests of E. G. Robichaux Co., Ltd., shall have its 1956 allotment based on its past production, marketings and inventories of sugar combined with those formerly representing the operations of E. G. Robichaux Co., Ltd.

(9) An efficient distribution of the quota requires provisions for transfer of allotments in unusual circumstances when deemed necessary to assure the processing of all proportionate shares.

(10) To aid in the efficient movement and storage of sugar, provision should be made to enable a processor to market a quantity of sugar of his own production in excess of his allotment, equivalent to the quantity of sugar which he holds in storage and which was acquired by him within the allotment of another allottee of the 1956 mainland cane sugar area quota.

(11) The order shall be revised without further notice or hearing, for the purpose of allotting any additional quota resulting from proration of deficits in the quota for other supply areas, or any deficit in the allotment of any allottee under the order, by allotting any such additional quota or deficit to allottees, who are able to supply the additional sugar, in the proportion that their respective allotments bear to the total allotments of such allottees under the order.

(12) Allotments established in the foregoing manner and in the amounts set forth in the order provide a fair, efficient and equitable distribution of the quota as required by section 205 (a) of the act.

*Recommended order.* Pursuant to the authority vested in the Secretary of Agriculture by section 205 (a) of the act; the section number designation § 815.23 as published in 20 F. R. 9851 is corrected to read § 814.23 and it is hereby ordered, that § 814.23 be amended to read as follows:

§ 814.23 *Allotment of the 1956 sugar quota for the Mainland Cane Sugar Area*—(a) *Allotments.* The 1956 sugar quota for the Mainland and Cane Sugar Area is hereby allotted to the following processors in amounts which appear opposite their respective names:

(b) *Restrictions on marketings.* During the calendar year 1956 each person named in paragraph (a) of this section and any other person is hereby prohibited from marketing in interstate commerce, or in competition with sugar or liquid sugar shipped, transported or marketed in interstate or foreign commerce, any sugar or liquid sugar produced from sugarcane grown in the Mainland Cane Sugar Area in excess of his allotment established in paragraph (a) of this section.

(c) *Transfer of allotment.* When approved in writing by the Director, Sugar Division, Commodity Stabilization Service, of the Department, allotments made in paragraph (a) of this section may be transferred, in whole or in part, to another allottee thereunder upon a showing that the transferee has processed or will process 1956-crop sugarcane because of inability of the transferor, arising subsequent to the processing of the 1955 crop, to process the tonnage of sugarcane which otherwise would be processed by him.

(d) *Exchanges of sugar between allottees.* When approved in writing by the Director of the Sugar Division, or the Chief of the Quota and Allotment Branch thereof, Commodity Stabilization Service of the Department, any allottee holding sugar or liquid sugar acquired by him within the allotment of another person established in paragraph (a) of this section, may ship, transport or market an equivalent quantity of sugar processed by him in excess of his allotment established in paragraph (a) of this section. The sugar or liquid sugar held under this paragraph shall be subject to all other provisions of this section as if it had been processed by the allottee who acquired it for the purpose authorized by this paragraph.

(Sec. 403, 61 Stat. 932; 7 U. S. C. 1153. Interprets or applies sec. 205, 61 Stat. 926; 7 U. S. C. 1115)

Issued at Washington, D. C., this 20th day of June 1956.

[SEAL] WALTER C. BERGER,
*Acting Administrator.*

## SECURITIES AND EXCHANGE COMMISSION

### [ 17 CFR Part 250 ]

PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

COMPANIES DEEMED NOT TO BE WITHIN DEFINITION OF "ELECTRIC UTILITY COMPANY"

Notice is hereby given that the Securities and Exchange Commission upon its own motion is considering amending § 250.7 (Rule U-7) under the Public Utility Holding Company Act of 1935 which excludes certain classes of companies from the categories of "electric utility company" and "gas utility company" as defined in the act. The proposal to amend Rule U-7 is made pursuant to the provisions of sections 2 (a) (3) and 20 (a) of the act.

Rule U-7 excludes from the categories of "electric utility company" and "gas utility company" certain companies primarily engaged in other businesses. The rule provides, in paragraph (a), that such companies, although having a certain amount of public utility business, shall not be deemed electric or gas utility companies if their gross sales of electric energy or gross retail sales of natural or manufactured gas did not exceed $100,000 for the previous calendar year, which amount is computed after excluding certain classes of transactions specified in paragraph (b) of the rule.

The proposed amendment to the rule specifies a new class of companies which would be excluded from the category of "electric utility company", namely, certain companies whose only connection with the generation, transmission, or distribution of electric energy is the ownership of facilities used for the production of heat from special nuclear material which heat is used in the generation of electric energy and which companies are organized not for profit and are engaged primarily in research and development activities. Companies not otherwise subject to the act would not become subject to the act as a result of participating in research and development activities with respect to electric energy generated through the utilization of nuclear material.

The proposed amendment to the rule would delete "(b)" and the words "in paragraph (a)" from the first sentence of the second paragraph of § 250.7 (Rule U-7) and would make that sentence a part of the preceding paragraph. A new paragraph (b) would be added to read as follows:

§ 250.7 *Companies deemed not to be electric or gas utility companies.* * * *

(b) (1) Any company whose only connection with the generation, transmission, or distribution of electric energy is the ownership of facilities used for the production of heat from special nuclear material which heat is used in the generation of electric energy shall not be deemed an electric utility company within the meaning of section 2 (a) (3) of the act, if such company is organized not for profit and is engaged primarily in research and development activities.

(2) As a prerequisite to being entitled to the status afforded by subparagraph (1) of this paragraph, any such company shall file with this Commission a statement that such company falls within the provisions of that subparagraph, including as exhibits (i) copies of its charter, by-laws and any licenses issued by the Atomic Energy Commission to such company; (ii) a list of its members or stockholders indicating their respective percentages of voting power; and (iii) a balance sheet as at the end of the preceding calendar year and an income and surplus statement for such year.

(3) As a prerequisite to retaining the status afforded by subparagraph (1) of this paragraph, any such company shall annually on or before May 1 file a statement with this Commission that such company continues to fall within the provisions of that subparagraph, including as exhibits (i) any changes or additions to its charter or by-laws or list of members or stockholders or any licenses issued by the Atomic Energy Commission to such company since the time of the last filing hereunder, and (ii) a balance sheet as at the end of the preceding calendar year and an income and surplus statement for such year.

(4) If it appears to the Commission (on the basis of the aforesaid statements or otherwise) that a substantial question of law or fact exists as to whether any company is entitled to the status afforded by subparagraph (1) of this paragraph, the Commission may notify such company to that effect by registered mail. Thirty days after such notification the status afforded by subparagraph (1) of this paragraph shall no longer be available to such company, without prejudice to the right of such company to file an application for an order granting an exemption from the application of section 2 (a) (3) of the act, and without prejudice to any temporary exemption provided by that section if such an application is filed in good faith. The Commission will grant such an application if it finds that the standards set forth in subparagraph (1) of this paragraph are satisfied.

All interested persons are invited to submit data, views and comments on this proposal in writing to the Secretary, Securities and Exchange Commission, Washington 25, D. C., on or before July 6, 1956.

By the Commission.

ORVAL L. DUBOIS,
*Secretary.*

JUNE 15, 1956.

# NOTICES

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[Order 616]

SOUTH COAST MASTER UNIT AND APPURTENANT MARKETING AREA FOR REVESTED OREGON AND CALIFORNIA RAILROAD AND RECONVEYED COOS BAY WAGON ROAD GRANT LANDS IN OREGON

JUNE 14, 1956.

Pursuant to the authority contained in section 1 of the act of August 28, 1937 (50 Stat. 874), and in Order No. 2583, Amendment No. 12, September 17, 1954, of the Secretary of the Interior it is hereby ordered as follows:

1. The boundaries of the South Coast Master Unit established by Order 2385, November 29, 1947 of the Secretary of the Interior, are amended to read as follows:

Beginning at the NE corner Sec. 34, T. 18 S., R. 9 W., W. M., Oregon, thence following lines of legal subdivision as follows: southeasterly 20 miles to NE corner Sec. 17, T. 20 S., R. 7 W.; southerly 14 miles to Elkton on the Umpqua River; southerly 25 miles along said river to the east ¼ corner Sec. 31, T. 23 S., R. 7 W.; westerly 5 miles; southerly 30 miles along divide between Coos and Umpqua Rivers to the NE corner of Sec. 36, T. 27 S., R. 8 W.; westerly 5 miles to the Coos-Douglas county line; southerly 6 miles to NE corner Sec. 1, T. 29 S., R. 9 W.; west 3 miles; south 13 miles to SE corner Sec. 4, T. 31 S., R. 9 W.; southwesterly 13 miles along divide between Coquille and Rogue Rivers to Coos-Curry County line; southwesterly 5 miles along said county line to Sec. 6, T. 33 S., R. 10 W.; southeasterly 12 miles to Josephine-Curry county line in Sec. 12, T. 34 S., R. 10 W.; southwesterly 20 miles to grant limit in Sec. 29, T. 35 S., R. 11 W.; northwesterly 19½ miles to SW corner Sec. 35, T. 33 S., R. 13 W.; northerly 34 miles west 4 miles to the SW corner T. 27 S., R. 13 W.; northerly 18 miles to the Pacific Ocean; easterly 18 miles to the SE corner Sec. 36, T. 24 S., R. 11 W.; northerly 18 miles to NE corner T. 22 S., R. 11 W.; east 2 miles; north 8 miles; east 2 miles; north 7¼ miles to the Lane-Douglas County line; northeast along the county line to NE corner of Sec. 12, T. 19 S., R. 10 W.; north ½ mile; west ½ mile; north 1 mile to the hub of Sec. 36, T. 18 S., R. 10 W.; east ½ mile; north ½ mile; east 4 miles to the place of beginning as shown in detail on the map entitled "Map of Western Oregon, showing O & C Lands," on file in the Bureau of Land Management, Department of the Interior, Washington, D. C., Portland, Salem, Eugene, Roseburg, Medford, and Coos Bay, Oregon.

2. The boundaries of the South Coast Master Unit Marketing Area, established by Order 2385, dated November 29, 1947 of the Secretary of the Interior, are amended to read as follows:

All of the Master Unit itself and in addition an area outside thereof founded by a line commencing on the unit boundary at the SE corner Sec. 29, T. 35 S., R. 11 W., W. M., Oregon, thence west 14 miles; south 6 miles; west 6½ miles to the Pacific Ocean at Gold Beach; north along the coastline to township line between T. 18 and 19 S.; east along said township line to the NE corner of Sec. 6, T. 19 S., R. 10 W.; southeasterly along lines of legal subdivisions on the Maple Creek-Sweet Creek divide to the East quarter corner of Sec. 16, T. 19 S., R. 10 W.; east 1¼ miles to the Lane-Douglas County line and the unit boundary as shown in detail on the map referred to above.

This order supersedes Order 2385 of the Secretary of the Interior, dated November 29, 1947. Any part or all of this order may be hereafter amended if such action shall be found to be in the public interest.

EDWARD WOOZLEY,
*Director.*

[Order 617]

SIUSLAW MASTER UNIT AND APPURTENANT MARKETING AREA FOR REVESTED OREGON AND CALIFORNIA RAILROAD GRANT LANDS IN OREGON

JUNE 14, 1956.

Pursuant to the authority contained in section 1 of the act of August 28, 1937 (50 Stat. 874), and in Order No. 2583, Amendment No. 12, September 17, 1954, of the Secretary of the Interior it is hereby ordered as follows:

1. The boundaries of the Siuslaw Master Unit, established by Order 2285, dated December 11, 1946, as amended, of the Secretary of the Interior, are as follows:

Beginning in Sec. 17, T. 15 S., R. 8 W., W. M., Oregon, at the summit of Taylor Butte, thence along the lines of legal subdivisions, southwesterly, 7½ miles, around the headwaters of Deadwood Creek; southerly, 9½ miles, to the Siuslaw River; southeasterly, 8½ miles, around the headwaters of the drainage into the Siuslaw River, to the line between Lane and Douglas counties, sections 1, 2, 11, and 12, T. 19 S., R. 9 W.; southeasterly, 33½ miles, around the headwaters of the drainage into the Siuslaw, on and adjacent to the boundary line between Lane and Douglas Counties to the ¼ section corner between sections 26 and 35, T. 21 S., R. 4 W.; northeasterly and westerly, 15 miles, around the headwaters of the drainage into the Siuslaw River, northerly, 24 miles, around the headwaters of Wolf Creek, Noti Creek, and Long Creek to the line between Lane and Benton counties in Sec. 12, T. 15 S., R. 6 W., W. M.; westerly from the east line of said Sec. 12, along the Lane-Benton County line, 7½ miles, to the center line of Sec. 11, T. 15 S., R. 7 W., W. M.; thence along legal subdivisions north, ¼ mile, west, 1½ miles; north, ¼ mile; west, 1¼ miles; south, ¼ mile; west, ½ mile; south, ¼ mile; west, ½ mile; south, approximately ¼ mile; west, ½ mile; south, approximately ¼ mile; thence along logging setting boundaries, southerly approximately ¾ mile; southeasterly, approximately ½ mile; southwesterly, approximately 2 miles; southeasterly, approximately ¾ mile to the east section line of Sec. 25, T. 15 S., R. 8 W., W. M.; thence along legal subdivisions, south approximately ¾ mile to the northeast corner of the Sec. 36, T. 15 S., R. 8 W.; west, ½ mile; south, ¾ mile; west, ¾ mile; northerly, ½ mile; west, ¾ mile; north, ¼ mile; west, 1 mile to the northwest corner of Sec. 34, T. 15 S., R. 8 W., W. M.; north, 1½ miles; west, ¾ mile; north, ¼ mile; west, ¼ mile; north ¾ mile; west to the summit of Taylor Butte, the place of beginning; all as shown in more detail on the map entitled "Map of Western Oregon, showing O & C Lands," on file in the Bureau of Land Management, Department of the Interior, Washington, D. C., and Portland, Eugene, Salem, Roseburg, Medford, and Coos Bay, Oregon.

2. The boundaries of the Siuslaw Master Unit Marketing Area established by Order 2285, dated December 11, 1946, as amended, of the Secretary of the Interior, are amended to read as follows:

Commencing on the northeast corner of the Siuslaw Master Unit, thence easterly along the boundary between Benton and Lane Counties to the Willamette River, thence south following the river to the boundary between Linn and Lane Counties; east to the range line between R. 1 W. and R. 2 W. Willamette, Meridian, thence south to the township line between T. 21 S. and T. 22 S., thence west to the south quarter corner of Section 35 in T. 21 S. R. 4 W.; thence north 1 mile to the Master Unit boundary, thence westerly along the Master Unit boundary to the NW corner of Sec. 35, T. 18 S., R. 9 W.; west to the NE corner of Sec. 36, T. 18 S., R. 10 W.; ½ mile south; ½ mile west to hub of Sec. 36; south 1 mile to hub of Sec. 1, T. 19 S.; R. 10 W.; east ½ mile; south ½ mile to NE corner of Sec. 12 and the Lane-Douglas County line; southwesterly along the county line to NW corner of the NE¼ SW¼ of Sec. 14; west 1¼ miles to the east quarter corner of Sec. 16; northwesterly along lines of legal subdivisions on the Maple Creek-Sweet Creek divide to the NE corner of Sec. 6, T. 19 S., R. 10 W.; west along the township line between T. 18 and 19 S. to the Pacific Ocean; north along the coastline to the township line between T. 17 and 18 S.; east approximately 10 miles to NE corner of T. 18 S., R. 11 W.; north 4 miles; east 6 miles; north 2 miles; east 1 mile; north 2½ miles to the unit boundary; northeasterly along the northerly boundary of the unit to the point of beginning, all as shown in more detail on the map referred to above.

This order supersedes Order 2285, as amended, of the Secretary of the Interior dated December 11, 1946. Any part or all of this order may be hereafter amended if such action shall be found to be in the public interest.

EDWARD WOOZLEY,
*Director.*

### Office of the Secretary

[69322]

OREGON

EXCHANGING ADMINISTRATIVE JURISDICTION OF CERTAIN OREGON AND CALIFORNIA RAILROAD GRANT LANDS AND NATIONAL FOREST LANDS

By virtue of the authority vested in the Secretary of the Interior and the Secretary of Agriculture by section 2 of the act of June 24, 1954 (68 Stat. 270–271), and subject to outstanding contracts, permits, or other existing rights, it is ordered as follows:

(1) The following-described national-forest lands are hereby excluded from the national forests of which they are now a part, and are transferred from the Department of Agriculture to the administrative jurisdiction of the Department of the Interior, and hereafter shall be administered by the Secretary of the Interior in accordance with the provisions of law applicable to revested Oregon and California railroad grant lands:

## DEPARTMENT OF AGRICULTURE

### Commodity Stabilization Service and Commodity Credit Corporation

ANNOUNCEMENT OF PAYMENT RATES FOR SHORN WOOL AND LAMBS AND YEARLINGS MARKETED DURING THE 1955 MARKETING YEAR AND NOTICE OF NO PAYMENTS ON MOHAIR

The national average price to producers for shorn wool marketed during the 1955 marketing year (April 1, 1955, through March 31, 1956) has been reported by the Agricultural Marketing Service as 42.8 cents per pound, grease basis. This national price to producers is 19.2 cents a pound below the announced incentive level for the 1955 marketing year of 62 cents a pound. Accordingly, the incentive payment rate for the 1955 marketing year is 44.9 per-

cent. To determine the amount of the incentive payment due to any producer on the wool he marketed during the 1955 marketing year, the incentive payment rate will be applied to the net proceeds received by the producer for his wool, adjusted so as to express the sales proceeds received at his farm, ranch, or local shipping point.

The rate of payment on lambs and yearlings sold for slaughter with the wool on during the 1955 marketing year will be 77 cents per hundredweight of live animals. This payment rate was determined by multiplying the average weight of wool per hundredweight of animals (5 pounds) by 80 percent of 19.2 cents (i. e., the difference between the 1955 incentive level of 62 cents a pound and the national average price of 42.8 cents a pound for shorn wool).

Since the national average return to producers of 82.2 cents a pound for mohair sold during the 1955 marketing year was 12.2 cents a pound above the announced support level of 70 cents a pound, no payments will be made to producers on the basis of mohair marketed during the 1955 marketing year.

(Sec. 704, 68 Stat. 911, 7 U. S. C. 1783)

Issued this 21st day of June 1956.

[SEAL] EZRA TAFT BENSON,
*Secretary of Agriculture.*

## DEPARTMENT OF LABOR

### Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938 (52 Stat. 1060, as amended; 29 U. S. C. 201 et seq.), and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners and learning periods for certificates issued under general learner regulations (§§ 522.1 to 522.12) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Apparel Industry Learner Regulations (29 CFR 522.20 to 522.24, as amended March 1, 1956, 21 F. R. 1349).

The following learner certificates were issued authorizing the employment of not more than 10 percent of the total number of factory production workers as learners for normal labor turnover purposes:

Angelica Uniform Co., Eminence, Mo.; effective 6-9-56 to 6-8-57 (washable service uniforms).

Angelica Uniform Co., Winfield, Mo.; effective 6-5-56 to 6-4-57 (washable service apparel).

Fair Manufacturing Co., 76 Franklin Street, New Haven, Conn.; effective 5-30-56 to 5-29-57 (blouses).

Humberland Dress Co., 31 North Spruce Street, Mr. Carmel, Pa.; effective 6-10-56 to 6-9-57 (children's dresses).

Edward Hyman Co., Hazlehurst, Miss.; effective 6-6-56 to 6-5-57 (men's coveralls, overalls and work pants).

Knox Manufacturing Corp., 214 West Jackson Avenue, Knoxville, Tenn.; effective 5-31-56 to 5-30-57 (dress slacks).

Martin Shirt Co., 27 East Poplar Street, Shenandoah, Pa.; effective 5-31-56 to 5-30-57 (ladies' blouses).

Playtogs Manufacturing Co., Inc., 7 Canal Street, Middletown, N. Y.; effective 6-4-56 to 6-3-57 (children's play clothes).

Sportcaster Co., 2222 Second Avenue, Seattle, Wash.; effective 6-5-56 to 6-4-57 (men's and women's outerwear).

Spruce Manufacturing Corp., Second and Spruce Streets, Sunbury, Pa.; effective 6-12-56 to 6-11-57 (ladies' underwear).

The following learner certificates were issued for normal labor turnover purposes and, except as otherwise indicated below, a maximum of 10 learners were authorized.

Cagleco Sportswear, 334 North Broadview, Cape Girardeau, Mo.; effective 3-1-56 to 2-28-57 (men's outerwear) (replacement certificate).

George Shirt Co., Inc., Church Street, Hebron, Md.; effective 6-2-56 to 6-1-57; 5 learners (children's dresses).

Glenshore Manufacturing Co., 1622 Arapahoe Street, Denver, Colo.; effective 6-4-56 to 6-3-57 (men's and women's heavy sports outerwear).

Shriner Manufacturing Co., Woodsboro, Md.; effective 6-2-56 to 6-1-57 (cotton pants).

York Springs Dress Co., York Springs, Pa.; effective 6-2-56 to 6-1-57; 3 learners (ladies' cotton uniforms).

The following learner certificates were issued for plant expansion purposes. The number of learners authorized is indicated:

Baxter Shirt Manufacturing Corp., Baxter, Tenn.; effective 6-5-56 to 12-4-56; 40 learners (men's and ladies' sportswear).

Harde Manufacturing Co., Inc., Dillard Street, Blackstone, Va.; effective 6-4-56 to 12-3-56; 25 learners (boys' outerwear).

The Jerold Corp., Smithfield, N. C.; effective 5-31-56 to 11-30-56; 25 learners (women's outerwear).

Monticello Manufacturing Co., Monticello, Miss.; effective 6-1-56 to 11-30-56; 55 learners (work trousers).

Renovo Shirt Co., Inc., Mena, Ark.; effective 6-4-56 to 12-3-56; 25 learners (sport shirts).

Stately Lady Nitewear, Inc., 315 East 12th Street, Charlotte, N. C.; effective 6-4-56 to 12-3-56; 25 learners (ladies' cotton nite gowns and pajamas).

Glove Industry Learner Regulations (29 CFR 522.60 to 522.65, as amended March 1, 1956, 21 F. R. 581).

Boss Manufacturing Co., 107 North Boss Street, Kewanee, Ill.; effective 5-31-56 to 11-30-56; 30 learners for plant expansion purposes (work gloves).

Brookville Glove Manufacturing Co., Inc., Foundry Avenue, Indiana, Pa.; effective 6-11-56 to 6-10-57; 10 learners for normal labor turnover purposes (work gloves).

Independent Telephone Industry Learner Regulations (29 CFR 522.70 to 522.74, as amended March 1, 1956, 21 F. R. 581).

Gulf Telephone Co., Foley, Ala.; effective 6-5-56 to 6-4-57.

Knitted Wear Industry Learner Regulations (29 CFR 522.30 to 522.35, as amended March 1, 1956, 21 F. R. 581).

Carolina Corp., Jefferson, S. C.; effective 6-4-56 to 12-3-56; 15 learners for plant expansion purposes (knitted cotton cloth).

Mifflin Knitting Mills, Inc., Fifth and Race Streets, Mifflinville, Pa.; effective 5-31-56 to 11-30-56; 40 learners for plant expansion purposes (sweaters). (Including additional occupations for hand sewing and crocheting for a maximum of 320 hours.)

Mifflin Knitting Mills, Inc., Fifth and Race Streets, Mifflinville, Pa.; effective 5-31-56 to 4-15-57; 5 percent of factory production workers for normal labor turnover purposes, including additional occupations for hand sewing and crocheting for a maximum of 320 hours (sweaters) (replacement certificate).

J. H. Rohrer Textile Co., Inc., New Ringgold, Pa.; effective 6-5-56 to 6-4-57; 5 learners for normal labor turnover purposes (men's and women's cotton knit underwear).

Regulations applicable to the Employment of Learners (29 CFR 522.1 to 522.12,

as amended February 28, 1955, 20 F. R. 645).

The following learner certificates were issued for normal labor turnover purposes, except as otherwise indicated, to the companies listed below manufacturing miscellaneous products. The effective and expiration dates, learner rates, occupations, learning periods, and the number or proportion of learners authorized to be employed, are as follows:

Cameron & Co., Inc., 2321 Oak Street, Napa, Calif.; effective 5–28–56 to 11–27–56; not less than 85 cents per hour for the first 280 hours and 90 cents per hour for the remaining 200 hours of the 480-hour learning period, for the occupations of sewing machine operating, final pressing, hand sewing, and finishing operations involving hand sewing; authorizing the employment of 5 learners (sport coats) (replacement certificate).

Cherubino Patti & Co., Inc., 23–25 North Arkansas Avenue, Atlantic City, N. J.; effective 6–5–56 to 12–4–56; not less than 85 cents per hour for the first 280 hours and 90 cents per hour for the remaining 200 hours of the 480-hour learning period, for the occupation of hand sewing; authorizing the employment of five percent of factory production workers (men's coats).

Collins of Texas, Medina, Tex.; effective 6–4–56 to 12–3–56; not less than 85 cents per hour for a maximum of 160 hours, for the occupations of machine stitching, die and clicker machine operating, hand cutting, pocketbook makers' helper, assembly and finishing; authorizing the employment of 2 learners (handbags and belts).

Danville Chenille Co., South Danville, N. H.; effective 6–4–56 to 12–3–56; not less than 85 cents per hour for a maximum of 240 hours for the occupation of chenille machine operator; authorizing the employment of 2 learners (chenille).

A. Di Paola & Co., Inc., Fifth and Nickle Streets, Camden, N. J.; effective 6–6–56 to 12–5–56; not less than 85 cents per hour for the first 280 hours and 90 cents per hour for the remaining 200 hours of the 480-hour learning period, for the occupation of hand sewing; authorizing the employment of 20 learners for plant expansion purposes (men's coats and uniforms).

Harrisburg Manufacturing Co., 43 South Main Street, Harrisburg, Ill.; effective 6–4–56 to 12–3–56; not less than 85 cents per hour for a maximum of 240 hours, for the occupation of sewing machine operator; authorizing the employment of five percent of factory production workers (caps).

Ramseur Furniture Co., Ramseur, N. C.; effective 6–4–56 to 12–3–56; not less than 80 cents per hour for the first 160 hours and 85 cents per hour for the remaining 160 hours of the 320-hour learning period, for the occupations of case good assembling, skilled; finishers; inspectors; belt sanders; sawyers, skilled; shaper operator; sprayer; woodworking machine operator; assemblers, semiskilled; rough stock gluers; polishers and rubbers; sanders (except belt sanders); rip sawyers; stainers, and hand fillers; authorizing the employment of ten percent of factory production workers (furniture).

The following special learner certificates were issued in Puerto Rico to the companies hereinafter named. The effective and expiration dates, learner rates, occupations, learning periods, and the number or proportion of learners authorized to be employed are as indicated:

Airflex, Inc., Carr. Militar K11, H 7, Bayamon, P. R.; effective 5–28–56 to 11–27–56; not less than 50 cents per hour for a maximum of 160 hours, for the occupation of assembly operations; authorizing the employment of 8 learners for plant expansion purposes (metal expansion watch bands).

Fajardo Knitting Mills, Inc., Igualdad Street, Fajardo, P. R.; effective 5–21–56 to 11–20–56; not less than 38 cents per hour for the first 240 hours and 44 cents per hour for the remaining 240 hours of the 480-hour learning period, for the occupations of knitting, and finishing operations involving hand sewing; authorizing the employment of 20 learners for plant expansion purposes (sweaters).

The following special learner certificate was issued in the Virgin Islands to the company hereinafter named. The effective and expiration dates, learner rates, occupations, learning periods, and the number or proportion of learners authorized to be employed, are as indicated:

Virgin Islands Art Flowers, Inc., 9–10 Curacao Gade, St. Thomas, V. I.; effective 6–4–56 to 8–19–56; not less than 38 cents per hour for a maximum of 160 hours for the manufacture by hand of artificial flowers, except cutting, pressing and packing; authorizing the employment of 25 learners for plant expansion purposes (artificial flowers).

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be cancelled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of the regulations, Part 522.

Signed at Washington, D. C., this 12th day of June 1956.

## FEDERAL POWER COMMISSION

[Docket Nos. G–10000, G–10005]

TRANSCONTINENTAL GAS PIPE LINE CORP. AND TRANS-CAROLINA PIPELINE CORP.

ORDER OF CONSOLIDATION AND FIXING DATE OF HEARING

Public hearings in the proceeding in Docket No. G–10000 commenced on June 6, 1956, and are currently in progress. That proceeding involves an application by Transcontinental Gas Pipe Line Corporation (Transco) for a certificate of public convenience and necessity authorizing the enlargement of Transco's facilities (1) to provide additional service to certain of its existing customers and (2) to provide initial natural-gas service principally in the Tidewater area of eastern North and South Carolinas. Transco proposes to make such initial service available at its main line, and the volume of 40,000 Mcf per day to be so made available is sought by three interveners in the proceeding in Docket No. G–10000, two of which, Carolina Pipeline Company and North Carolina Natural Gas Company, propose intrastate systems, and the third of which, Trans-Carolina Pipeline Corporation (Trans-Carolina), proposes an interstate system for which certificate authorization is sought in Docket No. G–10005.

Due notice of the filing of the application in Docket No. G–10005 has been given, including publication in the FEDERAL REGISTER on May 24, 1956 (21 F. R. 3466). Pursuant to such notice, the time for filing protests and petitions to intervene expired on June 8, 1956, subsequent to the commencement of hearings in Docket No. G–10000. An order granting numerous petitions to intervene in Docket No. G–10005 is being issued simultaneously herewith. All such petitions were filed by persons who are also interveners in the proceeding in Docket No. G–10000, with the exception of Atlantic Coastline Railway Company who filed a petition to intervene on June 8, 1956, and is not a party to the proceedings in Docket No. G–10000.

The Commission finds:

(1) The applications in Docket Nos. G–10000 and G–10005 are interrelated and should be consolidated for hearing.

(2) Good cause exists and it is necessary, appropriate and in the public interest that hearing in the consolidated proceedings in Docket Nos. G–10000 and G–10005 proceed without further notice of any nature and not await due publication of this order in the FEDERAL REGISTER: *Provided, however*, That such immediate hearing shall be without prejudice to any person permitted to intervene in Docket No. G–10005 to recall any witness for cross-examination whose testimony may relate to a matter with respect to which such person has asserted a right and interest and has been permitted to participate with respect thereto.

The Commission orders:

(A) The aforesaid proceedings in Docket Nos. G–10000 and G–10005 be and the same hereby are consolidated for purposes of hearing.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, hearing on the consolidated proceedings in Docket Nos. G–10000 and G–10005 proceed forthwith without further notice of any nature and prior to publication of this order in the FEDERAL REGISTER.

Issued: June 19, 1956.

By the Commission.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[Docket No. G–10615]

BRITISH-AMERICAN OIL PRODUCING CO.

ORDER INSTITUTING INVESTIGATION

British-American Oil Producing Company (Respondent) is an independent producer of natural gas and a "natural-gas company" within the meaning of the Natural Gas Act, being engaged in the sale and delivery of natural gas in interstate commerce for resale for ultimate public consumption.

Respondent is one of several independent producers under contract to supply natural gas to the American Louisiana Pipe Line Company (American Louisiana). The latter's interstate natural gas pipeline project was authorized by the Commission by order issued October 1, 1954, accompanying Opinion No. 276, In the Matters of American Louisiana Pipe Line Company, et al. Certificates of public convenience and necessity covering the projected sales to American Louisiana were issued to Respondent and others by order issued May 9, 1955, in Docket Nos. G–6067, et al. Respondent's FPC Gas Rate Schedule No. 17 covers its sales to American Louisiana in question, and specifies a price of 19.25 cents per Mcf, with estimated annual revenues amounting to approximately $693,000 a year. This price is among the highest known to the Commission.

In addition to the sales of natural gas hereinbefore specifically referred to, it appears from the Commission's files that the Respondent is also engaged in making other sales of natural gas in interstate commerce, subject to the jurisdiction of the Commission.

It further appears that, upon the basis of data available to the Commission, the rates, charges, and classifications for or in connection with the sale or transportation of natural gas by Respondent herein, subject to the jurisdiction of the Commission, and the rules, regulations, practices, and contracts relating thereto may be unjust, unreasonable, unduly discriminatory, or preferential.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that an investigation be instituted by the Commission, upon its own motion, into and concerning all rates, charges or classifications demanded, observed, charged or collected by the Respondent in connection with any transportation or sale of natural gas, subject to the jurisdiction of the Commission, and any rules, regulations, practices or contracts affecting such rates, charges or classifications.

The Commission orders:

(A) An investigation of Respondent, British-American Oil Producing Company, be and is hereby instituted under the provisions of the Natural Gas Act for the purpose of enabling the Commission to determine whether, with respect to any transportation or sale of natural gas, subject to the jurisdiction of the Commission, made or proposed to be made by Respondent, any of the rates, charges, or classifications demanded, observed, charged, or collected, or any rules, regulations, practices or contracts affecting such rates, charges or classifications are unjust, unreasonable, unduly discriminatory or preferential.

(B) If the Commission, after a hearing has been had, shall find with respect to Respondent, that any of its rates, charges, classifications, rules, regulations, practices, or contracts, subject to the jurisdiction of the Commission, are unjust, unreasonable, unduly discriminatory, or preferential, the Commission shall thereupon determine and fix by order or orders just and reasonable rates, charges, classifications, rules, regulations, practices or contracts to be thereafter observed and in force.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Natural Gas Act, particularly sections 5, 14, 15 and 16 thereof, and the Commission's rules of practice and procedure, a public hearing be held upon a date to be fixed by further order of the Commission concerning the matters specified in paragraphs (A) and (B) above.

(D) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Issued: June 19, 1956.

By the Commission.

[Docket No. G–10616]

KERR-MCGEE OIL INDUSTRIES, INC.

ORDER INSTITUTING INVESTIGATION

Kerr-McGee Oil Industries Inc. (Respondent) is an independent producer of

natural gas and a "natural-gas company" within the meaning of the Natural Gas Act, being engaged in the sale and delivery of natural gas in interstate commerce for resale for ultimate public consumption.

Respondent is one of several independent producers under contract to supply natural gas to the American Louisiana Pipe Line Company (American Louisiana). The latter's interstate natural gas pipeline project was authorized by the Commission by order issued October 1, 1954, accompanying Opinion No. 276, In the Matters of American Louisiana Pipe Line Company, et al. Certificates of public convenience and necessity covering the projected sales to American Louisiana were issued to Respondent and others by order issued May 9, 1955, in Docket Nos. G–6067, et al. Respondent's FPC Gas Rate Schedule No. 27 covers its sales to American Louisiana in question, and specifies a price of 19.25 cents per Mcf. with estimated annual revenues amounting to approximately $123,000 a year. This price is among the highest known to the Commission.

In addition to the sales of natural gas hereinbefore specifically referred to, it appears from the Commission's files that the Respondent is also engaged in making other sales of natural gas in interstate commerce, subject to the jurisdiction of the Commission.

It further appears that, upon the basis of data available to the Commission, the rates, charges, and classifications for or in connection with the sale or transportation of natural gas by Respondent herein, subject to the jurisdiction of the Commission, and the rules, regulations, practices, and contracts relating thereto may be unjust, unreasonable, unduly discriminatory, or preferential.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that an investigation be instituted by the Commission, upon its own motion, into and concerning all rates, charges or classifications demanded, observed, charged or collected by the Respondent in connection with any transportation or sale of natural gas, subject to the jurisdiction of the Commission, and any rules, regulations, practices or contracts affecting such rates, charges or classifications.

The Commission orders:

(A) An investigation of Respondent, Kerr-McGee Oil Industries, Inc., be and is hereby instituted under the provisions of the Natural Gas Act for the purpose of enabling the Commission to determine whether, with respect to any transportation or sale of natural gas, subject to the jurisdiction of the Commission, made or proposed to be made by Respondent, any of the rates, charges or classifications demanded, observed, charged, or collected, or any rules, regulations, practices or contracts affecting such rates, charges or classifications are unjust, unreasonable, unduly discriminatory or preferential.

(B) If the Commission, after a hearing has been had, shall find with respect to Respondent, that any of its rates, charges, classifications, rules, regulations, practices, or contracts, subject to the jurisdiction of the Commission, are unjust, unreasonable, unduly discriminatory, or preferential, the Commission shall thereupon determine and fix by order or orders just and reasonable rates, charges, classifications, rules, regulations, practices or contracts to be thereafter observed and in force.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Natural Gas Act, particularly sections 5, 14, 15 and 16 thereof, and the Commission's rules of practice and procedure, a public hearing be held upon a date to be fixed by further order of the Commission concerning the matters specified in paragraphs (A) and (B) above.

(D) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 f)) of the Commission's rules of practice and procedure.

Issued: June 19, 1956.

By the Commission.

## GENERAL SERVICES ADMINISTRATION

[Project 3–DC–01]

FEDERAL OFFICE BUILDINGS

PROSPECTUS FOR PROPOSED BUILDINGS IN SOUTHWEST REDEVELOPMENT AREA OF DISTRICT OF COLUMBIA

EDITORIAL NOTE: This prospectus of proposed Project Number 3–DC–01 is published pursuant to section 412 (f) of the Public Buildings Purchase Contract Act of 1954 as amended by Public Law 150, 84th Congress, which requires publication in the FEDERAL REGISTER, for a period of ten consecutive days from date of submission to the Committees on Public Works of the Senate and House of Representatives.

Project Number 3–DC–01 (Revised)

MARCH 14, 1956.

FORMAL PROSPECTUS FOR PROPOSED BUILDING UNDER TITLE I PUBLIC LAW 519, 83D CONGRESS, 2D SESSION

FEDERAL OFFICE BUILDING, WASHINGTON, D. C.

1. *Brief description of proposed building.* The project contemplates the erection of a group of three Federal Office Buildings on a site to be acquired by the Government facing on the proposed Tenth Street Mall in the southwest redevelopment area of Washington, D. C. Each building will be multistoried. An aggregate of approximately 643,000 square feet of net assignable space will be provided.

2. *Estimated maximum cost and financing.*
a. Maximum cost of site and buildings, $25,250,000.
b. Proposed contract term, 30 years.
c. Maximum rate of interest on purchase contract, 4 percent.

3. *Certificates of need.* As the project is intended to provide relocation of numerous Federal agencies now in temporary buildings, no specific allocation of space can be made at this time. Upon completion of the facility, assignment and reassignment will be made in accordance with existing law. Therefore, requirement for Certificate of Need otherwise required by section 411 (e) of the Public Buildings Purchase Contract Act of 1954 was waived in Public Law 150, 84th Congress. Certification is hereby made as to the need for service and garage space.

4. *Non-availability of existing space.* Suitable space owned by the Government is not available; and suitable rental space is not available at a price commensurate with that to be afforded through the contract proposed.

5. *Estimated annual managerial, custodial, heat, and utility costs.* (Services to be supplied by Government), $675,000.

6. *Estimated annual tax liability, upkeep and maintenance.* a. Taxes, post construction (contract period), $321,625.
b. Upkeep and maintenance (to be provided by Government), $96,000.

7. *Current annual housing costs.* Rents and other housing costs currently paid by the Government for agencies to be housed in the building to be erected, $509,000 p. a.

*Determination of need.* It has been determined that (1) the needs for space for the permanent activities of the Federal Government in this particular area cannot be satisfied by utilization of any existing suitable property now owned by the Government, and (2) the best interests of the United States will be served by taking action hereunder.

Submitted at Washington, D. C., on June 1, 1956.

Approved:

FRANKLIN G. FLOETE, *Administrator of General Services.*

8. *Statement of Director, Bureau of the Budget.* Reflected in letter (copy attached).

EXECUTIVE OFFICE OF THE PRESIDENT
BUREAU OF THE BUDGET
WASHINGTON 25, D. C.

JUNE 13, 1956.

Project 3–DC–01 (Revised 3–14–56).
3 Multi-storied Federal Office Buildings.
Southwest Redevelopment Area, Washington, D. C.

MY DEAR MR. FLOETE: Pursuant to section 411 (e) (8) of the Public Buildings Purchase Contract Act of 1954 (Public Law 519), the (Revised March 14, 1956) proposal for a group of three Federal Office Buildings, transmitted with your letter of June 1, 1956, has been examined and in my opinion "is necessary and in conformity with the policy of the President." This approval is given with the following understanding:

1. Revision reflects the application of more definite plans for integration of the facility with the proposed Tenth Street Mall developed subsequent to approval of the project last July. Effective integration requires construction of three building units in lieu of one, as originally proposed. Garage space of 134,250 square feet not contemplated in original project is provided. Number of employees, utilization of space and cost factors are relatively the same.

2. That the stated project cost of $25,250,000 (including $2,500,000 for a site to be acquired) is a maximum figure.

3. That the reported annual operating cost of existing Tempos 4, 5, and T; i. e., $1.00 per square foot, represents minimum maintenance in anticipation of demolition, and that temporary Government buildings actually cost more to maintain than the proposed new buildings.

4. That the proposed buildings will house approximately 10% of Federal employees presently housed in temporary buildings, and that the specific allocation of agencies in the proposed buildings is to be determined later by General Services Administration.

5. That every effort will be made to design and construct space conducive to maximum efficient utilization of both site and buildings and to take advantage of any revision of cost downward which may be found possible as the plans develop and negotiations are advanced.

6. That this approval supersedes Mr. Hughes' letter of July 22, 1955.

You appreciate, of course, that this project will receive a more detailed review as to cost and space utilization prior to the approval of the lease-purchase agreement.

Sincerely yours,

(Signed) PERCIVAL BRUNDAGE, *Director.*

Hon. FRANKLIN G. FLOETE,

## FOREIGN CLAIMS SETTLEMENT COMMISSION OF THE UNITED STATES

BULGARIAN, HUNGARIAN, ITALIAN, AND RUMANIAN CLAIM FUNDS

NOTICE OF HEARING

Notice is hereby given that the Foreign Claims Settlement Commission of the United States will conduct an open hearing at the Tariff Building, 8th and E Streets, N. W., Washington, D. C., at 10:00 a. m., July 25, 1956, upon the following matters having general application to all claims against the Bulgarian, Hungarian, Italian and Rumanian Claims Funds:

(1) The currency of the respective governments which should be used in appraising the value of property which is the subject of claims under section 303 (1) and (2) of Public Law 285 (22 U. S. C. 1631 (g)), amending the International Claims Settlement Act of 1949.

(2) The formulae for converting such currency of the respective governments to dollars of the Government of the United States as of the time of the issuance of awards authorized under section 303 of the above public law.

Dated: June 21, 1956.

By the Commission.

ANDREW T. MCGUIRE, *General Counsel.*

## SECURITIES AND EXCHANGE COMMISSION

[24 W–1745]

RIBBON COPIES CORP. OF AMERICA

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

JUNE 12, 1956.

I. Ribbon Copies Corporation of America, 1411 Pennsylvania Avenue NW., Washington, D. C., having filed with the Commission on February 9, 1955, a notification on Form 1–A and an offering circular, and having subsequently filed amendments thereto, relating to a proposed offering of 250,000 shares of 5¢ par common stock at $1 per share, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder; and

II. The Commission having reasonable cause to believe:

A. That the terms and conditions of Regulation A have not been complied with in respect of such notification and offering circular, in that:

1. The offering circular fails to disclose the name and address of the principal underwriter of the securities, as required by Rule 219 (c) (4);

2. Certain of the issuer's shares were sold without the use of an offering circular required by Rule 219 (a); and

3. The aggregate offering price of the securities offered exceeds the $300,000 limitation prescribed by Rule 217 (a).

B. The offering circular omits to state material facts necessary in order to make the statements made, in light of the circumstances under which they are made, not misleading, particularly with respect to the following:

1. The issuer sold certain of the shares offered thereunder at a price less than the offering price stated therein;

2. Certain of the issuer's shares offered thereunder were sold by the underwriter at prices in excess of the stated public offering price; and

3. The issuer granted options for the purchase of an aggregate of 23,000 shares at $1 per share to an undisclosed underwriter.

C. That the offering would and did operate as a fraud and deceit upon the purchasers of such securities.

III. *It is ordered,* Pursuant to Rule 223 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place for said hearing will be promptly given by the Commission.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 56–4745; Filed, June 22, 1956; 8:45 a. m.]

[File No. 812–1001]

STANDARD PROPERTIES, INC.

NOTICE OF APPLICATION FOR ORDER DECLARING THAT COMPANY IS NOT AN INVESTMENT COMPANY

JUNE 19, 1956.

Notice is hereby given that Standard Properties, Inc. ("Applicant") has filed an application pursuant to section 3 (b) (2) of the Investment Company Act of 1940 ("act") for an order declaring it to be primarily engaged, through a controlled company, in a business other than that of investing, reinvesting, owning, holding, or trading in securities.

On April 28, 1943, the Commission granted an application for exemption from all provisions of the act filed by Bessemer Securities Company ("Bessemer") pursuant to section 3 (b) (2) of the act upon the basis of a finding that Bessemer was primarily engaged in a business other than that of investing, reinvesting, owning, holding or trading in securities. Bessemer then held, among other assets, 29 percent of the voting stocks of Duquesne Slag Products Company ("Duquesne"), a company engaged in the manufacture of crushed blast furnace slag products. At that time Bessemer was a subsidiary of Standard Slag Company, a company then and now engaged, through controlled subsidiaries, in the cement and slag business and which then held directly 13.2 percent of the stock of Duquesne.

During 1955 Bessemer transferred to Applicant all of its holdings in Duquesne in exchange for all of Applicant's outstanding stock and thereafter Bessemer was liquidated and dissolved. The stock Applicant holds of Duquesne is its only asset. At the present time Applicant holds 34.14 percent and Standard Slag Company holds 15.6 percent (an aggregate of 50 percent) of Duquesne's outstanding stock.

The application recites that the control of Duquesne (by Standard Slag Company) remains the same as when the Commission granted an exemption to Bessemer in 1943, except that the present Applicant has been substituted for Bessemer in the chain of control. It is stated (1) the officers and directors of Applicant actively participate in the operation and management of Duquesne, (2) such participation is primarily for the benefit of Standard Slag, (3) Applicant has no employees and its activities (which are limited to the control and management of Duquesne) are carried out by employees or officers of Standard Slag and are paid for by that company, and (4) the officers of Applicant are paid no compensation.

Section 3 (b) (2) of the act, among other things, excerpts from the definition of an investment company contained in section 3 (a) (3), any issuer which the Commission finds and by order declares to be primarily engaged in a business other than that of investing, reinvesting, owning, holding, or trading in securities, either directly or through controlled companies conducting similar types of businesses.

Notice is further given that any interested person may, not later than July 12, 1956, at 5:30 p. m., submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon.

Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the rules and regulations promulgated under the act.

It appearing to the Commission that it would be appropriate to extend the period of exemption from the act accorded to Standard Properties, Inc. as a result of the filing of the instant application pursuant to section 3 (b) (2) of the act until the disposition of such application.

*It is ordered,* That the period of exemption provided Standard Properties, Inc. under section 3 (b) (2) of the act be extended until the disposition by the Commission of the application herein of Standard Properties, Inc.

By the Commssion.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 56-4956; Filed, June 22, 1956; 8:47 a. m.]

## INTERSTATE COMMERCE COMMISSION

FOURTH SECTION APPLICATIONS FOR RELIEF

JUNE 20, 1956.

Protest to the granting of an application must be prepared in accordance with Rule 40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA No. 32240: *Bottle caps—Leeds, Ala., to Southern Territory.* Filed by O. W. South, Jr., Agent, for interested rail carriers. Rates on bottle caps, carloads from Leeds, Ala., to specified points in Georgia, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee.

Grounds for relief: Circuitous routes.

Tariff: Supplement 155 to Agent Spaninger's I. C. C. 1295.

## DEPARTMENT OF JUSTICE

### Office of Alien Property

[Vesting Order SA-61]

REPLACEMENT INSURANCE OFFICE PRIV. CO. LTD.

In re: Debt owing to Replacement Insurance Office Priv. Co. Ltd., Budapest, Hungary; F-34-1112.

Under the authority of Title II of the International Claims Settlement Act of 1949, as amended (69 Stat. 562), Executive Order 10644, November 7, 1955 (20 F. R. 8363), Department of Justice Order No. 106-55, November 23, 1955 (20 F. R. 8993), and pursuant to law, after investigation, it is hereby found and determined:

1. That the property described as follows: That certain debt or other obligation of Guaranty Trust Company, 140 Broadway, New York 15, N. Y., arising out of a deposit account entitled "Replacement Insurance Office Priv. Co. Ltd., % Mr. Joseph Reitmann, Semmelweis Ucca 14, Budapest IV, Hungary", maintained by the aforesaid bank, together with any and all rights to demand, enforce and collect the same,

is property within the United States which was blocked in accordance with Executive Order 8389, as amended, and remained blocked on August 9, 1955, and which is, and as of September 15, 1947, was, owned directly or indirectly by Replacement Insurance Office Priv. Co. Ltd., Budapest, Hungary, a national of Hungary as defined in said Executive Order 8389, as amended.

2. That the property described herein is not owned directly by a natural person.

There is hereby vested in the Attorney General of the United States the property described above, to be administered, sold, or otherwise liquidated, in accordance with the provisions of Title II of the International Claims Settlement Act of 1949, as amended.

It is hereby required that the property described above be paid, conveyed, transferred, assigned and delivered to or for the account of the Attorney General of the United States in accordance with directions and instructions issued by or for the Assistant Attorney General, Director, Office of Alien Property, Department of Justice.

The foregoing requirement and any supplement thereto shall be deemed instructions or directions issued under Title II of the International Claims Settlement Act of 1949, as amended. Attention is directed to Section 205 of said Title II (69 Stat. 562) which provides that:

Any payment, conveyance, transfer, assignment, or delivery of property made to the President or his designee pursuant to this title, or any rule, regulation, instruction, or direction issued under this title, shall to the extent thereof be a full acquittance and discharge for all purposes of the obligation of the person making the same; and no person shall be held liable in any court for or in respect of any such payment, conveyance, transfer, assignment, or delivery made in good faith in pursuance of and in reliance on the provisions of this title, or of any rule, regulation, instruction, or direction issued thereunder.

Executed at Washington, D. C., on June 19, 1956.

For the Attorney General.

[SEAL] DALLAS S. TOWNSEND, *Assistant Attorney General, Director, Office of Alien Property.*

[Vesting Order SA-62]

GOVERNMENT OF HUNGARY

In re: Debt owing to the Government of Hungary (Ungarische Staatliche Eisen, Stahl-und Maschinenfabriken); F 34-1687, F 62-501 (Stockholm), F 34-548.

Under the authority of Title II of the International Claims Settlement Act of 1949, as amended (69 Stat. 562), Executive Order 10644, November 7, 1955 (20 F. R. 8363), Department of Justice Order No. 106-55, November 23, 1955 (20 F. R. 8993), and pursuant to law, after investigation, it is hereby found and determined:

1. That the property described as follows: That certain debt or other obligation of The Chase Manhattan Bank of the City of New York, 18 Pine Street, New York, New York, in the amount of $660.64 as of March 14, 1956, being a portion of an account entitled "Aktiebolaget Svenska Handelsbanken, Stockholm, Sweden, 'Special Account U', General Ruling No. 6 Account", maintained by the aforesaid bank, together with any and all rights to demand, enforce and collect the same,

is property within the United States which was blocked in accordance with Executive Order 8389, as amended, and remained blocked on August 9, 1955, and which is, and as of September 15, 1947, was, owned directly or indirectly by Hungary, as defined in said Executive Order 8389, as amended.

2. That the property described herein is not owned directly by a natural person.

There is hereby vested in the Attorney General of the United States the property described above, to be administered, sold, or otherwise liquidated, in accordance with the provisions of Title II of the International Claims Settlement Act of 1949, as amended.

It is hereby required that the property described above be paid, conveyed, transferred, assigned and delivered to or for the account of the Attorney General of the United States in accordance with directions and instructions issued by or for the Assistant Attorney General, Director, Office of Alien Property, Department of Justice.

The foregoing requirement and any supplement thereto shall be deemed instructions or directions issued under Title II of the International Claims Settlement Act of 1949, as amended. Attention is directed to Section 205 of said Title II (69 Stat. 562) which provides that:

Any payment, conveyance, transfer, assignment, or delivery of property made to the President or his designee pursuant to this title, or any rule, regulation, instruction, or direction issued under this title, shall to the extent thereof be a full acquittance and discharge for all purposes of the obligation of the person making the same; and no person shall be held liable in any court for or in respect of any such payment, conveyance, transfer, assignment, or delivery made in good faith in pursuance of and in reliance on the provisions of this title, or of any rule, regulation, instruction, or direction issued thereunder.

Executed at Washington, D. C., on June 19, 1956.

For the Attorney General.

[SEAL] DALLAS S. TOWNSEND, *Assistant Attorney General, Director, Office of Alien Property.*

[Vesting Order SA-63]

BANQUE CREDIT BULGARE S. A.

In re Debts owing to Banque Credit Bulgare S. A.; F-11-39.

Under the authority of Title II of the International Claims Settlement Act of 1949, as amended (69 Stat. 562), Executive Order 10644, November 7, 1955 (20 F. R. 8363), Department of Justice Order No. 106-55, November 23, 1955 (20 F. R. 8993), and pursuant to law, after investigation, it is hereby found and determined:

1. That the property described as follows:

a. That certain debt or other obligation of the Irving Trust Company, 1 Wall Street, New York 15, New York, arising out of an account entitled, "Banque Credit Bulgare S. A., Sofia, Bulgaria," maintained at the aforesaid bank, together with any and all rights to demand, enforce and collect the same;

b. That certain debt or other obligation of the Irving Trust Company, 1 Wall Street, New York 15, New York, in the amount of $7,478.66, being a portion of funds on deposit in an account entitled, "Banque Nationale de Bulgarie, Administration Centrale, Direction des Sofia," maintained at the aforesaid bank, together with any and all rights to demand, enforce and collect the same;

is property within the United States which was blocked in accordance with Executive Order 8389, as amended, and remained blocked on August 9, 1955, and which is and as of September 15, 1947, was, owned directly or indirectly by Banque Credit Bulgare S. A., Sofia, Bulgaria, a national of Bulgaria as defined in said Executive Order 8389, as amended.

2. That the property described herein is not owned directly by a natural person.

There is hereby vested in the Attorney General of the United States the property described above, to be administered, sold, or otherwise liquidated, in accordance with the provisions of Title II of the International Claims Settlement Act of 1949, as amended.

It is hereby required that the property described above be paid, conveyed, transferred, assigned and delivered to or for the account of the Attorney General of the United States in accordance with directions and instructions issued by or for the Assistant Attorney General, Director, Office of Alien Property, Department of Justice.

The foregoing requirement and any supplement thereto shall be deemed instructions or directions issued under Title II of the International Claims Settlement Act of 1949, as amended. Attention is directed to section 205 of said Title II (69 Stat. 562) which provides that:

Any payment, conveyance, transfer, assignment, or delivery of property made to the President or his designee pursuant to this title, or any rule, regulation, instruction, or direction issued under this title, shall to the extent thereof be a full acquittance and discharge for all purposes of the obligation of the person making the same; and no person shall be held liable in any court for or in respect of any such payment, conveyance, transfer, assignment, or delivery made in good faith in pursuance of and in reliance on the provisions of this title, or of any rule, regulation, instruction, or direction issued thereunder.

Executed at Washington, D. C., on June 19, 1956.

For the Attorney General.

VOLUME 21 NUMBER 123

Washington, Tuesday, June 26, 1956

## TITLE 7—AGRICULTURE

### Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Plum Order 10]

PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.534 *Plum Order 10*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than June 27, 1956. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until June 19, 1956; recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on June 19, 1956; after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information was submitted to the Department; shipments of the current crop of such plums are expected to begin on or about July 1, 1956; this section should be applicable to all such shipments in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., June 27, 1956, and ending at 12:01 a. m., P. s. t., November 1, 1956, no shipper shall ship from any shipping point during any day any package or container of Gaviota plums unless such plums grade at least U. S. No. 1 and, except to the extent otherwise permitted under this paragraph,

(i) If the plums are packed in a standard basket they are of a size not smaller than a size that will pack a 4 x 4 standard pack;

(ii) If the plums are packed in a special plum box, they are of a size not smaller than a size that will pack a 6-row standard pack;

(iii) If the plums are packed in any container other than a standard basket or special plum box, ninety (90) percent, by count, of the plums measure $1\frac{12}{16}$ inches in diameter and of the remainder of the plums none measures less than $1\frac{9}{16}$ inches in diameter: *Provided*, That, no lot of plums shall be considered as failing to meet this requirement if one package of such plums contains not more than one (1) percent, by count, of plums that are smaller than $1\frac{9}{16}$ inches in diameter; and

(iv) The diameters of the smallest and largest plums in the package or container do not vary more than one-fourth inch: *Provided*, That a total of not more than five (5) percent, by count, of the plums in the package or container may fail to meet this requirement.

(2) During each day of the aforesaid period, any shipper may ship from any shipping point a quantity of such plums, by number of packages or containers, which are of a size smaller than the size prescribed in subparagraph (1) of this paragraph if said quantity does not exceed one hundred (100) percent of the number of the same type of packages or

containers of plums shipped by such shipper which meet the size requirement of said subparagraph (1) of this paragraph and all such smaller plums meet the applicable one of following requirements:

(i) If the plums are packed in a standard basket, they are of a size not smaller than a size that will pack a 4 x 5 standard pack;

(ii) If the plums are packed in a special plum box, they are of a size not smaller than a size that will pack a 7-row standard pack;

(iii) If the plums are packed in any container other than a standard basket or special plum box, ninety (90) percent, by count, of the plums measure $1\frac{10}{16}$ inches in diameter and of the remainder of the plums none measures less than $1\frac{7}{16}$ inches in diameter: *Provided*, That, no lot of plums shall be considered as failing to meet this requirement if one package of such plums contains not more than one (1) percent, by count, of plums that are smaller than $1\frac{7}{16}$ inches in diameter; and

(iv) The diameters of the smallest and largest plums in the package or container do not vary more than one-fourth inch: *Provided*, That, a total of not more than five (5) percent, by count, of the plums in the package or container may fail to meet this requirement.

(3) If any shipper, during any day of the aforesaid period, ships from any shipping point less than the maximum allowable quantity of such plums that may be of a size smaller than the size prescribed in subparagraph (1) of this paragraph, the quantity of such undershipment may be shipped by such shipper only from such shipping point during the next 2 succeeding calendar days but only after shipment has been made of any other quantities of such smaller-sized plums such shipper is authorized to ship on those 2 succeeding calendar days.

(4) As used in this section, "U. S. No. 1," "fairly uniform in size," "diameter," and "standard pack" shall have the same meaning as set forth in the revised United States Standards for plums and prunes (fresh) (§§ 51.1520 to 51.1530 of this title); "standard basket" shall mean the standard basket set forth in paragraph 1 of section 828.1 of the Agricultural Code of California; "special plum box" shall mean the special plum box set forth in section 828.15 of the Agricultural Code of California; "6-row standard pack" shall mean that the top layer of the pack contains 39 plums which are fairly uniform in size and the plums in the top layer are not superior in size to those in the remainder of the pack; "7-row standard pack" shall mean that the top layer of the pack contains 52 plums which are fairly uniform in size and the plums in the top layer are not superior in size to those in the remainder of the pack; and, except as otherwise specified, all other terms shall have the same meaning as when used in the amended marketing agreement and order.

(5) Section 936.143 sets forth the requirements with respect to the inspection and certification of shipments of fruit covered by this regulation. Such section also prescribes the conditions which must be met if any shipment is to be made without prior inspection and certification. Notwithstanding that shipments may be made without inspection and certification, each shipper shall comply with all grade and size regulations applicable to the respective shipment.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

[Plum Order 11]

## PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

### REGULATION BY GRADES AND SIZES

§ 936.535 *Plum Order 11*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than June 27, 1956. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until June 19, 1956; recommendation as to the need for, and the extent of regulation of shipments of such plums was made at the meeting of said committee on June 19, 1956, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information were submitted to the Department; shipments of the current crop of such plums are expected to begin on or about July 1, 1956; this section should be applicable to all such shipments in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., June 27, 1956, and ending at 12:01 a. m., P. s. t., November 1, 1956, no shipper shall ship any package or container of Duarte plums unless such plums grade at least U. S. No. 1; and

(i) If the plums are packed in a standard basket, they are of a size not smaller than a size that will pack a 4 x 5 standard pack;

(ii) If the plums are packed in a special plum box, they are of a size not smaller than a size that will pack a 7-row standard pack;

(iii) If the plums are packed in any container other than a standard basket or special plum box, ninety (90) percent, by count, of the plums measure $1\frac{10}{16}$ inches in diameter and of the remainder of the plums none measures less than $1\frac{7}{16}$ inches in diameter: *Provided*, That, no lot of plums shall be considered as failing to meet this requirement if one package of such plums contains not more than one (1) percent, by count, of plums that are smaller than $1\frac{7}{16}$ inches in diameter; and

(iv) The diameters of the smallest and largest plums in the package or container do not vary more than one-fourth inch: *Provided*, That, a total of not more than five (5) percent, by count, of the plums in the package or container may fail to meet this requirement.

(2) Section 936.143 sets forth the requirements with respect to the inspection and certification of shipments of fruit covered by this section. Such section

also prescribes the conditions which must be met if any shipment is to be made without prior inspection and certification. Notwithstanding that shipments may be made without inspection and certification, each shipper shall comply with all grade and size regulations applicable to the respective shipment.

(3) As used in this section, "U. S. No. 1," "fairly uniform in size," and "standard pack" shall have the same meaning as set forth in the revised United States Standards for plums and prunes (fresh) (§§ 51.1520 to 51.1530 of this title); "standard basket" shall mean the standard basket set forth in paragraph 1 of section 828.1 of the Agricultural Code of California; "special plum box" shall mean the special plum box set forth in section 828.15 of the Agricultural Code of California; "7-row standard pack" shall mean that the top layer of the pack contains 52 plums which are fairly uniform in size and the plums in the top layer are not superior in size to those in the remainder of the pack; "diameter" means the shortest distance measured through the center of a plum at a right angle to a line running from the stem to the blossom end; and, except as otherwise specified, all other terms shall have the same meaning as when used in the amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: June 21, 1956.

[Plum Order 12]

## PART 936—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

### REGULATION BY GRADES AND SIZES

§ 936.536 *Plum Order 12*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR Part 936), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of plums of the variety hereinafter set forth, and in the manner herein provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that, as hereinafter set forth, the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than June 27, 1956. A reasonable determination as to the supply of, and the demand for, such plums must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until June 19, 1956; recommendation as to the need for, and the extent of, regulation of shipments of such plums was made at the meeting of said committee on June 19, 1956, after consideration of all available information relative to the supply and demand conditions for such plums, at which time the recommendation and supporting information were submitted to the Department; shipments of the current crop of such plums are expected to begin on or about July 12, 1956; this section should be applicable to all such shipments in order to effectuate the declared policy of the act; and compliance with the provisions of this section will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., June 27, 1956, and ending at 12:01 a. m., P. s. t., November 1, 1956, no shipper shall ship from any shipping point during any day any package or container of Becky Smith plums unless such plums grade at least U. S. No. 1 and, except to the extent otherwise permitted under this paragraph,

(i) If the plums are packed in a standard basket, they are of a size not smaller than a size that will pack a 4 x 4 standard pack;

(ii) If the plums are packed in a special plum box, they are of a size not smaller than a size that will pack a 6-row standard pack;

(iii) If the plums are packed in any container other than a standard basket or special plum box, ninety (90) percent, by count, of the plums measure $1^{12}/_{16}$ inches in diameter and of the remainder of the plums none measures less than $1^{9}/_{16}$ inches in diameter: *Provided,* That, no lot of plums shall be considered as failing to meet this requirement if one package of such plums contains not more than one (1) percent, by count, of plums that are smaller than $1^{9}/_{16}$ inches in diameter; and

(iv) The diameters of the smallest and largest plums in the package or container do not vary more than one-fourth inch: *Provided,* That a total of not more than five (5) percent, by count, of the plums in the package or container may fail to meet this requirement.

(2) During each day of the aforesaid period, any shipper may ship from any shipping point a quantity of such plums, by number of packages or containers, which are of a size smaller than the size prescribed in subparagraph (1) of this paragraph if said quantity does not exceed eleven and eleven one-hundredth ($11^{11}/_{100}$) percent of the number of the same type of packages or containers of plums shipped by such shipper which meet the size requirement of said subparagraph (1) of this paragraph and all such smaller plums meet the applicable one of the following requirements:

(i) If the plums are packed in a standard basket, they are of a size not smaller than a size that will pack a 4 x 5 standard pack;

(ii) If the plums are packed in a special plum box, they are of a size not smaller than a size that will pack a 7-row standard pack;

(iii) If the plums are packed in any container other than a standard basket or special plum box, ninety (90) percent, by count, of the plums measure $1^{9}/_{16}$ inches in diameter and of the remainder of the plums none measures less than $1^{7}/_{16}$ inches in diameter: *Provided,* That, no lot of plums shall be considered as failing to meet this requirement if one package of such plums contains not more than one (1) percent, by count, of plums that are smaller than $1^{7}/_{16}$ inches in diameter; and

(iv) The diameters of the smallest and largest plums in the package or container do not vary more than one-fourth inch: *Provided,* That, a total of not more than five (5) percent, by count, of the plums in the package or container may fail to meet this requirement.

(3) If any shipper, during any day of the aforesaid period, ships from any shipping point less than the maximum allowable quantity of such plums that may be of a size smaller than the size prescribed in subparagraph (1) of this paragraph, the quantity of such undershipment may be shipped by such shipper only from such shipping point during the next 2 succeeding calendar days but only after shipment has been made of any other quantities of such smaller-sized plums such shipper is authorized to ship on those 2 succeeding calendar days.

(4) As used in this section, "U. S. No. 1," "fairly uniform in size," "diameter," and "standard pack" shall have the same meaning as set forth in the revised United States Standards for plums and prunes (fresh) (§§ 51.1520 to 51.1530 of this title); "standard basket" shall mean the standard basket set forth in paragraph 1 of section 828.1 of the Agricultural Code of California; "special plum box" shall mean the special plum box set forth in section 828.15 of the Agricultural Code of California; "6-row standard pack" shall mean that the top layer of the pack contains 39 plums which are fairly uniform in size and the plums in the top layer are not superior in size to those in the remainder of the pack; "7-row standard pack" shall mean that the top layer of the pack contains 52 plums which are fairly uniform in size and the plums in the top layer are not superior in size to those in the remainder of the pack; and, except as otherwise specified, all other terms shall have the same meaning as when used in the amended marketing agreement and order.

(5) Section 936.143 sets forth the requirements with respect to the inspection and certification of shipments of fruit covered by this section. Such section also prescribes the conditions which must be met if any shipment is to be made without prior inspection and certification. Notwithstanding that shipments may be made without inspection and certification, each shipper shall comply with all grade and size regulations applicable to the respective shipment.

# TITLE 6—AGRICULTURAL CREDIT

## Chapter III—Farmers Home Administration, Department of Agriculture

### Subchapter B—Farm Ownership Loans

[FHA Instruction 401.2]

### PART 311—BASIC REGULATIONS

### SUBPART B—LOAN LIMITATIONS

### AVERAGE VALUES OF FARMS; VIRGINIA

On May 29, 1956, for the purposes of title I of the Bankhead-Jones Farm Tenant Act, as amended, average values of efficient family-type farm-management units for the counties identified below were determined to be as herein set forth. The average values heretofore established for said counties, which appear in the tabulations of average values under § 311.29, Chapter III, Title 6 of the Code of Federal Regulations, are hereby superseded by the average values set forth below for said counties.

VIRGINIA

| County: | Average value |
|---|---|
| Buchanan | $18,000 |
| Dickenson | 18,000 |
| Scott | 20,000 |
| Wise | 20,000 |

(Sec. 41 (1), 50 Stat. 528, as amended; 7 U. S. C. 1015 (i))

Dated: June 20, 1956.

[SEAL] H. C. SMITH,
*Acting Administrator, Farmers Home Administration.*

[1956 C. C. C. Flaxseed Bulletin 1, Amdt. 1]

### PART 421 GRAINS AND RELATED COMMODITIES

### SUBPART 1956 TEXAS FLAXSEED PURCHASE PROGRAM

### BASIC PURCHASE PRICES

*Correction*

In F. R. Doc. 56-4829, appearing at page 4313 of the issue for Wednesday, June 20, 1956, the following changes should be made in the table of basic purchase rates:

1. The county name "Forio" should read "Frio", and the county name "Haverick" should read "Maverick".

2. The basic purchase rate for San Patricio County should read $2.96, instead of $3.96.

---

## Chapter IV—Commodity Stabilization Service and Commodity Credit Corporation, Department of Agriculture

### Subchapter B—Loans, Purchases, and Other Operations

[1956 C. C. C. Grain Price Support Bulletin 1, Supp. 1, Flaxseed]

### PART 421—GRAINS AND RELATED COMMODITIES

### SUBPART—1956-CROP FLAXSEED LOAN AND PURCHASE AGREEMENT PROGRAM

*Correction*

In F. R. Doc. 56-4760, appearing at page 4265 of the issue for Tuesday, June 19, 1956, the following changes should be made:

1. The fourth line of table under § 421.2083 (a) should read:

| | |
|---|---|
| Duluth, Minneapolis, and St. Paul, Minn. | 3.39 |

2. The word "county" in the fourth line of § 421.2083 (c) (1) should read "country."

# TITLE 15—COMMERCE AND FOREIGN TRADE

## Chapter II—National Bureau of Standards, Department of Commerce

### Subchapter B—Standard Samples

### PART 230—STANDARD SAMPLES AND REFERENCE STANDARDS ISSUED BY NATIONAL BUREAU OF STANDARDS

### SUBPART B—STANDARD SAMPLES WITH SCHEDULE OF WEIGHTS AND FEES

### DESCRIPTIVE LIST; MISCELLANEOUS AMENDMENT

In accordance with the provisions of section 4 (a) and (c) of the Administrative Procedure Act, it has been found that notice and hearing on these schedules of fees are unnecessary for the reason that such procedures, because of the nature of these rules, serve no useful purpose. These schedules are effective from June 22, 1956.

Section 230.11 *Descriptive list,* is amended as follows:

1. Paragraph (r) *Radioactive standards* is amended by the addition of standard 4933 to read as follows:

RADIOACTIVE STANDARDS—ALPHA-BETA-GAMMA STANDARDS

| Sample No. | Radiation | Nuclide | Nominal activity | Volume | Price per sample |
|---|---|---|---|---|---|
| 4933 | $\beta(\gamma)$ | Potassium-42 [1] | $10^3$ dps/ml [2] | (h) | $20.00 |

(Sec. 9, 31 Stat. 1450, as amended; 15 U. S. C. 277. Interprets or applies sec. 8, 31 Stat. 1450, as amended; 15 U. S. C. 276)

A. V. ASTIN,
*Director, National Bureau of Standards.*

# TITLE 21—FOOD AND DRUGS

## Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

### Subchapter A—General

### PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

### PESTICIDE CHEMICALS; FURTHER EXTENDED DATES ON WHICH STATUTE SHALL BECOME FULLY EFFECTIVE

Requests have been received for further extensions of the date when the amendment to section 402 (a) of the Federal Food, Drug, and Cosmetic Act (68 Stat. 511 et seq.; 21 U. S. C. 342, 346a) shall become effective for certain pesticide chemicals.

One request is for extension to permit continued use of ethylene oxide as a fumigant for copra. The request is supported by the data outlined in the amendment of Statement of Policy § 3.44 *Pesticide chemicals; further extended dates on which statute shall become fully effective,* published in the FEDERAL REGISTER of February 21, 1956 (21 F. R. 1172) and by a showing that a petition can be submitted for tolerances for ethylene oxide residues in copra before July 22, 1956.

One request is for extension to permit the use of piperonyl butoxide and pyrethrins as an insect spray on harvested tomatoes at canneries. A petition has been submitted requesting that these pesticide chemicals be exempted from the requirement of a tolerance when used for this purpose.

Extension is necessary for residues of ethylene oxide on copra and of piperonyl butoxide and pyrethrins on harvested tomatoes.

Now, therefore, in exercise of the authority vested in the Secretary of Health, Education, and Welfare by the Federal Food, Drug, and Cosmetic Act (secs. 402 (a) (2), 408, 68 Stat. 511, 517 (Ch. 559, Secs. 2, 5); 21 U. S. C. 342 (a) (2) and note 1 under section 342; 346a) and delegated to the Commissioner of Food and Drugs by the Secretary (20 F. R. 1996), the following order is promulgated:

Section 3.44 *Pesticide chemicals; further extended dates on which statute shall become fully effective* (21 CFR, 1955 Edition, 3.44; as amended 21 F. R. 1463, 2327, 2591, 2861, 3218) is amended by inserting in paragraph (a) (6), after the item "Ethylene dichloride * * *" the item: "Ethylene oxide: In copra.", and by changing the explanatory state-

ments under the items "Piperonyl butoxide" and "Pyrethrins" to read: "On livestock as a fly spray; on stored raw agricultural commodities as follows: Almonds, beans, cocoa beans, copra, grain sorghum, peanuts, peas, walnuts; on harvested tomatoes."

(Sec. 701, 52 Stat. 1055. Interpret or apply secs. 402, 408, 68 Stat. 511, 517; 21 U. S. C. 342, 346a)

Dated: June 19, 1956.

[SEAL] GEO. P. LARRICK,
*Commissioner of Food and Drugs.*

[F. R. Doc. 56-4992; Filed, June 25, 1956; 8:45 a. m.]

### Subchapter B—Food and Food Products

PART 120—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

TOLERANCES FOR RESIDUES OF SODIUM O-PHENYLPHENATE

A petition was filed with the Food and Drug Administration requesting the establishment of tolerances for residues of sodium o-phenylphenate in or on apples and pears.

The Secretary of Agriculture has certified that this pesticide chemical is useful for the purposes for which tolerances are being established.

After consideration of the data submitted in the petition and other relevant material which show that the tolerances established in this order will protect the public health, and by virtue of the authority vested in the Secretary of Health, Education, and Welfare by the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (2), 68 Stat. 512; 21 U. S. C. 346a (d) (2)) and delegated to the Commissioner of Food and Drugs by the Secretary (21 CFR 120.7 (g)), the regulations for tolerances for pesticide chemicals in or on raw agricultural commodities (21 CFR Part 120; 21 F. R. 1172) are amended by changing § 120.129 to read as follows:

§ 120.129 *Tolerances for residues of sodium o-phenylphenate.* (a) A tolerance of 10 parts per million is established for residues of sodium o-phenylphenate, calculated as o-phenylphenol, in or on each of the following citrus fruits: Oranges, lemons, grapefruit, tangerines, limes, tangelos, citrus citron, kumquat.

(b) A tolerance of 5 parts per million is established for residues of sodium o-phenylphenate, calculated as o-phenylphenol, in or on apples and pears.

Any person who will be adversely affected by the foregoing order may at any time prior to the thirtieth day from the effective date thereof, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington 25, D. C., written objections thereto. Objections shall show wherein the person filing will be adversely affected by this order, specify with particularity the provisions of the order deemed objectionable and reasonable grounds for the objections, and request a public hearing upon the objections. Objections may be accompanied by a memorandum or brief in support thereof. All documents shall be filed in quintuplicate.

*Effective date.* This order shall be effective upon publication in the FEDERAL REGISTER.

(Sec. 701, 52 Stat. 1055, as amended; 21 U. S. C. 371. Interprets or applies sec. 408, 68 Stat. 511; 21 U. S. C. 346a)

Dated: June 19, 1956.

[SEAL] GEO. P. LARRICK,
*Commissioner of Food and Drugs.*

[F. R. Doc. 56-4991; Filed, June 25, 1956; 8:45 a. m.]

### Subchapter C—Drugs

PART 141a—PENICILLIN AND PENICILLIN-CONTAINING DRUGS—TESTS AND METHODS OF ASSAY

CRYSTALLINE PENICILLIN-STREPTOMYCIN-(OR DIHYDROSTREPTOMYCIN-) POLYMYXINOXYTETRACYCLINE-CARBOMYCIN POWDER VETERINARY

*Correction*

In F. R. Document 56-4861 appearing in the issue for Thursday, June 21, 1956, at page 4341, make the following change: In § 141a.90 (a) (3), line 9, the word "milligram" should read "milliliter".

## TITLE 24—HOUSING AND HOUSING CREDIT

### Chapter I—Federal Home Loan Bank Board

#### Subchapter A—General Regulations of the Federal Home Loan Bank Board

[No. 9715]

PART 109—RULES OF PRACTICE AND PROCEDURE; ADJUDICATIONS UNDER ADMINISTRATIVE PROCEDURE ACT

JUNE 21, 1956.

Resolved, that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108), the general regulations of the Federal Home Loan Bank Board (24 CFR Chap. I, Subchapter A) are hereby amended by adding a new Part 109 at the end thereof to read as follows:

Sec.
109.1 Scope of regulations.
109.2 Service, filing of papers, etc.
109.3 Notice of hearing.
109.4 Attendance at hearings.
109.5 Conduct of hearings.
109.6 Rules of evidence.
109.7 Transcript of testimony.
109.8 Proposed findings and conclusions and recommended decisions.
109.9 Exceptions; filing of briefs.
109.10 Decision of the board.

AUTHORITY: §§ 109.1 to 109.10 issued under sec. 17, 47 Stat. 1736, as amended; 12 U. S. C. 1437. Interpret or apply sec 8, 47 Stat. 727, as amended, sec. 5, 48 Stat. 132, as amended; sec. 407, 48 Stat. 1260, as amended; 12 U. S. C. 1730, 1426, 1464. Reorg. Plan No. 3 of 1947, 12 F. R. 4981, 3 CFR, 1947 Supp.

§ 109.1 *Scope of regulations.* The provisions of this part shall govern hearings to determine whether cause exists, under the provisions of section 6 (i) of the Federal Home Loan Bank Act, as amended (12 U. S. C. 1426 (i)), for the removal of any member of a Federal Home Loan Bank from membership or for depriving any nonmember borrower of the privilege of obtaining advances from a Federal Home Loan Bank; hearings under the provisions of section 5 (d) of the Home Owners' Loan Act of 1933, as amended (12 U. S. C. 1464 (d)), involving alleged violations of law or regulation by a Federal savings and loan association and upon the existence of grounds for the appointment of a conservator or receiver for a Federal savings and loan association; and hearings to determine whether cause exists for the termination of the insured status of any institution insured by the Federal Savings and Loan Insurance Corporation, as provided in section 407 of the National Housing Act, as amended (12 U. S. C. 1730).

§ 109.2 *Service, filing of papers, etc.*—(a) *Proof of service.* All documents or papers required to be served by the Board on the institution involved shall be served by the Secretary unless some other person shall be designated for such purpose by the Board. Such service, shall be made by personal service or by registered mail addressed to the last known address as shown on the records of the Board, on the attorney or representative of record of the institution involved, provided that if there is no attorney or representative of record, such service shall be made upon the institution involved at the last known address, as shown on the records of the Board. The term Secretary as used in this part shall mean the Secretary and any Assistant Secretary to the Board.

(b) *Filing of papers.* All material required to be filed with the Board or the Secretary to the Federal Home Loan Bank Board in any proceedings shall be filed with the Secretary, Federal Home Loan Bank Board, Washington 25, D. C. Any such papers may be sent to the Secretary by mail or express but must be received by the Secretary in the office of the Board in Washington, D. C., or be postmarked, within the time limited for the particular filing.

(c) *Form.* All papers filed under this part must include at the head thereof or on the title page, the name of the Board, the name of the institution against which such action is being brought, the number of the resolution giving notice of the hearing, and the subject matter of the particular paper. All such papers shall be typewritten, mimeographed, or printed, and must be signed in the case of the Board by Counsel for the Board or, in the case of the institution involved, by such institution, its duly authorized agent or attorney, and must show the address of the signer.

(d) *Copies.* Unless otherwise specifically provided in the notice of hearing, an original and 7 copies of all documents and papers required or permitted to be filed or served under this part, except the transcript of testimony and exhibits, shall be furnished to the Secretary.

(e) *Computing time.* In computing any period of time prescribed or allowed by this part, the date of the act, event or default from which the designated period of time begins to run is not to be included. The last day so computed is to be included, unless it is a Saturday, Sunday or legal holiday in the District of Columbia, in which event the period shall run until the end of the next day which is neither a Saturday, Sunday nor legal holiday. Intermediate Saturdays, Sundays and legal holidays shall be included in the computation unless the time within which the act is to be performed is 10 days or less in which event Saturdays, Sundays and legal holidays shall not be included. Half holidays shall be considered as other days and not as holidays.

§ 109.3 *Notice of hearing.* Whenever a hearing is ordered by the Board in any proceedings a notice of hearing shall be given by the Secretary to the Board to the institution involved. Such notice shall designate the time and place of the hearing and the nature thereof, shall specify the charges, and shall be served by delivering the same personally or by registered mail to the home office of the institution involved, at its last known address as shown on the records of the Board. No hearing shall be held upon less than 30 days' notice except that hearings held pursuant to section 5 (d) of the Home Owners' Loan Act of 1933, as amended, may be held upon not less than 20 days' notice.

§ 109.4 *Attendance at hearings.* All hearings shall be private and shall be attended only by the institution involved and its representative or counsel, representatives and counsel of the Board, witnesses, and other persons having an official interest in the proceedings: *Provided, however,* That on the written request of the institution, or counsel for the Board, or on its own motion, the Board may permit other persons to attend any such hearing or may order the hearing to be public.

§ 109.5 *Conduct of hearings.* Each hearing shall be held before a Trial Examiner, one or more Members of the Board, or the Board (hereinafter referred to as Presiding Officer, which term shall be construed to include whichever of the three shall preside at a hearing hereunder, except as otherwise specified in the text), as determined by the Board. The Presiding Officer who shall be designated to conduct any hearing shall have complete charge of such hearing; have authority to permit the examination of witnesses, to receive evidence, rule upon the admission of evidence, allow and deny motions, except that in the case of any hearing which is held before a Presiding Officer other than the Board, such Presiding Officer shall not have power to decide any motion to dismiss the proceedings or other motion which results in final determination of the merits of the proceedings; and to adjourn such hearing from time to time and, as permitted by law or agreed to by the parties, from place to place. The Presiding Officer shall have power to administer oaths and affirmations and, to issue subpenas and subpenas duces tecum, as authorized by law, and shall issue such at the request of any interested party. The Presiding Officer may hold conferences before or during the hearing for the settlement or simplification of issues by consent of the parties. Without limitation on the foregoing the Presiding Officer shall, subject to the provisions of this part have all the authority of section 7 (B) of the Administrative Procedure Act.

§ 109.6 *Rules of evidence.* Any party to the hearing shall have the right to present his case or defense by oral and documentary evidence, to submit rebuttal evidence and conduct such cross-examination as may be required for a clear and true disclosure of the facts. Immaterial, irrelevant or unduly repetitious evidence shall be excluded. Objections to the admission or exclusion of evidence shall state the grounds of objection relied upon but no argument thereon shall be permitted, except as may be ordered or requested by the Presiding Officer. Rulings on such objections and all other matters shall be part of the transcript. Failure timely to object to the admission or exclusion of evidence or to any ruling shall be considered a waiver of such objection.

§ 109.7 *Transcript of testimony.* Hearings shall be recorded and transcripts will be made available to the institution involved upon payment therefor at the reasonable cost thereof and, in the event the hearing is public, or the Board shall so authorize, shall be furnished on similar payment to other persons. A copy of the transcript of the testimony taken at any hearing, duly certified by the Reporter, together with all exhibits and any briefs or memoranda of law theretofore filed in the cause shall be filed with the Secretary to the Board. The Secretary shall by registered mail notify the institution of such filing. The Presiding Officer shall have authority to rule upon motions to correct the record.

§ 109.8 *Proposed findings and conclusions and recommended decisions*—(a) *Proposed findings and conclusions by parties.* Each party to a hearing shall have a period of 15 days or such further time as the Presiding Officer for good cause shall determine, running from the date of the notice of the filing of the transcript to file with the Secretary, for submission to the Presiding Officer of proposed findings and conclusions, which may be accompanied by a brief or memorandum in support thereof. A copy of all such material shall be delivered by the Secretary to the Presiding Officer and to the other party to the proceedings, and all such proposals, briefs and memoranda shall become a part of the record.

(b) *Recommended decision and filing of record.* The presiding Officer, unless such Presiding Officer shall be the Board, shall, within 15 days after the expiration of the time allowed for the filing of proposed findings and conclusions or within such further time as the Board for good cause shall determine, file with the Secretary and certify to the Board for decision the entire record of the hearings, which shall include his findings and conclusions and his recommended decision, the transcript, exhibits (including on request of the parties concerned any exhibits excluded from evidence or tenders of proof), exceptions, rulings, and all briefs and memoranda filed in connection with the hearing.

§ 109.9 *Exceptions; filing of briefs.* Promptly upon the filing of the record the Secretary shall serve on the institution involved a notice of such filing together with a copy of the Presiding Officer's findings, conclusions and recommended decision. Each party shall have a period of 15 days from the date of such notice, or such further time as the Board for good cause shall determine, to file with the Secretary exceptions to the findings, conclusions, and recommended decision or any part thereof, or to the failure to make any finding, conclusion, or recommendation, or to the admission or exclusion of evidence, or other ruling of the Presiding Officer, supported by such brief as may appear advisable. A copy of any exceptions filed by counsel for the Board and of any brief filed by such counsel shall promptly be served upon the institution. A reply brief may be filed with the Secretary by counsel for the Board within ten days after the filing of the institution's brief, and a reply brief may be filed with the Secretary by the institution within ten days after the date of service by the Secretary upon the institution of a copy of the brief of counsel for the Board. Further briefs may be filed only with permission of the Board.

§ 109.10 *Decision of the Board.* A copy of the decision of the Board shall be furnished by the Secretary to the institution involved and if directed by the Board to any appropriate governmental supervisory authority.

Resolved further that, these amendments should be made effective as soon as possible, as any delay in action authorized by this part because of a later effective date will reduce the benefits to the parties affected thereby. All persons who may be affected by the issuance of this part have had a reasonable opportunity to prepare for the effective date thereof, or to take any other action which the issuance of this part may prompt. This proposed Part 109 was duly published February 4, 1956 (21 F. R. 813) and no persons have filed any written data or made oral arguments with respect thereto either within the time allotted or at any later date. There have been no substantial changes from the Proposed Rule published in 21 F. R. 813. In addition to the foregoing, this part is, essentially procedural in nature and is promulgated to carry into effect statutory amendments. Good cause is found, therefore, for issuing this Part 109, effective less than 30 days after publication in the FEDERAL REGISTER, as provided in section 4 of the Administrative Procedure Act (5 U. S. C. 1003).

These amendments shall be effective June 26, 1956.

By the Federal Home Loan Bank Board.

[SEAL] H. CAULSEN,
*Assistant Secretary.*

**Subchapter B—Federal Home Loan Bank System**

[No. 9716]

PART 123—MEMBERS OF BANKS

PROCEDURE FOR REMOVAL

JUNE 21, 1956.

Resolved that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108), § 123.32 of the regulations for the Federal Home Loan Bank System (24 CFR 123.32) is hereby amended to read as follows:

§ 123.32 *Procedure for removal*—(a) *Grounds for removal.* The grounds for the removal of a member from membership in a Federal Home Loan Bank or to deprive any nonmember borrower of the privilege of obtaining further advances from a Bank shall consist of any one or more of the following:

(1) The failure of the member or nonmember borrower to comply with any provision of the act.

(2) The failure of the member or nonmember borrower to comply with any regulation of the Board adopted pursuant to the act.

(3) The insolvency of the member or nonmember borrower. Any member which is a building and loan association, savings and loan association, cooperative bank or homestead association will be deemed insolvent if its assets are less than its obligations to creditors and others, including the holders of its withdrawable accounts.

(4) The management or home-financing policy of the member or nonmember borrower is of a character inconsistent with sound and economical home financing or with the purposes of the act.

(b) *Hearing.* In the event the Board is of the opinion that one or more of the grounds enumerated in paragraph (a) of this section exists for the removal of any member from membership or the depriving of any nonmember borrower of the privilege of obtaining further advances, the Board will give such member or nonmember borrower at least 30 days' written notice of its intention to terminate such membership or to deprive such nonmember borrower of the privilege of obtaining further advances, which notice shall state the grounds for such action and the time and place of a hearing at which the member or nonmember borrower may appear and be heard. Such notice shall be served upon the member or nonmember borrower in the manner provided by part 109 of this chapter. The hearing shall be conducted in accordance with the provisions of said part 109 of this chapter.

Resolved, further, that, these amendments should be made effective as soon as possible, as any delay in action authorized by this section because of a later effective date will reduce the benefits to the parties affected thereby. All persons who may be affected by the issuance of this section have had a reasonable opportunity to prepare for the effective date thereof, or to take any other action which the issuance of this amendment may prompt. This proposed section was duly published February 4, 1956 (21 F. R. 813) and no persons have filed any written data or made oral arguments with respect thereto either within the time allotted or at any later date. There have been no substantial changes from the Proposed Rule published in 21 F. R. 813. In addition to the foregoing, this amended section is, essentially procedural in nature and is promulgated to carry into effect statutory amendments. Good cause is found, therefore, for issuing this amended section effective less than 30 days after publication in the FEDERAL REGISTER, as provided in section 4 of the Administrative Procedure Act (5 U. S. C. 1003).

(Sec. 17, 47 Stat. 736, as amended; 12 U. S. C. 1437. Interprets and applies sec. 6, 47 Stat. 727, as amended; 12 U. S. C. 1426)

This amendment shall be effective June 26, 1956.

By the Federal Home Loan Bank Board.

[SEAL] H. CAULSEN,
*Assistant Secretary.*

**Subchapter C—Federal Savings and Loan System**

[No. 9717]

PART 142—RULES AND REGULATIONS; HEARINGS

PART 147—APPOINTMENT OF CONSERVATOR, RECEIVER AND SUPERVISORY REPRESENTATIVE IN CHARGE

PART 148—POWERS OF CONSERVATOR AND CONDUCT OF CONSERVATORSHIP

PART 149—POWERS OF RECEIVER AND CONDUCT OF RECEIVERSHIP

PART 150—POWERS OF RECEIVER AND CONDUCT OF RECEIVERSHIPS

MISCELLANEOUS AMENDMENTS

JUNE 21, 1956.

Resolved that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108) and § 142.1 of the rules and regulations for the Federal Savings and Loan System (24 CFR 142.1), the rules and regulations for the Federal Savings and Loan System (24 CFR Chap. I, Subchapter C) are hereby amended as hereinafter set forth:

(1) Part 142 is hereby amended by adding at the end thereof a new § 142.3, reading as follows:

§ 142.3 *Hearings; compliance with law and regulations.* If, in the opinion of the Board, a Federal association is in violation of any law or regulation to which it is subject, the Board in any proceeding under the provisions of section 5 (d) (1) of the Home Owners' Loan Act of 1933, as amended, shall, by formal resolution, state the alleged violation of law or regulation and give written notice to such Federal association of the facts alleged to be such violation, addressed to its home office. Such notice shall contain a statement that it is a formal notice issued pursuant to this section. In the event the Federal association does not correct such violation of law or regulation or perform such legal duty as it may be required to perform within 30 days after the date it shall have been served with such notice, the Board shall give such Federal association 20 days' written notice of the charges against it and of the date on which the Board will conduct a hearing as to such alleged violation or failure to perform. Unless the Federal association consents to another place, the hearing shall be held in the Federal judicial district in which the home office of such association is located. Such hearing shall be conducted in accordance with the pertinent provisions of Part 109 of this chapter. The cost of any hearing pursuant to the provisions hereof, as determined by the Board, may be assessed against the Federal association party to such hearing unless it is found, that such Federal association was not guilty of any of the alleged violations of law, regulation or duty.

(Sec. 17, 47 Stat. 736, as amended; 12 U. S. C. 1437. Inteprets or applies sec. 5, 48 Stat. 132, as amended; 12 U. S. C. 1464)

(2) Parts 147, 148, 149 and 150 are hereby repealed and the following new Parts 147, 148 and 149 adopted in lieu thereof:

PART 147—APPOINTMENT OF CONSERVATORS, RECEIVERS AND SUPERVISORY REPRESENTATIVES IN CHARGE

Sec.

147.1 Grounds for appointment of receiver or conservator.
147.2 Appointment of Supervisory Representatives in Charge.
147.3 Possession by Supervisory Representative in Charge.
147.4 Surrender of possession by Supervisory (Representative in Charge.
147.5 Consent to appointment of conservator or receiver.
147.6 Appointment of conservator or receiver; hearings.
147.7 Possession by conservator or receiver.
147.8 Surrender of possession by conservator or receiver.
147.9 Cost of hearings.

AUTHORITY: §§ 147.1 to 147.9 issued under sec. 17, 47 Stat. 736, as amended; 12 U. S. C. 1437. Interpret or applies sec. 5, 48 Stat. 132, as amended; 12 U. S. C. 1464.

§ 147.1 *Grounds for appointment of receiver or conservator.* The grounds for the appointment of a conservator or receiver for a Federal association shall consist of the existence of any one or more of the following:

(a) Insolvency of the Federal association, in that its assets are less than its obligations to its creditors and others, including its members;

(b) Violation of law or of a regulation;

(c) The concealment of the books, records or assets of the Federal association or the refusal to submit its books, papers, records or affairs for inspection to any examiner or lawful agent appointed by the Board;

(d) Unsafe or unsound operation.

§ 147.2 *Appointment of Supervisory Representative in Charge.* In the event the Board is of the opinion that one or more grounds enumerated in § 147.1 exist for the appointment of a conservator or receiver for a Federal association

and determines that an emergency exists requiring immediate action, the Board may, by order, appoint, ex parte and without notice, a Supervisory Representative in Charge who shall forthwith, or at such time as may be fixed by the Board, take charge of said Federal association and its affairs, and such Supervisory Representative in Charge shall, to the extent authorized by the Board, have and exercise the same powers as a conservator or a receiver. The formal resolution of the Board so appointing any such Supervisory Representative in Charge shall state the ground or grounds which, in the opinion of the Board, exist for the appointment of a conservator or receiver and the reason or reasons which the Board determines exist requiring such immediate action. The Secretary to the Board shall mail a certified copy of such resolution to the address of the association as it shall appear on the records of the Board and to each director of the association known by the Secretary to be such, at the last address of each as the same shall appear on the records of the Board. Unless sooner removed by the Board, such Supervisory Representative in Charge shall hold office until a conservator or receiver appointed by the Board takes charge of such Federal association and its affairs, or for six months, or until thirty days after the termination of an administrative hearing and final proceedings as provided in paragraph 2 of subsection (d) of section 5 of the Home Owners' Loan Act of 1933, as amended (12 U. S. C. 1464 (d) and Supp.), or until sixty days after the final termination of any litigation affecting such temporary appointment, whichever is longest. Upon the expiration of a period of six months from the date of the appointment by the Board of a Supervisory Representative in Charge for a Federal association, the Board will restore such Federal association to its management unless, prior to the expiration of such period, the Supervisory Representative in Charge shall have been discharged, the Board shall have adopted a formal resolution providing for an administrative hearing upon the appointment of a conservator or receiver for such Federal association, or there is pending litigation affecting the appointment of the Supervisory Representative in Charge.

§ 147.3 *Possession by Supervisory Representative in Charge.* A Supervisory Representative in Charge shall forthwith upon appointment as such for a Federal association, or at such time as may be fixed by the Board, take possession of such association and, at the time he shall demand possession, shall serve a certified copy of the resolution of the Board appointing him as Supervisory Representative in Charge upon the officer or employee of the association, if any, who shall be in the home office of the association and appear to be in charge of such office. Immediately upon taking possession of such Federal association the Supervisory Representative in Charge shall succeed to all the rights, powers and privileges of the members of the Federal association, its officers and directors, or any of them. Such members, officers and directors shall not thereafter, except as hereinafter expressly provided, have or exercise any such rights, powers or privileges, or act in connection with any assets or property of any nature of the association: *Provided, however,* That the board of directors of such association, as such, or any member of such association, shall have the right to appear and be heard at any administrative hearing fixed by the Board for a determination upon the question of whether or not a conservator or receiver should be appointed for such Federal association, and the officers, directors, or the members of the Federal association, or any of them, may, from time to time, communicate with the Board with respect to the discharge of such Supervisory Representative in Charge and the release of the association from his control: *Provided further,* That the members of the association or the board of directors thereof, may by resolution consent to the appointment of a conservator or receiver for such association. The Board may, at any time, direct the Supervisory Representative in Charge to return the Federal association to its management; may provide for a meeting or meetings of the members for any purpose, including, without any limitation on the generality of the foregoing, an increase in the number of directors, the election of additional directors or an entire new board, and may provide for a meeting or meetings of the directors for any purpose, including, without any limitation on the generality of the foregoing, the filling of vacancies on the board of directors, the election of new officers, or both. Any such meeting of members or of directors may, as provided by the Board, be supervised or conducted by a representative of the Board. Such Supervisory Representative in Charge shall furnish bond in form and amount and with surety acceptable to the Director. The expenses incurred by a Supervisory Representative in Charge during the period that he continues in charge of any Federal association, including the cost of his bond and charges for his services, as determined by the Director, shall be paid out of the assets of the Federal association. In addition, all expenses incurred by the Board arising out of the appointment and affecting such appointment shall be paid by the association to the Board. The term "Director", when used in this Part, shall mean the Director and any Associate or Assistant Director of the Division of Supervision of the Board and the term Secretary to the Board shall also mean any Assistant Secretary to the Board.

§ 147.4 *Surrender of possession by Supervisory Representative in Charge*—(a) *To the association.* In the event the Board shall restore a Federal association which is in the hands of a Supervisory Representative in Charge to its management, such action, except as the Board may otherwise provide, shall restore the rights, powers and privileges of its members, officers and directors, all as of the time specified by the Board.

(b) *To a conservator or receiver.* In the event a Supervisory Representative in Charge is in charge of a Federal association and its affairs at the time of the appointment of a conservator or receiver for such association, such Supervisory Representative in Charge shall, as may be required by the Board, surrender his control and management of such association and its affairs to such conservator or receiver.

(c) *Reports, final report and discharge.* A Supervisory Representative in Charge shall make such reports to the Board as the Board may require and at the time he shall surrender possession of a Federal association of which he has been placed in charge, shall make such final report and accounting to the Board as the Board shall require. The Board may at any time require an examination or audit, or both, of the affairs of a Federal association under the control of a Supervisory Representative in Charge. Upon a determination by the Board that a final accounting to a Supervisory Representative in Charge is satisfactory, the Board will grant to such Supervisory Representative in Charge, a complete and final release and discharge.

§ 147.5 *Consent to appointment of conservator or receiver.* In the event the board of directors or members of any Federal association, by appropriate resolution, consent to the appointment of a conservator or receiver for such association, the Board may, in its discretion, appoint such conservator or receiver.

§ 147.6 *Appointment of conservator or receiver; hearings.* In the event the Board is of the opinion that any of the grounds specified in § 147.1 exist for the appointment of a conservator or receiver for a Federal association, the Board will, by formal resolution, state the ground or grounds which, in its opinion, are cause for the appointment of a conservator or receiver for such Federal association and provide therein an opportunity for an administrative hearing upon the matter at which the Federal association may appear and show cause why such conservator or receiver should not be appointed. Such resolution shall state the time and place of such hearing, which hearing shall be held in the Federal judicial district in which the home office of the Federal association is located, unless such association consents to another place. Any such hearing shall be subject to review as provided in the Administrative Procedure Act, and any review by a court shall be upon the weight of the evidence. Notice of opportunity to appear and be heard at such administrative hearing shall be given to the Federal association by the Secretary to the Federal Home Loan Bank Board who shall forthwith, upon the action of the Board providing for such hearing, mail an authenticated copy of the formal resolution of the Board, by registered mail, to the last address of the Federal association as it shall appear on the records of the Board and to each director of the association known by the Secretary to be such, at the last known address of each, as the same shall appear on the records of the Board. The board of directors of the Federal association, whether such association is in charge of

a Supervisory Representative in Charge or otherwise, may, by the adoption of a resolution and the filing of a certified copy thereof with the Board within fifteen days after the mailing of notice of hearing, demand a more definite statement of the ground or grounds stated in the resolution for the appointment of a conservator or a receiver of the Federal Home Loan Bank Board. Any interested party may, at any time prior to the date fixed for the hearing, submit for consideration facts, arguments, offers of settlement and proposals of adjustment. In the event the Federal association does not appear at the administrative hearing and show cause why a conservator or receiver should not be appointed, the Board may forthwith appoint a conservator or receiver for such Federal association. In the event the Federal association shall appear at such administrative hearing, such hearing shall be held in the manner provided in Part 109 of this chapter and in accordance with the Administrative Procedure Act, as in force and effect at the time such hearing is held. In the event the final decision of the Board shall be that a conservator or receiver should be appointed, the action of the Board in appointing such conservator or receiver shall provide that such conservator or receiver shall take possession of the association immediately or at such time as may be fixed by the Board. A copy of such final decision of the Board shall be furnished by the Secretary to the Federal Home Loan Bank Board to each party appearing at the hearing, either in person or by registered mail, addressed to such interested party at his last address as the same shall appear on the records of the Board. Notice of appointment of a receiver or conservator shall forthwith be filed for publication in the FEDERAL REGISTER. The appointment of a receiver shall be for the purpose of liquidation.

§ 147.7 *Possession by conservator or receiver.* A conservator or receiver shall take possession of the Federal association for which he has been so appointed in accordance with the terms of such appointment and, at the time he shall demand possession, notify the officer or employee of the association, if any, who shall be in the home office of the association and appears to be in charge of such office, of the action of the Board. Immediately upon taking possession of such Federal association, such conservator or receiver shall forthwith take possession of the books, records and assets of every description of such association and (a) a conservator shall succeed to all the rights, powers and privileges of its members, its officers and directors, or any of them, and (b) a receiver, by operation of law and without any conveyance and other instrument, act or deed shall succeed to all the rights, titles, powers and privileges of the Federal association and shall succeed to the rights, powers and privileges of its members, its officers and directors, or any of them. Such members, officers or directors, or any of them, shall not thereafter, except as hereinafter expressly provided, have or exercise any such rights, powers or privileges, or act in connection with any assets or property of any nature of the association: *Provided, however,* That any officer, director or member of such association shall have the right from time to time to communicate with the Board with respect to such conservatorship or receivership. Such conservator or receiver shall furnish bond in form and amount and with surety acceptable to the Director. The Board may, at any time, direct the conservator or receiver to return the Federal association to its previous or a newly constituted management; may provide for a meeting or meetings of the members for any purpose, including, without any limitation on the generality of the foregoing, the election of directors or an increase in the number of directors, or both or the election of an entire new board; and may provide for a meeting or meetings of the directors for any purpose, including, without any limitation on the generality of the foregoing, the filling of vacancies on the board of directors, the removal of officers, and the election of new officers, or for any of such purposes. Any such meeting of members or of directors may, as provided by the Board, be supervised or conducted by a representative of the Board.

§ 147.8 *Surrender of possession by conservator or receiver.* (a) *To the association.* In the event the Board shall restore a Federal association which is in the hands of a conservator or receiver to its management, such action except as the Board may otherwise provide, shall restore the rights, powers and privileges of its members, officers and directors, all as of the time specified by the Board. The return of a Federal association to its management from the possession of a receiver shall, by operation of law and without any conveyance or other instrument, act, or deed, revest in such Federal association the title to all its property.

(b) *To a receiver.* In the event a conservator is in possession of a Federal association and its affairs at the time of appointment of a receiver for such association, such conservator shall, as may be required by the Board, surrender possession of such association and its affairs to such receiver.

§ 147.9 *Costs of hearings.* Costs, as determined by the Board, of hearings held pursuant to § 147.6 may be assessed against the Federal association party to such hearing unless it is found, upon such hearing, that grounds did not exist for the appointment of a conservator or receiver.

---

PART 148—POWERS OF CONSERVATOR AND CONDUCT OF CONSERVATORSHIPS

Sec.
148.1 Procedure upon taking possession.
148.2 Powers and duties of Conservator.
148.3 Creditors.
148.4 Share interests.
148.5 Examinations, inventories, reports, costs and expenses.
148.6 Final discharge and release of conservator.
148.7 Inspection of reports.
148.8 Delegation by conservator.

AUTHORITY: § 148.1 to 148.8 issued under sec. 1, 47 Stat. 736, as amended; 12 U. S. C. 1437. Interprets or applies sec. 5, 48 Stat. 132, as amended; 12 U. S. C. 1464.

§ 148.1 *Procedure upon taking possession.* Upon taking possession, pursuant to § 147.7 of this subchapter, of such Federal association, the conservator shall forthwith:

(a) Notify, by written notice served personally or by registered mail or telegraph, all banks, trust companies and all other individuals, partnerships, corporations, and associations known to such conservator to be holding or in possession of any assets of such association,

(b) File with the Secretary to the Board a statement (1) that he has taken possession, pursuant to § 147.7 of this subchapter, of such Federal association and (2) of the time of such taking of possession; and such statement shall be conclusive evidence of such taking of possession and of the time of such taking of possession, and

(c) In the event one of the grounds for the appointment of the conservator is that set forth in § 147.1 (1) of this subchapter, post a notice in substantially the following form on the door of the home office of such association:

---------- Federal Savings and Loan Association ----------, ----------, ----------, is in the possession and charge of the undersigned as conservator under appointment by the Federal Home Loan Bank Board.

----------
(Conservator)

----------
(Date)

§ 148.2 *Powers and duties of conservator.* The conservator, subject to the direction and supervision of the Director, shall, after taking possession, pursuant to § 147.7 of this subchapter, take such action as may be necessary to conserve the assets of the association pending further disposition of its affairs. The term "Director", when used in this part shall mean the Director and any Associate or Assistant Director of the Division of Supervision of the Board. The conservator shall forthwith in his name, in the name of the association, in the name of both, or otherwise, collect all obligations and money due the association, and in his name, in the name of the association, in the name of both, or otherwise:

(a) May do all things desirable or expedient in his discretion to carry on the business of the association to an extent consistent with his appointment and to preserve and conserve the assets and property of every nature of such association, but shall not declare, credit, pay or distribute dividends on its savings accounts except with the approval of the Board or of the Director;

(b) May exercise all the rights and powers of such association, including, without any limitation on the generality of the foregoing, any rights and powers under any mortgage, deed of trust, chose in action, option, collateral note, contract, judgment or decree, share or certificate of share of stock, or instrument of any nature;

(c) May, with the approval of the Board or of the Director, pay off and discharge any taxes, assessments, liens, claims, or charges of any nature against the association or the conservator or any assets or property of any nature of such association;

(d) May pay out and expend such sums as he shall deem necessary or advisable:

(1) For or in connection with the preservation, maintenance, conservation or protection of any asset or property of such association, or

(2) With the approval of the Board or the Director, for or in connection with the remodeling, repair, rehabilitation or improvement not necessary for such preservation, maintenance, conservation or protection of any asset or property of such association;

(e) May, with the approval of the Board or the Director,

(1) Pay out and expend such sums as he shall deem necessary or advisable for or in connection with the preservation, maintenance, conservation or protection of, or

(2) Pay off and discharge any taxes, assessments, liens, claims or charges of any nature against, any asset or property of any nature on which the association or conservator has a lien by way of mortgage, deed of trust, pledge or otherwise, or in which the association or conservator has an interest of value of any nature;

(f) May, under the direction and supervision of the General Counsel of the Board, institute, prosecute, maintain, defend, intervene, and otherwise participate in any and all actions, suits or other legal proceedings by and against the conservator or association or in which the conservator, the association, or its creditors or members, or any of them, shall have an interest, and in every way to represent such association, its members and creditors:

(g) (1) May, with the approval of the Director, employ such assistants and employees as he may deem necessary for the proper administration of the conservatorship, and shall by bond cover all such assistants and employees in form satisfactory to such conservator and to the said Director, the cost of the same and the cost of the conservator's bond to be paid out of the assets of the association in the possession of the conservator; and

(2) Shall employ any attorney or attorneys designated by the General Counsel of the Board, in connection with litigation or otherwise to give legal advice and assistance, for the conservatorship generally or in particular instances, and pay retainers and compensation of such attorney or attorneys, together with all expenses, including, but not limited to, the costs and expenses of any litigation, as approved by said General Counsel, out of the assets of the association;

(h) May execute, acknowledge, and deliver any and all deeds, contracts, leases, assignments, bills of sale, releases, extensions, satisfactions, and other instruments necessary or proper for any purposes, including, without limitation on the generality of the foregoing, the effectuation or termination of any sale, lease or transfer of real, personal or mixed property. Any deed or other instrument executed pursuant to the authority hereby given shall be as valid and effectual for all purposes as if the same had been executed, as the act and deed of the association or otherwise, by the officers of such association by authority of its board of directors;

(i) The conservator shall close such bank accounts and open such additional bank accounts for the association as he shall deem advisable subject to the approval of the Director, but no account shall be retained or opened in a bank which is not insured by the Federal Deposit Insurance Corporation or in any Federal Home Loan Bank except with the approval of the Board.

(j) (1) May, with the approval of the Board or the Director, sell for cash any mortgage, deed of trust, chose in action, bond, note, contract, judgment or decree, or share or certificate of share of stock or debt, owing to such association, at not less than the actual amount owing the association thereon or the face or par value thereof, and

(2) May, with the approval of the Board, or on terms and conditions approved by the Board, sell for cash or on terms, or exchange or otherwise dispose of, at less than the amount owing the association thereon or the face or par value thereof, in whole or in part, any mortgage, deed of trust, chose in action, bond, note, contract, judgment or decree, share or certificate of share of stock or debt, owing to such association;

(k) (1) May lease on a month to month basis, or for a term of not to exceed one year, and

(2) May, with the approval of the Board, or on terms and conditions approved by the Board, sell for cash or on terms, lease for a period of more than one year, exchange or otherwise dispose of, in whole or in part, any or all of the assets and property of the association, real, personal, and mixed, tangible and intangible, of any nature;

(l) May, with the approval of the Board or the Director, or on terms and conditions approved by the Board or the Director, surrender, abandon, and release any choses in action, or other assets or property of any nature, whether the subject of pending litigation or not, and reject or repudiate any lease or contract which he considers burdensome;

(m) May, with the approval of the Board, or on terms and conditions approved by the Board, settle, compromise, or obtain the release of, for cash or other considerations, claims and demands against such association or the conservator;

(n) May, with the approval of the Board, or on terms and conditions approved by the Board, settle, compromise, or release, for cash or other considerations, claims and demands in favor of the association or the conservator;

(o) May, with the approval of the Board or the Director, borrow money in any amount and from any source and in any manner, and execute, acknowledge and deliver notes, certificates, and other evidence of indebtedness therefor and secure the repayment thereof by the mortgage, pledge, assignment in trust or hypothecation of any or all of the property, whether real, personal, or mixed, of such association, and such borrowing may be for any purpose, including, without any limitation on the generality of the foregoing, protecting or preserving the assets in his possession, declaring and paying dividends to members and creditors, providing for the expense of administration, or aiding in the reopening or reorganization of such association;

(p) May pay out of the assets of the conservatorship all costs and expenses of the conservatorship and all costs of carrying out or exercising his rights, powers, privileges and duties as conservator, all as determined by him, except as otherwise provided herein; and

(q) May do such things, and have such rights, powers, privileges, immunities, and duties, whether or not otherwise granted in these rules and regulations, as shall be authorized, directed, conferred, or imposed from time to time in specific cases by order of the Board or by amendment of these rules and regulations.

For the purposes of this section, assets and property, without limitation on the generality thereof and including any mortgage, deed of trust, chose in action, bond, note, contract, judgment or decree, share or certificate of share of stock, or debt of the association, shall include any such asset or property of the conservator.

§ 148.3 *Creditors.* The conservator may, after certification by the conservator to the Board that the assets of the association will be sufficient to meet all creditor obligations and that the condition of the association justifies, out of the assets in his possession,

(a) With the approval of the Director, make disbursements which the association was obligated to make on loan commitments and other valid contracts,

(b) With the approval of the Director, pay salaries due officers or employees of the association, permit the payment of outstanding checks given in connection with valid creditor obligations, and pay valid creditor obligations, or, in the absence of such certification or approval, may, out of the assets of the association in his possession, pay creditor obligations and make disbursements which the association was obligated to make on loan commitments, to the extent determined by the Director to be compatible with the condition of the association and the proper conduct of its affairs.

§ 148.4 *Share interests.* The conservator shall not accept any payments on or purchases, or make any repurchases, of share accounts, unless the Board shall otherwise direct by order, which order, or orders, shall be posted in a conspicuous place in the principal office of the conservator for conducting the affairs of the association, and such payments or purchases shall be accepted, or such repurchases made, only to the extent and in the manner, and with segregation to the extent, that the same, if any, may be directed in such order or orders.

§ 148.5 *Examination, inventories, reports, costs and expenses.*—(a) *Inventory.* As soon as practicable after taking possession, the conservator shall

make an inventory of the assets of such association as of the date of such taking possession, showing the value as carried on the books of the association, and the security therefor, if any, in whatever form the same shall exist, with a brief description of each such asset and such security. Such assets may be listed in such groups or classes as shall, to the satisfaction of the Director, afford full information as to their character and book value, and the inventory shall include a record of the creditor and share liabilities of the association. Two copies of such inventory shall promptly be filed with the Secretary to the Board, one copy with the Director, and one copy shall during the conservatorship be retained in the principal office of the association.

(b) *Examinations and audits.* Each Federal association for which a conservator has been appointed may be examined and/or audited (with appraisals when deemed advisable by the Board) by the Division of Examinations of the Board as directed by the Board. The cost, as determined by the Board, of examinations including office analysis thereof, audits, and any appraisals made in connection therewith, shall be paid from the assets of the association unless otherwise ordered by the Board.

(c) *Forms and reports.* The conservator shall follow such accounting practices as may, from time to time, be prescribed by the Director. The conservator shall make such reports as may be required by the Board or the Director.

§ 148.6 *Final discharge and release of conservator—(a) Final report.* At such time as the conservator be relieved of his duties, the conservator shall file with the Board a detailed report in form satisfactory to the Board.

(b) *Final discharge.* Unless otherwise directed by the Board, upon the completion of the duties of the conservator or at such time as the conservator shall be otherwise relieved of his duties, an examination and audit may be directed by the Board in connection with the report of the conservator hereinbefore required. The accounts of the conservator shall be approved or disapproved by the Board, and, if approved, the conservator shall thereupon be given a complete and final release.

§ 148.7 *Inspection of reports.* All inventories, statements and reports of the conservator shall be in at least four copies unless otherwise directed by the Board or the Director. Two copies shall be filed with the Secretary to the Board, one copy with the Director, and each of the inventories, statements, and reports shall constitute permanent records of each conservatorship open for inspection at such times and on such conditions as may be from time to time directed by the Board or, in the absence of such directions, whenever the office of the Secretary to the Board shall be open for business.

§ 148.8 *Delegation by conservator.* The conservator may delegate to such persons as he may designate any or all of the powers and authorities vested in the conservator by or under §§ 148.2, 148.3 and 148.4.

---

## PART 149—POWERS OF RECEIVER AND CONDUCT OF RECEIVERSHIPS

Sec.

149.1 Procedure upon taking possession.
149.2 Disposition.
149.3 Powers and duties of receiver.
149.4 Creditor claims.
149.5 Share interest claims.
149.6 Inventories, examinations, and reports.
149.7 Final discharge and release of receiver.
149.8 Inspection of reports.

AUTHORITY: §§ 149.1 to 149.8 issued under sec. 17, 47 Stat. 736, as amended; 12 U. S. C. 1437. Interprets or applies sec. 5, 48 Stat. 132, as amended; 12 U. S. C. 1464.

§ 149.1 *Procedure upon taking possession.* Upon taking possession, pursuant to § 147.7 of this subchapter, the receiver shall forthwith:

(a) Post a notice in substantially the following form on the door of the home office of such association:

---------- Federal Savings and Loan Association ----------, ----------, ----------, is in the hands of the Federal Savings and Loan Insurance Corporation as receiver under appointment by the Federal Home Loan Bank Board.

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION AS RECEIVER,

By ----------
(Title)

----------
(Date)

(b) Notify, by written notice served personally or by registered mail or telegraph, all banks, trust companies, and all other individuals, partnerships, corporations and associations known to it to be holding or in possession of any assets of such associations; and

(c) File with the Secretary to the Board a statement (1) that it has taken possession, pursuant to § 147.7 of this subchapter, of such Federal association, and (2) of the posting and time of posting of the notice pursuant to the provisions of paragraph (a) of this section, together with a copy of such notice; and such statement shall be conclusive evidence of the posting and time of posting of such notice. Notice of appointment of a receiver or conservator shall forthwith be filed for publication in the FEDERAL REGISTER.

§ 149.2 *Disposition.* Unless the Board shall otherwise order, the receiver shall, within 20 days of its appointment, recommend to the Board a plan for the reorganization, consolidation, merger, liquidation or other disposition of the association. Such recommended plan may provide that the receiver as such may (a) take over the assets of and operate the association, (b) take such action as may be necessary to put it in a sound and solvent condition, (c) merge it with another insured institution, (d) organize a new Federal savings and loan association to take over its assets, or (e) proceed to liquidate its assets in an orderly manner. The Board shall thereupon adopt a plan which may provide for the reorganization, consolidation, merger, liquidation or other disposition of the association, which plan, including any amendments thereto and substitutions therefor ordered at any time by the Board, shall be carried into effect by the receiver. The facilities of the Board may be availed of in carrying out the plan.

§ 149.3 *Powers and duties of receiver.* The receiver, after posting notice pursuant to § 149.1, shall, in its name, in the name of the association, in the name of both, or otherwise, collect all obligations and money due such association, and may, in its name, in the name of the association, in the name of both, or otherwise:

(a) Do all things desirable or expedient in its discretion to carry on the business of such association to an extent consistent with its appointment and to preserve and conserve the assets and property of every nature of such association, but shall not declare, credit, pay or distribute dividends on its savings accounts except with the approval of the Board or of the Director;

(b) Exercise all the rights and powers of such association, including, without any limitation on the generality of the foregoing, any rights and powers under any mortgage, deed of trust, chose in action, option, collateral note, contract, judgment or decree, share or certificate of share of stock, or instrument of any nature;

(c) Pay off and discharge any taxes, assessments, liens, claims, or charges of any nature against the association or the receiver or any asset or property of any nature of such association;

(d) Pay out and expend such sums as it shall deem necessary or advisable for or in connection with the preservation, maintenance, conservation, protection, remodeling, repair, rehabilitation, or improvement of any asset or property of any nature of such association;

(e) Pay out and expend such sums as it shall deem necessary or advisable for or in connection with the preservation, maintenance, conservation, or protection of, or pay off and discharge any taxes, assessments, liens, claims, or charges of any nature against, any asset or property of any nature on which the association or the receiver has a lien by way of mortgage, deed of trust, pledge or otherwise, or in which the association or receiver has an interest of value of any nature;

(f) Institute, prosecute, maintain, defend, intervene, and otherwise participate in any and all actions, suits, or other legal proceedings by and against the receiver or association or in which the receiver, the association, or its creditors or members, or any of them, shall have an interest, and in every way to represent such association, its members and creditors;

(g) Employ any attorney or attorneys designated by, or acceptable to, the General Counsel of the Federal Home Loan Bank Board in connection with litigation or otherwise to give legal advice and assistance, for the receivership generally or in particular instances, and pay retainers and compensation of such attorney or attorneys, together with all expenses, including, but not limited to, the costs and expenses of any litigation, as approved by said General Counsel, out of the assets of the association;

(h) Execute, acknowledge, and deliver any and all deeds, contracts, leases, assignments, bills of sale, releases, extensions, satisfactions, and other instruments necessary or proper for any purposes, including, without any limitation on the generality of the foregoing, the effectuation or termination of any sale, lease or transfer of real, personal or mixed property, or that shall be necessary or proper to liquidate or carry on the business of such association. Any deed or other instrument executed pursuant to the authority hereby given shall be as valid and effectual for all purposes as if the same had been executed as the act and deed of the association or otherwise, by the officers of such association by authority of its board of directors;

(i) Deposit the moneys and funds in any bank or banks insured by the Federal Deposit Insurance Corporation or in any Federal Home Loan Bank, or any other banks or other depositories approved for such purposes by the Board. All depository bank accounts of the receiver shall be carried as follows: "Federal Savings and Loan Insurance Corporation, Receiver for ---------- Association."

(j) Sell for cash or on terms, exchange, or otherwise dispose of, in whole or in part, any mortgage, deed of trust, chose in action, bond, note, contract, judgment or decree, share or certificate of share of stock or debt, owing to such association;

(k) Sell for cash or on terms, exchange or otherwise dispose of, in whole or in part, any or all of the assets and property of the association, real, personal, and mixed, tangible and intangible, of any nature;

(l) Surrender, abandon, and release any choses in action, or other assets or property of any nature, whether the subject of pending litigation or not, and reject or repudiate any lease or contract which it considers burdensome;

(m) Settle, compromise, or obtain the release of, for cash or other considerations, claims and demands against such association or the receiver;

(n) Settle, compromise, or release, for cash or other considerations, claims and demands in favor of the association or the receiver;

(o) With the approval of the Board and on terms and conditions approved by the Board, borrow money in any amount and from any source and in any manner, and execute, acknowledge and deliver notes, certificates, and other evidence of indebtedness therefor and secure the repayment thereof by the mortgage, pledge, assignment in trust or hypothecation of any or all of the property, whether real, personal, or mixed, of such association, and such borrowing may be for any purpose, including, without any limitation on the generality of the foregoing, facilitating liquidation, carrying on the business of such association, protecting or preserving the assets in its possession, declaring and paying dividends to members and creditors, providing for the expense of administration and liquidation, or aiding in the reopening or reorganization of such association;

(p) Pay out of the assets of the receivership all costs and expenses of the receivership and all costs of carrying out or exercising its rights, powers, privileges and duties as receiver, all as determined by it, except as otherwise provided in this section; and

(q) Do such things, and have such rights, powers, privileges, immunities, and duties, whether or not otherwise granted in the rules and regulations in this chapter, as shall be authorized, directed, conferred, or imposed from time to time in specific cases by order of the Board, or by amendment of the rules and regulations in this chapter. For the purposes of this section, assets and property, without limitation on the generality thereof and including any mortgage, deed of trust, chose in action, bond, note, contract, judgment or decree, share or certificate of share of stock, or debt of the association, shall include any such asset or property of the receiver.

§ 149.4 *Creditor claims.* (a) In the event the Board shall adopt a plan providing for the liquidation of the association, as provided in § 149.2, the receiver shall promptly publish, in a newspaper printed in the English language and of general circulation in the city or county in which the home office of such Federal association is located, a notice to all creditors of such Federal association to present their claims with proof thereof to such receiver on or before a date specified in such notice. The date specified in such notice shall be at least 90 days after the date of the first publication of such notice (Sundays and holidays included). Such notice shall be similarly published on dates approximately one month and two months respectively after the date of such first publication. Claims not filed within such period shall be disallowed, except as they may thereafter be approved by the Board for payment in whole or in part out of the assets of said Federal association remaining undistributed at the time of such approval. The receiver shall mail a similar notice to any creditor, shown to be such on the books of the association, at the last address of such creditor as the same shall appear on such books.

(b) Any claim proved to the satisfaction of the receiver shall be allowed by the receiver except as provided in paragraph (a) of this section. The receiver may disallow in whole or in part or reject in whole or in part any creditor claim or claim of security, preference or priority not proved to its satisfaction, and notice of such disallowance or rejection together with the reason therefor shall be served by the receiver upon the claimant. The mailing of notice of such disallowance or rejection to the last known address of any claimant appearing on the books or the proof of claim shall be deemed sufficient for the purposes hereof. Unless such claimant shall within 30 days after the mailing of such notice (Sundays and holidays included) file with the Board written request for payment regardless of such disallowance or rejection by the receiver, such disallowance or rejection shall be final except as the Board may otherwise determine in its discretion.

(c) Upon the expiration of the time fixed for the presentation of creditor claims by the notice provided for in paragraph (a) of this section, the receiver shall cause to be filed with the Board a full and complete list of such claims presented. Such list shall indicate the character of each claim therein listed and whether or not allowed by the receiver. At such other date or dates as may be ordered by the Board or determined by the receiver, a list of claims presented before such date shall be filed with the Board.

(d) Allowed creditor claims, and creditor claims approved for payment by the Board regardless of disallowance or non-allowance by the receiver, shall be paid by the receiver, from time to time, to the extent that funds are available, in such manner and amount as may be directed by the Board.

§ 149.5 *Share interest claims.* (a) In the event the Board shall adopt a plan providing for the liquidation of the association, as provided in § 149.2, the receiver shall, within six months from the date of the adoption of such plan, publish, in a newspaper printed in the English language and of general circulation in the city or county in which the home office of such Federal association is located, a notice to all shareholders of such Federal association to present their sworn proofs of claim of ownership thereof to such receiver on or before a date specified in such notice. The date specified in such notice shall be 3 years after the date of the appointment of the receiver. Such notice shall urge that claims of ownership be presented promptly and shall be similarly published on dates approximately 1 year and 2 years respectively after the date of such first publication. Claims of ownership not filed within the period stated in the notice shall be disallowed, except as they may thereafter be approved by the Board for payment in whole or in part out of the assets of said Federal association remaining undistributed at the time of such approval. The receiver shall mail a similar notice to any shareholder, shown to be such on the books of the association in the possession of the receiver, at the last address of such shareholder as the same shall appear on such books: *Provided, however,* That such notice need not be mailed to the holder of a share account that has been surrendered and transferred to, or is in the process of being surrendered and transferred to, the Federal Savings and Loan Insurance Corporation. At the time of the declaration of the first liquidating dividend, the receiver shall credit to a special reserve the proportionate shares of such liquidating dividend otherwise payable to the holders of unclaimed share accounts shown on the books of the association which appear to be outstanding and valid, and similar credits shall from time to time be made for any subsequent liquidating dividends as the same may be declared before the date specified in the notice provided for in this paragraph. The final liquidating divi-

dend to shareholders whose claims of ownership have been allowed may include any sums held in such accounts or any portion thereof, but such dividend shall in no event be paid before the date specified in the notice provided in this paragraph.

(b) Any share ownership proved to the satisfaction of the receiver shall be allowed by the receiver. The receiver may disallow in whole or in part any claim of share interest not proved to its satisfaction, and notice of such disallowance together with reason therefor shall be served by the receiver upon the claimant. The mailing of notice of such disallowance to the last known address of any claimant appearing on the books or proof of claim shall be deemed sufficient for the purposes hereof. Unless such claimant shall file with the Board written request for payment regardless of such disallowance or rejection by the receiver within 30 days after the mailing of such notice (Sundays and holidays included), such disallowance or rejection shall be final except as the Board shall otherwise determine in its discretion.

(c) Upon the expiration of the time fixed for the presentation of claims of share interest by the notice provided for in paragraph (a) of this section, the receiver shall cause to be filed with the Board a full and complete list of such claims presented. Such list shall indicate the character of each claim therein listed and whether or not allowed by the receiver. At such other date or dates as may be ordered by the Board or determined by the receiver, a list of claims presented before such date shall be filed with the Board.

(d) Upon the payment of insurance to the holder of a share interest, the transfer to the Federal Savings and Loan Insurance Corporation of the insured account, and the subrogation of the Federal Savings and Loan Insurance Corporation with respect to such insured account to the extent provided by law, shall be noted on the books of the receivership.

(e) Allowed claims of share interest to which the Federal Savings and Loan Insurance Corporation has become subrogated; uninsured claims of share interest allowed by the receiver, and claims of share interest approved for payment by the Board regardless of disallowance or nonallowance by the receiver, shall be paid by the receiver in liquidating dividends declared from time to time by the Board, to the extent that funds are available, in such manner and amounts as may be directed by the Board.

§ 149.6 *Inventories, examination, and reports*—(a) *Inventory.* As soon as practicable after taking possession, the receiver shall make an inventory of the assets of such association as of the date of such taking possession, showing the value as carried on the books of the association, and the security therefor, if any, in whatever form the same shall exist, with a brief description of each such asset and such security. Such assets may be listed in such groups or classes as shall, to the satisfaction of the Board, afford full information as to their character and book value, and the receiver shall include a record of the creditor and share liabilities of the association. One copy of such inventory shall promptly be filed with the Secretary to the Board, one copy with the Federal Savings and Loan Insurance Corporation, and one copy shall be retained in the principal office for liquidation of the association, so long as such office is maintained.

(b) *Examinations and audits.* Each Federal association for which a receiver has been appointed shall be examined and audited (with appraisals when deemed advisable by the Board) at least annually by the Examining Division of the Board or as otherwise directed by the Board. The cost, as determined by the Board, of examinations, including office analysis thereof, audits, and any appraisals made in connection therewith, shall be paid from the assets of the association.

(c) *Forms and reports.* The receiver may, from time to time, prescribe the accounting practices to be followed. The receiver shall make an annual report of its affairs as of June 30 of each year to the Board on forms prescribed by the Board or the receiver, and such other reports as may be from time to time required by the Board or the receiver and shall accompany each recommendation for the declaration and payment of a liquidating dividend with a report showing the available assets. One copy of the reports required in this section shall be filed with the Secretary to the Board, one copy shall be retained by the Federal Savings and Loan Insurance Corporation, and one copy shall be retained in the principal office for the liquidation of the association, so long as such is maintained.

§ 149.7 *Final discharge and release of receiver*—(a) *Final report.* At such time as the receiver shall recommend a final distribution of the assets or at such time as the receiver shall be otherwise relieved of its duties, the receiver shall file with the Board a detailed report in form satisfactory to the Board.

(b) *Final discharge.* Unless otherwise directed by the Board, upon the final liquidation of the receivership, or the completion of the duties of the receiver or at such time as the receiver shall be otherwise relieved of its duties, an examination and audit of the association in receivership shall be conducted. The accounts of the receiver shall thereupon be approved or disapproved, and, if approved, the receiver shall thereupon be given a complete and final discharge and release.

§ 149.8 *Inspection of reports.* All inventories, statements and reports of the receiver shall be in at least as many copies as required by the regulations in this chapter or as shall be otherwise directed by the Board. One copy shall be filed with the Board and a duplicate shall be filed with the Federal Savings and Loan Insurance Corporation, and each of the inventories, statements, and reports shall constitute permanent records of each liquidation open for inspection at such times and on such conditions as may be from time to time directed by the Board or, in the absence of such directions, whenever the office of the Secretary to the Board shall be open for business.

*Resolved further,* That these amendments should be made effective as soon as possible, as any delay in action authorized by these amendments to § 142.3 of Part 142, and Parts 147, 148 and 149 because of a later effective date will reduce the benefits to the parties affected thereby. All persons who may be affected by the issuance of these amendments have had a reasonable opportunity to prepare for the effective date thereof, or to take any other action which the issuance of these amendments may prompt. The proposed amendment to section 142.3 of Part 142 and the amendments of Parts 147, 148 and 149 were duly published February 4, 1956 (21 F. R. 813) and no persons have filed any written data or made oral arguments with respect thereto either within the time allotted or at any later date. There have been no substantial changes from the Proposed Rule published in 21 F. R. 813. In addition to the foregoing, these amendments are, essentially procedural in nature and are promulgated to carry into effect statutory amendments. Good cause is found, therefore, for issuing these amendments effective less than 30 days after publication in the FEDERAL REGISTER, as provided in section 4 of the Administrative Procedure Act (5 U. S. C. 1003).

These amendments shall be effective June 26, 1956.

By the Federal Home Loan Bank Board.

**Subchapter D—Federal Savings and Loan Insurance Corporation**

[No. 9718]

PART 165—TERMINATION OF INSURANCE

TERMINATION OF INSURANCE OF ACCOUNTS

JUNE 21, 1956.

Resolved that, pursuant to Part 108 of the general regulations of the Federal Home Loan Bank Board (24 CFR Part 108) and § 167.1 of the rules and regulations for insurance of accounts (24 CFR 167.1), § 165.3 of the rules and regulations for insurance of accounts (24 CFR 165.3) is hereby amended to read as follows:

§ 165.3 *Termination by the Board*—(a) *Grounds.* The grounds for termination of insurance of accounts of any insured institution shall consist of any one or more of the following:

(1) The violation by the insured institution of any of its duties as an insured institution;

(2) Continued unsafe or unsound practices by the insured institution in conducting its business; or

(3) The permitting by the insured institution, either knowingly or negligently, of any of its officers or agents to violate any provision of any law or regulation to which such insured institution is subject.

(b) *Hearing.* In the event the Board is of the opinion that one or more of the grounds enumerated in paragraph (a) of this section exists for the termination of insurance of any insured institution, the Board will furnish to the appropriate governmental authority having supervision of such insured institution a statement with respect to such practices or violations and furnish a copy thereof to the insured institution: *Provided,* That, in the event there is no such supervisory authority over an insured institution operating under state law, such statement shall be sent directly to the insured institution. The insured institution shall have a period of 120 days, or such shorter period of time as the governmental authority having supervision of such insured institution, if any, may require, within which to correct such practice or violation. If satisfactory correction has not been effected by the insured institution within the specified period of time, the Board, if it shall determine to proceed further with the matter, will give the insured institution at least 30 days' written notice of intention to terminate its status as an insured institution; and such notice shall state the grounds for such termination and the time and place of a hearing at which the insured institution may appear and be heard. Such notice shall be served upon the insured institution in the manner provided in Part 109 of this chapter. Unless such insured institution shall appear at such hearing by duly authorized representative, it shall be deemed to have consented to the termination of its status as an insured institution. The hearing shall be conducted in the manner provided in said Part 109 and in accordance with the provisions of the Administrative Procedure Act as in force and effect at the time such hearing is held.

Resolved further, that, this amendment should be made effective as soon as possible, as any delay in action authorized by this amendment because of a later effective date will reduce the benefits to the parties affected thereby. All persons who may be affected by the issuance of this amendment of § 165.3 of Part 165 have had a reasonable opportunity to prepare for the effective date thereof, or to take any other action which this amendment may prompt. This proposed amendment of § 165.3 of Part 165 was duly published February 4, 1956 (21 F. R. 813) and no persons have filed any written data or made oral arguments with respect thereto either within the time allotted or at any later date. There have been no substantial changes from the Proposed Rule published in 21 F. R. 813. In addition to the foregoing, this amendment is, essentially procedural in nature and is promulgated to carry into effect statutory amendments. Good cause is found, therefore, for issuing this amendment, effective less than 30 days after publication in the FEDERAL REGISTER, as provided in section 4 of the Administrative Procedural Act (5 U. S. C. 1003).

(Sec. 402, 48 Stat. 1256, as amended, 12 U. S. C. 1725. Interprets or applies sec. 407, 48 Stat. 1260, as amended; 12 U. S. C. 1730)

This amendment shall be effective June 26, 1956.

By the Federal Home Loan Bank Board.

[SEAL] H. CAULSEN,
*Assistant Secretary.*

## Chapter II—Federal Housing Administration, Housing and Home Finance Agency

**Subchapter M—Military and Armed Services Housing Mortgage Insurance**

PART 293a—ARMED SERVICES HOUSING INSURANCE; RIGHTS AND OBLIGATIONS OF THE MORTGAGEE UNDER THE INSURANCE CONTRACT

EDITORIAL NOTE: In FEDERAL REGISTER Document 56-4753, appearing at page 4231 of the issue for Friday, June 15, 1956, paragraph 2, in the third column, should read as follows:

2. In Part 293a, §§ 293a.1 to 293a.14 are designated as Subpart A—Military Personnel. The references therein to "this part" shall be deemed to mean "this subpart." A new Subpart B is added as follows:

---

## TITLE 26—INTERNAL REVENUE, 1954

## Chapter I—Internal Revenue Service, Department of the Treasury

**Subchapter E—Alcohol, Tobacco, and Other Excise Taxes**

[T. D. 6185]

PART 270—CIGARS AND CIGARETTES: MANUFACTURERS, IMPORTERS, AND DEALERS

OPTIONAL DAILY RETURN SYSTEM FOR TAXPAYMENT OF CIGARS

In order to prescribe provisions for an optional daily return system for taxpayment of cigars and to make miscellaneous amendments, regulations in 26 CFR (1954) Part 270 are hereby amended as follows:

PARAGRAPH 1. Section 270.64 is amended by deletion in its entirety and insertion of a new section to read as follows:

§ 270.64 *Liability for tax and method of payment.* The taxes imposed on cigars and cigarettes shall be determined at the time of removal of such products. The tax imposed on cigarettes shall be paid by the manufacturer or the importer by the affixture of internal revenue tax stamps to each package of such products before removal. The tax imposed on cigars shall be paid by the manufacturer by return in accordance with the provisions of Subpart L of this part and by the importer by return in accordance with the provisions of Subpart M of this part: *Provided,* That a manufacturer or an importer of cigars shall have the option, in lieu of shifting over to the payment of tax by return, of continuing to pay the tax on cigars by the affixture of internal revenue tax stamps to each package of such products before removal. Each manufacturer who intends to pay the tax on cigars by return shall submit notice of such intention to the assistant regional commissioner, at least 5 days in advance of the day on which he desires to shift over to the return system. After exercising his option to pay the tax by return, a manufacturer may not revert to the payment of such taxes by stamp.

(68A Stat. 707; 26 U. S. C. 5703)

PAR. 2. Section 270.72 is amended by deletion in its entirety and insertion of a new section to read as follows:

§ 270.72 *Disposal of forfeited, condemned, and abandoned cigars and cigarettes.* When in the opinion of any Federal, State, or local officer having custody of forefeited, condemned, or abandoned cigars or cigarettes, upon which the Federal tax has not been paid, the sale thereof will not bring a price equal to such tax due and payable thereon, and the expenses incident to the sale thereof, he shall not sell, nor cause to be sold, such products for consumption in the United States. Where the products are not sold, the officer may deliver them to a Federal or State hospital or institution (if they are fit for human consumption) or cause their destruction in the manner provided in § 270.155. Where such products are sold, they shall not be released by the officer having custody thereof until they are properly packaged and taxpaid, which tax shall be considered as a portion of the sales price. The tax on cigarettes shall be evidenced by the purchase from the district director of the proper internal revenue stamps and the affixture of such stamps to the packages of cigarettes. The tax on cigars may be evidenced by the purchase from the district director of the proper internal revenue stamps and the affixture of such stamps to the packages of cigars, or by the presentation to the officer having custody of the cigars of a receipt from the district director showing payment to him of the tax on the cigars. In the case of such products held by or for the Federal Government, the sale thereof shall be subject to the applicable provisions of the Regulations of the General Services Administration, Title 1, Personal Property Management.

(68A Stat. 716, 831; 26 U. S. C. 5753, 6807)

PAR. 3. Section 270.144 is amended as follows:

(A) Paragraph (a), by deletion in its entirety and insertion of a new paragraph to read as follows:

(a) *General.* All cigars and cigarettes shall, before removal, be put up by the manufacturer in packages which shall bear the stamps, class designation, and mark, as required by this subpart. Such packages shall be of such construction as will securely contain the cigars and cigarettes therein and maintain such stamps, class designation, and mark thereon: *Provided,* That cigars and cigarettes transferred to another manufacturer of such products, removed for export, furnished for consumption by

employees, or used for experimental purposes, shall be exempt from the provisions of this paragraph.

(B) Paragraph (b), by deletion of the word "the" and insertion, in lieu thereof, of the word "such"; and insertion before the word "mark" of the expression "the warning of the".

PAR. 4. Section 270.146 is amended by deletion in its entirety and insertion of a new section to read as follows:

§ 270.146 *Mark.* Every package of cigars and cigarettes subject to tax shall, before removal, have legibly imprinted thereon, or on a label securely affixed thereto, the name and location of the manufacturer, or his permit number. Where the tax on the contents of a package is paid by the affixture of stamps thereon, the package shall also bear a warning reading "Law forbids the reuse of the Federal stamps hereon and requires the person who empties this package to destroy such stamps when the package is emptied." Where the tax on the contents of a package of cigars is payable by return, the package shall also bear the number of cigars contained in such package.

(68A Stat. 713; 26 U. S. C. 5723)

PAR. 5. Section 270.149 is amended by deletion in its entirety and insertion of a new section to read as follows:

§ 270.149 *Affixture of stamps.* Every manufacturer of cigars who, under § 270.64, pays the tax by stamp, and every manufacturer of cigarettes, shall, before removal subject to tax, securely affix to each package of such products one or more stamps of such proper class and denominations as will fully taxpay the contents of such package.

(68A Stat. 713; 26 U. S. C. 5723)

PAR. 6. Section 270.153 is amended, in the first sentence, by insertion of the word "only" after the word "supervision"; and is further amended by adding a third sentence to read as follows: "If the tax on cigars removed from the factory is to be paid, or has been paid, by return, and claim for allowance or refund of the tax is to be made by the manufacturer, the procedure in § 270.162a or § 270.164, as the case may be, shall be followed."

PAR. 7. Section 270.154 is amended by deletion of the third sentence and insertion, in lieu thereof, of a new sentence to read as follows: "Where the manufacturer intends to file a claim for allowance or refund of tax on the cigars or cigarettes to be reduced to materials, he shall follow the provisions of § 270.162a, § 270.164, or § 270.165, as the case may be.

PAR. 8. Section 270.162 is amended by deletion in its entirety and insertion of a new section to read as follows:

§ 270.162 *Claim for remission of tax liability on cigars and cigarettes.* Every loss (otherwise than by theft) or destruction, by fire, casualty, or act of God, of cigars and cigarettes before removal from the factory, or after removal for tax-exempt purposes, and which are in the possession or ownership of the manufacturer of such cigars and cigarettes, shall be reported by the manufacturer to the assistant regional commissioner and the facts of such loss or destruction shall be established to his satisfaction. Claim for remission of tax liability may be filed with the assistant regional commissioner. Such claim shall be in letter form showing the nature, date, and extent of such loss or destruction, shall set forth the reasons why such tax liability should be remitted, and shall be accompanied by evidence necessary to support the claim.

(68A Stat. 709; 26 U. S. C. 5705)

PAR. 9. A new section 270.162a to read as follows is inserted:

§ 270.162a *Claim for allowance of tax*—(a) *General.* Where cigars, after removal from the factory subject to tax payable by return, and prior to the time for payment of such tax as set forth in Subpart L, are lost (otherwise than by theft) or destroyed by fire, casualty, or act of God, or are withdrawn from the market, while in the possession or ownership of the manufacturer of such cigars, relief from the payment of such tax may be extended to the manufacturer by allowance of the tax under the provisions of paragraph (b) or (c) of this section.

(b) *Cigars lost or destroyed.* Where, under the circumstances described in paragraph (a) of this section, cigars are lost (otherwise than by theft) or destroyed by fire, casualty, or act of God, and the manufacturer desires relief from the tax on the cigars, such loss or destruction shall be reported promptly by the manufacturer to the assistant regional commissioner of the region in which the removal of the cigars from the factory took place. The manufacturer shall also file claim for allowance of the tax, in letter form, showing the nature, date, and extent of such loss or destruction, together with evidence necessary to establish the validity of the claim. The claim shall be filed by the manufacturer with his tax return, Form 2135, on which the removal of such cigars is reported. The manufacturer may take a credit or deduction, on such tax return, of the amount of tax on the cigars so lost or destroyed.

(c) *Cigars withdrawn from the market.* Where, under the circumstances described in paragraph (a) of this section, cigars are withdrawn from the market by the manufacturer because of damage by fire, casualty, or act of God, or for any other reason, but are in such condition as to permit identification of the product and determination of the tax applicable to the cigars, such cigars shall be assembled by the manufacturer (1) at his factory, if the cigars are to be returned to such factory, or (2) at a suitable place, if the cigars are to be destroyed. The manufacturer shall prepare a claim, in letter form, in triplicate, which shall include a schedule of the cigars. The manufacturer shall request the assistant regional commissioner, for the region in which the cigars are assembled, to detail a revenue officer to inspect the cigars, verify the schedule thereof, and supervise the receipt of the cigars into the factory or the destruction, as the case may be. The revenue officer shall execute an appropriate certificate on all copies of the claim to show the disposition of the cigars, return the original and one copy to the manufacturer, and submit the other copy to the assistant regional commissioner. The manufacturer shall file the original copy of the claim for allowance of the tax with his tax return, Form 2135, on which the removal of the cigars is reported, and retain the copy for his records. The manufacturer may take a credit or deduction, on such tax return, of the amount of tax on the cigars so withdrawn from the market.

(68A Stat. 709; 26 U. S. C. 5705)

PAR. 10. Section 270.163 is amended by deletion of the expression ", in duplicate," from the first sentence.

PAR. 11. Section 270.164 is amended by deletion in its entirety and insertion of a new section to read as follows:

§ 270.164 *Claim for refund of tax*—(a) *General.* The tax paid on cigars by return or upon an assessment, or cigarettes upon an assessment, may be refunded to the person who paid the tax, where such tax has been paid in error. The tax paid by return on cigars which are withdrawn from the market by the manufacturer, or are lost (otherwise than by theft) or destroyed, by fire, casualty, or act of God, while in the possession or ownership of the manufacturer, may be refunded to the manufacturer. To obtain refund of tax under this section, claim for refund, Form 843, shall be filed within three years from the date of payment of the tax.

(b) *Claim based on error or on complete loss or destruction.* A claim, under the circumstances described in paragraph (a) of this section, which is based on taxpayment in error, or on complete loss or destruction of cigars or cigarettes, shall be filed with the assistant regional commissioner for the region in which the tax was paid, and the claim shall be supported by such evidence necessary to establish to the satisfaction of the assistant regional commissioner that the claim is valid.

(c) *Claim based on cigars damaged or withdrawn from the market.* Where, under the circumstances described in paragraph (a) of this section, cigars on which the tax has been paid by return are withdrawn from the market by the manufacturer because of damage by fire, casualty, or act of God, or for any other reason, but are in such condition as to permit identification of the product and determination of the tax paid, such cigars shall be assembled by the manufacturer (1) at his factory, if the cigars are to be returned to such factory, or (2) at a suitable place, if the cigars are to be destroyed, or exported with drawback of tax. The manufacturer shall prepare a schedule, in letter form, in duplicate, of such cigars. The manufacturer shall request the assistant regional commissioner, for the region in which the cigars are assembled, to detail a revenue officer to inspect the cigars, verify the schedule thereof, and supervise the receipt of the cigars into the factory or the destruction, as the case may be. The revenue officer shall execute an appropriate certificate on both copies of the schedule of cigars to show the disposition thereof, return one copy to the manufacturer for his records, and submit the other copy to the assistant regional commissioner to be associated with the manufacturer's claim. The manufacturer shall file his claim with the assistant regional commissioner for the region in which the cigars were destroyed or returned to the factory. Where such cigars are to be exported with drawback of tax, the manufacturer shall comply with the provisions in 26 CFR (1954) Part 290 relating to drawback of tax.

(68A Stat. 709; 26 U. S. C. 5705)

PAR. 12. Section 270.165 is amended as follows:

(A) Paragraph (a), by deletion of the expression ", in duplicate," from the second sentence.

(B) Paragraph (b), by deletion of the expression ", in duplicate," from the second sentence.

PAR. 13. Section 270.181 is amended by deletion of the expression "1939" and insertion, in lieu thereof, of the expression "1954".

PAR. 14. Section 270.190 is amended by deletion of paragraph (a) in its entirety and insertion of a new paragraph to read as follows:

(a) *General.* All cigars and cigarettes shall, before removal, be put up by the importer in packages which shall bear the stamps, class designation, and mark, as required by this subpart. Such packages shall be of such construction as will securely contain the cigars and cigarettes therein and maintain such stamps, class designation, and mark thereon.

PAR. 15. A new § 270.191a to read as follows is inserted:

§ 270.191a *Mark.* Every package of cigars on which tax is paid by return shall, before removal, have legibly imprinted thereon, or on a label securely affixed thereto, the number of cigars contained in such package.

(68A Stat. 713; 26 U. S. C. 5723)

PAR. 16. Section 270.193 is amended by deletion in its entirety and insertion of a new section to read as follows:

§ 270.193 *Affixture of stamps.* Every importer of cigars who, under section 270.64, pays the tax by stamp, and every importer of cigarettes, shall, before removal subject to tax, securely affix to each package of such products one or more stamps of such proper class and denominations as will fully taxpay the contents of such package.

(68A Stat. 713; 26 U. S. C. 5723)

PAR. 17. Section 270.197 is amended by deletion in its entirety and insertion of a new section to read as follows:

§ 270.197 *Claim for refund of tax*—(a) *General.* The tax paid on cigars by return or upon an assessment, or cigarettes upon an assessment, may be refunded to the person who paid the tax, where such tax has been paid in error. The tax paid by return on cigars which are withdrawn from the market by the importer, or are lost (otherwise than by theft) or destroyed, by fire, casualty, or act of God, while in the possession or ownership of the importer, may be refunded to the importer. To obtain refund of tax under this section, claim for refund, Form 843, shall be filed within three years from the date of payment of the tax.

(b) *Claim based on error or on complete loss or destruction.* A claim, under the circumstances described in paragraph (a) of this section, which is based on taxpayment in error, or on complete loss or destruction of cigars or cigarettes, shall be filed with the assistant regional commissioner, for the region in which the cigars were destroyed or returned to the factory, and the claim shall be supported by such evidence necessary to establish to the satisfaction of the assistant regional commissioner that the claim is valid.

(c) *Claim based on cigars damaged or withdrawn from the market.* Where, under the circumstances described in paragraph (a) of this section, cigars on which the tax has been paid by return are withdrawn from the market by the importer because of damage by fire, casualty, or act of God, or for any other reason, but are in such condition as to permit identification of the product and determination of the tax paid, such cigars may be taken into a domestic factory, repacked by the importer, exported with drawback of tax, or destroyed. If the cigars are to be taken into a factory, they shall be assembled at the factory. If they are to be repacked by the importer or are to be destroyed, in connection with a claim for refund, they shall be assembled in a suitable place. Where such cigars are to be taken into a factory, repacked, or destroyed, the importer shall prepare a schedule, in letter form, in duplicate, of the cigars. The importer shall request the assistant regional commissioner, for the region in which the cigars are assembled, to detail a revenue officer to inspect the cigars, verify the schedule thereof, and supervise the receipt of the cigars into the factory, the repacking, or the destruction, as the case may be. The revenue officer shall execute an appropriate certificate on both copies of the schedule of cigars to show the disposition thereof, return one copy to the importer for his records, and submit the other copy to the assistant regional commissioner to be associated with the importer's claim. The importer shall file his claim with the assistant regional commissioner for the region in which the cigars were destroyed or taken into a domestic factory. Where such cigars are to be exported with drawback of tax, the importer shall comply with the provisions of 26 CFR (1954) Part 290 relating to drawback of tax.

(68A Stat. 709; 26 U. S. C. 5705)

PAR. 18. Section 270.198 is amended as follows:

(A) Paragraph (a), by deletion of the expression ", in duplicate," from the second sentence.

(B) Paragraph (b), by deletion of the expression ", in duplicate," from the second sentence.

PAR. 19. A new § 270.199 to read as follows is inserted:

§ 270.199 *Cigars manufactured in customs bonded manufacturing warehouses.* The manufacture of cigars in customs bonded manufacturing warehouses, class 6, is governed by customs regulations. The removal of cigars from such warehouses is governed by customs regulations and applicable internal revenue regulations. Sections 270.190 and 270.191 shall apply to all cigars removed from such a warehouse for consumption in the United States. Where the tax on such cigars removed is paid by means of stamps, §§ 270.192 and 270.193 shall apply, but where the tax is to be paid by return, §§ 270.191a, 270.220, 270.221, and 270.222 shall apply: *Provided*, That the proprietor of such warehouse who intends to pay the tax on cigars by return shall file with the assistant regional commissioner a bond, Form 2100, appropriately modified, in accordance with the provisions of Subpart G.

(19 U. S. C. 1311)

PAR. 20. Section 270.210 is amended by deletion in its entirety and insertion of a new section to read as follows:

§ 270.210 *Purchase, receipt, possession, or sale of cigars and cigarettes.* The restrictions relating to the purchase, receipt, possession, sale, and offering for sale of cigars and cigarettes are set forth in section 5751, I. R. C.

PAR. 21. Section 270.212 is amended by deletion of the expression "packed and stamped by the manufacturers of such products" from the first sentence and insertion, in lieu thereof, of the expression "put up in packages bearing the stamps, class designation, and mark, as required by this part"; and is further amended by insertion of the expression "on the package, as" before the word "required" in the fourth sentence.

PAR. 22. A new Subpart L, to read as follows, is added:

SUBPART L—PAYMENT OF TAX BY RETURN ON CIGARS BY MANUFACTURERS

Sec.
270.220 Return.
270.221 Deferment of return where tax liability is less than $100.
270.222 Remittance with return.
270.223 Modification of records.
270.224 Record of removals subject to tax.

AUTHORITY: §§ 270.220 to 270.224 issued under sec. 7805, 68A Stat. 917; 26 U. S. C. 7805. Statutory provisions interpreted or applied are cited to text in parentheses.

§ 270.220 *Return.* Every manufacturer of cigars who pays the tax on cigars by return shall, except as provided in section 270.221, file a tax return, Form 2135, with the district director for each day on which cigars are removed subject to tax. The manufacturer shall file such tax return, with remittance, covering the cigars removed, not later than the close of the business day next succeeding that on which the cigars were removed: *Provided*, That where the manufacturer has deposited with the district director an additional remittance equal to, or greater than, the maximum tax liability to be incurred during any one business day, the tax return may be filed not later than the close of the second business day next succeeding the day on which the cigars

were removed. If the tax liability for any one business day exceeds the additional remittance deposited, a return covering such liability filed later than the close of the business day next succeeding that on which the cigars were removed will not be considered as having been timely filed, and further, the manufacturer will not be permitted to continue deferring the filing of his returns to the second business day unless the amount of the deposit has been appropriately increased. In no event will the filing of the return be delayed for more than one additional day because of the advance deposit: *And provided further,* That when the last day for filing a tax return with remittance falls on Saturday or Sunday, or on a legal holiday (of the particular State or of the District of Columbia wherein the return is required to be filed), the performance of such acts shall be considered timely if they are performed on the next succeeding day which is not a Saturday, Sunday, or such legal holiday: *And provided further,* That where the return and remittance are delivered by United States mail to the office of the district director, the official postmark of the United States Post Office stamped on the cover in which the return and remittance were mailed shall be deemed to be the date of delivery. The manufacturer shall retain the receipted copy of each tax return, transmitted to him by the district director, for two years following the close of the year in which such return was filed and it shall be made available for inspection by any revenue officer upon his request.

(68A Stat. 707, 896; 26 U. S. C. 5703, 7503)

§ 270.221 *Deferment of return where tax liability is less than $100.* Notwithstanding the provisions of § 270.220 regarding the filing of tax returns daily, where the gross tax liability for any one day is less than $100, the preparation of the tax return and the payment of the tax due may be deferred until the day the aggregate tax liability reaches $100, when the tax return on Form 2135 accompanied by remittance of the aggregate tax, including the tax for that day, shall be filed before the close of business on the next succeeding business day: *Provided,* That, although any such aggregate tax liability is less than $100 at the close of the last business day of a calendar month, Form 2135, to cover such tax liability, shall be prepared and filed with remittance before the close of the first business day of the following month.

(68A Stat. 707; 26 U. S. C. 5703)

§ 270.222 *Remittance with return.* The tax on cigars shall be paid by remittance to the district director with the tax return. In paying the tax, a fractional part of a cent shall be disregarded unless it amounts to one-half cent or more, in which case it shall be increased to one cent.

§ 270.223 *Modification of records and reports.* Every manufacturer who pays the tax on cigars by return shall modify the record, Form 2142 or 2143, as the case may be, and the monthly report, Form 2136, by substituting the expression "removed subject to tax" for the expression "removed taxpaid." Entry shall be made in the sections of such records and reports relating to tax stamps to the effect that the tax on cigars was "payable by return."

(68A Stat. 713, 715; 26 U. S. C. 5722, 5741)

§ 270.224 *Record of removals subject to tax.* Every manufacturer who pays the tax on cigars by return shall keep a supporting record, in addition to the record required by § 270.142, of cigars removed from his factory subject to tax and shall make the appropriate entries therein at the time of removal. Such supporting record shall show, with respect to each removal, the date of removal, the name and address of the person to whom shipped or delivered, and the class and quantity of cigars. Where the manufacturer keeps, at the factory, copies of invoices or other commercial records containing the information required as to each such removal, in such orderly manner that such information may be readily ascertained therefrom by revenue officers, such copies will be considered the supporting record required by this section. Such record shall be retained for two years following the close of the year in which the cigars were removed, and shall be made available for inspection by any revenue officer upon his request.

(68A Stat 715; 26 U. S. C. 5741)

PAR. 23. A new Subpart M, to read as follows, is added:

SUBPART M—PAYMENT OF TAX BY RETURN ON CIGARS BY IMPORTERS

Sec.
270.230 Tax payable by return.
270.231 Remittance with return.

AUTHORITY: §§ 270.230 and 270.231 issued under sec. 7805, 68A Stat. 917; 26 U. S. C. 7805. Statutory provisions interpreted or applied are cited to text in parentheses.

§ 270.230 *Tax payable by return*—(a) *After importation.* Where cigars are imported into the United States on which tax has not been paid, the importer may pay tax thereon by return. The importer shall file a tax return, Form 2135, with remittance, with the district director for each removal of such cigars from customs custody subject to tax. The importer shall secure from the district director a copy of the tax return bearing acknowledgment of receipt of the remittance. Such copy shall be presented by the importer to the appropriate customs officer before such cigars are released from customs custody. When the cigars are so released, the customs officer shall endorse the copy of Form 2135 to show release of the cigars and return this copy to the importer, who shall retain such copy of the tax return for two years following the close of the year in which the return was filed and shall make it available for inspection by any revenue officer upon his request.

(b) *Prior to importation from Puerto Rico.* Where cigars produced in Puerto Rico are to be shipped to the United States, and the manufacturer desires to pay the United States internal revenue tax on such cigars by return, prior to shipment from Puerto Rico to the United States, the manufacturer shall file a tax return, Form 2135, as the importer of the cigars, with the United States Internal Revenue Service office in Puerto Rico, with remittance of the tax on the cigars covered by such tax return. The manufacturer shall secure from such office a copy of the return bearing acknowledgment of receipt of the remittance. Such copy shall be presented by the manufacturer to the representative of the Internal Revenue Service, who visits the factory for the purpose of inspecting a shipment of cigars to be sent to the United States. Such representative shall affix to the outside of the shipping cases in which the cigars are packed a certification that the United States internal revenue tax has been paid on the cigars contained in such cases. The United States Internal Revenue Service representative shall endorse the copy of the tax return, Form 2135, to show release of the cigars covered by the return, or to show the number of cigars of each class inspected and released by him for shipment to the United States where less than the total number of cigars covered by the return are so inspected and released.

(68A Stat. 707; 26 U. S. C. 5703)

§ 270.231 *Remittance with return.* The tax on imported cigars shall be paid by remittance to the district director with the tax return. In paying the tax, a fractional part of a cent shall be disregarded unless it amounts to one-half cent or more, in which case it shall be increased to one cent.

This Treasury decision is necessary to institute, on July 1, 1956, the optional daily return system for the taxpayment of cigars. Because the amendments made by this Treasury decision are of a liberalizing nature, it is found that it is unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the affective date limitations of section 4 (c) of said act.

This Treasury decision shall be effective on July 1, 1956.

(Sec. 7805, 68A Stat. 917; 26 U. S. C. 7805)

[SEAL] O. GORDON DELK,
*Acting Commissioner of Internal Revenue.*

Approved: June 21, 1956.

DAN THROOP SMITH,
*Special Assistant to the Secretary in Charge of Tax Policy.*

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

[Docket No. 11548; FCC 56-576]

[Rules Amdt. 31-6]

PART 31—UNIFORM SYSTEM OF ACCOUNTS, CLASS A AND CLASS B TELEPHONE COMPANIES

TELEPHONE PLANT UNDER CONSTRUCTION

1. The American Telephone and Telegraph Company, by letter dated December 27, 1954, requested the Commission's approval of two changes in its plant accounting practices, described as follows:

(a) Exclude from account 100.2, "Telephone plant under construction," the costs of jobs with authorized gross construction expenditures of less than $15,000 and charge the costs of such jobs directly to account 100.1, "Telephone plant in service," and

(b) Establish a limit of $15,000 for plant retirements below which retirements would not be recorded in the accounts in advance of physical removal of plant.

The Commission was of the opinion that effectuation of proposals of the type described above would require amendment of Part 31 of the Commission's Rules and Regulations. On the basis of information before it the Commission was of the view that $15,000 as the limit in the proposal set out in (a) above would be too great a relaxation of the present rule. The Commission, however, decided to invite comments from interested persons on a proposal that the cost of jobs with authorized gross construction expenditures of less than $10,000 (in lieu of the $15,000 suggested) may be charged directly to account 100.1, "Telephone plant in service." With respect to the proposal set out in (b), above, the Commission was of the opinion that the potential savings in record keeping were not sufficient to warrant further consideration of the proposal, in view of the risks involved in permitting delays in the accounting for retirement of plant that is no longer in service. Accordingly, no rule making proposal on this item was issued.

2. The Notice of Proposed Rule Making was adopted November 23, 1955. It was published in the FEDERAL REGISTER on November 30, 1955 (20 F. R. 8779) in accordance with section 4 (a) of the Administrative Procedure Act. It was provided that comments on the proposal would be received through January 3, 1956 and that ten additional days would be allowed for filing of comments and briefs in reply to the original comments. Comments were received from the following:

Kansas State Corporation Commission (Kansas).
New York Public Service Commission (New York).
North Carolina Utilities Commission (North Carolina).
Oklahoma Corporation Commission (Oklahoma).
Communications Workers of America (CWA).
United States Independent Telephone Association (USITA).
American Telephone and Telegraph Company, in behalf of the Bell System Telephone Companies (AT&T).

AT&T filed reply comments and also filed a reply to a late supplemental filing of CWA. On April 23, 1956 a letter was received from the New Mexico State Corporation Commission indicating opposition to the proposed rules revision.

3. The system of accounts presently provides that use of account 100.2, "Telephone plant under construction," is not mandatory for construction projects which will be completed ready for service within two months. The proposed revision adds to this existing exemption a provision that there may also be charged directly to the plant in service accounts the cost of any construction project for which the gross additions to plant are estimated to amount to less than $10,000. It will be seen that the net effect of the proposed revision is that use of account 100.2 would not be required for projects amounting to less than $10,000 even though they are not completed ready for service within two months.

4. AT&T, in support of the rules change contained in the Notice of Proposed Rule Making, asserted that the present two-months rule was beneficial in permitting dispensing with a considerable amount of accounting expense, as well as field reporting and related record keeping, without loss of administrative benefits and without material effect on the accounts. It argues, however, that the two-months rule without an accompanying amount dividing line makes impossible a complete realization of the benefits of clearing the cost of minor jobs directly to telephone plant in service accounts. This is because of the necessity of constantly reviewing construction project records to see that minor jobs are not being delayed beyond two months in their completion and the cost of record adjustments when such delay is found. The tendency, as a consequence of the necessity for constant review, it is asserted, has been to treat as specific estimate undertakings all construction projects above the general level of $5,000. If the rules change is adopted it is expected by AT&T that the specific estimate monetary dividing line will be generally increased to or near to the full $10,000 limit. It is stated that, among other changes, there will be benefits flowing from the elimination of the following with respect to additional minor projects:

(a) Specific estimate authorization sheets, detailed ledger sheets and completion reports.

(b) Computation of charges for labor, material, engineering, supervision, supply expense and other costs by individual jobs.

(c) Work in connection with the transfer of charges from account 100.2 to account 100.1.

(d) Work in determination of interest during construction.

(e) Reclassification of "currently ready for service" jobs not completed within two months to "under construction" accounting status.

In addition to the above eliminations, AT&T states that development of retirement unit costs would be simplified if it were made practicable to increase the monetary limits on specific estimates. AT&T estimates cost savings to the Bell System companies from adoption of the proposal of several hundreds of thousands of dollars annually. AT&T states that the proposal will have only a negligible effect on revenue requirements from depreciation expense and rate base standpoints and should be judged more on the cost savings it will produce in reporting and record keeping.

5. The USITA in its comments stated that statements of views received from members of its Accounting Committee "indicate no objection" to the proposed change. Oklahoma also said it saw "no objection" to the change. The Accounting Bureau of the New York Public Service Commission "fully approves" the proposed amendment. Kansas, while it felt itself not in a position to comment on the relative merits of the proposed change on a nation-wide basis, expressed the opinion that the change would be without merit for adoption in Kansas at this time. North Carolina opposed the amendment on the grounds that such saving in accounting costs as might result certainly would not be major in amount while, on the other hand, the change would result in the inclusion in account 100.1, "Telephone plant in service," of construction costs "substantial in the aggregate" relating to physical plant which actually, in numerous instances, would not be placed in service for several months thereafter. This, North Carolina contends, would occasion the taking of a greater amount of depreciation prematurely and accordingly would increase the level of expenses. It added that adoption of the proposal would increase revenue requirements in two ways, (1) a larger net book cost rate base, and (2) greater depreciation expense.

6. CWA opposed the change in the rules and its opposition revolves around its statement that adoption of the change "would allow the Bell System and large independent companies to inflate their rate bases by charging to 'Telephone plant in service' equipment which is not yet in use and from which the public is receiving no benefit." CWA stated that it had no means of knowing the effect upon the accounts of the change proposed since information was not available to it of the number and total value of construction projects costing less than $10,000. It added and stressed the point,

however, that no matter how few the less-than-$10,000 projects have been in the past that fact might not be a reliable indicator of the future if the rule were changed because of the ability of telephone companies to break up large construction projects into small segments and the difficulty to regulatory bodies in detecting and taking steps to prevent such subversion of the rule. CWA requested a public hearing in the proceeding. The reply comments of AT&T, the supplemental filing of CWA (received after the closing date for receipt of comments), and the AT&T reply to the latter are not summarized herein but they are considered and given effect in the discussion following.

7. It is believed that the question of expense savings from the proposed change in accounting need not be discussed further. All parties are in agreement that there should be savings resulting although there are differences in views as to their relative magnitude. In view of the contentions made with respect to effect upon revenue requirements, in particular by CWA and also by North Carolina, the decision whether or not to adopt the proposed amendment must take into consideration the validity of the revenue requirement contentions. North Carolina foresees larger amounts of depreciation expense being accrued if the proposal is adopted. This is obviously because it assumes an unchanged depreciation rate will be applied for the longer time the book cost of plant will be carried in telephone plant in service accounts. It also overlooks the fact that the amounts in the depreciable plant accounts will be smaller by the amounts of interest during construction that would otherwise be accrued. Depreciation rates are subject to adjustment downward as service lives increase and no one is warranted in assuming that depreciation rates will not be so adjusted as conditions change. Actually, less depreciation expense in total will be accrued if the amendment is adopted because the service value will be less by the amount of interest during construction that would otherwise be accrued and service value fixes the ceiling on the amount of depreciation expense which can properly be accrued. It is, of course, true that the amounts of depreciation expense accrued by time periods will be changed somewhat.

8. The question remaining is whether or not revenue requirements, from causes other than savings through reduced record keeping and through any minor changes in depreciation expense, will be altered as a result of adopting the proposal. As has already been noted, AT&T stated in its comments that the effect on the Bell System rate base will be negligible. In computations made by the Commission's staff a similar conclusion was reached. This comes about principally because, while the amounts expended for construction will enter the plant-in-service accounts earlier under the proposal, these amounts will not include any interest capitalized while the plant is under construction as presently required in the Commission's accounting rules. At the most, the increase in revenue requirements would be slight, and this increase would be further minimized by the fact that interest during construction is not taxable income as accrued and cannot be depreciated for Federal income tax purposes. In any event, statements supplied for the record by AT&T including those filed in reply to the comments of CWA, support the conclusion that the bulk of projects under $10,000 in amount are completed in less than two months so the effect of the amendment will be small. (This is not to say, however, that the telephone companies will not realize substantial savings in record keeping since, as noted in paragraph 4, the adoption of the proposal will permit the elimination of various "paper work" particularly if, as AT&T anticipates, the specific estimate monetary dividing line is increased by the various Bell System telephone companies.) It is recognized that the timing of impact of revenue requirements by years changes somewhat but this also is minor and should not be permitted to prevent adoption of the amendment. Accordingly, the amendment to the note to account 100.2 proposed in paragraph 4 of the Notice of Proposed Rule Making will be ordered. In view of the foregoing analysis of the facts in this proceeding it does not appear that a public hearing, as requested by CWA, would contribute substantially to the record and the request of CWA for such a hearing is accordingly denied.

9. As noted in paragraph 1 above, the Commission was of the view that risks involved in permitting delays in accounting for retirement of plant no longer in service are such that it should not issue a rule making proposal establishing in the system of accounts a specific amount below which retirements would not be required to be recorded in the accounts in advance of physical removal of plant. AT&T, in its comments dated December 30, 1955, expressed the belief "that some clarification of the Commission's statement as to retirements as set forth in the proposed rule making is essential since it appears to be in conflict with the Commission's previous position." The Commission's "previous position" referred to is apparently that contained in its letter to AT&T of November 21, 1952 replying to a letter dated November 13, 1952. The USITA called attention, also, "to the practical necessity of a change in the system of accounts which would permit, under certain conditions, deferral of retirements until the plant has been physically removed." The Accounting Bureau of New York supported the Commission's decision not to issue a rule making proposal relating to retirements.

10. The system of accounts, in particular section 2–25, when read literally contemplates that retirement accounting entries shall be made without delay when plant is cut out of service except for the special provision with respect to station installations and drop and block wires contained in sub-paragraph (c) of section 2–25. The question of what could be considered compliance with the system of accounts in the matter of timing of plant retirement entries came up in 1952 and was one subject in the exchange of letters with AT&T in November, 1952. In brief, the Commission informed AT&T that a telephone company would not be considered as failing to comply with the system of accounts even though retirement entries for plant other than large individual items such as entire buildings, entire central offices, and large P. B. X.'s were delayed until the calendar month following that in which withdrawn from service. It was understood, in addition, that compliance with the system of accounts would call for accounting retirement, in the month of withdrawal from service, of large sections of plant when it was definitely known that they would not be physically removed during the following month. The Commission is advised that the Bell telephone companies have construed its reply of November 21, 1952 to the AT&T letter of November 13, 1952 to permit deferring book entries for retirement of plant when less than $5,000 is involved until the month of physical removal. The correspondence is not explicit in permitting such deferment beyond one month following withdrawal from service but it is obvious that there would have been little real relief unless the authorization were applied as it has been.

11. The Commission did not intend, by failing to include in its rule making proposal an amendment relating to retirements, to alter the position taken in its exchange of correspondence with AT&T in 1952. It appears, however, in view of the comments of AT&T and USITA, that some supplementation of the system of accounts by way of clarification regarding plant retirement accounting would be in order. Such supplemental language is included in the Order herein.

It appearing that the proposed rule making herein has indicated a need for amendment of the Commission's accounting rules;

*It is ordered*, That under Authority contained in sections 4 (i) and 220 (a) of the Communications Act of 1934, as amended, Part 31 (Uniform System of Accounts for Class A and Class B Telephone Companies) of the Commission's Rules and Regulations is amended as follows, effective January 1, 1957:

The note to the text of § 31.100:2 is amended to read as follows:

NOTE: There may be charged directly to the appropriate plant accounts the cost of any construction project which is estimated to be completed ready for service within two months. There may also be charged directly to the plant accounts the cost of any construction project for which the gross additions to plant are estimated to amount to less than $10,000.

Paragraph (a) of § 31.2–25 is amended to read as follows:

(a) To the end that the telephone plant accounts (note §§ 31.2–20, 31.2–21) shall at all times disclose the original cost (note § 31.01–3 (x)) of all property in service, the original cost of retired property, whether replaced or not (except as provided in paragraph (b) (2) of this section), shall be credited to the account or accounts in this classification to which such cost was charged. Normally, these retirement credits with respect to such plant as entire buildings, entire central offices, large private branch exchanges, all plant abandoned, and any large sections of plant withdrawn from service with knowledge that they will not be physically removed during the following month shall be entered in the accounts for the month in which use of the property ceased and no later than the next succeeding month with respect to other plant: Provided, That when literal compliance with this provision for timing of entries with respect to the property amounting to less than $5,000 retired under any one project would involve an unreasonable amount of record keeping and estimating of quantities, original costs, and salvage, such entries may be deferred until physical removal of the property or decision to abandon it in place if there is asurance that such removal or decision will not be unduly delayed. Every company shall, therefore, take such measures and establish such procedure as will insure strict compliance with these requirements. When any item of property subject to plant retirement accounting is worn out, lost, sold, destroyed, abandoned, surendered upon lapse of title, becomes permanently unserviceable, is withdrawn, or for any other reason is retired from service, the amount in the plant acounts applicable to that item shall be credited to the appropriate plant accounts, and the retirement entry shall refer to the source (or to the supporting records showing the source) in the continuing property record from which the cost was obtained. (Note also paragraph (e) of this section.)

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154; interprets or applies sec. 220, 48 Stat. 1078; 47 U. S. C. 220.)

Adopted: June 20, 1956.

Released: June 21, 1956.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
*Secretary.*

[F. R. Doc. 56–5019; Filed, June 25, 1956; 8:49 a. m.]

## TITLE 33—NAVIGATION AND NAVIGABLE WATERS

### Chapter II—Corps of Engineers, Department of the Army

PART 207—NAVIGATION REGULATIONS

MISCELLANEOUS AMENDMENTS

Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U. S. C. 1), § 207.300 governing the use and navigation of the Ohio River, Mississippi River above Cairo, Illinois, and their tributaries is hereby amended to include in footnotes appropriate remarks regarding the discontinuance of operation of Rough River Lock and Dam and revision of paragraphs (v) (1) and (w) pertaining to navigation lights at locks and dams, as follows:

§ 207.300 *Ohio River, Mississippi River above Cairo, Ill., and their tributaries; use, administration, and navigation*—(a) *Authority of Lock Masters.* • • •

NOTE 7: Operation of Rough River Lock and Dam No. 1, near Hartford, Kentucky, has been discontinued.

• • • • • •

(v) *Navigation lights for use of all locks and dams except on the Little Kanawha, Big Sandy, Muskingum, Kentucky, Barren, Rough and Green (Locks No. 3–6) Rivers, and the Illinois and Mississippi Canal.* (1) (i) At locks at all fixed dams and at locks at all movable dams when the dams are up so that there is no navigable pass through the dam, the following navigation lights will be displayed during hours of darkness:

(*a*) Three green lights visible through an arc of 360° arranged in a vertical line on the upstream end of the river (guard) wall unless the intermediate wall extends farther upstream. In the latter case, the lights will be placed on the upstream end of the intermediate wall.

(*b*) Two green lights visible through an arc of 360° arranged in a vertical line on the downstream end of the river (guard) wall unless the intermediate wall extends farther downstream. In the latter case, the lights will be placed on the downstream end of the intermediate wall.

(*c*) A single red light visible through an arc of 360° on each end (upstream and downstream) of the land (guide) wall.

(*d*) At Locks No. 1 and 2, Green River, when the locks are not in operation because of high river stages, a single red light will be visible through an arc of 360° on each end (upstream and downstream) of the lock river (guard) wall at which time the lights referred to in (*a*), (*b*), and (*c*) of this subdivision, will not be visible.

(ii) If one or more bear traps or weirs are open or partially open, which may cause a set in current conditions at the upper approach to the locks, this fact will be indicated by displaying a circular disk 5 feet in diameter, on or near the light support on the upstream end of the land (guide) wall during the hours of daylight, and will be indicated during hours of darkness by displaying a white (amber) light vertically under and 5 feet below the red light on the upstream end of the land (guide) wall.

(2) • • •

(w) Navigation lights for use at locks and dams on Little Kanaeha, Big Sandy, Muskingum, Kentucky, Barren, Rough, and Green (Locks No. 3–6) Rivers, and the Illinois and Mississippi Canal. A single red light visible through an arc of 360° shall be displayed during hours of darkness at each end of the river wall or extending guard structures until these structures are awash.

NOTE: Locks which have been closed to navigation are listed in the footnotes to paragraph (a) of this section.

• • • • • •

(Sec. 4, 28 Stat. 362, as amended; 33 U. S. C. 1) [Regs., 8 June 1956, 800.211–ENGWO]

[SEAL] JOHN A. KLEIN,
*Major General, U. S. Army,*
*The Adjutant General.*

## TITLE 49—TRANSPORTATION

### Chapter I—Interstate Commerce Commission

[Docket No. 3666]

[Order No. 24]

PART 73—SHIPPERS

PART 78—SHIPPING CONTAINER SPECIFICATIONS

MISCELLANEOUS AMENDMENTS

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 4th day of June 1956.

The matter of revision of certain regulations governing the transportation of explosives and other dangerous articles, formulated and published by the Commission, being under consideration, and

It appearing that Notice No. 24, dated February 23, 1956, setting forth certain proposed amendments to the said regulations, and the reasons therefor, and stating that consideration was to be given thereto, was published in the FEDERAL REGISTER on March 31, 1956 (21 F. R. 2045), pursuant to the provisions of section 4 of the Administrative Procedure Act; that pursuant to said notice interested parties were given an opportunity to be heard with respect to said proposed amendments; that written views or arguments were submitted to the Commission with respect to the proposed amendments;

And it further appearing that said views and arguments with respect to the proposed amendments are such as to warrant revision at this time of certain of the proposed amendments, and that in all other respects the proposed amendments set forth in the above referred-to Notice No. 24 are deemed justified and necessary:

*It is ordered*, That the aforesaid regulations governing the transportation of explosives and other dangerous articles be, and they are hereby, amended in the manner and to the extent set forth below, except for the specific deletions and modifications set forth as follows:

1. In § 73.31 paragraph (a), amend the entire table and Note 7 of the notes there-

to; add Notes 9 and 10 to paragraph (a) table; amend paragraph (f) to read as set forth below.

2. In § 73.119 amend paragraphs (a) (12), and (e) (2), and (f) (3) to read as set forth below.

3. In § 73.123 amend paragraph (a) (5) to read as set forth below.

4. In § 73.124 amend paragraph (a) (6) to read as set forth below.

5. In § 73.247 amend paragraph (a) (11) to read as set forth below.

6. In § 73.264 amend paragraph (a) (8) to read as set forth below.

7. In § 73.268 amend paragraph (b) (1) to read as set forth below.

8. Delete the entire proposed amendment to § 73.289 paragraph (a) (2).

9. In § 73.314 paragraph (a) table, amend the entry, "Vinyl methyl ether, inhibited"; amend Note 2 to paragraph (a) table; amend paragraph (b) to read as set forth below.

10. In § 73.346 amend paragraph (a) (10) as set forth below.

11. In § 73.353 amend paragraphs (a) (5) and (b) as set forth below.

12. In § 78.257 amend paragraph (a) to read as set forth below.

13. In § 78.258 amend paragraph (a) to read as set forth below.

14. In § 78.281–6 paragraph (a), amend the last sentence to read as set forth below.

15. In § 78.282–8 paragraph (a), amend the 7th sentence to read as set forth below.

16. In § 78.289–8 amend paragraph (a) to read as set forth below.

17. In § 78.293–16 delete paragraph (a) (7) and renumber paragraph (a) (8) to read (a) (7).

*It is further ordered*, That this order shall become effective August 31, 1956 and shall remain in effect until further order of the Commission;

*It is further ordered*, That compliance with the herein prescribed and amended regulations is hereby authorized on and after the date of service of this order;

*And it is further ordered*, That copies of this order be served upon all parties of record herein, and that notice shall be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing a copy thereof with the Director, Division of Federal Register.

(Sec. 204, 49 Stat. 546, as amended, sec. 835, 62 Stat. 739; 49 U. S. C. 304, 18 U. S. C. 835)

By the Commission, Division 3.

[SEAL] HAROLD D. McCOY, *Secretary.*

## PART 73—SHIPPERS

### SUBPART A—PREPARATION OF ARTICLES FOR TRANSPORTATION BY CARRIERS BY RAIL FREIGHT, RAIL EXPRESS, HIGHWAY OR WATER

Amend § 73.31 paragraph (a) table and notes thereto; paragraph (c); paragraph (f); entire paragraph (g); paragraph (h); cancel note 1 to paragraph (l) (19 F. R. 3258, June 3, 1954) (18 F. R. 802, Feb. 7, 1953) (16 F. R. 9373, Sept. 15, 1951) (20 F. R. 10162, Dec. 31, 1955) (20 F. R. 4413, June 23, 1955) (17 F. R. 9835,

Nov. 1, 1952) (15 F. R. 8278, Dec. 2, 1950) (49 CFR 1950 Rev, 1954 Supp., 73.31) to read as follows:

§ 73.31 *Qualification, maintenance, and use of tank cars.* (a) * * *

| Where these regulations call for specifications Nos.— | These specification containers may also be used subject to the provisions of the following notes— |
|---|---|
| 103 [4] [6] and 103–W [4] [6] | ARA–II [4] [6], III [4] [6] and IV. [6] |
| 103A [4] and 103A–W [4] | ARA–II [4] and III. [3] [4] |
| 103B [4] and 103B–W [4] | ARA–II [4] and III [4] rubber lined. |
| 103C–W | 103C. [5] |
| 103D–W, 103E–W, 103A–X–W | (See Note 10.) |
| 104 [4] and 104–W [4] | ARA–IV. [4] |
| 105A100 and 105A100–W | 104A [7] and 104A–W. [7] |
| 105A100–AL–W | 104A–AL–W. [7] |
| 105A300–W | ARA–V, [3] ICC–105 [3] and 105A300. [3] |
| 105A400–W | 105A400. |
| 105A500–W | 105A500. |
| 105A600–W | 105A600. |
| 106A500 and 106A500–X | ICC–27 tanks mounted on a car and classified as a multi-unit tank prior to Oct. 1, 1930. [9] |
| 106A800 and 106A800–X | None. |
| 106A800NCI | None. |
| 107A**** | None. |

[1] Tank must be tested to a pressure of 60 pounds per square inch and safety valves be set to open at a pressure of 25 pounds per square inch.

[2] Tanks and their appurtenances must have been originally designed or subsequently reconstructed for the transportation of acids.

[3] Safety valves on these cars must be set to open at a pressure not exceeding 225 pounds per square inch.

[4] Tank cars equipped with safety vents must have the vent closure so chained or otherwise fastened as to prevent misplacement.

[5] These cars must not be used for shipments of smokeless powder in water unless equipped with positive closure type bottom outlet valves.

[6] Tanks made under specification BE–27 and mounted on a car, and classified as multi-unit tank cars prior to October 1, 1930, may be continued in service until further order of the Commission, provided they have been properly retested and are fitted with valves, valve protection devices, and safety devices of approved type.

[7] Tanks must be restenciled to proper 105A–100, 105A100–W or 105A100AL–W classifications within 2 years from Aug. 31, 1956.

[8] Tanks authorized under I. C. C. Special Orders of Nov. 5, 1937, and Nov. 14, 1939, may be continued in service as provided by order and revision thereof.

[9] Cars built prior to Aug. 31, 1956, equipped with safety valves having a pressure setting of 35 pounds per square inch may be used. Cars equipped with 25 pounds per square inch safety valves may be continued in service but these valves may not be reset to 35 pounds per square inch without changing spring to a design suitable for the increased pressure setting.

[10] Existing tanks built of materials and equipped with fittings complying with these specifications must be restenciled to indicate proper classification.

* * * * *

(c) For detailed procedure to be followed in making repairs or alterations to tanks of all tank car classifications, together with methods of filing application for securing approval from the Secretary of the Mechanical Division, Association of American Railroads, see Appendix R, Association of American Railroads Code for Repairs to Tank Car Tanks.

* * * * *

(f) After alterations of tank cars or equipment therefor from original design, a certificate of compliance with the specifications, similar to that required in specifications 103, 103–W, 103AL–W, 105A100, 105A100–W, 105A100AL–W, 105A300–W, 105A300AL–W, 106A500, 107A, and 110A500–W (§§ 78.265, 78.280, 78.291, 78.270, 78.285, 78.294, 78.286, 78.300, 78.275, 78.277, and 78.293 of this chapter), respectively, must be furnished to the car owner, to the Bureau of Explosives, and to the Secretary Mechanical Division, Association of American Railroads.

(g) Tanks, interior heater systems and safety valves must be retested at intervals of time as specified in Retest Tables 1, 2, and 3.

(1) Each tank must be retested by completely filling the tank and manway nozzle, or expansion dome, with water or other liquid of similar viscosity having a temperature which must not exceed 100 degrees Fahrenheit during retest and applying a pressure as specified. The specified pressure must be held for the minimum period prescribed without leakage or evidence of distress. Calking of welded joints to stop leaks developed during retests is prohibited. Tanks in service 10 years or over must be internally inspected and interior heater systems inspected for defects which would make leakage or failure probable during transit.

(2) Anchor rivet housings, if used, must not be removed during retest. They shall be retested by applying an air pressure of 100 pounds per square inch through openings in the tank shell and must show no leakage.

(3) The tank lagging and jacket need not be removed unless leakage is indicated by a drop in pressure. When lagging is not removed, the prescribed test pressure must be held for the minimum number of minutes shown in Tables 1 and 3 for tests under this condition.

(4) Interior heater systems shall be retested with hydrostatic pressure and shall be tight at 200 pounds per square inch.

(5) Retests of exterior heater systems is not a specification requirement.

(6) Retest of safety valves: Each valve must be retested by air, or inert gas and must open at the prescribed pressure within tolerances specified or below maximum pressure permitted and must be vapor tight at or above prescribed limits. See Tables 1, 2, and 3.

(7) Repairs: Tanks must be retested before being returned to service after any repairs requiring welding, riveting or calking of rivets. Rubber lined tanks must be retested before lining is renewed. Interior heater systems must be retested after repairs or renewals of any part of heater systems.

(8) Retests of all tanks and safety valves must be certified by party making tests to owners of tank cars and to the Bureau of Explosives. Certifications must show initials and numbers of cars, pressure to which tested, date of test, place of test, and by whom test is made.

(9) Periodic retests of metal tanks, safety valves and interior heater systems, except cars in chlorine service and tanks to specifications ICC–106A500, 106A500X, 106A800, 106A800X, 106A800–NCI, 107A**** or 110A500–W, may be made at any time during the calendar year the retest falls due.

TABLE 1—RETEST PERIODS AND PRESSURES

| Classification | Tank retests: Up to 10 years | Tank retests: 10 to 22 years | Tank retests: Over 10 years | Tank retests: Over 22 years | Safety valve retest (years) | Interior heater systems retest: Up to 10 years | Interior heater systems retest: 10 to 22 years | Interior heater systems retest: Over 10 years | Interior heater systems retest: Over 22 years | Tank test (p. s. i.) | Safety valve (p. s. i.[e]) | Safety valve vapor tight (p. s. i.) (minutes) | Retest holding time (minutes) | Test time when lagging is not removed (minutes) |

[a] Tanks and safety valves in chlorine service must be retested every 2 years.

[b] Special requirements for carbon dioxide: Valves must be retested at pressure required for new construction.

[c] Safety valves indicated with * are set at specified pressure plus or minus 3 p. s. i. All other valves must be open at a pressure not exceeding that specified.

[d] A commodity for which the tank is approved may be used for filling tank and dome when retesting tanks in service not over 10 years.

[e] Safety valve retest period is same as tank retest period.

[f] Tanks must be retested before rubber lining is renewed or before being returned to service after any repairs requiring welding, riveting or calking of rivets.

TABLE 2—RETEST PERIODS AND PRESSURES

| Classification | Tank retest (years [a] [b]) | Safety valves (years [c]) | Tank test: Holding time minimum (seconds) | Tank test: Hydrostatic displacement test (p. s. i.) | Tank test: Air test for leaks (p. s. i.) | Safety valve (p. s. i.) | Safety valve vapor tight (p. s. i.) |
|---|---|---|---|---|---|---|---|
| ICC–106A500 | 5 | 2 | 30 | 500 | 100 | 375 | 300 |
| ICC–106A500X | 5 | 2 | 30 | 500 | 100 | 375 | 300 |
| ICC–106A800 | 5 | 2 | 30 | 800 | 100 | 600 | 480 |
| ICC–106A800X | 5 | 2 | 30 | 800 | 100 | 600 | 480 |
| ICC–106A800NCI | 5 | 2 | 30 | 800 | None | (*) | (*) |
| ICC–107A**** | 5 | [12] | 30 | (*) | | 375 | 300 |
| ICC–110A500–W | [e] 5 | 2 | 10 minutes | 500 hydrostatic | | | |

[a] Tank must be condemned when it leaks or permanent expansion exceeds 10 percent of the total expansion.

[b] Reports giving data showing results of these retests must be rendered by the party making the test to the owner of the tank and to the Bureau of Explosives, and each tank passing the test must be marked with the date (month and year) plainly and permanently stamped into the metal of one head or chime. For example, 1–54 for January 1954. Dates of previous tests must not be obliterated. (On ICC–107A**** tanks date should be stamped into metal of marked end.)

[c] Safety vents of the frangible disc and fusible plug types must be inspected after each loaded trip of tank as follows: Remove at least 1 vent for visual inspection and if it shows signs of deterioration, all the vents must be removed and inspected and those which do not meet the requirements must be renewed. See Note f for ICC–107A**** tanks.

[d] Each tank must be tested to a pressure at least equal to the marked test pressure of the tank.

[e] Safety valve must open at a pressure not exceeding the marked test pressure of the tank and must be vapor tight at 80 percent of the marked test pressure of the tank.

[f] ICC–107A**** tanks used for transportation of flammable gasses must have safety devices of valve type retested once in every 2 years as prescribed. When safety devices of frangible disc type are used, 1 from each car must be tested as prescribed.

[g] Tank must be condemned when it leaks or shows evidence of distress during hydrostatic test.

TABLE 3—(AAR CLASSIFICATIONS) RETEST PERIODS AND PRESSURES

| Classification | Tank retests: Up to 10 years | Tank retests: 10 to 22 years | Tank retests: Over 10 years | Tank retests: Over 22 years | Safety valve retest (years) | Interior heater systems retest: Up to 10 years | Interior heater systems retest: 10 to 22 years | Interior heater systems retest: Over 10 years | Interior heater systems retest: Over 22 years | Tank test (p. s. i.) | Safety valve (p. s. i.[b]) | Safety valve vapor tight (p. s. i. minutes) | Retest holding time (minutes) | Test time when lagging is not removed (minutes) |

[1] Unlined acid tanks.

[2] Rubber lined tanks.

[a] Tanks and safety valves in chlorine service must be retested every 2 years.

[b] Safety valves indicated with * are set at specified pressure plus or minus 3 p. s. i. All other valves must be open at a pressure not exceeding that specified.

[c] Tanks must be retested before rubber lining is renewed or before being returned to service after any repairs requiring welding, riveting or calking of rivets.

(h) Tank cars and appurtenances may be used for the transportation of any commodity for which they are authorized, as indicated on the certificate of construction. When a car is to be used for the transportation of a commodity other than those approved on the certificate of construction, it must be approved for such loading by the A. A. R. Tank Car Committee. Changes in fittings or commodity stenciling required to transfer a car from one service to another as authorized on the certificates of construction may be made only by the owner or owner's authorized agent; except, that where no change in fittings or other appurtenances is necessary, ICC–103, 103–W, 103AL–W, 103A, 103A–W, 103A–AL–W, 103A–N–W, 103B, 103B–W, 103C, 103C–W, 103D–W, and 103E–W (§§ 78.265, 78.280, 78.291, 78.266, 78.281, 78.292, 78.299, 78.267, 78.282, 78.268, 78.283, 78.297, and 78.298 of this chapter) tank cars may be transferred from one commodity service to another when authorized for the transportation of such commodity by this part.

NOTE 1: For qualification of cylinders and tank cars for compressed gases see §§ 73.34, 73.301 (g), and 73.314.

[Note 1 canceled.]

SUBPART C—FLAMMABLE LIQUIDS; DEFINITION AND PREPARATION

1. Amend § 73.119 paragraph (a) (12); cancel paragraph (a) (13) and (18); amend paragraphs (e) (2) and (f) (3) (17 F. R. 7280, 7281, Aug. 9, 1952) (16 F. R. 5323, June 6, 1951) (15 F. R. 8298, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 73.119) to read as follows:

§ 73.119 *Flammable liquids not specifically provided for.* (a) * * *

(12) Spec. 103, 103–W, 103AL–W, 103D–W, 104, 104–W, 105A100, 105A100–W, 105A100AL–W, 105A300–W, 105A300AL–W, 105A400–W, 105A500–W, 105A600–W, ARA–II,[2] ARA–III,[2] ARA–IV,[2] or ARA–IV–A[2] (§§ 78.265, 78.280, 78.291, 78.269, 78.284, 78.270, 78.285, 78.294, 78.286, 78.297, 78.287, 78.288, 78.289, or 78.300 of this chapter). Tank cars. For cars equipped with expansion domes, manhole closures must be so designed that pressure will be released automatically by starting the operation of removing the manhole cover. (See § 73.432 for shipping instructions.)

(13) [Canceled.]

* * * * *

(18) [Canceled.]

* * * * *

(e) * * *

(2) Spec. 103, 103–W, 103AL–W, 103D–W, 104, 104–W, 105A100, 105A100–W, 105A100AL–W, 105A300–W, 105A300AL–W, 105A400–W, 105A500–W, 105A600–W, ARA–II,[2] ARA–III,[2] ARA–IV,[2] or ARA–IV–A[2] (§§ 78.265, 78.280, 78.291, 78.297, 78.269, 78.284, 78.270, 78.285, 78.294, 78.286, 78.287, 78.288, 78.289, and 78.300 of this chapter). Tank cars. Cars having expansion domes must be equipped with manhole closures, identification marks, and dome placards as prescribed in (f) (4), (g), (h), and (h) (1) of this section. (See Note 1 of paragraph (f) (3) of this section.)

(f) * * *

(3) Spec. 105A100, 105A100–W, 105A100AL–W, 105A300–W, 105A300AL–W, 105A400–W, 105A500–W, 105A600–W, or ARA–IV–A[2] (§§ 78.270, 78.285, 78.294, 78.286, 78.287, 78.288, 78.289, and 78.300 of this chapter) See Note 1 of this subparagraph. Tank cars. Spec. 104 (§ 78.269 of this chapter) and ARA–IV[2] tank cars are authorized under the conditions prescribed in paragraphs (f) (4), (g), (h), and (h) (1) of this section and Note 3 of this subparagraph.

[No change in Notes.]

* * * * *

2. Amend § 73.123 paragraph (a) (5) (15 F. R. 8301, Dec. 2, 1950) (49 CFR 73.123, 1950 Rev.) to read as follows:

§ 73.123 *Ethyl chloride.* (a) * * *

(5) Spec. 105A100, 105A100–W, 105A300–W, 105A400–W, 105A500–W, 105A600–W, or ARA–IV–A[1] (§§ 78.270, 78.285, 78.286, 78.287, 78.288, and 78.289 of this chapter). Tank cars. See Note 1 of § 73.119 (f) (3). (See § 73.432 for shipping instructions.)

* * * * *

3. Amend § 73.124 paragraphs (a) (5) and Note 1 thereto, and (a) (6) (16 F. R. 5324, June 6, 1951) (15 F. R. 8301, Dec. 2, 1950) (16 F. R. 9374, Sept. 15, 1951) (49 CFR 1950 Rev., 1954 Supp., 73.124) to read as follows:

§ 73.124 *Ethylene oxide.* (a) * * *

(5) Spec. 105A100, 105A100–W, or ARA–IV–A[1] (§§ 78.270, or 78.285 of this chapter). Tank cars. See Note 1 of § 73.119 (f) (3). (See § 73.432 for shipping instructions.)

NOTE 1: Because of the present emergency and until further order of the Commission, specification ARA–IV[1] and ICC–104 and 104–W (§§ 78.269 and 78.284 of this chapter) tank cars, converted as follows, are authorized for use. Tanks must be tested to 75 pounds per square inch hydrostatic pressure and show no leakage with lagging removed. Bottom discharge outlet must be removed, the opening closed with a riveted plate, and a sump applied. Safety valves must be removed and replaced by two safety valves of the type and size used on ICC–105A100 or 105A100–W (§§ 78.270 or 78.285 of this chapter) tank cars but set to open at 60 pounds per square inch instead of 75 pounds. The various approved dome fittings now required on ICC–105A100 or 105A100–W (§§ 78.270 or 78.285 of this chapter) tank cars, must be installed in an approved manner to provide for the loading, unloading, gauging, sampling, and taking of temperature of contents without removing the manhole closure. Tank jacket must be stenciled immediately above the mark ARA–IV[1], ICC–104, or ICC–104–W (§§ 78.269 or 78.284 of this chapter) with the words "For Ethylene Oxide Only".

(6) Spec. 105A300–W, 105A400–W, 105A500–W, or 105A600–W (§§ 78.286, 78.287, 78.288, or 78.289 of this chapter). Tank cars. Tanks must be restenciled 105A100 or 105A100–W and be equipped with safety valves of the type and size used on 105A100 and 105A100–W tank cars. See Note 1 of § 73.119 (f) (3). (See § 73.432 for shipping instructions.)

* * * * *

SUBPART E—ACIDS AND OTHER CORROSIVE LIQUIDS; DEFINITION AND PREPARATION

1. Amend § 73.247 paragraphs (a) (11) and (13) (15 F. R. 8314, Dec. 2, 1950) (18 F. R. 6778, Oct. 27, 1953) (49 CFR 1950 Rev., 1954 Supp., 73.247) to read as follows:

§ 73.247 *Acetyl chloride, antimony pentachloride, benzoyl chloride, benzyl chloride, pyro sulfuryl chloride, silicon chloride, sulfur chloride (mono and di), sulfuryl chloride, thionyl chloride, tintetrachloride (anhydrous), and titanium tetrachloride.* (a) * * *

(11) Spec. 103A–N–W (§ 78.299 of this chapter). Tank cars, authorized for benzyl chloride only. When shipped in unstabilized condition, the lading must be anhydrous and must be free from impurities such as iron. All cast metal parts of the tank in contact with the lading must have a minimum nickel content of approximately 96.7 percent.

* * * * *

(13) Spec. 103A or 103A–W (§§ 78.266 or 78.281 of this chapter) tank cars. Tank cars, nickel clad at least 10 percent, authorized for stabilized benzyl chloride only. Acetyl chloride, benzoyl chloride, pyro sulfuryl chloride, sulfuryl chloride, and thionyl chloride when shipped in unstabilized condition, must be anhydrous and free from impurities such as iron.

2. Amend § 73.249 paragraph (a) (5) (15 F. R. 8314, Dec. 2, 1950) (49 CFR 73.249, 1950 Rev.) to read as follows:

§ 73.249 *Alkaline corrosive liquids, n. o. s., alkaline caustic liquids, n. o. s., and alkaline battery fluids.* (a) * * *

(5) Spec. 103, 103–W, 103A, 103A–W, 104, 104–W, 105A100, or 105A100–W (§§ 78.265, 78.280, 78.266, 78.281, 78.269, 78.284, 78.270, or 78.285 of this chapter). Tank cars.

* * * * *

3. Amend § 73.254 paragraph (a) (4) (20 F. R. 951, Feb. 15, 1955) (49 CFR 73.254, 1950 Rev.) to read as follows:

§ 73.254 *Chlorosulfonic acid and mixtures of chlorosulfonic acid-sulfur trioxide.* (a) * * *

(4) Spec. 103A, 103A–W, 103C–W, or 103E–W (§§ 78.266, 78.281, 78.283, or 78.298 of this chapter). Tank cars.

* * * * *

4. Amend § 73.263 paragraph (a) (9) (17 F. R. 9837, Nov. 1, 1952) (49 CFR 1950 Rev., 1954 Supp., 73.263) to read as follows:

§ 73.263 *Hydrochloric (muriatic) acid, hydrochloric acid mixtures, and sodium chlorite solution.* (a) * * *

(9) Spec. 103B or 103B–W (§§ 78.267 or 78.282 of this chapter). Tank cars. Authorized for acid not over 38 percent strength by weight. Except for hydrochloric (muriatic) acid of 22° Baume strength, and other fuming acids, safety vent of approved design equipped with frangible disc having ⅛ inch breather hole in the center thereof or a safety vent of approved design equipped with carbon discs permitting continuous venting may be used.

* * * * *

5. Amend § 73.264 paragraph (a) (8); cancel paragraph (a) (13) (20 F. R. 4417, June 23, 1955) (15 F. R. 8317, Dec. 2, 1950) (49 CFR 73.264, 1950 Rev.) to read as follows:

§ 73.264 *Hydrofluoric acid.* (a) * * *

(8) Spec. 103A, 103A–W, 105A100, 105A100–W, 105A300–W, 105A400–W, 105A500–W, 105A600–W, or ARA–IV–A[1] (§§ 78.266, 78.281, 78.270, 78.285, 78.286, 78.287, 78.288, and 78.289 of this chapter). Unlined metal tanks which have been subjected to adequate passivity or neutralization process. (See Note 1 to subparagraph (7) of this paragraph.) Authorized only for acid of 60 to 80 percent strength. If tanks are washed out with water they must be resubjected to passivity before reshipment.

* * * * *

(13) [Canceled.]

* * * * *

6. Cancel paragraph (a) (4) in § 73.265 (15 F. R. 8318, Dec. 2, 1950) (49 CFR 73.265, 1950 rev.)

§ 73.265 *Hydrofluosilicic acid.* (a) * * *

(4) [Canceled.]

* * * * *

7. In § 73.268 amend paragraph (b) (1); cancel paragraph (b) (2); add paragraph (c) (2) (17 F. R. 4294, May 10, 1952) (15 F. R. 8319, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 73.268) to read as follows:

§ 73.268 *Nitric acid.* * * *

(b) * * *

(1) Spec. 103C–W (§ 78.283 of this chapter). Tank cars.

(2) [Canceled.]

* * * * *

(c) * * *

(2) Spec. 103A–AL–W (§ 78.292 of this chapter). Tank car.

* * * * *

8. Amend § 73.271 paragraph (a) (7) (15 F. R. 8321, Dec. 2, 1950) (49 CFR 73.271, 1950 Rev.) to read as follows:

§ 73.271 *Phosphorus oxychloride, phosphorus trichloride, and thiophosphoryl chloride.* (a) * * *

(7) Spec. 103A, 103A–W, or 103A–N–W (§§ 78.266, 78.281, or 78.299 of this chapter). Tank cars, when the tanks of these cars are lead-lined or the tanks are made of solid nickel at least 99 percent pure and all cast metal parts of the tank in contact with the lading have a minimum nickel content of approximately 96.7 percent.

* * * * *

9. Amend § 73.272 paragraph (h) (3) (15 F. R. 8321, Dec. 2, 1950) (49 CFR 73.272, 1950 Rev.) to read as follows:

§ 73.272 *Sulfuric acid.* * * *

(h) * * *

(3) Spec. 103A or 103A–W (§ 78.266 or § 78.281 of this chapter). Tank cars. Sulfuric acid, except oleum, mixed acid (nitric and sulfuric) (nitrating acid), and other fuming acids, may be transported in ICC–103A tank cars having safety vents equipped with lead discs having a ⅛ inch breather hole in the center thereof.

* * * * *

| Kind of gas | Maximum permitted filling density, Note 1 | Required type of tank car, Note 2 |
|---|---|---|
| Butadiene (pressure not exceeding 75 pounds per square inch at 105° F.), inhibited. | Note 3 | ICC–105A100, 105A100–W, Note 9. |
| Liquid hydrocarbon gas (pressure not exceeding 75 pounds per square inch at 105° F.). | Note 6 | ICC–105A100, 105A100–W, Note 9. |
| Liquefied petroleum gas (pressure not exceeding 75 pounds per square inch at 105° F.). | Note 3 | ICC–105A100, 105A100–W, Note 9. |
| Vinyl methyl ether, inhibited. (See Note 14.) | 68 | ICC–105A100, 105A100–W, 105A300–W. |

* * * * *

NOTE 2: When tank cars marked ICC–105A300–W (§ 78.286 of this chapter) are prescribed, tank cars marked ICC–105A400–W, 105A500–W, and 105A600–W (§§ 78.287, 78.288, and 78.289 of this chapter) may also be used. When ICC–105A100 or ICC–105A100–W (§§ 78.270 or 78.285 of this chapter) tank cars are prescribed, tank cars marked ICC–105A300–W, 105A400–W, 105A500–W, and 105A600–W (§§ 78.286, 78.287, 78.288, and 78.289 of this chapter), may also be used. When tank cars marked ICC–105A100AL–W (§ 78.294 of this chapter) are prescribed, tank cars marked ICC–105A300AL–W (§ 78.300 of this chapter) may also be used. When ICC–106A500 and 106A500X (§ 78.275 of this chapter) tank cars are prescribed, tank cars marked ICC–106A800 and 106A800X (§ 78.276 of this chapter) may also be used.

* * * * *

NOTE 9: For tank cars other than 106A (§ 78.275 or 78.276 of this chapter) type, used for the transportation of liquefied flammable gases, interior pipes of loading and unloading valves must be equipped with excess flow valves of approved design.

* * * * *

(b) The gas pressure at 105° F. in any lagged tank of tank cars of specs. 105A100, 105A100–W, 105A300–W, 105A400–W, 105A500, 105A600–W (§§ 78.270, 78.285, 78.286, 78.287, 78.288, and 78.289 of this chapter), and at 130° F. in any unlagged tank of tank car of specs. 106A500, 106A500X, 106A800, 106A800X, and 110A500–W (§§ 78.275, 78.276, and 78.293 of this chapter) must not exceed three-fourth times the prescribed retest pressure of the tank. The gas pressure at 130° F. in any unlagged tank of tank cars of the 107A (§ 78.277 of this chapter) series must not exceed seven-tenths of the marked test pressure of the tank.

[No change in Note 1.]

* * * * *

SUBPART G—POISONOUS ARTICLES; DEFINITION AND PREPARATION

1. Amend § 73.346 paragraph (a) (10) (19 F. R. 8528, Dec. 14, 1954) (49 CFR 1950 Rev., 1954 Supp., 73.346) to read as follows:

§ 73.346 *Poisonous liquids not specifically provided for.* (a) * * *

(10) Spec. 103, 103–W, 103A, 103A–W, 104, 104–W, 105A100, 105A100–W, 105A300–W, 105A400–W, 105A500–W, 105A600–W (§§ 78.265, 78.280, 78.266, 78.281, 78.269, 78.284, 78.270, 78.285, 78.286, 78.287, 78.288, 78.289 of this chapter), or ARA–IV–A.[1] Tank cars.

* * * * *

2. Amend § 73.353 paragraphs (a) (5) and (b) (17 F. R. 7282, Aug. 9, 1952) (49 CFR 1950 Rev., 1954 Supp., 73.353) to read as follows:

§ 73.353 *Methyl bromide.* (a) * * *

(5) Spec. 105A100, 105A100–W, 105A300–W, 105A400–W, 105A500–W, 105A600–W, 106A500, 106A500X, or 106A800 (§§ 78.270, 78.285, 78.286, 78.287, 78.288, 78.289, 78.275, or 78.276 of this chapter). Tank cars.

(b) Outage must be sufficient to prevent tank car from becoming entirely filled with liquid at the following temperature: Spec. 105A100, 105A100–W, 105A300–W, 105A400–W, 105A500–W, or 105A600–W (§§ 78.270, 78.285, 78.286, 78.287, 78.288, or 78.289 of this chapter) at 105° F.; spec. 106A500, 106A500X, or 106A800 (§§ 78.275 or 78.276 of this chapter) at 130° F.

* * * * *

## PART 78—SHIPPING CONTAINER SPECIFICATIONS

### SUBPART I—SPECIFICATIONS FOR TANK CARS

1. Amend the Preface to Subpart I (15 F. R. 8485, Dec. 2, 1950) (49 CFR Part 78 Subpart I Preface, 1950 Rev.) to read as follows:

§ 78.256 *Preface.* (a) The following specifications for tanks are minimum requirements. Changes or modifications thereof may be made effective by further order of the Commission. See § 71.4 of this chapter reading as follows:

*Changes in tank car specifications.* (a) Proposals of changes in or additions to specifications for tanks to be mounted on or to form part of a car and to be classified as tank cars should be submitted to the Secretary, Mechanical Division, Association of American Railroads, for thorough investigation and consideration by its Committee on Tank Cars, that Committee to report its recommendations, together with objections offered to its proposals, with explanations and reasons for desired approval thereof, through said Secretary to the Commission, and such reports may be submitted to the Bureau of Explosives, as circumstances appear to warrant, for comments and suggestions before appropriate action by the Commission.

(b) Wherever the word "approved" is used in this subpart, it refers to procedure covered in § 71.5 of this chapter reading as follows:

*Procedure covering tank car construction.* (a) Complete detailed prints of new or improved types of tank car tanks and detailed prints or samples of new or improved types of equipment therefore should be submitted to the Secretary, Mechanical Division, Association of American Railroads, for thorough investigation and laboratory tests of samples by its Committee on Tank Cars.

(b) When in the opinion of the Committee such tanks or equipment therefore are in full compliance with effective specifications of the Commission and no increase in hazard is involved, their use should be permitted.

(c) When in the opinion of the Committee such tanks or equipment therefore are in full compliance with effective specifications of the Commission and a possible increase in hazard is involved, service trials should be agreed upon among interested parties before more extended use is permitted.

(d) When in the opinion of the Committee such tanks or equipment therefore do not comply with effective specifications of the Commission and service trials are desirable, approval by the Commission of the conditions of such trials must be obtained.

(e) Prompt reports of the Tank Car Committee on these matters should be made to the Commission through said Mechanical Division Secretary and should include objections to proposed modifications of the specifications and advice of any extensions of pending investigations found necessary. The Committee's expert opinions thus obtained will be given due weight by the Commission in determining appropriate final action to be taken. The merits of controversies arising under the foregoing procedure will be considered and changes in or additions to the specifications, or authorizations of service trials, will be made by the Commission as conditions appear to warrant.

2. Amend § 78.257 paragraph (a) (15 F. R. 8485, Dec. 2, 1950) (49 CFR 78.257, 1950 Rev.) to read as follows:

§ 78.257 *General.* (a) All tanks built on or after August 31, 1956, must comply with all applicable requirements of the specifications in this subpart, and maintained in accordance with § 73.31 of this chapter.

3. Amend entire § 78.258 (15 F. R. 8485, Dec. 2, 1950) (49 CFR 78.258, 1950 Rev.) to read as follows:

§ 78.258 *Specification changes.* (a) Specifications previously published are not applicable for cars and tanks mounted thereon built on or after August 31, 1956. Specifications contained herein are for new cars, or tanks therefore, built on or after August 31, 1956.

4. Amend entire § 78.259 (17 F. R. 9840, Nov. 1, 1952) (17 F. R. 4298, May 10, 1952) (15 F. R. 8485, 8486, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.259) to read as follows:

§ 78.259 *Applications for approval.* (a) Applications for approval of new or modified designs, specifications or materials for tanks and equipment therefore shall be submitted to the Secretary, Mechanical Division, Association of American Railroads for appropriate committee action.

(b) Applications for approval of designs to be used in constructing cars under these specifications, shall be submitted to said Secretary.

(c) To propose a new specification for tank cars, an applicant should furnish information to show the necessity to justify a new classification. This data should give:

(1) The method of handling the loading and unloading of the lading.

(2) The nature and properties of the lading.

(3) The reason why any existing classification cannot be used.

(d) An application for construction of cars to any new classification, and the proposed specification covering same, may be filed with the Secretary, Mechanical Division, Association of American Railroads; but construction shall be held in abeyance until after the specification has been approved. The Subcommittee on Specifications of the Committee on Tank Cars shall complete a review of the proposed specification at its earliest convenience and report its recommendations to the Committee on Tank Cars for prompt consideration. Construction or repairs not in accord with currently effective regulations is cause for rejection of an application, therefore the Committee on Tank Cars should not be asked to approve an application on any other basis other than currently effective regulations. This procedure is not intended to discourage new design within the scope of currently effective regulations; but to prevent premature construction in anticipation of the adoption of a new tank car classification.

5. Amend entire § 78.260 (15 F. R. 8486, Dec. 2, 1950) (49 CFR 78.260, 1950 Rev.) to read as follows:

§ 78.260 *Tank car heater systems; approval of designs.* (a) Application for approval of designs of heater systems for installation in new or existing tanks shall be submitted to said Secretary and approval by appropriate action obtained before cars with heater systems are placed in service.

6. Amend entire § 78.261 (15 F. R. 8486, Dec. 2, 1950) (49 CFR 78.261, 1950 Rev.) to read as follows:

§ 78.261 *Specification for interior heater systems.*—(a) *Heater pipes and fittings.* (1) When threaded joints are used, pipes shall not be less than two inch "extra strong" lap-welded steel, seamless steel, electric-resistance-welded steel, or wrought iron to current A. A. R. specifications. When the joints are welded, instead of threaded, to give them the same bending strength as the body of the pipes, the thickness of wall may be reduced 20 percent. Joints shall be made by threaded wrought couplings, forged unions, bolted flanges, or welding. A minimum number of connections shall be used.

(2) Interior heater systems shall be made of material not affected by the lading. When materials specified in subparagraph (1) of this paragraph are not suitable on account of effect of lading, other approved materials shall be used.

(b) *Return bends.* Cast iron, malleable iron or cast steel return bends shall not be used. Return bends shall be forged or made by bending the pipe. Cast or forged manifolds of approved design are permissible.

(c) *Application to tank.* All piping shall be properly secured to permit necessary expansion and contraction.

(d) *Inlets and outlets.* (1) Inlets and outlets shall be so located in any portion of dome, shell or heads of tanks or steam jacketed outlet as to afford proper self-drainage of the entire system.

(2) Breakage groove required on steam jacketed outlets.

(3) When ends of steam coils are not attached to manifold or steam jacketed outlet chamber they shall be attached to pads or reinforcements. Pads or reinforcements shall be attached to tank or dome to comply with specifications for type of car involved. Outside pipe connections to steam coils shall not be integral part of the interior coils and shall be screwed or welded, or both, into outside of pads or reinforcements.

(4) Both inlets and outlets of heater pipes shall be equipped with valve cock, cap or plug. Caps and plugs shall be secured by chain.

(e) *Compartment and multiple-tank cars.* The heater system for each compartment of a compartment tank or each tank of a multiple tank car shall be treated as a separate tank and comply with the requirements contained herein.

(f) *Tests and retests.* (1) The heater system of each tank shall be tested with hydrostatic pressure and shall be tight at 200 pounds per square inch.

(2) Similar tests shall be made after renewals of any part of heater system.

(3) Each time tanks having heater systems are retested as prescribed in the specifications therefor, the heater system shall also be retested and be tight at a hydrostatic pressure of 200 pounds per square inch.

(g) *Reports.* Reports shall be made on Certificate of Construction when heater systems are installed, including report of initial test. Reports of retests of tanks shall include retests of heater systems.

7. Cancel entire § 78.262 (15 F. R. 8486, Dec. 2, 1950) (49 CFR 78.262, 1950 Rev.)

8. Cancel entire § 78.263 (15 F. R. 8486 to 8488, Dec. 2, 1950) (49 CFR 78.263, 1950 Rev.)

9. Amend entire § 78.265 (19 F. R. 3263, June 3, 1954) (18 F. R. 3144, June 2, 1953) (17 F. R. 9840, Nov. 1, 1952) (15 F. R. 8488, 8489, 8490, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.265) to read as follows:

§ 78.265 *Specification ICC–103; riveted steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.265–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward, and must have at least one expansion dome with manway, and such other external projections as are prescribed herein. When the interior of the tank is divided into compartments, each compartment must have 2 heads designed convex outward, one expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.265–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to exterior of tank the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.265–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal seam, must be at least 240 pounds per square inch.

§ 78.265–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t = \frac{Pd}{2SE}$$

where
- $t$ = thickness in inches of thinnest plate;
- $P$ = calculated bursting pressure pounds per square inch;
- $d$ = inside diameter in inches;
- $S$ = minimum ultimate tensile strength in pounds per square inch;
- $E$ = efficiency of longitudinal riveted seam.

(See § 78.265–7 (b).)

(1) The thickness of a dished head must be determined by the following formula, but in no case be less than that specified in paragraph (b) of this section:

$$t = \frac{5PL}{6SE}$$

where
- $t$ = thickness of plate in inches;
- $P$ = calculated bursting pressure pounds per square inch;
- $L$ = main inside radius to which head is dished measured on concave side in inches;
- $S$ = minimum ultimate tensile strength in pounds per square inch;
- $E$ = efficiency of riveted joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

(b) The minimum thickness of plates, including thickness of each plate at rivet seams, must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Expansion dome sheets | Tank heads | Expansion dome heads | Interior compartment heads |
|---|---|---|---|---|---|---|
| | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* |
| 60 inches or under | 7/16 | ¼ | 5/16 | ½ | 5/16 | 3/8 |
| Over 60 to 78 inches | 7/16 | 5/16 | 5/16 | ½ | 5/16 | 3/8 |
| Over 78 to 96 inches | ½ | 3/8 | 5/16 | ½ | 5/16 | 3/8 |
| Over 96 to 112 inches | ½ | 7/16 | 5/16 | 9/16 | 5/16 | 7/16 |
| Over 112 to 122 inches | ½ | ½ | 5/16 | 9/16 | 5/16 | ½ |

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.265–5 (a), must be as prescribed in the above table. Where the cladding material does not have physical properties at least equal to that of the base plate prescribed in § 78.265–5 (a), minimum thickness of base plate must be as prescribed in the above table.

(d) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal seam, including overlaps, above the cradle.

(e) For tanks built of one piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(f) For tanks without underframe the minimum thickness of bottom sheet must not be less than 5/16 inch.

(g) When tank is divided into compartments the interior heads must comply with the requirements for interior compartment heads prescribed herein. When capacity of tank is reduced by moving in the exterior head a new exterior head of approved contour not less than 3/8 inch thickness must be applied. When the capacity is reduced by the insertion of a new interior head this head must comply with the requirements for interior compartment heads and the exterior head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, must be provided with a tapped drain hole at their lowest point, and a tapped hole at top of tank. The top hole must be closed, and the bottom hole may be closed, with not less than ¾ inch nor more than 1½ inches solid pipe plugs having standard pipe threads.

§ 78.265–5 *Material.* (a) All plates for tank and expansion dome must be made of open-hearth boiler-plate flange quality steel to an approved specification. These plates may also be clad with other metals, such as nickel.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification.

(c) Rivets must be of the same quality as used for steam boilers and other pressure vessels and be made of steel to an approved specification. When clad plates are used, the rivet heads inside the tank must be clad with the same material or rivets may be of the same material as the cladding, provided rivets have physical properties at least equivalent to rivets prescribed herein.

(d) All external projections must be made of materials specified herein.

(e) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.265–6 *Tank heads.* (a) Tank heads must be of approved contour and must be designed for pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3¾ inches except for interior heads of compartment tanks the knuckle radius must not be less than 1½ inches.

(b) Tank heads may be made of two plates joined by fusion-welding in accordance with the requirements prescribed by AAR Welding Code Appendix W, except that stress-relieving is not required if heads are heated to not less than 1200 degrees Fahrenheit for pressing. The fusion welded joint for tank heads must be located horizontally.

§ 78.265–7 *Riveting.* (a) For computing rivet areas the effective diameter of a driven rivet is the diameter of its reamed hole, which hole must in no case exceed nominal diameter of rivet by more than 1/16 inch. All rivets must be driven hot.

(b) All seams formed in the manufacture of the tank and expansion dome proper and the attachment of the expansion dome to the tank must be double riveted. Dome head, manway ring, safety valve flange and bottom outlet nozzle flange may be single or double riveted. Riveted seams and joints must be made metal to metal without interposition of other material, with the exception that the use of 2 liners not to exceed 1 inch in width and ⅛ inch in thickness, placed at an angle across the longitudinal seams between 2 rows of rivets near the internal tank heads on compartment cars to prevent the liquid from passing along the longitudinal seams from one compartment to another while cars are being water tested, will be permissible. The efficiency of double-riveted seams must be at least 70 per cent of the strength of the thinnest plate specified in § 78.265–4 (a) (1), (b) and (c). The efficiency of single riveted seams must be at least 45 per cent of the strength of the thinnest plate specified in § 78.265–4 (a) (1), (b) and (c). Use of rivets of less than 5/8-inch nominal diameter not permissible on any part of tank or attachments.

§ 78.265–8 *Calking.* (a) All seams, including those formed by attachment of expansion dome and other external projections, must be calked both inside and outside, except that inside calking of the seam formed by attachment of expansion dome to tank when tank sheet is not cut out to full diameter of the dome, is not required and outside calking of seams formed by attachment of all external projections, except the expansion dome, is not required. Split calking is prohibited.

(b) The edges of plates at all riveted seams must be beveled so that the angle of the calking edges will be between 60 and 70 degrees with the flat surface of the plate. The extreme calking edge distance, measured from center line of rivet hole, must be at least 1½ times the diameter of the hole and not more than that distance plus ¼ inch.

(c) Electric seal welding of inside calking edges only, in whole or in part, using shielded arc type of electrode, is permitted on new or existing equipment, provided the weld bead has a ⅛ inch minimum to 3/16 inch maximum throat thickness. Qualification of welders must comply with requirements prescribed by AAR Welding Code Appendix W. Welding clad material to edge of clad plates inside of tank is permitted. Other methods of covering edges of clad plates, if approved, may be used.

§ 78.265–9 *Tank mounting.* (a) The manner in which tank is supported on and securely attached to the car structure must be approved.

§ 78.265–10 *Expansion dome.* (a) The expansion dome must have a capacity, measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside dome of at least 2 percent of the total capacity of the tank and dome combined, except that when safety valve or safety vent is applied to side of dome, the effective capacity of dome must be measured from top of safety valve or safety vent opening in the side of dome to inside top of shell of tank.

(b) The opening in manway ring must be at least 16 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter, the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, and the dome pocket is not closed off in an approved manner. Dome pocket drain holes must be provided in the tank shell with nipples projecting inside the tank at least 1 inch.

(c) The dome head must be of approved contour and must be designed for pressure on concave side.

(d) The entire dome assembly, dome head assembly, or dome header assembly, including the nozzles and flanges, as required, may be built up by fusion welding, providing this detail is fabricated and stress-relieved in accordance with the requirements prescribed by AAR Welding Code Appendix W.

§ 78.265–11 *Closures for manway.* (a) The manway cover must be of approved type and designed to make it impossible to remove the cover while the interior of the tank is subjected to pressure.

(b) Manway rings and covers must be of cast, forged or fabricated steel, malleable iron or other malleable metals.

(c) All covers not hinged must be attached to outside of the dome head by at least ⅜ inch chain or its equivalent.

(d) All joints between manway covers and their seats must be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

§ 78.265–12 *Gauging, bottom outlet valve operating rod, venting, loading and unloading, and air inlet devices extending through domes of tanks.* (a) Not specification requirements. When installed, these devices including their valves or fittings must be of approved design and made of materials not subject to rapid deterioration by the lading. These devices including their valves or fittings must be provided with a protective housing. Unloading pipes must be securely anchored within the tank. Provision must be made for closing pipe connections of valves.

§ 78.265–13 *Bottom outlets.* (a) The bottom outlet, when installed, must be made of metal not subject to rapid deterioration by the lading, be of approved construction and be provided with a valve at its upper end and a liquid-tight closure at its lower end.

(b) The valve operating mechanism and outlet nozzle construction must be such as to insure against unseating of valve due to stresses or shocks incident to transportation.

(c) Bottom outlet nozzle may be of cast, fabricated or forged metal.

(d) To provide for the attachment of standard unloading connections, the bottom of the main portion of the outlet nozzle or some fixed attachment thereto, must have external Unified Form Threads, 4 threads to the inch.

(e) For outlet nozzles that project 6 inches or more from the shell of tank a "V" groove must be cut (not cast) in the upper part of outlet nozzle at a point immediately below lowest part of valve to a depth that will leave thickness of nozzle wall at the root of the "V" not over ⅜ inch. In the case of steam jacketed outlet nozzles this groove must be below the steam chamber but above the bottom of center sill construction. Where outlet nozzle is not a single piece, arrangement must be made to provide the equivalent of the breakage groove.

(f) The flange on the outlet nozzle must be of a thickness which will prevent distortion of the valve seat or valve by any change in contour of the shell resulting from expansion of lading, or other causes, and which will insure that accidental breakage of the outlet nozzle will occur at or below the "V" groove.

(g) The valve must have no wings or stem projecting below the "V" groove in the outlet nozzle. The valve seat must be readily accessible or removable for repairs, including grinding.

(h) The valve operating mechanism must have means for compensating for variation in the vertical diameter of the tank produced by expansion, weight of the liquid contents, or other causes, and should operate from the interior of the tank, but in the event the rod is carried through the dome, leakage must be prevented by packing in stuffing box and cap nut.

(i) In no case must extreme projection of bottom outlet equipment extend to within 12 inches above top of rail. All bottom outlet reducers and closures and their attachments must be secured to car by at least ⅜ inch chain or its equivalent, except that outlet closure plugs may be attached by ¼ inch chain. When the bottom outlet closure is of the combination cap and valve type, the pipe connection to the valve must be closed by a plug or cap.

§ 78.265–14 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design mounted on expansion dome. Total valve discharge capacity must be sufficient to prevent building up of pressure in the tank in excess of 45 pounds per square inch.

(b) One safety valve must be provided for each tank or compartment thereof, of 6,650 gallons capacity or less, and 2 safety valves for each tank or compartment thereof, of over 6,650 gallons capacity.

(c) Each safety valve must be set to open at a pressure of 35 pounds per square inch and be vapor tight at 28 pounds per square inch. (For tolerance see § 78.265–19.)

(d) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped must have one safety vent at least 1¾ inches inside diameter closed with a frangible disc of lead or other suitable material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids".

§ 78.265–15 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) All attachments to tank and dome must be riveted in place and calked to comply with conditions prescribed in §§ 78.265–7 and 78.265–8, or applied by other approved means of at least equal strength and efficiency. Interior heater systems, when installed, must be so constructed that the breaking off of their external connections will not cause leakage of contents of tank.

§ 78.265–16 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

§ 78.265–17 *Closures for openings.* (a) All plugs must be solid of good grade cast iron or equivalent with standard pipe thread of a length which will screw at least 6 threads inside the face of fitting or tank. Plugs when inserted from the outside of tank must have the letter "S" at least ⅜ inch in size stamped with steel stamp or cast on the outside surface to indicate the plug is solid.

§ 78.265–18 *Tests of tanks.* (a) Each tank must be tested, before being put into service, by completely filling tank and dome with water, or other liquid having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures, except safety valves or safety vents, must be in place while test is made.

(b) If tanks are to be lagged, the test of tank must be made before lagging is applied.

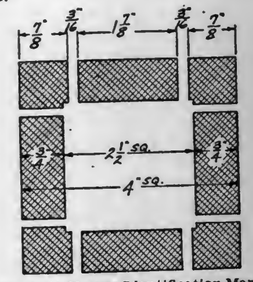
(c) Before interior heater systems are placed in service they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

§ 78.265–19 *Tests of safety valves.* (a) Each valve must be tested, before being put into service, by attaching to an air line and applying pressure. The valve must not leak below 28 pounds pressure. The valve must open at the pressure prescribed in § 78.265–14 (c), with a tolerance of plus or minus 3 pounds.

§ 78.265–20 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103 in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped mark specified in subparagraph (1) of this paragraph.



(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the builder does not complete the fabrication of the tank, such as application of riveted anchors, etc., in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(6) Date on which heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(7) Identification mark, illustrated herein, for approved manway closure must be stenciled on each side of dome, or jacket if lagged, in line with the ladders and in a color contrasting to color of dome.

Manhole Closure Identification Mark
(Reduced size)

(8) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity, followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(9) Tanks made of clad plates must be stenciled on the tank, or jacket if lagged, "(naming material) ------ clad tank". Lined tanks must be stenciled on the tank, or jacket if lagged, "(naming material) ------ lined tanks". These marks must be in letters at least 2 inches high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.265–21 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of alterations of or additions to tanks or equipment from original design and construction, there must be furnished to the same parties a report in detail of the alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

10. Amend entire § 78.266 (19 F. R. 3263, June 3, 1954) (18 F. R. 3144, June 2, 1953) (15 F. R. 8490, 8491, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.266) to read as follows:

§ 78.266 *Specification ICC–103A; riveted steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.266–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward and must have at least one expansion dome with manway, and such other external projections as are prescribed herein. When the interior of the tank is divided into compartments, each compartment must have 2 heads designed convex outward, one expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.266–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to the exterior of tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.266–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal seam, must be at least 240 pounds per square inch.

§ 78.266–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than that specified in paragraph (b) of this section.

$$t=\frac{Pd}{2SE}$$

where
$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal riveted seam.

(See § 78.266–7 (b).)

(1) The thickness of a dished head must be determined by the following formula, but in no case be less than that specified in paragraph (b) of this section.

$$t=\frac{5PL}{6SE}$$

where
$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of riveted joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

(b) The minimum thickness of plates, including thickness of each plate at rivet seams, must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Expansion dome sheets | Tank heads | Expansion dome heads | Interior compartment heads |
|---|---|---|---|---|---|---|
| | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* |
| 60 inches or under | 3/16 | 1/4 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 60 to 78 inches | 3/16 | 5/16 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 78 to 96 inches | 1/2 | 3/8 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 96 to 112 inches | 1/2 | 7/16 | 5/16 | 9/16 | 5/16 | 7/16 |
| Over 112 to 122 inches | 1/2 | 1/2 | 5/16 | 5/8 | 5/16 | 3/8 |

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.266–5 (a), must be as prescribed in the above table. Where the cladding material does not have physical properties at least equal to that of the base plate described in § 78.266–5 (a), minimum thickness of base plate must be as prescribed in the above table.

(d) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal seam, including overlaps, above the cradle.

(e) For tanks built of one piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(f) When tank is divided into compartments the interior heads must comply with the requirements for interior compartment heads prescribed herein. When capacity of tank is reduced by moving in the exterior head a new exterior head of approved contour not less than 3/8 inch thickness must be applied. When the capacity is reduced by the insertion of a new interior head, this head must comply with the requirements for interior compartment heads and the exterior head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, must be provided with a tapped drain hole at their lowest point, and a tapped hole at top of tank. The top hole must be closed, and the bottom hole may be closed, with not less than 3/4 inch nor more than 1 1/2 inches solid pipe plugs having standard pipe threads.

§ 78.266–5 *Material.* (a) All plates for tank and expansion dome must be made of open-hearth boiler-plate flange quality steel to an approved specification. These plates may also be clad with other metals, such as nickel.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification.

(c) Rivets must be of the same quality as used for steam boilers and other pressure vessels, and be made of steel to an approved specification. When clad plates are used, the rivet heads inside the tank must be clad with the same material or rivets may be of the same material as the cladding provided rivets have physical properties at least equivalent to rivets prescribed herein.

(d) All external projections must be made of materials specified herein.

(e) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.266–6 *Tank heads.* (a) Tank heads must be of approved contour and must be designed for pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3 3/4 inches except for interior heads of compartment tanks the knuckle radius must not be less than 1 1/2 inches.

(b) Tank heads may be made of two plates joined by fusion welding in accordance with the requirements prescribed by AAR Welding Code Appendix W, except that stress-relieving is not required if heads are heated to not less than 1,200 degrees Fahrenheit, for pressing. Fusion-welded joint for tank heads must be located horizontally.

§ 78.266–7 *Riveting.* (a) For computing rivet areas the effective diameter of a driven rivet is the diameter of its reamed hole, which hole must in no case exceed nominal diameter of rivet by more than 1/16 inch. All rivets must be driven hot.

(b) All seams formed in the manufacture of the tank and expansion dome proper and the attachment of the expansion dome to the tank must be double riveted. Dome head, manway ring, safety vent flange and bottom washout nozzle flange may be single or double riveted. Riveted seams and joints must be made metal to metal without interposition of other material with the exception that the use of two liners not to exceed one inch in width and 1/16 inch in thickness, placed at an angle across the longitudinal seams between two rows of rivets near the internal tank heads on compartment cars to prevent the liquid from passing along the longitudinal seams from one compartment to another while cars are being water tested, will be permissible. The efficiency of double riveted seams must be at least 70 per cent of the thinnest plate specified in § 78.266–4 (a) (1), (b) and (c). The efficiency of single riveted seams must be at least 45 per cent of the strength of the thinnest plate specified in § 78.266–4 (a) (1), (b) and (c). Use of rivets less than 5/8 inch nominal diameter not permissible on any part of tank or attachments.

§ 78.266–8 *Calking.* (a) All seams, including those formed by attachment of expansion dome and other external projections, must be calked both inside and outside, except that inside calking of the seams formed by attachment of expansion dome to tank, when tank sheet is not cut out to full diameter of dome, is not required and outside calking of seams formed by attachment of all external projections, except the expansion dome, is not required. Split calking is prohibited.

(b) The edges of plates at all riveted seams must be beveled so that the angle of the calking edges will be between 60 and 70 degrees with the flat surface of the plate. The extreme calking edge distance, measured from center line of rivet hole, must be at least 1 1/2 times the diameter of the hole and not more than that distance plus 1/4 inch.

(c) Electric seal welding of inside calking edges only, in whole or in part, using shielded arc type of electrode, is permitted on new or existing equipment, provided the weld bead has a 1/8 inch minimum to 3/16 inch maximum throat thickness. Qualification of welders must comply with requirements of AAR Welding Code Appendix W. Welding clad material to edge of clad plates inside of tank is permitted. Other methods of covering edges of clad plates, if approved, may be used.

§ 78.266–9 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

§ 78.266–10 *Expansion dome.* (a) The expansion dome must have a capacity, measured from the inside top of dome or bottom of any vent pipe projecting inside dome, of at least 1 percent of the total capacity of the tank and dome combined, except that when safety vent applied to side of dome, the effective capacity of dome must be measured from top of safety vent opening in the side of dome to inside top of shell of tank.

(b) The opening in manway ring must be 16 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, and the dome pocket is not closed off in an approved manner, dome pocket drain holes must be provided with nipples extending inside the tank at least 1 inch and the joint between the base of the dome and the tank shell must be sealed on the inside in an approved manner.

(c) The dome head must be of approved contour and must be designed for pressure on concave side.

(d) The entire dome assembly, dome head assembly, or dome header assembly, including the nozzles and flanges, as required, may be built up by fusion-welding providing this detail is fabricated and stress-relieved in accordance with the requirements prescribed in AAR Welding Code Appendix W.

§ 78.266–11 *Closures for manways.* (a) The manway cover must be bolted type, bolted and hinged type or other approved types and designed to provide a secure closure of the manway.

(b) Manway rings and covers must be of cast, forged or fabricated steel, malleable iron or other malleable metals.

(c) Chains, if used to attach manway cover to outside of dome head, must be at least 3/8 inch or its equivalent.

(d) All joints between covers and their seats must be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

§ 78.266–12 *Gauging, venting, loading and unloading, and air inlet devices extending through dome of tank.* (a) Not specification requirements. When installed these devices must be of approved design made of material not subject to rapid deterioration by the lading and be tightly closed. Protective housing not required except as prescribed in paragraph (b) of this section. Unloading pipes must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves to provide for the loading and unloading of the contents, these devices, including valves, must be of an approved design, and be provided with a protective housing. Provision must be made for closing pipe connections of the valves.

§ 78.266–13 *Bottom outlets.* (a) Bottom outlet is prohibited, but tank may be equipped with a bottom washout nozzle of metal not subject to rapid deterioration by the lading, which must be of approved construction complying with the following requirements:

(b) The construction and closure of the bottom washout nozzle must be such that it is liquid tight and should the nozzle be broken, loss of contents of the tank will not occur.

(c) The extreme projection of the bottom washout nozzle must be at least 12 inches above the top of rail.

(d) Bottom washout may be of cast, fabricated, or forged metal.

(e) The closure of the washout nozzle must be equipped with a 3/4 inch solid screw plug. Plug must be secured to car structure or washout chamber by at least a 1/4 inch chain.

(f) For bottom washout nozzles that project 6 inches or more from shell of tank a "V" groove must be cut (not cast) in the upper part of bottom washout nozzle at a point immediately below lowest part of inside closure seat to a depth that will leave thickness of nozzle wall at the root of the "V" not over 3/8 inch. Where bottom washout nozzle is not a single piece, arrangement must be made to provide the equivalent of the breakage groove.

(g) The flange on the bottom washout nozzle must be of a thickness which will prevent distortion of the inside closure seat or closure casting by any change in contour of the shell, resulting from expansion of lading, or other causes, and which will insure that accidental breakage of the washout nozzle will occur at or below the "V" groove.

(h) The closure casting must not project below the "V" groove in the washout nozzle. The closure casting and seat must be readily accessible for repairs, including grinding.

§ 78.266–14 *Safety vents.* (a) Safety valves are prohibited, but a safety vent must be applied.

(b) Each tank or compartment thereof must be equipped with one safety vent at least 1 3/4 inches inside diameter closed with a frangible disc of lead or other suitable material that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement.

§ 78.266–15 *Fixtures, reinforcements and attachments not otherwise specified.* (a) All attachments to tank and dome must be riveted in place and calked to comply with conditions prescribed in §§ 78.266–7 and 78.266–8 or applied by other approved means of at least equal strength and efficiency. Interior heater systems, when installed, must be so constructed that the breaking off of their external connections will not cause leakage of contents of tank.

§ 78.266–16 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

§ 78.266–17 *Closures for openings.* (a) All plugs must be solid of good grade cast iron or equivalent with standard pipe thread, of a length which will screw at least 6 threads inside the face of fitting or tank. Plugs when inserted from the outside of tank heads must have the letter "S" at least 3/8 inch in size stamped with steel stamp or cast on the outside surface to indicate the plug is solid.

§ 78.266–18 *Tests of tanks.* (a) Each tank must be tested, before being put into service, by completely filling tank and dome with water, or other liquid having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures, except safety vents, must be in place while test is made.

(b) If tanks are to be lagged, the test of tank must be made before lagging is applied.

(c) Test of interior heater systems. Before interior heater systems are placed in service they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

§ 78.266–19 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103A in letters and figures at least 3/8 inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank. This mark must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters at least 3/8 inch high stamped plainly and permanently into the metal immediately below the stamped mark specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, such as application of riveted anchors, etc., in letters and figures at least 3/8 inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(5) Date on which interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(6) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only" or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(7) Tanks made of clad plates must be stenciled on the tank, or jacket if lagged, "(naming material) ---------- clad tank". Lined tanks must be stenciled on the tank, or jacket if lagged, "(naming material) ---------- lined tank". These marks must be in letters at least 2 inches high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.266–20 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of alterations of or additions to tanks or equipment from original design and construction, there must be furnished to the same parties a report in detail of the alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Report of retests must be rendered to the Bureau of Explosives and car owner.

11. Amend entire § 78.267 (19 F. R. 3263, June 3, 1954) (18 F. R. 3144, June 2, 1953) (15 F. R. 8491, 8492, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.267) to read as follows:

§ 78.267 *Specification ICC–103B; rubber lined riveted steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.267–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward, and must have at least one expansion dome with manway and such other external projections as are prescribed herein. When the interior of the tank is divided into compartments, each compartment must have two heads designed convex outward, one expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.267–2 *Lagging.* (a) Not a specification requirement. If applied, the

tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to the exterior of the tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.267–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal seam, must be at least 240 pounds per square inch.

§ 78.267–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t=\frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal riveted seam.

(See § 78.267–7 (b).)

(1) The thickness of a dished head must be determined by the following formula, but in no case be less than that specified in paragraph (b) of this section.

$$t=\frac{5PL}{6SE}$$

where

$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of riveted joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

(b) The minimum thickness of plates, including thickness of each plate at rivet seams, must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Expansion dome sheets | Tank heads | Expansion dome heads | Interior compartment heads |
|---|---|---|---|---|---|---|
| | Inch | Inch | Inch | Inch | Inch | Inch |
| 60 inches or under | 7/16 | 1/4 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 60 to 78 inches | 7/16 | 5/16 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 78 to 96 inches | 1/2 | 3/8 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 96 to 112 inches | 1/2 | 7/16 | 5/16 | 5/16 | 5/16 | 7/16 |
| Over 112 to 122 inches | 1/2 | 1/2 | 5/16 | 5/8 | 5/16 | 1/2 |

(c) Tanks must be lined with rubber at least 5/32 inch thick, except that over all rivets and tank seams the lining must be double thickness. The lining must overlap at least 1½ inches at all edges, which must be straight and be beveled to an angle of approximately 45 degrees. A rubber reinforcement pad at least 4½ feet square and at least ½ inch thick must be applied by vulcanizing to the lining on bottom of tank directly under the dome. The edges of pad must be beveled to an angle of approximately 45 degrees. An opening in this pad for sump is permitted. No rubber shall be under tension when applied except that due to conformation over rivet heads. Interior of tank must be free from scale, oxidation, moisture, and all foreign matter during the lining operation.

(d) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal seam, including overlaps, above the cradle.

(e) For tanks built for one piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(f) When tank is divided into compartments the interior heads must comply with the requirements for interior compartment heads prescribed herein. When the capacity of tank is reduced by moving in the exterior head a new exterior head of approved contour not less than ⅜ inch in thickness must be applied. When the capacity is reduced by the insertion of a new interior head this head must comply with the requirements for interior compartment heads and the exterior head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, must be provided with a tapped drain hole at their lowest point, and a tapped drain hole at top of tank. The top hole must be closed, and the bottom hole may be closed, with not less than ¾ inch nor more than 1½ inch solid pipe plug having standard pipe threads.

§ 78.267–5 *Material.* (a) All plates for tank and expansion dome must be made of open-hearth boiler-plate flange quality steel to an approved specification.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification.

(c) Rivets must be of the same quality as used for steam boilers and other pressure vessels and be made of steel to an approved specification.

(d) Each tank or each compartment thereof, must be lined with an acid-resisting rubber, vulcanized or bonded directly or otherwise attached to the metal tank, to provide a non-porous laminated lining.

(e) All external projections must be made of materials specified herein.

§ 78.267–6 *Tank heads.* (a) Tank heads must be of approved contour and must be designed for pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3¾ inches except for interior heads of compartment tanks the knuckle radius must not be less than 1½ inches.

(b) Tank heads may be made of two plates joined by fusion-welding in accordance with the requirements prescribed by AAR Welding Code Appendix W, except that stress-relieving is not required if heads are heated to not less than 1200 degrees Fahrenheit for pressing. The fusion welded joint for tank heads must be located horizontally.

§ 78.267–7 *Riveting.* (a) For computing rivet areas the effective diameter of a driven rivet is the diameter of its reamed hole, which hole must in no case exceed nominal diameter of rivet by more than 1/16 inch. All rivets must be driven hot.

(b) All seams formed in the manufacture of the tank and expansion dome proper and the attachment of the expansion dome to the tank must be double riveted. Dome head, manway ring, safety vent flange and sump flange may be single or double riveted. Riveted seams and joints must be made metal to metal without interposition of other material with the exception that the use of two liners not to exceed 1 inch in width and 1/16 inch in thickness, placed at an angle across the longitudinal seams between two rows of rivets near the internal tank heads on compartment cars to prevent the liquid from passing along the longitudinal seams from one compartment to another while car is being water tested, will be permissible. The efficiency of double riveted seams must be at least 70 percent of the strength of the thinnest plate specified in § 78.267–4 (a) (1) and (b). The efficiency of single riveted seams must be at least 45 percent of the thinnest plate specified in § 78.267–4 (a) (1) and (b). Use of rivets less than ⅝ inch nominal diameter not permitted on any part of tank or attachments. All rivet heads on the inside of tank must be of uniform size, button head or similar shape, and the under surface of the heads must be driven tight against shell.

§ 78.267–8 *Calking.* (a) All seams, including those formed by attachment of expansion dome and other external projections, must be calked both inside and outside, except that inside calking of the seam formed by attachment of expansion dome to tank, when tank sheet is not cut out to full diameter of dome, is not required and outside calking of seams formed by attachment of all external projections, except the expansion dome, is not required. When the opening in tank shell is cut out to full diameter of dome, inside calking of seam formed by attachment of expansion dome to tank is required. All projecting edges of plates, castings, and rivet heads on inside of tank must be rounded and free from fins and other irregular projections. Castings must be free from porosity. Split calking is prohibited.

(b) The edges of plates at all riveted seams must be beveled so that the angle of the calking edges will be between 60 and 70 degrees with the flat surface of the plate. The extreme calking edge distance, measured from center line of rivet hole, must be at least 1½ times the diameter of the hole and not more than that distance plus ¼ inch.

§ 78.267–9 *Tank mounting.* (a) The manner in which tank is supported on and securely attached to the car structure must be approved.

§ 78.267–10 *Expansion dome.* (a) The expansion dome must have a capacity, measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside dome, of at least 1 per cent of the total capacity of the tank and dome combined, except that when safety vent is applied to side of dome, the effective capacity of dome must be measured from top of safety vent opening in the side of dome to inside top of shell of tank.

(b) The opening for manway, before lining, must be at least 18 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter, the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, and the dome pocket is not closed off in an approved manner, dome pocket drain holes must be provided in the tank shell with nipples projecting inside the tank at least 1 inch.

(c) The dome head must be of approved contour and designed for pressure on concave side.

(d) The entire dome assembly, dome head assembly, including the nozzle and flanges, as required, may be built up by fusion-welding, provided this detail is fabricated and stress-relieved in accordance with the requirements prescribed by A. A. R. Welding Code Appendix "W".

§ 78.267–11 *Closures for manway.* (a) The manway cover must be of approved type, and designed to provide a secure closure of the manway.

(b) Manway cover must be made of a suitable metal. The top, bottom and edge of manway cover must be rubber covered as prescribed in § 78.267–4 (c) and § 78.267–5 (d). Through bolt holes must be lined with rubber at least ⅛ inch in thickness. Cover made of metal not affected by the lading need not be rubber covered. All rubber surfaces on outside of tank or fittings must be protected with an age resisting coating. Manway flanges must be of cast, forged or fabricated steel, malleable iron or other malleable metals.

(c) Chains, if used to attach manway cover to outside of the dome head, must be at least ⅜ inch or its equivalent.

(d) All joints between manway cover and manway flange and between manway cover and any appurtenances mounted thereon, must be made tight against leakage.

§ 78.267–12 *Gauging, venting, loading and unloading, and air inlet devices extending through dome of tanks.* (a) When installed, these devices must be of an approved design and must be tightly closed. Protective housing not required, except when the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves to provide for the loading and unloading of the contents. These devices including the valves must be of an approved design and be provided with a protective housing. Unloading pipes must be securely anchored within the tank.

(b) When gauging, venting, loading and unloading and air inlet devices and their closures are made of material affected by the lading they must have all surfaces rubber covered as prescribed in §§ 78.267–4 (c) and 78.267–5 (d). Interior pipes of these devices must be supported at their lower end.

§ 78.267–13 *Bottom outlets.* (a) Bottom outlet is prohibited. Bottom sump is permissible. If used it must be of cast, fabricated or forged metal.

§ 78.267–14 *Safety vents.* (a) Safety valves are prohibited, but a safety vent must be applied.

(b) Each tank, or compartment thereof, must be equipped with one safety vent, lined with rubber at least ⅛ inch in thickness, having an inside diameter of at least 1¾ inches after lining, closed with a frangible disc of lead or other suitable material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement.

§ 78.267–15 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) All attachments to tank and dome must be riveted in place and calked to comply with conditions prescribed in §§ 78.267–7 and 78.267–8, or applied by other approved means of at least equal strength and efficiency. Interior heater systems, when installed, must be made of material not affected by the lading. They must be constructed so that the breaking off of their external connections will not cause leakage of contents of tank. All surfaces or attachments exposed to the lading must be rubber covered as prescribed in § 78.267–4 (c) and § 78.267–5 (d). Attachments made of metal not affected by the lading need not be rubber covered.

§ 78.267–16 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

§ 78.267–17 *Closures for openings.* (a) Closures for all openings must have all surfaces exposed to the lading rubber covered or be made of metal not affected by the lading.

§ 78.267–18 *Tests of tanks.* (a) Each tank must be tested, before rubber lining is applied, by completely filling tank and dome with water, or other liquid having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures, except safety vents, must be in place while test is made. After tank is rubber lined, no further tests are required. If tanks are to be lagged, the test of tank must be made before lagging is applied.

(b) Before interior heater systems are placed in service they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

§ 78.267–19 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103B in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the tank or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped mark specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, such as application of riveted anchors, etc., in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) "Rubber-lined tank—pressure test not required", stenciled on tank, or jacket if lagged, instead of record of test of tank.

(5) Date on which interior heater systems were last tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(6) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity, followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.267–20 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to the car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of alterations or additions to tanks and equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the alterations or additions made to each tank covered by a particular application, showing the initials and numbers of each tank involved. Reports of retests must be

rendered to the Bureau of Explosives and car owner.

(b) Before a tank car tank not originally built under this specification is lined with rubber, a report certifying that the tank and its equipment have been brought into compliance with the tank requirements of specification ICC–103B must be furnished by car owner to the party who is to apply the rubber lining. A copy of this report, together with report in approved form certifying that tank has been lined in compliance with all requirements of this specification, must be furnished by party lining the tank to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads.

12. Cancel entire § 78.268 (19 F. R. 3263, June 3, 1954) (15 F. R. 8492, 8493, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.268).

13. Amend entire § 78.269 (17 F. R. 9840, Nov. 1, 1952) (15 F. R. 8493, 8494, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.269) to read as follows:

§ 78.269 *Specification ICC–104; lagged riveted steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.269–1 *Type.* (a) Tanks built under this specification must be cylindrical, with heads designed convex outward, and must have at least one expansion dome with manway and such other external projections as are prescribed herein. When the interior of the tank is divided into compartments, each compartment must have two heads designed convex outward, one expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.269–2 *Lagging.* (a) The tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than 1/8 inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness equivalent to 1/2 that required for shell.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.269–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal seam, must be at least 240 pounds per square inch.

§ 78.269–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than specified in paragraph (b) of this section:

$$t = \frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal riveted seam.

(See § 78.269–7 (b).)

(1) The thickness of a dished head must be determined by the following formula, but in no case be less than that specified in paragraph (b) of this section.

$$t = \frac{5PL}{6SE}$$

where

$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure in pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of riveted joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

(b) The minimum thickness of plates, including minimum thickness of each plate at rivets seams, must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Expansion dome sheets | Tank heads | Expansion dome heads | Interior compartment heads |
|---|---|---|---|---|---|---|
| | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* |
| 60 inches or under | 7/16 | 1/4 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 60 to 78 inches | 7/16 | 5/16 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 78 to 96 inches | 1/2 | 3/8 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 96 to 112 inches | 1/2 | 7/16 | 5/16 | 9/16 | 5/16 | 7/16 |
| Over 112 to 122 inches | 1/2 | 1/2 | 5/16 | 5/8 | 5/16 | 1/2 |

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.269–5 (a), must be as prescribed in the above table. Where the cladding material does not have the physical properties at least equal to that of the base plate prescribed in § 78.269–5 (a), minimum thickness of base plate must be as prescribed in the above table.

(d) The minimum width of bottom sheet of tank must be 60 inches measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal seam, including overlaps, above the cradle.

(e) For tanks built of one piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(f) For tanks without underframe the minimum thickness of bottom sheet must not be less than 5/8 inch.

(g) When tank is divided into compartments the interior heads must comply with the requirements for interior compartment heads prescribed herein. When capacity of tank is reduced by moving in the exterior head, a new exterior head of approved contour not less than 3/8 inch thickness must be applied. When the capacity is reduced by the insertion of a new interior head, this head must comply with the requirements for interior compartment heads and the exterior head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, must be provided with a tapped drain hole at top of tank. The top hole must be closed, and the bottom hole may be closed, with not less than 3/4 inch nor more than 1 1/2 inch solid pipe plugs having standard pipe threads.

§ 78.269–5 *Material.* (a) All plates for tank and expansion dome must be made of open-hearth boiler-plate flange quality steel to an approved specification. These plates may also be clad with other metals, such as nickel.

(b) All castings used for fittings or attachments to tank must be made of materials to an approved specification.

(c) Rivets must be of the same quality as used for steam boilers and other pressure vessels and be made of steel to an approved specification. When clad plates are used, the rivet heads inside the tank must be clad with the same material or rivets may be of the same material as the cladding, provided rivets have physical properties at least equivalent to rivets prescribed herein.

(d) All external projections must be made of materials specified herein.

(e) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.269–6 *Tank heads.* (a) Tank heads must be of approved contour and must be designed for pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3 3/4 inches except for interior heads of compartment tanks the knuckle radius must not be less than 1 1/2 inches.

(b) Tank heads may be made of two plates joined by fusion welding in accordance with the requirements prescribed by the AAR Welding Code Appendix W, except that stress relieving is not required if heads are heated to not less than 1200 degrees Fahrenheit for pressing. The fusion-welded joint for tank heads must be located horizontally.

§ 78.269–7 *Riveting.* (a) For computing rivet areas, the effective diameter of a driven rivet is the diameter of its reamed hole, which hole must in no case exceed nominal diameter of rivet by more than 1/16 inch. All rivets must be driven hot.

(b) All seams formed in the manufacture of the tank and expansion dome proper and the attachment of the expansion dome to the tank must be double riveted. Dome head, manway ring, safety valve flange and bottom outlet nozzle flange may be double riveted. Riveted seams and joints must be made metal to metal without interposition of other material, with the exception that the use of two liners not to exceed 1 inch in width and 1/16 inch in thickness, placed at an angle across the longitudinal seams between two rows of rivets near the internal tank heads on compartment cars to prevent the liquid from passing along the longitudinal seams from one compartment to another while cars are being water tested, will be permissible. The efficiency of double riveted seams must be at least 70 percent of the strength of the thinnest plate specified in § 78.269–4 (a) (1), (b) and (c). The efficiency of single riveted seams must be at least 45 percent of the thinnest plate specified in § 78.269–4 (a) (1), (b) and (c). Use of rivets less than 5/8 inch nominal diameter not permissible on any part of tank or attachments.

§ 78.269–8 *Calking.* (a) All seams including those formed by attachments of expansion dome and other external projections, must be calked both inside and outside, except that inside calking of the seam formed by attachment of expansion dome to tank when tank sheet is not cut out to full diameter of dome, is not required and outside calking of seams formed by attachment of all external projections, except expansion dome, is not required. Split calking is prohibited.

(b) The edges of plates at all riveted seams must be beveled so that the angle of the calking edges will be between 60 and 70 degrees with the flat surface of the plate. The extreme calking edge distance, measured from center line of rivet hole, must be at least 1 1/2 times the diameter of the hole and not more than that distance plus 1/4 inch.

(c) Electric seal welding of inside calking edges only, in whole or in part, using shielded arc type of electrode, is permitted on new or existing equipment, provided the weld bead has a 1/8 inch minimum to 3/16 inch maximum throat thickness. Qualification of welders must comply with requirements prescribed by AAR Welding Code Appendix W. Welding clad material to edge of clad plates inside of tank is permitted. Other methods of covering edges of clad plates, if approved, may be used.

§ 78.269–9 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

§ 78.269–10 *Expansion dome.* (a) The expansion dome must have a capacity, measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside dome of at least 2 per cent of the total capacity of the tank and dome combined, except that when safety valve or safety vent is applied to side of dome, the effective capacity of dome must be measured from top of safety valve or safety vent opening in the side of dome to inside top of shell of tank.

(b) The opening in manway ring must be at least 16 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, and the dome pocket is not closed off in an approved manner, dome pocket drain holes must be provided in the tank shell with nipples projecting inside the tank at least 1 inch.

(c) The dome head must be of approved contour and designed for pressure on concave side.

(d) The entire dome assembly, dome head assembly, or dome header assembly, including the nozzles and flanges, as required, may be built up by fusion welding, provided this detail is fabricated and stress-relieved in accordance with the requirements prescribed by AAR Welding Code Appendix W.

§ 78.269–11 *Closures for manways.* (a) The manway cover must be of approved type and designed to make it impossible to remove the cover while the interior of the tank is subjected to pressure.

(b) Manway rings and covers must be of cast, forged or fabricated steel, malleable iron or other malleable metals.

(c) All covers not hinged must be attached to outside of the dome head by at least a 3/8 inch chain or its equivalent.

(d) All joints between manway covers and their seats must be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

§ 78.269–12 *Gauging, bottom outlet valve operating rod, venting, loading and unloading, and air inlet devices extending through domes of tanks.* (a) Venting, loading and unloading devices of approved design must be installed.

(b) Gauging, bottom outlet valve operating rod and air inlet devices are not specification requirements.

(c) When installed, these devices, including their valves and fittings must be of approved design made of metal not subject to rapid deterioration by the lading. These devices, including their valves and fittings, must be protected from accidental injury by means of a cast or fabricated housing with cover securely attached. Drain holes permitted. Unloading pipe must be securely anchored within the tank. Provision must be made for closing pipe connections of valves.

§ 78.269–13 *Bottom outlets.* (a) The bottom outlet, when installed, must be made of metal not subject to rapid deterioration by the lading, be of approved construction, and be provided with a valve at its upper end and a liquid tight closure at its lower end.

(b) The valve operating mechanism and outlet nozzle construction, must be such as to insure against unseating of valve due to stresses or shocks incident to transportation.

(c) Bottom outlet nozzle may be of cast, fabricated or forged metal.

(d) To provide for the attachment of unloading connections, the bottom of the main portion of the outlet nozzle or some fixed attachment thereto, must have external Unified Form Threads, 4 threads to the inch.

(e) For outlet nozzles that project 6 inches or more from shell of tank a "V" groove must be cut (not cast) in the upper part of outlet valve nozzle at a point immediately below lowest part of valve to a depth that will leave thickness of nozzle wall at the root of the "V" not over 3/8 inch. In the case of steam jacketed outlet nozzles this groove must be below the steam chamber but above the bottom of center sill construction. Where outlet nozzle is not a single piece, arrangement must be made to provide the equivalent of the breakage groove.

(f) The flange on the outlet nozzle must be of a thickness which will prevent distortion of the valve seat or valve by any change in contour of the shell resulting from expansion of lading, or other causes, and which will insure that accidental breakage of the outlet nozzle will occur at or below the "V" groove.

(g) The valve must have no wings or stem projecting below the "V" groove in the outlet nozzle. The valve and seat must be readily accessible or removable for repairs, including grinding.

(h) The valve operating mechanism must have means for compensating for variation if the vertical diameter of the tank produced by expansion, weight of the liquid contents, or other causes, and should operate from the interior of the tank, but in the event the rod is carried through the dome, leakage must be prevented by packing in the stuffing box and cap nut.

(i) In no case must extreme projection of bottom outlet equipment extend to within 12 inches above top of rail. All bottom outlet reducers and closures and their attachments must be secured to car by at least 3/8 inch chain or its equivalent, except that outlet closure plugs may be attached by 1/4 inch chain. When the bottom outlet closure is of the combination cap and valve type, the pipe connection to the valve must be closed by a plug or cap.

§ 78.269–14 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design mounted on expansion dome. Total valve discharge capacity must be sufficient to prevent building up of pressure in the tank in excess of 45 pounds per square inch.

(b) One safety valve must be provided for each tank, or compartment thereof, of 6,650 gallons capacity or less, and two safety valves for each tank, or compartment thereof, of over 6,650 gallons capacity.

(c) Each safety valve must be set to open at a pressure of 35 pounds per square inch and be vapor tight at 28 pounds per square inch. (For tolerance see § 78.269–19 (a).)

(d) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, Class B, need not be equipped with safety valves, but if not so equipped, must have one safety vent at least 1 3/4 inches inside diameter closed with a frangible disc of lead or other suitable material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not For Flammable Liquids".

§ 78.269–15 *Fixtures, reinforcements and attachments not otherwise specified.*

(a) All attachments to tank and dome must be riveted in place and calked to comply with conditions prescribed in §§ 78.269–7 and 78.269–8, or applied by other approved means of at least equal strength and efficiency. Interior heater systems, when installed, must be so constructed that the breaking off of their external connections will not cause leakage of contents of tank.

§ 78.269–16 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

§ 78.269–17 *Closures for openings.* (a) All plugs must be solid of good grade cast iron or equivalent with standard pipe threads, of a length which will screw at least 6 threads inside the face of fitting or tank. Plugs when inserted from the outside of tank must have the letter "S" at least ⅜ inch in size stamped with steel stamp or cast on the outside surface to indicate the plug is solid.

§ 78.269–18 *Tests of tanks.* (a) Each tank must be tested, before being put into service and before lagging is applied, by completely filling the tank and dome with water, or other liquid having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures, except safety valves or safety vents, must be in place while test is made.

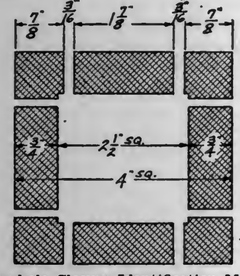
(b) Before interior heater systems are placed in service they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

§ 78.269–19 *Tests of safety valves.* (a) Each valve must be tested, before being put into service, by attaching to an air line and applying pressure. The valve must not leak below 28 pounds per square inch pressure. The valve must open at the pressure prescribed in § 78.269–14 (c) with a tolerance of plus or minus 3 pounds.

§ 78.269–20 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–104 in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the builder. This mark must also be stenciled on the jacket in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped mark specified in subparagraph (1) of this paragraph.



(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases were the tank builder does not complete the fabrication of the tank, such as application of riveted anchors, etc., in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph, by the party assembling the completed car. These marks must also be stenciled on the jacket in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(6) Date on which the interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(7) Identification mark, illustrated herein, for approved manway closure must be stenciled on each side of dome, or jacket if lagged, in line with the ladders and in a color contrasting to color of dome.

Manhole Closure Identification Mark
(Reduced size)

(8) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity, followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(9) Tanks made of clad plates must be stenciled on the jacket "(naming material) _____ clad tank". Lined tanks must be stenciled on the jacket "(naming material) _____ lined tanks". These marks must be in letters at least 2 inches high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.269–21 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of alterations of or additions to tanks or equipment from original design and construction, there must be furnished to the same parties a report in detail of the alterations or additions made to each tank covered by a particular application, showing the initials and numbers of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

14. Amend entire § 78.270 (18 F. R. 3144, June 3, 1954) (17 F. R. 9840, Nov. 1, 1952) (17 F. R. 7287, Aug. 9, 1952) (15 F. R. 8494, 8495, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.270) to read as follows:

§ 78.270 *Specification ICC–105A100; lagged riveted steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed by § 78.259 (a), (b), (c) and (d).

§ 78.270–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward. The tank must be provided with a manway nozzle and cover on top of tank of sufficient diameter to permit access to the interior of the tank and to provide for the proper mounting of venting, loading, unloading, sampling and safety valves, gauging device, thermometer well, and a protective housing on the cover. Other openings in the tank are prohibited.

§ 78.270–2 *Lagging.* (a) The tank shell and manway nozzle must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.075 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness equivalent to ½ that required for shell.

(b) Before lagging is applied, the tank surface and the entire surface of the metal jacket shall be given a protective coating.

§ 78.270–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal seam, must be at least 495 pounds per square inch.

§ 78.270–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t = \frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal riveted seam.

(See § 78.270–7 (b).)

(b) The minimum thickness of plates, including thickness of each plate at rivet seams, must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Tank heads |
|---|---|---|---|
| 87 inches or under | 9/16 | 9/16 | 13/16 |
| Over 87 to 96 inches | 5/8 | 5/8 | 7/8 |

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.270–6 (a) must be as prescribed in the above table. Where the cladding material does not have physical properties at least equal to that of the base plate prescribed in § 78.270–6 (a), minimum thickness of base plate must be as prescribed in the above table.

(d) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal seam, including overlaps, above the cradle.

§ 78.270–5 *Manway nozzle opening.* (a) Opening in tank for manway nozzle must be reinforced in an approved manner.

§ 78.270–6 *Material.* (a) All plates for tank and manway nozzle must be made of open-hearth boiler plate flange quality steel to an approved specification. These plates may also be clad with other metals, such as nickel.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification.

(c) Rivets must be of the same quality as used for steam boilers and other pressure vessels, and be made of steel to an approved specification. When clad plates are used, the rivet heads inside the tank must be clad with the same material or rivets may be of the same material as the cladding, provided rivets have physical properties at least equivalent to rivets prescribed herein.

(d) All external projections must be made of materials specified herein.

(e) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.270–7 *Tank heads.* (a) Tank heads must be of approved contour and designed for pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3¾ inches.

§ 78.270–8 *Riveting.* (a) For computing rivet areas the effective diameter of a driven rivet in the diameter of its reamed hole, which hole must in no case exceed nominal diameter of rivet by more than 1/16 inch. All rivets must be driven hot.

(b) All seams formed in the manufacture of the tank and the attachment of manway nozzle to tank must be double-riveted. Riveted seams and joints must be made metal to metal without interposition of other material. The efficiency of the double-riveted seams must be at least 70 per cent of the strength of the thinnest plate.

§ 78.270–9 *Preparation for calking and calking.* (a) The edges of plates at all riveted seams must be beveled so that the angle of the calking edges will be between 60 and 70 degrees with the flat surface of the plate. The extreme calking edge distance, measured from center line of rivet hole, must be at least 1½ times the diameter of the hole and not more than that distance plus ¼ inch.

(b) All seams must be calked on the inside and outside. Split calking is prohibited.

(c) Electric seal welding of inside calking edges only, in whole or in part, using shielded arc type of electrode is permitted on new or existing equipment, provided the weld bead has a ⅛ inch minimum to 3/16 inch maximum throat thickness. Qualification of welders must comply with requirements prescribed with AAR Welding Code Appendix "W". Welding clad material to edges of clad plates inside of tank is permitted. Other methods of covering edges of clad plates, if approved, may be used.

§ 78.270–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

§ 78.270–11 *Manway nozzle, cover and protective housing.* (a) Manway nozzle must be of cast, forged or rolled steel at least 18 inches inside diameter having approved wall thicknesses and dimensions.

(b) Manway cover must be of forged or rolled steel at least 2¼ inches thick, machined to approved dimensions. Manway cover must be attached to manway nozzle by through or stud bolts not entering tank.

(c) The shearing value of the bolts attaching protective housing to manway cover must not exceed 70 percent of shearing value of bolts attaching manway cover to manway nozzle.

(d) All joints between manway cover and manway nozzle, and between manway cover and valves or other appurtenances mounted thereon, must be made tight against vapor pressure.

(e) Protective housing of cast or fabricated steel must be bolted to manway cover. Housing must be equipped with a suitable metal cover that can be securely closed. Housing cover on tanks used for the transportation of liquefied flammable gases must be provided with an opening equipped with an approved weather-proof covering and having an area at least equal to the total safety valve discharge area. Housing cover must have suitable stop to prevent cover striking loading or unloading connections and be hinged on one side only with approved riveted pin or rod with nuts and cotters. Openings in wall of housing must be equipped with screw plugs or other closures.

§ 78.270–12 *Venting, loading and unloading, gauging and sampling devices and thermometer well.* (a) Venting, loading and unloading valves must be of approved type, made of metal not subject to rapid deterioration by the lading, and must withstand a pressure of 100 pounds per square inch without leakage. The valves must be directly bolted to seatings on manway cover. Pipe connections of the valves must be closed with approved plugs, chained or otherwise fastened to prevent misplacement.

(b) Interior pipes of the loading and unloading valves, except as prescribed in paragraph (d) of this section, may be equipped with excess flow valves of an approved design.

(c) Gauging device, sampling valve, and thermometer well are not specification requirements. When installed, they must be of approved design, made of metal not subject to rapid deterioration by the lading, and must withstand a pressure of 100 pounds per square inch without leakage. Interior pipes of the gauging device and sampling valve, except as prescribed in paragraph (d) of this section, may be equipped with excess flow valves of an approved design. Interior pipe of thermometer well must be anchored in an approved manner to prevent breakage due to vibration. The thermometer well must be closed by an approved valve attached close to the manway cover and closed by a screw plug. Other approved attachments that permit testing thermometer well for leaks without complete removal of the closure may be used.

(d) Tanks used in transportation of liquefied flammable gases must have the interior pipes of the loading and unloading valves, gauging device and sampling valve equipped with excess flow valves of an approved design.

§ 78.270–13 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design, made of metal not subject to rapid deterioration by lading and mounted on manway cover. The total valve discharge capacity must be sufficient to prevent building up of pressure in tank in excess of 75 pounds per square inch.

(b) The safety valve must be set to open at a pressure of not exceeding 75 pounds per square inch. (For tolerance see § 78.270–18 (a).)

§ 78.270–14 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) Attachments, other than anchorage and those mounted on manway cover, are prohibited. Heater systems may be applied to exterior of tank by tank bands or other approved method.

§ 78.270–15 *Closures for openings.* (a) Plugs must be of approved type, with standard pipe threads, and of metal not subject to rapid deterioration by the lading.

§ 78.270–16 *Tests of tanks.* (a) Each tank must be tested, before lagging is applied, by completely filling the tank and manway nozzle with water, or other liquid of similar viscosity, having a temperature which must not exceed 100 degrees Fahrenheit during test, and applying a pressure of 100 pounds per square inch. The tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures, except safety valves, must be in place while test is made.

§ 78.270–17 *Tests of exterior heater systems.* (a) Not a specification requirement.

§ 78.270–18 *Tests of safety valves.* (a) Each valve must be tested by air or

gas before being put into service. The valve must open at a pressure not exceeding 75 pounds per square inch and be vapor-tight at 60 pounds per square inch, which limiting pressures must not be affected by any auxiliary closure or other combination.

§ 78.270–19 *Marking.* (a) Each tank must be marked, thus certifying that tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–105A100 in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the jacket in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped mark specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, such as application of riveted anchors, etc., in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the jacket in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(6) Water capacity of the tank in pounds stamped plainly and permanently in letters and figures at least ⅜ inch high into the metal of the tank immediately below the marks specified in subparagraphs (2) and (3) of this paragraph. This mark must also be stenciled on the jacket immediately below the dome platform and either directly behind or within 3 feet of the right or left side of ladder, or ladders if there is a ladder on each side of the tank, in letters and figures at least 2 inches high as follows:

WATER CAPACITY
000000 POUNDS

(7) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity, followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the jacket, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(8) Tanks made of clad plates must be stenciled on the jacket "(naming material) ____ clad tank". Lined tanks must be stenciled on the jacket "(naming material) _____ lined tank". These marks must be in letters at least 2 inches high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.270–20 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of alterations of or additions to tanks or equipment from original design and construction, there must be furnished to the same parties a report in detail of the alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

15. Cancel entire § 78.271 (18 F. R. 3144, June 2, 1953) (17 F. R. 9840, 9841, Nov. 1, 1952) (16 F. R. 11783, Nov. 21, 1951) (15 F. R. 8495 to 8497, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.271).

16. Cancel entire § 78.272 (18 F. R. 3144, June 2, 1953) (17 F. R. 9841, Nov. 1, 1952) (15 F. R. 8497, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.272).

17. Cancel entire § 78.273 (18 F. R. 3145, June 2, 1953) (17 F. R. 9841, Nov. 1, 1952) (15 F. R. 8497, 8498, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.273).

18. Cancel entire § 78.274 (18 F. R. 3145, June 2, 1953) (17 F. R. 9841, Nov. 1, 1952) (15 F. R. 8498, Dec. 2, 1950) (49 CFR 1950 Rev., 1954, Supp., 78.274).

19. Amend entire § 78.275 (20 F. R. 4420, June 23, 1955) (15 F. R. 8498 to 8500, Dec. 2, 1950) (49 CFR 78.275, 1950 Rev.) to read as follows:

§ 78.275 *Specification ICC–106A500; forged lap-welded steel tanks, or ICC 106A500–X forge-welded steel tanks with fusion welded longitudinal barrel sections, to be mounted on a car.* (a) Wherever the word "approved" is in this specification, it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.275–1 *Type and general requirements.* (a) Tanks built under this specification must be cylindrical, with heads designed convex inward. All openings must be located in the heads. Tanks must be securely attached to car structure in such a manner that they may be removed for filling by the consignor and emptying by the consignee. Each tank must have a capacity of at least 1,600 pounds and not more than 2,600 pounds of water.

(b) The tanks must be fabricated by approved methods.

(c) For tanks made in foreign countries, a chemical analysis of material and all tests as specified must be carried out within the limits of the United States under the supervision of a competent and disinterested inspector.

§ 78.275–2 *Thickness of plates.* (a) The wall thickness of tanks must be at least $^{13}/_{32}$ inch and must be such that at the test pressure the calculated fiber stress in wall of tank will not be in excess of the following.

| | *Maximum fiber stress, pounds per square inch* |
|---|---|
| Shell wall having longitudinal seam: | |
| Water gas lap-welded | 17,500 |
| Fusion-welded | 15,750 |

as calculated by the following formula:

$$S=\frac{P(1.3D^2+0.4d^2)}{D^2-d^2}$$

where

$P$=interior test pressure in pounds per square inch;
$D$=outside diameter in inches;
$d$=inside diameter in inches;
$S$=wall stress in pounds per square inch.

(b) Tank heads must be of a thickness sufficient to meet the test requirements of § 78.275–12 (a), (b) and (c), and provide for the threading of openings therein as prescribed in § 78.275–4 (b).

§ 78.275–3 *Material.* (a) All plates for tank must be make of uniform open-hearth steel of good welding quality, free from cracks, laminations, or other defects injurious to the finished tank, and have an elastic limit of not more than 45,000 pounds per square inch and an elongation of at least 20 percent in 8 inches; a test specimen must also bend cold through 180 degrees flat on itself without cracking on the outside of the bent portion; the tensile and bend test specimens must be taken from the finished rolled material, and there must be at least one tensile test and one bend test on specimens from each heat. Chemical analysis must show maximum content per cent not greater than as follows:

Carbon—0.20.
Phosphorus—0.04.
Sulphur—0.05.

(b) All plates must have their heat number and the name or brand of the manufacturer legibly stamped on them at the rolling mill.

§ 78.275–4 *Tank heads.* (a) The heads must be hot pressed, flanging and dishing being done in one heat, so as to make a straight flange having a minimum length of 4 inches and a radius of dish not greater than the diameter of the tank. They must be inserted into the tank shell with flange extending outward and must have a snug drive fit into the shell.

(b) Threads for openings in tank heads for valves and vents must be American Standard taper, tapped to gauge, clean cut, even and without checks to insure tight joints.

§ 78.275–5 *Welding.* (a) All joints and seams other than the longitudinal seam for which alternate requirements are prescribed in paragraph (b) of this section, must be made by the water gas lap-weld process, or other lap-weld processes, which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce equivalent or superior results. All joints and seams other than those provided for in paragraph (b) of this section, must be thoroughly hammered or rolled to insure perfect welds. The flanges of the heads must be forged lap-welded to the shell and then crimped inwardly toward the axis line at least 1 inch on the radius. Welding and crimping must be accomplished in 1 heat.

(b) Alternate welding procedure: Longitudinal seams may be fusion welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints fabricated by means of fusion welding must be in accordance with the requirements of AAR Welding Code, Appendix W.

§ 78.275–6 *Heat treatment.* (a) Each finished tank, before being subjected to hydrostatic test, must be uniformly and properly heat-treated by heating to a temperature of at least 1,200 degrees Fahrenheit to remove any undue strains due to processes of manufacture.

§ 78.275–7 *Tank mounting.* (a) The manner in which the tanks are mounted on and securely attached to the car structure must be approved.

§ 78.275–8 *Protective housing and cover.* (a) Valves and other closures of openings in tank heads, except fusible plug vents, must be protected against accidental injury by a detachable cast or pressed housing at least $^{3}/_{16}$ inch thick, which much not project beyond the flanged ends of the tank and must be securely fastened to the tank head. Housing must be provided with an opening having an area equal to the total safety valve or vent discharge area.

(b) The upper head of tanks mounted vertically on the car structure must be completely covered by a light metal cover designed to exclude moisture, cinders, and other foreign matter, and to be displaced by pressure of gas discharged through safety valves or vents.

§ 78.275–9 *Venting, loading and unloading valves.* (a) These valves must be of approved type, made of metal not subject to rapid deterioration by lading, and must withstand a pressure of 500 pounds per square inch without leakage. The valves must be screwed directly into tank heads or attached to tank heads by other approved methods. Provision must be made for closing pipe connections of the valves.

§ 78.275–10 *Safety valves or vents.* (a) Unless prohibited for type of service in which tank is used, the tank must be equipped with one or more safety valves or vents of approved type, made of metal not subject to rapid deterioration by the lading and be screwed directly into tank heads or attached to tank heads by other approved methods. The total valve or vent discharge capacity must be sufficient to prevent building up of pressure in the tank in excess of ¾ of the test pressure; when safety vents of the fusible plug type are used, the required discharge capacity must be available in each head.

(b) Tank mounted vertically on the car structure must have safety valves, or vents of the frangible disc type, which must be located on the upper head.

(c) Safety valves must be set to open and vents of the frangible disc type must function at a pressure not exceeding 375 pounds per square inch. Vents of the fusible plug type must function at a temperature not exceeding 175 degrees Fahrenheit. (For tolerance see § 78.275–13.)

§ 78.275–11 *Fixtures.* (a) Siphon pipes and their couplings on the inside of the tank head and lugs on the outside of the tank head for attaching the valve protection housing may be fusion-welded in place in accordance with A. A. R. Welding Code Appendix W, provided they are properly heat-treated in accordance with § 78.275–6 (a) at the time the entire tank is heat-treated. All other fixtures and appurtenances, except as provided in §§ 78.275–7, 78.275–8, 78.275–9 and 78.275–10 are prohibited.

§ 78.275–12 *Tests of tank.* (a) After heat-treatment tanks must be subjected to hydrostatic test in a water jacket, or by other accurate method, operated so as to obtain reliable data. No tank shall have been subjected previously to internal pressure within 100 pounds of the test pressure. Each tank must be tested to 500 pounds per square inch. Pressure must be maintained for 30 seconds and sufficiently longer to insure complete expansion of tank. Pressure gauge must permit reading to accuracy of one per cent. Expansion gauge must permit reading of total expansion to accuracy of one percent. Expansion must be recorded in cubic centimeters.

(b) Permanent volumetric expansion must not exceed 10 per cent of total volumetric expansion at test pressure.

(c) Each finished tank must be subjected to interior air pressure test of at least 100 pounds per square inch under conditions favorable to detection of any leakage. No leaks shall appear.

(d) Repairs of leaks detected in manufacture or test must be made by the same process as employed in manufacture of tank. Calking, soldering, or similar repairing is prohibited.

§ 78.275–13 *Tests of safety valves and vents.* (a) Each valve must be tested by air or gas before being put into service. The valve must open at a pressure not exceeding 375 pounds per square inch and be vapor tight at 300 pounds per square inch which limiting pressures must not be affected by any auxiliary closure or other combination.

(b) For safety vents of the frangible disc type. A sample of the disc used must burst at a pressure of not exceeding 375 pounds per square inch and be vapor-tight at 300 pounds per square inch.

(c) For safety vents of the fusible plug type. A sample of the fusible plugs used must function at a temperature of not exceeding 175 degrees Fahrenheit, and be vapor tight at a temperature of 130 degrees Fahrenheit.

§ 78.275–14 *Alterations and maintenance of tanks.* (a) All prescribed markings on tanks must be kept legible. Copy of the said markings, in letters and figures of the prescribed size stamped on a brass plate secured to the tank, is authorized. Markings must not be changed except as follows:

(1) By application of additional marks not affecting the test pressure or water capacity. These must not obliterate previously applied marks.

(2) By application of test pressure marks, or alteration of such marks, to indicate a reduced test pressure. This is authorized only for tanks that have not failed in the 5-year test.

(3) By change of serial numbers or ownership marks, or both. A report must be filed with the Bureau of Explosives in sufficient detail so that previous serial number and ownership mark can be determined for each tank, arranged by lot numbers or by consecutive serial numbers.

§ 78.275–15 *Marking.* (a) Each tank must be plainly and permanently marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be stamped into the metal of one head or chime, in letters and figures at least ⅜ inch high, as follows:

(1) When longitudinal seam is water gas lap-welded, the mark must be ICC–106A500. When longitudinal seam is fusion-welded, the mark must be ICC–106A500–X.

(2) Serial number immediately below the stamped mark specified in subparagraph (1) of this paragraph.

(3) Inspector's official mark immediately below the stamped mark specified in subparagraph (2) of this paragraph.

(4) Name, mark (other than trademark), or initials of company or person for whose use the tanks are being made, which must be recorded with the Bureau of Explosives.

(5) Date of tank test (month and year), such as 1–54 for January 1954, so placed that date of subsequent tests may easily be added thereto.

(6) Water capacity—0000 Pounds.

§ 78.275–16 *Inspection and reports.* (a) Purchaser of tanks must provide for inspection by a competent inspector as follows:

(1) The inspector must carefully inspect all plates from which tanks are to be made, and records pertaining thereto, and plates which do not comply with the requirements of this specification must be rejected.

(2) The inspector must secure complete certified records, including chemical analyses and physical tests on samples taken from each heat of steel used in the manufacture of the plate.

(3) The inspector must report capacity in pounds of water and tare weight of each tank and the minimum thickness of tank wall noted.

(4) The inspector must make such inspection as may be necessary to see that all the requirements of this specification are fully complied with, must see that the finished tanks are properly heat-treated, and must witness all air and hydrostatic tests.

(5) The inspector must stamp his official mark on each accepted tank imme-

diately below the serial number, and make certified report (See paragraph (b) of this section) to the builder, to the company or person for whose use the tanks are made, to the builder of the car structure on which the tanks are to be mounted, if any, to the Bureau of Explosives, and to the Secretary, Mechanical Division, Association of American Railroads.

(b) Inspector's report required herein must be in the following form:

(Place) ----------
(Date) ----------

STEEL TANKS

It is hereby certified that drawings were submitted for these tanks under A. A. R. Application for Approval No. ---- and approved by the A. A. R. Committee on Tank Cars under date of ----------
Built for ---------- Company
Location at ----------
Built by ---------- Company
Location at ----------
Consigned to ---------- Company
Location at ----------
Quantity ----------
Size ---------- inches outside diameter
by ---------- inches long.

Marks stamped into the head or chime of the tank are:

Specification ICC ----------
Serial numbers -------- to -------- inclusive
Inspector's mark ----------
Owner's mark ----------
Test date ----------
Water capacity (see Record of Hydrostatic Tests).
Tare weights (Yes or No) (See Record of Hydrostatic Tests).
These tanks were made by process of --------

The steel used was identified as indicated by the attached list showing the serial number of each tank, followed by the heat number of the plate, head, and bottom used in the tank.

The steel used was verified as to chemical analysis and record thereof is attached hereto. The heat numbers were stamped into the metal.

All material, such as plates, billets, and seamless tubing, was inspected and each tank was inspected both before and after closing in the ends; all that was accepted was found free from seams, cracks, laminations, and other defects which might prove injurious to the strength of the tank. The processes of manufacture and heat treatment of tanks were supervised and found to be efficient and satisfactory.

The tank walls were measured and the minimum thickness noted was -------- inch. The outside diameter was determined by a close approximation to be -------- inches. The wall stress was calculated to be ------- pounds per square inch under an internal pressure of -------- pounds per square inch.

Hydrostatic tests, bend and tensile tests of material, and other tests, as prescribed in this specification were made in the presence of the inspector and all material and tanks accepted were found to be in compliance with the requirements of this specification. Records thereof are attached hereto.

I hereby certify that all of these tanks proved satisfactory in every way and comply with the requirements of Interstate Commerce Commission.

[1] If the tests are made by a method involving the measurement of the amount of liquid forced into the tank by the test pressure then the basic data, on which the calculations are made, such as the pump factors, temperature of liquid, coefficient of compressibility of liquid, etc., must also be given.
[2] Do not include protective housing and cover but state whether with or without valves.

(Signed) ----------

(c) Before a tank built under this specification is placed in service, the builder must furnish to the owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in proper form, certifying that the tank and its equipment comply with all the requirements of this specification including information as to the serial numbers, dates of test, and ownership marks on the tanks.

(d) In the event the owner of the tank instead of the builder elects to furnish the appurtenances such as valve protection caps, loading and unloading valves, and safety valves or vents of the frangible disc or fusible plug type, the owner must furnish to the Bureau of Explosives and to the Secretary, Mechanical Division, Association of American Railroads, a report in proper form certifying that these appurtenances comply with all the requirements of this specification.

(e) In case of alterations of or additions to tanks or equipment from original design and construction or of repairs, there must be furnished to the owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in detail of the repairs, alterations, or additions made to each tank covered by a particular application, showing the serial number of each tank involved and stating that heat treatment called for by the particular type of repair authorized has been performed and that after repairs, alterations, or additions, the tests prescribed in § 78.275–12 were made, results of hydrostatic tests reported, and tanks marked as prescribed by retest table No. 2 of § 73.31 of this chapter.

20. Amend entire § 78.276 (15 F. R. 8501, Dec. 2, 1950) (49 CFR 78.276, 1950 Rev.) to read as follows:

§ 78.276 *Specification ICC–106A800; forged lap-welded steel tanks, or ICC–106A800–X; forge-welded steel tanks with fusion-welded longitudinal barrel sections, to be mounted on a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.276–1 *Type and general requirements.* (a) Tanks built under this specification must be cylindrical, with heads designed convex inward. All openings must be located in the heads. Tanks must be securely attached to car structure in such a manner that they may be removed for filling by the consignor and emptying by the consignee. Each tank must have a capacity of at least 1,600 pounds and not more than 2,600 pounds of water.

(b) The tanks must be fabricated by approved methods.

(c) For tanks made in foreign countries, a chemical analysis of material and all tests as specified must be carried out within the limits of the United States under the supervision of a competent and disinterested inspector.

§ 78.276–2 *Thickness of plates.* (a) The wall thickness of tanks must be at least $^{13}/_{32}$ inch and must be such that at the test pressure the calculated fiber stress in wall of tank will not be in excess of the following:

| | *Maximum fiber stress, pounds per square inch* |
|---|---|
| Shell wall having longitudinal seam: | |
| Water gas lap-welded | 17,500 |
| Fusion-welded | 15,750 |

as calculated by the following formula:

$$S=\frac{P(1.3D^2+0.4d^2)}{D^2-d^2}$$

where
$P$ = interior test pressure in pounds per square inch;
$D$ = outside diameter in inches;
$d$ = inside diameter in inches;
$S$ = wall stress in pounds per square inch.

(b) Tank heads must be of a thickness sufficient to meet the test requirements of § 78.276–12 (a), (b) and (c), and provide for the threading of openings therein as prescribed in § 78.276–4 (b).

§ 78.276–3 *Material.* (a) All plates for tank must be made of uniform open-hearth steel of good welding quality, free from cracks, laminations, or other defects injurious to the finished tank, and have an elastic limit of not more than 45,000 pounds per square inch and an elongation of at least 20 per cent in 8 inches; a test specimen must also bend cold through 180 degrees flat on itself without cracking on the outside of the bent portion; the tensile and bend test specimens must be taken from the finished rolled material, and there must be at least one tensile test and one bend test on specimens from each heat. Chemical analysis must show maximum content percent not greater than as follows:

Carbon—0.20.
Phosphorus—0.04.
Sulphur—0.05.

(b) All plates must have their heat number and the name or brand of the manufacturer legibly stamped on them at the rolling mill.

§ 78.276–4 *Tank heads.* (a) The heads must be hot pressed, flanging and dishing being done in one heat, so as to make a straight flange having a minimum length of 4 inches and a radius of dish not greater than the diameter of the tank. They must be inserted into the tank shell with flange extending outward and must have a snug drive fit into the shell.

(b) Threads for openings in tank heads for valves and vents must be American Standard taper, tapped to gauge, clean cut, even and without checks to insure tight joints.

§ 78.276–5 *Welding.* (a) All joints and seams, other than the longitudinal seam for which alternate requirements are prescribed in paragraph (b) of this section, must be made by the water gas lap-weld process, or other lap-weld processes, which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce equivalent or superior results. All joints and seams, other than those provided for in paragraph (b) of this section, must be thoroughly hammered or rolled to insure perfect welds. The flanges of the heads must be forged lap-welded to the shell and then crimped inwardly toward the axis line at least 1 inch on the radius. Welding and crimping must be accomplished in 1 heat.

(b) *Alternate welding procedure.* Longitudinal seams may be fusion welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints fabricated by means of fusion welding must be in accordance with the requirements of AAR Welding Code, Appendix W.

§ 78.276–6 *Heat treatment.* (a) Each finished tank, before being subjected to hydrostatic test, must be uniformly and properly heat-treated by heating to a temperature of at least 1,200 degrees Fahrenheit to remove any undue strains due to processes of manufacture.

§ 78.276–7 *Tank mounting.* (a) The manner in which the tanks are mounted on and securely attached to the car structure must be approved.

§ 78.276–8 *Protective housing and cover.* (a) Valves and other closures of openings in tank heads, except fusible plug vents, must be protected against accidental injury by a detachable cast or pressed housing at least $^{5}/_{16}$ inch thick, which must not project beyond the flanged ends of the tank and must be securely fastened to the tank head. Housing must be provided with an opening having an area equal to the total safety valve or vent discharge area.

§ 78.276–9 *Venting, loading and unloading valves.* (a) These valves must be of approved type, made of metal not subject to rapid deterioration by the lading, and must withstand a pressure of 800 pounds per square inch without leakage. The valves must be screwed directly into tank heads or attached to tank heads by other approved methods. Provision must be made for closing the pipe connection of the valves.

§ 78.276–10 *Safety valves or vents.* (a) Unless prohibited for type of service in which tank is used, the tank must be equipped with one or more safety valves or vents of approved type, made of metal not subject to rapid deterioration by the lading and be screwed directly into tank heads or attached to tank heads by other approved methods. The total valve or vent discharge capacity must be sufficient to prevent building up of pressure in the tank in excess of ¾ of the test pressure; when safety vents of the fusible plug type are used, the required discharge capacity must be available in each head.

(b) Tanks mounted vertically on the car structure must have safety valves, or vents of the frangible disc type, which must be located on the upper head.

(c) Safety valves must be set to open and vents of the frangible disc type must function at a pressure of not exceeding 600 pounds per square inch. Vents of the fusible plug type must function at a temperature not exceeding 175 degrees Fahrenheit. (For tolerance see § 78.276–13.)

§ 78.276–11 *Fixtures.* (a) Siphon pipes and their couplings on the inside of the tank head and lugs on the outside of the tank head for attaching the valve protection housing may be fusion-welded in place in accordance with A. A. R. Welding Code Appendix W, provided they are properly heat-treated in accordance with § 78.276–6 (a) at the time the entire tank is heat-treated. All other fixtures and appurtenances, except as provided in § 78.276–7, §78.276–8, §78.276–9 and § 78.276–10, are prohibited.

§ 78.276–12 *Tests of tanks.* (a) After heat-treatment tanks must be subjected to hydrostatic test in a water jacket, or by other accurate method, operated so as to obtain reliable data. No tank shall have been subjected previously to internal pressure within 100 pounds of the test pressure. Each tank must be tested to 800 pounds per square inch. Pressure must be maintained for 30 seconds and sufficiently longer to insure complete expansion of tank. Pressure gauge must permit reading to accuracy of one per cent. Expansion gauge must permit reading of total expansion to accuracy of one per cent. Expansion must be recorded in cubic centimeters.

(b) Permanent volumetric expansion must not exceed 10 percent of total volumetric expansion at test pressure.

(c) Each finished tank must be subjected to interior air pressure test of at least 100 pounds per square inch under conditions favorable to detection of any leakage. No leaks shall appear.

(d) Repairs of leaks detected in manufacture or test must be made by the same process as employed in manufacture of tank. Calking, soldering, or similar repairing is prohibited.

§ 78.276–13 *Tests of safety valves and vents.* (a) Each valve must be tested by air or gas before being put into service. The valve must open at a pressure not exceeding 600 pounds per square inch and be vapor tight at 480 pounds per square inch which limiting pressures must not be affected by any auxiliary closure or other combination.

(b) For safety vents of the frangible disc type. A sample of the disc used must burst at a pressure of not exceeding 600 pounds per square inch and be vapor tight at 480 pounds per square inch.

(c) For safety vents of the fusible plug type. A sample of the fusible plugs used must function at a temperature of not exceeding 175 degrees Fahrenheit, and be vapor tight at a temperature of 130 degrees Fahrenheit.

§ 78.276–14 *Alterations and maintenance of tanks.* (a) All prescribed markings on tanks must be kept legible. Copy of the said markings, in letters and figures of the prescribed size stamped on a brass plate secured to the tank, is authorized. Markings must not be changed except as follows:

(1) By application of additional marks not affecting the test pressure or water capacity. These must not obliterate previously applied marks.

(2) By application of test pressure marks, or alteration of such marks, to indicate a reduced test pressure. This is authorized only for tanks that have not failed in the 5-year test.

(3) By change of serial numbers or ownership marks, or both. A report must be filed with the Bureau of Explosives in sufficient detail so that previous serial number and ownership mark can be determined for each tank, arranged by lot numbers or by consecutive serial numbers.

§ 78.276–15 *Marking.* (a) Each tank must be plainly and permanently marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be stamped into the metal of one head or chime, in letters and figures at least ⅜ inch high, as follows:

(1) When longitudinal seam is water gas lap-welded, the mark must be ICC–106A800. When longitudinal seam is fusion-welded, the mark must be ICC–106A800–X.

(2) Serial number immediately below the stamped marked specified in subparagraph (1) of this paragraph.

(3) Inspector's official mark immediately below the stamped mark specified in subparagraph (2) of this paragraph.

(4) Name, mark (other than trademark), or initials of company or person for whose use the tanks are being made, which must be recorded with the Bureau of Explosives.

(5) Date of tank test (month and year), such as 1-54 for January, 1954, so placed that date of subsequent tests may easily be added thereto.

(6) Water capacity—0000 Pounds.

§ 78.276–16 *Inspection and reports.* (a) Purchaser of tanks must provide for inspection by a competent inspector as follows:

(1) The inspector must carefully inspect all plates from which tanks are to be made, and records pertaining thereto, and plates which do not comply with the requirements of this specification must be rejected.

(2) The inspector must secure complete certified records, including chemical analyses and physical tests on samples taken from each heat of steel used in the manufacture of the plate.

(3) The inspector must report capacity in pounds of water and tare weight of each tank and the minimum thickness of tank wall noted.

(4) The inspector must make such inspection as may be necessary to see that all the requirements of this specification are fully complied with, must see that the finished tanks are properly heat-treated, and must witness all air and hydrostatic tests.

(5) The inspector must stamp his official mark on each accepted tank immediately below the serial number, and make certified report (see paragraph (b) of this paragraph) to the builder, to the company or person for whose use the tanks are being made, to the builder of the car structure on which the tanks are to be mounted, if any, to the Bureau of Explosives, and to the Secretary, Mechanical Division, Association of American Railroads.

(c) Before a tank built under this specification is placed in service, the builder must furnish to the owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in proper form, certifying that the tank and its equipment comply with all the requirements of this specification including information as to the serial numbers, dates of test, and ownership marks on the tanks.

(d) In the event the owner of the tank instead of the builder elects to furnish the appurtenances such as valve protection caps, loading and unloading valves, and safety valves or vents of the frangible disc or fusible plug type, the owner must furnish to the Bureau of Explosives and to the Secretary, Mechanical Division, Association of American Railroads, a report in proper form certifying that these appurtenances comply with all the requirements of this specification.

(e) In case of alterations of or additions to tanks or equipment from original design and construction or of repairs, there must be furnished to the owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in detail of the repairs, alterations, or additions made to each tank covered by a particular application, showing the serial number of each tank involved and stating that heat treatment called for by the particular type of repair authorized has been performed and that after repairs, alterations, or additions, the tests prescribed in § 78.276–12 were made, results of hydrostatic tests reported, and tanks marked as prescribed by retest table No. 2 of § 73.31 of this chapter.

21. Amend entire § 78.277 (20 F. R. 955 to 958, Feb. 15, 1955) (49 CFR 78.277, 1950 Rev.) to read as follows:

§ 78.277 *Specification ICC–107A ****; seamless steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed by § 78.259 (a), (b), (c) and (d).

§ 78.277–1 *Type and general requirements.* (a) Tanks built under this specification must be hollow forged or drawn in one piece. Forged tanks must be machined inside and outside before ends are necked-down and, after necking-down, the ends must be machined to size on the ends and outside diameter. Machining not necessary on inside or outside of seamless steel tubing, but required on ends after necking down.

(b) Tanks must be fabricated by approved methods.

(c) For tanks made in foreign countries, chemical analysis of material and all tests as specified must be carried out within the limits of the United States under supervision of a competent and disinterested inspector; in addition to which, provisions in § 78.277–17 (b) and (c) must be carried out at the point of manufacture by a recognized inspection bureau with principal office in the United States.

(d) The terms "marked end" and "marked test pressure" used throughout this specification are defined as follows:

(1) "Marked end" is that end of the tank on which marks prescribed in § 78.277–16 are stamped.

(2) "Marked test pressure" is that pressure in pounds per square inch which is indicated by the figures substituted for the **** in the marking ICC–107–A **** stamped on the marked end of tank.

(e) The gas pressure at 130 degrees Fahrenheit in the tank must not exceed 7/10 of the marked test pressure of the tank.

§ 78.277–2 *Thickness of wall.* (a) Minimum thickness of wall of each finished tank must be such that a pressure equal to 7/10 of the marked test pressure of the tank, the calculated fiber stress in pounds per square inch at inner wall of tank multiplied by 3.0 will not exceed the tensile strength of any specimen taken from the tank and tested as prescribed in § 78.277–5 (b). Minimum wall thickness shall be 1/4 inch.

(b) Calculations to determine the maximum marked test pressure permitted to be marked on the tank must be made by the formula:

$$P=\frac{10S(D^2-d^2)}{7(D^2+d^2)}$$

where

$P$ = maximum marked test pressure permitted;

$$S=\frac{U}{3.0}$$

where

$U$ = tensile strength of that specimen which shows the lower tensile strength of the two specimens taken from the tank and tested as prescribed in § 78.277–5 (b).

3.0 = Factor of safety.

$\frac{D^2-d^2}{D^2+d^2}$ = The smaller value obtained for this factor by the operations specified in paragraph (c) of this section.

(c) Measure at one end, in a plane perpendicular to the longitudinal axis of the tank and at least 18 inches from that end before necking down:

$d$ = Maximum inside diameter (inches) for the location under consideration; to be determined by direct measurement to an accuracy of 0.05 inch.

$t$ = Minimum thickness of wall for the location under consideration; to be determined by direct measurement to an accuracy of 0.001 inch.

Take $D=d+2t$.

Calculate the value of

$$\frac{D^2-d^2}{D^2+d^2}$$

Make similar measurements and calculation for a corresponding location at the other end of the tank.

Use the smaller result obtained, from the foregoing, in making calculations prescribed in paragraph (b) of this section.

§ 78.277–3 *Material.* (a) Tanks must be made from open-hearth or electric steel of uniform quality. Material must be free from seams, cracks, laminations, or other defects injurious to finished tank. If not free from such defects, the surface may be machined or ground to eliminate these defects. Forgings and seamless tubing for bodies of tanks must be stamped with heat numbers.

(b) Steel must conform to the following requirements as to chemical composition:

| | Carbon steel (percent) | Alloy steel (percent) |
|---|---|---|
| Carbon, not over | 0.55 | [1] 0.50 |
| Manganese, not over | .80 | [1] 1.65 |
| Phosphorus: | | |
| Acid, not over | .05 | .05 |
| Basic, not over | .04 | .04 |
| Sulphur: | | |
| Acid, not over | .06 | .06 |
| Basic, not over | .05 | .05 |
| Sum of manganese and carbon [1] not over | | 2.10 |

[1] Steel containing other alloying elements may be used if approved.

(1) For instructions as to the obtaining and checking of chemical analysis, see § 78.277–17 (b) (3).

§ 78.277–4 *Heat treatment.* (a) Each necked-down tank must be uniformly and properly heat treated. Heat treatment must consist of annealing or normalizing and drawing. Heat treatment involving the use of liquid quenching medium is prohibited, except under special approval. All scale must be removed from inside and outside of tank to an extent sufficient to allow proper inspection.

(b) To check uniformity of heat treatment, Brinell hardness tests must be made at 18-inch intervals on the entire longitudinal axis. The hardness must not vary more than 35 points in the length of the tank. No hardness tests need be taken within 12 inches from point of head to shell tangency.

§ 78.277–5 *Physical tests.* (a) Physical tests must be made on 2 test specimens 0.505 inch in diameter within 2-inch gauge length, taken 180 degrees apart, 1 from each ring section cut from each end of each forged or drawn tube before necking down, or 1 from each prolongation at each end of each necked-down tank. These test specimen ring sections or prolongations must be heat treated with the necked-down tank which they represent. The width of the test specimen ring section must be at least its wall thickness. Only when diameters and wall thickness will not permit removal of 0.505 by 2-inch tensile test bar, laid in the transverse direction, may test bar cut in the longitudinal direction be substituted. When the thickness will not permit obtaining a 0.505 specimen, then the largest diameter specimen obtainable in the longitudinal direction shall be used. Specimens shall have bright surface and a reduced section. When 0.505 specimen is not used the gauge length shall be a ratio of 4 to 1 length to diameter.

(b) Elastic limit as determined by extensometer, must not exceed 70 percent of tensile strength. Determination shall be made at cross head speed of not more than 0.125 inch per minute with an extensometer reading to 0.0002 inch. The extensometer shall be read at increments of stress not exceeding 5,000 pounds per square inch. The stress at which the strain first exceeds

$$\frac{\text{stress (pounds per square inch)}}{30{,}000{,}000 \text{ (pounds per square inch)}}$$

plus 0.005 (inch per inch) shall be recorded as the elastic limit.

(1) Elongation must be at least 18 percent and reduction of area at least 35 percent.

NOTE 1: Upon approval, the ratio of elastic limit to ultimate strength may be raised to permit use of special alloy steels of definite composition that will give equal or better physical properties than steels herein specified.

§ 78.277–6 *Openings in tanks.* (a) Each end must be closed by a cover made of forged steel. Covers must be secured to ends of tank by through bolts or studs not entering interior of tank. Covers must be of a thickness sufficient to meet test requirements of § 78.277–10 and to compensate for the openings closed by attachments prescribed herein.

(1) It is also provided that each end may be closed by internal threading to accommodate an approved fitting. The internal threads as well as the threads on fittings for these openings shall be clean cut, even, without checks, and tapped to gauge. Taper threads are required and must be of a length not less than as specified for American Standard Taper pipe threads. External threading of an approved type shall be permissible on the internal threaded ends.

(b) Joints between covers and ends and between cover and attachments must be of approved form and made tight against vapor or liquid leakage by means of a confined gasket of suitable material.

§ 78.277–7 *Tank mounting.* (a) The manner in which tanks are supported on and securely attached to car structure must be approved.

§ 78.277–8 *Protective housing.* (a) Safety devices, and loading and unloading valves on tanks must be protected from accidental injury by approved metal housing, arranged so it may be readily opened to permit inspection and adjustment of safety devices and valves, and securely locked in closed position. Housing must be provided with opening having an opening equal to twice the total discharge area of safety device enclosed.

§ 78.277–9 *Loading and unloading valves.* (a) Loading and unloading valve or valves must be mounted on the cover or threaded into the marked end of tank. These valves must be of approved type, made of metal not subject to rapid deterioration by lading or in service, and must withstand without leakage a pressure equal to the marked test pressure of tank. Provision must be made for closing service outlet of valves.

§ 78.277–10 *Safety devices.* (a) Tank must be equipped with one or more safety devices of approved type and discharge area, mounted on the cover or threaded into the non-marked end of the tank. If fittings are mounted on a cover, they must be of the flanged type, made of metal not subject to rapid de-

terioration by lading or in service. Total discharge capacity must be such that, with tank filled with air at pressure equal to 70 percent of the marked test pressure of tank, discharge capacity will be sufficient to reduce air pressure to 30 percent of the marked test pressure within 3 minutes after safety device opens.

(b) Safety devices must open at pressure not exceeding the marked test pressure of tank and not less than 7/10 of marked test pressure. (For tolerance for safety relief valves, see § 78.277–14 (a).)

(c) Cars used for the transportation of flammable gases must have the safety devices equipped with an approved ignition device.

§ 78.277–11 *Fixtures.* (a) Attachments, other than those mounted on tank covers or serving as threaded closures for the ends of the tank, are prohibited.

§ 78.277–12 *Tests of tanks.* (a) After heat-treatment, tanks must be subjected to hydrostatic tests in a water jacket, or by other accurate method, operated so as to obtain reliable data. No tank shall have been subjected previously to internal pressure greater than 90 percent of the marked test pressure. Each tank must be tested to a pressure at least equal to the marked test pressure of the tank. Pressure must be maintained for 30 seconds, and sufficiently longer to insure complete expansion of tank. Pressure gauge must permit reading to accuracy of one percent. Expansion gauge must permit reading of total expansion to accuracy of one percent. Expansion must be recorded in cubic centimeters.

(b) Permanent volumetric expansion must not exceed 10 percent of the total volumetric expansion at test pressure.

§ 78.277–13 *Handling of tanks failing in tests.* (a) Tanks rejected for failure in any of the tests prescribed may be reheat-treated, and will be acceptable if subsequent to reheat-treatment they are subjected to and pass all of the tests.

§ 78.277–14 *Tests of safety devices.* (a) Safety relief valves must be tested by air or gas before being put into service. Valve must open at pressure not exceeding the marked test pressure of tank and must be vapor-tight at 80 percent of the marked test pressure. These limiting pressures must not be affected by any auxiliary closure or other combination.

(b) For safety devices of frangible disc type, samples of discs used must burst at a pressure not exceeding the marked test pressure of tank and not less than 7/10 of marked test pressure.

§ 78.277–15 *Alterations and maintenance of tanks.* (a) All prescribed markings on tanks must be kept legible. Markings must not be added to or changed, except as follows:

(1) By application of additional marks not affecting the marked test pressure or water capacity; these marks must not obliterate prescribed marks previously applied.

(2) By application of test pressure marks, or alteration of such marks, to indicate reduced marked test pressure; authorized only for tanks that have not failed in 5-year test.

(3) By change of serial numbers or ownership marks, or both, in which case report, in sufficient detail so that previous serial number and ownership mark can be determined for each tank, and arranged by lot numbers or by consecutive serial numbers, must be filed with the Bureau of Explosives.

§ 78.277–16 *Marking.* (a) Each tank must be plainly and permanently marked, thus certifying that tank complies with all requirements of this specification. These marks must be stamped into the metal of necked-down section of tank at marked end, in letters and figures at least ¼ inch high, as follows:

(1) ICC–107A ****, the **** to be replaced by figures indicating marked test pressure of the tank. This pressure must not exceed the calculated maximum marked test pressure permitted, as determined by the formula in § 78.277–2 (b).

(2) Serial number immediately below the stamped mark specified in subparagraph (1) of this paragraph.

(3) Inspector's official mark immediately below the stamped mark specified in subparagraph (2) of this paragraph.

(4) Name, mark (other than trademark), or initials of company or person for whose use tank is being made, which must be recorded with the Bureau of Explosives.

(5) Date (such as 1–54, for January 1954) of tank test, so placed that dates of subsequent tests may easily be added thereto.

(6) Date (such as 1–54, for January 1954) of latest test of safety relief valve or of frangible disc, required only when tank is used for transportation of flammable gases.

(7) Name of gas for which tank car is being used, stenciled in letters at least 2 inches high on each side of car where they are clearly visible.

§ 78.277–17 *Inspection and reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in proper form certifying that tanks and their equipment comply with all the requirements of this specification and including information as to serial numbers, dates of tests, and ownership marks on tanks mounted on car structure. In case of alterations or additions to tanks or equipment from original design and construction, there must be furnished to the same parties a report in detail of the alterations or additions made to each tank covered by a particular application, showing the serial number of each tank involved.

(b) Purchaser of tanks must provide for inspection by a competent inspector as follows:

(1) Inspector must carefully inspect all material and reject that not complying with § 78.277–3.

(2) Inspector must stamp his official mark on each forging or seamless tube accepted by him for use in making tanks, and must verify proper application of heat number to such material by occasional inspections at steel manufacturer's plant.

(3) Inspector must obtain certified chemical analysis of each heat of material.

(4) Inspector must make inspection of inside surface of tanks before necking down, to insure that no seams, cracks, laminations, or other defects exist.

(5) Inspector must fully verify compliance with specification, verify heat treatment of tank as proper; obtain samples for all tests and check chemical analyses; witness all tests; and report minimum thickness of tank wall, maximum inside diameter, and calculated value of D, for each end of each tank as prescribed in § 78.277–2 (c).

(6) Inspector must stamp his official mark on each accepted tank immediately below serial number, and make certified report (See paragraph (c) of this section) to builder, to company or person for whose use tanks are being made, to builder of car structure on which tanks are to be mounted, to the Bureau of Explosives, and to the Secretary, Mechanical Division, Association of American Railroads.

(c) Inspector's report required herein must be in the following form:

(Place) _____
(Date) _____

STEEL TANKS

It is hereby certified that drawings were submitted for these tanks under A. A. R. Application for Approval _____ and approved by the A. A. R. Committee on Tank Cars under date of _____
Built for _____ Company
Location at _____
Built by _____ Company
Location at _____
Consigned to _____
Location at _____
Quantity _____
Length (inches) _____
Outside diameter (inches) _____

Marks stamped into tank as required in § 78.277–16 are:

ICC–107A ****

NOTE: The marked test pressure substituted for the **** on each tank is shown on Record of General Data on Tanks attached hereto.

Serial numbers _____ to _____ inclusive
Inspector's mark _____
Owner's mark _____
Test date _____
Water capacity (see Record of Hydrostatic Tests).
Tare weights (yes or no) (see Record of Hydrostatic Tests). These tanks were made by process of _____

Steel used was identified as indicated by the attached list showing the serial number of each tank, followed by the heat number.

Steel used was verified as to chemical analysis and record thereof is attached hereto. Heat numbers were stamped into metal.

All material was inspected and each tank was inspected both before and after closing in ends; all material accepted was found free from seams, cracks, laminations, and other defects which might prove injurious to strength of tank. Processes of manufacture and heat-treatment of tanks were witnessed and found to be efficient and satisfactory.

Before necking down ends, each tank was measured at each location prescribed in § 78.277–2 (c) and minimum wall thickness

in inches at each location was recorded; maximum inside diameter in inches at each location was recorded; value of D in inches at each location was calculated and recorded; maximum fiber stress in wall at location showing larger value for

$$\frac{D^2+d^2}{D^2-d^2}$$

was calculated for 7/10 the marked test pressure and recorded. Calculations were made by the formula:

$$S=0.7P\frac{(D^2+d^2)}{(D^2-d^2)}$$

Hydrostatic tests, tensile tests of material, and other tests as prescribed in this specification, were made in the presence of the inspector, and all material and tanks accepted were found to be in compliance with the requirements of this specification. Records thereof are attached hereto.

I hereby certify that all of these tanks proved satisfactory in every way and comply with the requirements of Interstate Commerce Commission Specification No. 107A ****

22. Cancel entire § 78.278 (15 F. R. 8503, 8504, Dec. 2, 1950) (49 CFR 78.278, 1950 Rev.)

23. Cancel entire § 78.279 (15 F. R. 8504, Dec. 2, 1950) (49 CFR 78.279, 1950 Rev.)

24. Amend entire § 78.280 (20 F. R. 8111, Oct. 28, 1955) (19 F. R. 3263, 3264, June 3, 1954) (18 F. R. 5278, Sept. 1, 1953) (18 F. R. 806, Feb. 7, 1953) (17 F. R. 9841, Nov. 1, 1952) (17 F. R. 7287, Aug. 9, 1952) (16 F. R. 11783, 11784, Nov. 21, 1951) (15 F. R. 8504 to 8509, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.280) to read as follows:

§ 78.280 *Specification ICC–103–W; fusion-welded steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.280–1 *Type.* (a) Tanks built under this specification must be cylindrical, with heads designed convex outward, and have at least one expansion dome with manway, and such other external projections as are prescribed herein. When the interior of the tank is divided into compartments, each compartment must have two heads designed convex outward, one expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.280–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather-tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.280–3 *Bursting pressure.* (a) the calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 240 pounds per square inch.

§ 78.280–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t=\frac{Pd}{2SE}$$

where
$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(1) The thickness of a dished head must be determined by the following formula, but in no case be less than that specified in paragraph (b) of this section:

$$t = \frac{5PL}{6SE}$$

where
$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of welded joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

(b) The minimum thickness of plates must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Expansion dome sheets | Tank heads | Expansion dome heads | Interior compartment heads |
|---|---|---|---|---|---|---|
| | Inch | Inch | Inch | Inch | Inch | Inch |
| 60 inches or under | 7/16 | 3/4 | 5/16 | 1/2 | 5/16 | 5/16 |
| Over 60 to 78 inches | 7/16 | 5/16 | 5/16 | 1/2 | 5/16 | 5/16 |
| Over 78 to 96 inches | 1/2 | 3/8 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 96 to 112 inches | 1/2 | 7/16 | 5/16 | 9/16 | 5/16 | 7/16 |
| Over 112 to 122 inches | 1/2 | 1/2 | 5/16 | 5/8 | 5/16 | 1/2 |

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.280–5 (a), must be as prescribed in the above table. Where the cladding material does not have physical properties at least equal to that of the base plate prescribed in § 78.280–5 (a), minimum thickness of base plate must be as prescribed in the above table.

(d) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the cradle.

(e) For tanks built of one piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(f) For tanks without underframe the minimum thickness of bottom sheet must not be less than 5/8 inch.

(g) When tank is divided into compartments the interior head must comply with the requirements for interior compartment heads prescribed herein. When capacity of tank is reduced by moving in the exterior head a new exterior head of approved contour not less than 3/8 inch thickness must be applied. When the capacity is reduced by the insertion of a new interior head this head must comply with the requirements for interior compartment heads and the exterior head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, must be provided with a tapped drain hole at their lowest point, and a tapped hole at top of tank. The top hole must be closed, and the bottom hole may be closed, with not less than 3/4 inch nor more than 1 1/2 inch solid pipe plugs having standard pipe threads.

§ 78.280–5 *Material.* (a) All plates for tank and expansion dome must be made of open-hearth boiler-plate flange quality steel to an approved specification, the carbon content of which shall not exceed 0.31 percent. These plates may also be clad with other metals, such as nickel.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification.

(c) Rivets, if used, must be of the same quality as used for steam boilers and other pressure vessels, and be made of steel to an approved specification. When clad plates are used and attachments are riveted, the rivet heads inside the tank must be clad with the same material, or, rivets may be of the same material as the cladding, provided rivets have physical properties at least equivalent to rivets prescribed herein.

(d) All external projections must be made of materials specified herein.

(e) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.280–6 *Tank heads.* (a) Tank heads must be of approved contour and must be designed for pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3 3/4 inches except for interior heads of compartment tanks the knuckle radius must not be less than 1 1/2 inches.

§ 78.280–7 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion welding to be performed by fabricators certified by the Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion welding in accordance with the requirements of AAR Welding Code Appendix W.

§ 78.280–8 *Manway ring, safety valve flange, and bottom outlet nozzle flange or other attachments.* (a) These attachments may be riveted or fusion welded. Riveted joints must be made metal to metal without interposition of other material. Rivets, if used, must be driven hot and calked inside. For computing rivet areas the effective diameter of a driven rivet is the diameter of its reamed hole, which hole must in no case exceed nominal diameter of rivet by more than 1/16 inch. Use of rivets of less than 5/8 inch nominal diameter prohibited. Fusion-welding for securing these attachments in place must be of double-welded butt joint type or double full-fillet lap joint type.

(b) *Calking.* All attachments riveted to the tank must have the rivets calked, and the joints formed by the attachments, calked on the inside of tank.

§ 78.280–9 *Stress-relieving.* (a) All welding of the tank shell and of attachments welded directly thereto must be stress relieved as a unit.

§ 78.280–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

§ 78.280–11 *Anchor rivets.* (a) If used, they may have their heads on the inside of the tank shell covered and protected from the lading by a liquid-tight housing of approved design. The lower portion of the housing must be fusion-welded to, and stress-relieved with the tank shell as a unit. After the rivets have been driven and calked, the top portion of the housing must be secured to the top of the lower portion by an approved method of welding, which welding need not be stress-relieved. A hole must be provided through tank shell, under each housing, to permit making air pressure test. Each test hole must be tightly closed after completion of test with an approved plug.

§ 78.280–12 *Expansion dome.* (a) The expansion dome must have a capacity measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside of dome, of at least 2 per cent of the total capacity of the tank and dome combined, except that when safety valve or safety vent is applied to side of dome, the effective capacity of dome must be measured from top of safety valve or safety vent opening in the side of dome to inside top of shell of tank.

(b) The opening in the manway ring must be at least 16 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter, the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, and the dome pocket is not closed off in an approved manner, dome pocket drain holes must be provided in the tank shell with nipples projecting inside the tank at least 1 inch.

(c) The dome head must be of approved contour and designed for pressure on concave side.

§ 78.280–13 *Closures for manways.* (a) The manway cover must be of approved type and designed to make it impossible to remove the cover while the interior of the tank is subjected to pressure.

(b) Manway covers must be made of cast, forged or fabricated steel, malleable iron or other malleable metals. Manway rings, if riveted to dome of tank, must be made of cast, forged or fabricated steel, malleable iron or other malleable metals. Manway rings, if welded to dome of tanks, must be made of cast, forged or fabricated steel and be of good weldable quality in conjunction with metal of dome.

(c) All covers not hinged must be attached to outside of dome head by at least 3/8 inch chain or its equivalent.

(d) All joints between manway covers and their seats must be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

§ 78.280–14 *Gauging, bottom outlet valve operating rod, venting, loading and unloading, and air inlet devices extending through dome of tank.* (a) Not specification requirements. When installed these devices including their valves and fittings must be of approved design, made of materials not subject to rapid deterioration by the lading. These devices including their valves must be provided with a protective housing. Unloading pipe must be securely anchored within the tank. Provision must be made for closing pipe connections of valves.

§ 78.280–15 *Bottom outlets.* (a) The bottom outlet, when installed, must be made of metal not subject to rapid deterioration by the lading, be of approved construction, and be provided with a valve at its upper end and a liquid tight closure at its lower end.

(b) The valve operating mechanism and outlet nozzle construction must be such as to insure against unseating of valve due to stresses or shocks incident to transportation.

(c) Bottom outlet nozzle may be cast, fabricated or forged metal. If outlet nozzle is welded to tank, it must be of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of tank.

(d) To provide for the attachment of standard unloading connections, the bottom of the main portion of the outlet nozzle or some fixed attachment thereto, must have external Unified Form Threads, 4 threads to the inch.

(e) For outlet nozzles that extend 6 inches or more from shell of tank a "V" groove must be cut (not cast) in the upper part of outlet nozzle at a point immediately below lowest part of valve to a depth that will leave thickness of nozzle wall at the root of the "V" not over 3/8 inch. In the case of steam-jacketed outlet nozzles this groove must be below the steam chamber but above the bottom of center sill construction. Where outlet nozzle is not a single piece, arrangement must be made to provide the equivalent of the breakage groove.

(f) The flange on the outlet nozzle must be of a thickness which will prevent distortion of the valve seat or valve by any change in contour of the shell resulting from expansion of lading, or other causes, and which will insure that accidental breakage of the outlet nozzle will occur at or below the "V" groove.

(g) The valve must have no wings or stem projecting below the "V" groove in the outlet nozzle. The valve and seat must be readily accessible or removeable for repairs, including grinding.

(h) The valve operating mechanism must have means for compensating for variation in the vertical diameter of the tank produced by expansion, weight of the liquid contents, or other causes, and should operate from the interior of the tank, but in the event the rod is carried through the dome, leakage must be prevented by packing in stuffing box and cap nut.

(i) In no case must extreme projection of bottom outlet equipment extend to within 12 inches above top of rail. All bottom outlet reducers and closures and their attachments must be secured to car by at least 3/8 inch chain or its equivalent, except that outlet closure plugs may be attached by 1/4 inch chain. When the bottom outlet closure is of the combination cap and valve type, the pipe connection to the valve must be closed by a plug or cap.

§ 78.280–16 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design mounted on expansion dome. Total valve discharge capacity must be sufficient to prevent building up of pressure in the tank in excess of 45 pounds per square inch.

(b) One safety valve must be provided for each tank, or compartment thereof, of 6,650 gallons capacity or less, and two safety valves for each tank, or compartment thereof, of over 6,650 gallons capacity.

(c) Each safety valve must be set to open at a pressure of 35 pounds per square inch and be vapor tight at 28 pounds per square inch. (For tolerance see § 78.280–21 (a).)

(d) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped must have 1 safety vent at least 1 3/4 inches inside diameter closed with a frangible disc of lead or other suitable material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids."

(e) Safety valve or safety vent flanges, if welded to dome, must be of cast, forged or fabricated metal, and be of good weldable quality in conjunction with metal of dome.

§ 78.280–17 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) All attachments to tank and dome must be applied by approved means. When attachments are riveted the edges of plates must be beveled so that the angle of the calking edge will be between 60 and 70 degrees with the flat surface of the attachment. The extreme calking edge distance, measured from center line of rivet hole, must be at least one and one-half times the diameter of the hole and not more than that distance plus 1/4 inch. The joints formed by attachment of all riveted external projections must be calked on the inside. All rivet heads on the inside and outside of tank and dome must be calked. Split calking is prohibited. Interior heater systems when installed, must be so constructed that the breaking off of their external connections will not cause leakage of contents of tank.

§ 78.280–18 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

(b) Interior heater systems and plug flanges, if welded to tank or dome, must be of cast, forged or fabricated metal, and be of good weldable quality in conjunction with metal of tank or dome.

§ 78.280–19 *Closures for openings.* (a) All plugs must be solid, of good grade cast iron or equivalent, of standard pipe thread of a length which will screw at least 6 threads inside the face of fitting or tank. Plugs when inserted from the outside of tank must have the letter "S" at least 3/8 inch in size stamped with steel-stamp or cast in the outside surface to indicate the plug is solid.

§ 78.280–20 *Tests of tanks.* (a) Each tank must be tested, before being put into service, by completely filling the tank and dome with water, or other liquid having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures, except safety valves or safety vents, must be in place while test is made.

(b) If tanks are to be lagged, the test of the tank must be made before lagging is applied.

(c) Calking of welded joints to stop leaks developed during the foregoing tests is prohibited. Repairs in welded joints must be made as prescribed in § 78.280–7 (a).

(d) Test of interior heater systems. Before interior heater systems are placed in service they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

(e) Anchor rivet housing test. After anchor rivet housings, if applied, are in place these housings must be tested by applying an air pressure of 100 pounds per square inch through openings in tank shell and must be tight against leakage.

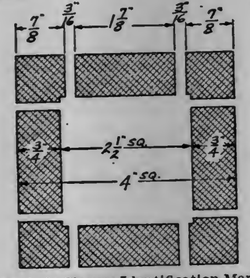
§ 78.280–21 *Test of safety valves.* (a) Each valve must be tested, before being put into service, by attaching to an air line and applying pressure. The valve must not leak below 28 pounds pressure. The valve must open at the pressure prescribed in § 78.280–16 (c), with a tolerance of plus or minus 3 pounds.

§ 78.280–22 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103–W in letters and figures at least 3/8 inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and

figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.



(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, such as application of riveted anchors, etc., in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(6) Date on which interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(7) Identification mark, illustrated herein, for approved manway closure must be stenciled on each side of dome, or jacket if lagged, in line with the ladders and in a color contrasting to color of dome.

Manhole Closure Identification Mark
(Reduced size)

(8) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(9) Tanks made of clad plates must be stenciled on the tank, or jacket if lagged, (naming material) _____ clad tank. Lined tanks must be stenciled on the tank, or jacket if lagged, (naming material) _____ lined tank. These marks must be in letters at least 2 inches high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.280–23 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

25. Amend entire § 78.281 (19 F. R. 3264, June 3, 1954) (15 F. R. 8509, 8510, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.281) to read as follows:

§ 78.281 *Specification ICC–103A–W; fusion-welded steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.281–1 *Type.* (a) Tanks built under this specification must be cylindrical, with heads designed convex outward, and must have at least 1 expansion dome with manway, and such other external projections as are prescribed herein. When the interior of the tank is divided into compartments, each compartment must have 2 heads designed convex outward, 1 expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.281–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to the exterior of tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.281–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 240 pounds per square inch.

§ 78.281–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t=\frac{Pd}{2SE}$$

where
$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(1) The thickness of a dished head must be determined by the following formula, but in no case be less than that specified in paragraph (b) of this section:

$$t=\frac{5PL}{6SE}$$

where
$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of welded joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

(b) The minimum thickness of plates must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Expansion dome sheets | Tank heads | Expansion dome heads | Interior compartment heads |
|---|---|---|---|---|---|---|
| | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* |
| 60 inches or under | 7/16 | ¼ | 5/16 | ½ | 5/16 | 5/16 |
| Over 60 to 78 inches | 7/16 | 5/16 | 5/16 | ½ | 5/16 | 5/16 |
| Over 78 to 96 inches | ½ | 3/8 | 5/16 | ½ | 5/16 | 3/8 |
| Over 96 to 112 inches | ½ | 7/16 | 5/16 | 9/16 | 5/16 | 7/16 |
| Over 112 to 122 inches | ½ | ½ | 5/16 | 5/8 | 5/16 | ½ |

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.281–5 (a) must be as prescribed in the above table. Where the cladding material does not have physical properties at least equal to that of the base plate prescribed in § 78.281–5 (a), minimum thickness of base plate must be as prescribed in the above table.

(d) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the cradle.

(e) For tanks built of one piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(f) When tank is divided into compartments the interior head must comply with the requirements for interior compartment heads prescribed herein. When capacity of tank is reduced by moving in the exterior head a new exterior head of approved contour not less than ⅜ inch thickness must be applied. When the capacity is reduced by the insertion of a new interior head this head must comply with the requirements for interior compartment heads and the exterior head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, must be provided with a tapped drain hole at their lowest point, and a tapped hole at top of tank. The top hole must be closed, and the bottom hole may be closed, with not less than ¾ inch nor more than 1½ inch solid pipe plugs having standard pipe threads.

§ 78.281–5 *Material.* (a) All plates for tank and expansion dome must be made of open-hearth boiler-plate flange-quality steel to an approved specification. The carbon content of which shall not exceed 0.31 percent. These plates may also be clad with other metals, such as nickel.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification.

(c) Rivets, if used, must be of the same quality as used for steam boilers and other pressure vessels and be made of steel to an approved specification. When clad plates are used and attachments are riveted, the rivet heads inside the tank must be clad with the same material, or, rivets may be of the same material as the cladding, provided rivets have physical properties at least equivalent to rivets prescribed herein.

(d) All external projections must be made of materials specified herein.

(e) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.281–6 *Tank heads.* (a) Tanks heads must be of an approved contour and must be designed for pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3¾ inches, except for interior heads of compartment tanks the knuckle radius must not be less than 1½ inches.

§ 78.281–7 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of A. A. R. Welding Code Appendix W.

§ 78.281–8 *Manway rings, safety vent flange, and bottom washout nozzle flange or other attachments.* (a) These attachments may be riveted or fusion-welded. Riveted joints must be made metal to metal without interposition of other materials. Rivets, if used, must be driven hot and calked inside. For computing rivet areas the effective diameter of a driven rivet is the diameter of its reamed hole, which hole must in no case exceed nominal diameter of rivet by more than 1/16 inch. Use of rivets of less than ⅝ inch nominal diameter prohibited. Fusion welding for securing these attachments in place must be of the double-welded butt-joint type or double-full-fillet-lap joint type.

(b) *Calking.* All attachments riveted to the tank must have the rivets calked, and the joints formed by the attachments, calked on the inside of tank.

§ 78.281–9 *Stress relieving.* (a) All welding of the tank shell and of attachments welded directly thereto must be stress-relieved as a unit.

§ 78.281–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

§ 78.281–11 *Anchor rivets.* (a) If used, they may have their heads on the inside of the tank shell covered and protected from the lading by a liquid-tight housing of approved design. The lower portion of the housing must be fusion-welded to, and stress-relieved with, the tank shell as a unit. After the rivets have been driven and calked, the top portion of the housing must be secured to the top of the lower portion by an approved method of welding, which welding need not be stress-relieved. A hole must be provided through tank shell, under each housing to permit making air pressure test. Each test hole must be tightly closed after completion of test with an approved plug.

§ 78.281–12 *Expansion dome.* (a) The expansion dome must have a capacity measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside of dome, of at least 1 per cent of the total capacity of the tank and dome combined, except that when safety vent is applied to side of dome, the effective capacity of dome must be measured from top of safety vent opening in the side of dome to inside top of shell of tank.

(b) The opening in the manway ring must be at least 16 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter, the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, and the dome pocket is not closed off in an approved manner, dome pocket drain holes must be provided in the tank shell with nipples projecting inside the tank at least 1 inch.

(c) The dome head must be of approved contour and must be designed for pressure on concave side.

§ 78.281–13 *Closures for manway.* (a) The manway cover must be of bolted type, bolted and hinged type, or other approved types, and designed to provide a secure closure of the manway.

(b) Manway covers must be made of cast, forged or fabricated steel, malleable iron or other malleable metals. Manway rings, if riveted to dome of tank, must be made of cast, forged or fabricated steel, malleable iron or other malleable metals. Manway rings, if welded to dome of tank, must be made of cast, forged or fabricated steel and be of good weldable quality in conjunction with the metal of the dome.

(c) Chains, if used to attach manway covers to outside of dome head, must be at least ⅜ inch or its equivalent.

(d) All joints between manway covers and their seats must be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

§ 78.281–14 *Gauging, venting, loading and unloading, and air inlet devices extending through domes of tanks.* (a) Not specification requirements. When installed these devices must be of an approved design, made of material not subject to rapid deterioration by the lading, and be tightly closed. Protective housing not required, except as prescribed in paragraph (b) of this section. Unloading pipe must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves to provide for the loading and unloading of the contents, these devices including valves must be of an approved design and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.281–15 *Bottom outlets.* (a) Bottom outlet is prohibited, but tank may be equipped with a bottom washout nozzle of metal not subject to rapid deterioration by the lading, which must be of approved construction complying with the following requirements:

(b) The construction and closure of the bottom washout nozzle must be such that it is liquid tight and should the nozzle be broken, loss of contents will not occur.

(c) The extreme projection of the bottom washout nozzle must be at least 12 inches above the top of rail.

(d) Bottom washout nozzle may be of cast, fabricated, or forged metal. If welded to tank, it must be of good weldable quality in conjunction with metal of tank.

(e) The closure of the washout nozzle must be equipped with a ¾ inch solid screw plug. Plug must be secured to car structure or washout chamber by at least a ¼ inch chain.

(f) For bottom washout nozzles that project 6 inches or more from shell of tank, a "V" groove must be cut (not cast) in the upper part of bottom washout nozzle at a point immediately below lowest part of inside closure seat to a depth that will leave thickness of nozzle wall at the root of the "V" not over ⅜ inch. Where bottom washout nozzle is not a single piece, arrangement must be made to provide the equivalent of the breakage groove.

(g) The flange on the bottom washout nozzle must be of a thickness which will prevent distortion of the inside closure seat or closure casting by any change in contour of the shell, resulting from expansion of lading, or other causes, and which will insure that accidental breakage of the washout nozzle will occur at or below the "V" groove.

(h) The closure casting must not project below the "V" groove in the washout nozzle. The closure casting and seat

must be readily accessible for repairs, including grinding.

§ 78.281–16 *Safety vents.* (a) Safety valves are prohibited, but a safety vent must be applied.

(b) Each tank or compartment thereof must be equipped with 1 safety vent at least 1¾ inches inside diameter closed with a frangible disc of lead or other suitable material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement.

(c) Safety vent flanges, if welded to dome, must be of cast, forged, or fabricated metal and be of good weldable quality in conjunction with metal of dome.

§ 78.281–17 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) All attachments to tank and dome must be applied by approved means. When attachments are riveted, the edges of plates must be beveled so that the angle of the calking edge will be between 60 and 70 degrees with the flat surface of the attachment. The extreme calking edge distance, measured from center line of rivet hole, must be at least 1½ times the diameter of the hole and not more than that distance plus ¼ inch. The joints formed by attachment of all riveted external projections must be calked on the inside. All rivet heads on the inside and outside of tank and dome must be calked. Split calking is prohibited. Interior heater systems when installed, must be so constructed that the breaking off of their external connections will not cause leakage of contents of tank.

§ 78.281–18 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

(b) Interior heater systems and plug flanges, if welded to tank or dome, must be of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of tank or dome.

§ 78.281–19 *Closures for openings.* (a) All plugs must be solid, of good grade cast iron or equivalent, with standard pipe threads of a length which will screw at least 6 threads inside the face of fitting or tank. Plugs, when inserted from the outside of tank heads, must have the letter "S" at least ⅜ inch in size stamped with steel stamp or cast on the outside surface to indicate the plug is solid.

§ 78.281–20 *Tests of tanks.* (a) Each tank must be tested before being put into service, by completely filling tank and dome with water, or other liquid having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures, except safety valves or safety vents, must be in place while test is made.

(b) If tanks are to be lagged, the test of tank must be made before lagging is applied.

(c) Calking of welded joints to stop leaks developed during the foregoing tests prohibited. Repairs in welded joints must be as prescribed in § 78.281–7 (a).

(d) Test of interior heater systems: Before interior heater systems are placed in service they must be tested with hydrostatic pressure and be tight at 200 pounds per square inch.

(e) Anchor rivet housing test: After anchor rivet housings, if applied, are in place, these housings must be tested by applying a pressure of 60 pounds per square inch through openings in tank shell and must be tight against leakage.

§ 78.281–21 *Marking.* (a) Each tank must be marked thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103A–W in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, such as application of riveted anchors, etc., in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph, by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(5) Date on which interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(6) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(7) Tanks made of clad plates must be stenciled on the tank, or jacket if lagged, (naming material) _____ clad tank. Lined tanks must be stenciled on the tank, or jacket if lagged, (naming material) _____ lined tank. These marks must be in letters at least 2 inches high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.281–22 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish the car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of, or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

26. Amend entire § 78.282 (19 F. R. 3264, June 3, 1954) (18 F. R. 5278, Sept. 1, 1953) (15 F. R. 8510 to 8512, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.282) to read as follows:

§ 78.282 *Specification ICC–103B–W; rubber lined fusion-welded steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.282–1 *Type.* (a) Tanks built under this specification must be cylindrical, with heads designed convex outward, and must have at least one expansion dome with manway, and such other external projections as are prescribed herein. When the interior of the tank is divided into compartments, each compartment must have two heads designed convex outward, one expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.282–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than 1/8 inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.282–3 *Bursting pressure.* (a) The calculated bursting pressure, based

on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 240 pounds per square inch.

§ 78.282–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t=\frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(1) The thickness of a dished head must be determined by the following formula, but in no case be less than that specified in paragraph (b) of this section:

$$t=\frac{5PL}{6SE}$$

where

$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of welded joint.

When head is formed from one piece the efficiency may be considered as 100 percent.

(b) The minimum thickness of plates must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Expansion dome sheets | Tank heads | Expansion dome heads | Interior compartment heads |
|---|---|---|---|---|---|---|
| | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* |
| 60 inches or under | 7/16 | 1/4 | 5/16 | 1/2 | 5/16 | 5/16 |
| Over 60 to 78 inches | 7/16 | 5/16 | 5/16 | 1/2 | 5/16 | 5/16 |
| Over 78 to 96 inches | 1/2 | 3/8 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 96 to 112 inches | 1/2 | 7/16 | 5/16 | 9/16 | 5/16 | 7/16 |
| Over 112 to 122 inches | 1/2 | 1/2 | 5/16 | 5/8 | 5/16 | 1/2 |

(c) Tank must be lined with rubber at least 5/32 inch thick, except over all rivets and seams formed by riveted attachments where the lining must be double thickness. The lining must overlap at least 1½ inches at all edges, which must be straight and be beveled to an angle of approximately 45 degrees. A rubber reinforcement pad at least 4½ feet square and at least ½ inch thick must be applied by vulcanizing to the lining on bottom of tank directly under the dome. The edges of pad must be beveled to an angle of approximately 45 degrees. An opening in this pad for sump is permitted. No rubber shall be under tension when applied except that due to conformation over rivet heads. Interior of tank must be free from scale, oxidation, moisture, and all foreign matter during the lining operations.

(d) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the cradle.

(e) For tanks built of one piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(f) When tank is divided into compartments the interior head must comply with the requirements for interior compartment heads prescribed herein. When capacity of tank is reduced by moving in the exterior head, a new exterior head of approved contour not less than ⅜ inch in thickness must be applied. When the capacity is reduced by the insertion of a new interior head, this head must comply with the requirements for interior compartment heads and the exterior head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, must be provided with a tapped drain-hole at their lowest point, and a tapped hole at top of tank. The top hole must be closed, and the bottom hole may be closed, with not less than ¾ inch nor more than 1½ inch solid pipe plugs having standard pipe threads.

§ 78.282–5 *Material.* (a) All plates for tank and expansion dome must be made of open-hearth boiler-plate flange quality steel to an approved specification. The carbon content of which shall not exceed 0.31 percent.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification.

(c) Rivets, if used, must be of the same quality as used for steam boilers and other pressure vessels and be made of steel to an approved specification.

(d) Each tank or each compartment thereof, must be lined with acid resisting rubber, vulcanized or bonded directly or otherwise attached to the metal tank, to provide a non-porous laminated lining.

(e) All external projections must be made of materials specified herein.

§ 78.282–6 *Tank heads.* (a) Tank heads must be of approved contour and must be designed to pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3¾ inches, except for interior heads of compartment tanks the knuckle radius must not be less than 1½ inches.

§ 78.282–7 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of A. A. R. welding code Appendix "W".

§ 78.282–8 *Manway ring, safety vent flange, and sump flange or other attachments.* (a) These attachments may be riveted or fusion-welded. Riveted joints must be made metal to metal without interposition of other material. Rivets, if used, must be driven hot and calked inside. For computing rivet areas, the effective diameter of a driven rivet is the diameter of its ream hole, which must in no case exceed nominal diameter of rivet by more than 1/16 inch. Use of rivets of less than ⅝ inch nominal diameter prohibited. Fusion-welding for securing attachments in place must be of the double-welded butt joint type or double full-fillet lap joint type. All rivet heads on inside of tank must be button-head or similar shape, of uniform size and the under surface of heads must be driven tight against shell. All plates, castings, and rivet heads on inside of tank must be calked. All projecting edges of plates, castings, and rivet heads on inside of tank must be rounded and free from fins or other irregular projections. Castings must be free from porosity.

(b) *Calking.* All attachments riveted to the tank must have the rivets calked, and the joints formed by the attachments calked on the inside of tank.

§ 78.282–9 *Stress relieving.* (a) All welding of the tank shell and of attachments welded directly thereto must be stress-relieved as a unit.

§ 78.282–10 *Tank mounting.* (a) The manner in which tank is supported on and securely attached to the car structure must be approved.

§ 78.282–11 *Expansion dome.* (a) The expansion dome must have a capacity, measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside dome, of at least 1 percent of total capacity of the tank and dome combined, except that when safety vent is applied to side of dome, the effective capacity of dome must be measured from top of safety vent opening in the side of dome to inside top of shell of tank.

(b) The opening for manway before lining, must be at least 18 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter, the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, and the dome pocket is not closed off in an approved manner, dome pocket drain holes must be provided in the tank shell with nipples projecting inside the tank at least 1 inch.

(c) The dome head must be of approved contour and must be designed for pressure on concave side.

§ 78.282–12 *Closures for manway.* (a) The manway cover must be of approved type and designed to provide a secure closure of the manway.

(b) Manway cover must be made of a suitable metal. The top, bottom, and edge of manway cover must be rubber covered as prescribed in §§ 78.282–4 (c) and 78.282–5 (d). Through bolt holes must be lined with rubber at least 1/8 inch in thickness. Cover made of metal not affected by the lading need not be rubber covered. All rubber surfaces on out-

side of tank or fittings must be protected with an age resisting coating. Manway flange, if riveted to dome of tank, must be of cast, forged or fabricated steel, malleable iron or other malleable metals. Manway flange, if welded to dome of tank, must be made of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of dome.

(c) Chains, if used to attach manway cover to outside of the dome head, must be at least ⅜ inch or its equivalent.

(d) All joints between manway cover and manway flange, and between manway cover and any appurtenances mounted thereon, must be made tight against leakage.

§ 78.282–13 *Gauging, venting, loading and unloading, and air inlet devices extending through domes of tanks.* (a) When installed, these devices must be of an approved design and must be tightly closed. Protective housing not required, except when the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves to provide for the loading and unloading of the contents, these devices, including the valves, must be of an approved design and provided with a protective housing. Unloading pipes must be securely anchored within the tank.

(b) When gauging, venting, loading and unloading, and air inlet devices and their closures are made of material affected by the lading they must have all surfaces rubber covered as prescribed in § 78.282–4 (c) and § 78.282–5 (d). Interior pipes of these devices must be supported at their lower end.

§ 78.282–14 *Bottom outlets.* (a) Bottom outlet is prohibited. Bottom sump is permissible. If used and welded to tank it must be of cast, fabricated or forged metal of good weldable quality in conjunction with metal of tank.

§ 78.282–15 *Safety vents.* (a) Safety valves are prohibited, but a safety vent must be applied.

(b) Each tank, or each compartment thereof, must be equipped with one safety vent, lined with rubber of at least ⅛ inch thickness, having an inside diameter of at least 1¾ inches after lining, closed with a frangible disc of lead or other suitable material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement.

(c) Safety vent flanges, if welded to dome, must be of cast, forged, or fabricated metal and be of good weldable quality in conjunction with metal of dome.

§ 78.282–16 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) All attachments to tank and dome must be applied by an approved means. When attachments are riveted the edges of plates must be beveled so that the angle of the calking edge will be between 60 and 70 degrees with the flat surface of the attachment. The extreme calking edge distance, measured from center line of rivet hole, must be at least one and one-half times the diameter of the hole and not more than that distance plus ¼ inch. The joints formed by attachments of all riveted external projections must be calked on the inside. Split calking prohibited. Interior heater systems, when installed, must be made of material not affected by the lading. They must be constructed so that the breaking off of their external connections will not cause leakage of contents of tanks. All surfaces of attachments exposed to the lading must be covered with rubber as prescribed in §§ 78.282–4 (c) and 78.282–5 (d). Attachments made of metal not affected by the lading need not be rubber covered.

§ 78.282–17 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

(b) Interior heater systems closure flanges, if welded to tank or dome, must be of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of tank or dome.

§ 78.282–18 *Closures for openings.* (a) Closures for openings must have all surfaces exposed to the lading rubber covered or be made of material not affected by the lading.

§ 78.282–19 *Tests of tanks.* (a) Each tank must be tested, before rubber lining is applied by completely filling tank and dome with water, or other liquid of similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures, except safety vents, must be in place while test is made. After tank is rubber lined, no further tests are required.

(b) If tanks are to be lagged, the test of tank must be made before lagging is applied.

(c) Calking of welded joints to stop leaks developed during the foregoing tests prohibited. Repairs in welded joints must be made as prescribed in § 78.282–7 (a).

(d) Tests of interior heater systems: Before interior heater systems are placed in service they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

§ 78.282–20 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103B–W in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of orignal test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, such as application of riveted anchors, etc., in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped mark specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) "Rubber-lined tank—pressure test not required," stenciled on tank, or jacket if lagged, instead of record of test of tank.

(5) Date on which interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(6) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.282–21 *Reports.* (a) Before a tank is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

(b) Before a tank car tank not originally built under this specification is lined with rubber, a report certifying that the tank and its equipment have been brought into compliance with the tank requirements of Specification ICC–103B–W must be furnished by car owner to the party who is to apply the rubber lining. A copy of this report in approved form certifying that tank has been lined in compliance with all requirements of this specification, must be furnished by party lining the tank to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads.

27. Amend entire § 78.283 (19 F. R. 3264, June 3, 1954) (18 F. R. 5278, Sept. 1, 1953) (16 F. R. 11784, Nov. 21, 1951) (15 F. R. 8512, 8513, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.283) to read as follows:

§ 78.283 *Specification ICC–103C–W; fusion-welded alloy steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification, it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.283–1 *Type.* (a) Tanks built under this specification must be cylindrical, with heads designed convex outward, and must have at least 1 expansion dome with manway, and such other external projections as are prescribed herein. When the interior of the tank is divided into compartments, each compartment must have 2 heads designed convex outward, 1 expansion dome with manway, and such other external protections as are prescribed herein.

§ 78.283–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to the exterior of tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.283–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 240 pounds per square inch.

§ 78.283–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t=\frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(1) The thickness of a dished head must be determined by the following formula, but in no case be less than that specified in paragraph (b) of this section:

$$t=\frac{5PL}{6SE}$$

where

$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of welded joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

(b) The minimum thickness of plates must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Expansion dome sheets | Tank heads | Expansion dome heads | Interior compartment heads |
|---|---|---|---|---|---|---|
| | Inch | Inch | Inch | Inch | Inch | Inch |
| 60 inches or under | 7/16 | 3/4 | 5/16 | 1/2 | 5/16 | 5/16 |
| Over 60 to 78 inches | 7/16 | 5/16 | 5/16 | 1/2 | 5/16 | 5/16 |
| Over 78 to 96 inches | 1/2 | 3/8 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 96 to 112 inches | 1/2 | 5/16 | 5/16 | 9/16 | 5/16 | 7/16 |
| Over 112 to 122 inches | 1/2 | 1/2 | 5/16 | 5/8 | 5/16 | 1/2 |

(c) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the cradle.

(d) For tanks built of 1 piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(e) When tank is divided into compartments the interior head must comply with the requirements for interior compartment heads prescribed herein. When capacity of tank is reduced by moving in the exterior head a new exterior head of approved contour not less than ⅜ inch thickness must be applied. When the capacity is reduced by the insertion of a new interior head this head must comply with the requirements for interior compartment heads and the exterior head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, must be provided with a tapped drain hole at their lowest point, and a tapped hole at top of tank. The top hole must be closed, and the bottom hole may be closed, with not less than ¾ inch nor more than 1½ inch solid pipe plugs having standard pipe threads.

§ 78.283–5 *Material.* (a) All plates, forgings, tubes and castings for tank and expansion dome, and all projections and their closures, must be to an approved specification and be made of a metal capable of resisting the action of nitric acid as follows:

(1) The maximum corrosion rate in inches penetration per month in the standard 65 percent boiling nitric acid test shall be 0.006 for the straight chromium-bearing stainless steel and 0.0015 for any of the chromium nickel alloys. This figure to be an average of five 48-hour periods.

§ 78.283–6 *Tank heads.* (a) Tank heads must be of approved contour and must be designed for pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3¾ inches except for interior heads of compartment tanks the knuckle radius must not be less than 1½ inches.

§ 78.283–7 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with requirements of AAR Welding Code Appendix "W".

§ 78.283–8 *Manway flange, safety valves flange, and sump flange or other attachments.* (a) These attachments must be fusion-welded. Fusion-welding for securing these attachments in place must be of the double-welded butt joint type or double full-fillet lap joint type.

§ 78.283–9 *Heat treatment.* (a) All welding of the tank shell and of attachments welded directly thereto must be heat treated as a unit to remove stresses and at the proper temperature to obtain the corrosion resistance specified in § 78.283–5 (a) (1)

§ 78.283–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to the tank is prohibited.

§ 78.283–11 *Expansion dome.* (a) The expansion dome must have a capacity measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside dome, of at least 1 percent of the total capacity of the tank and dome combined.

(b) The opening for manway must be at least 18 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter, the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, dome pocket drain holes must be provided in the tank shell with nipples extending inside the tank at least 1 inch.

(c) The dome head must be of material complying with requirements of § 78.283–5 (a), and designed convex outward to a radius of not more than 10 feet.

§ 78.283–12 *Closures for manway.* (a) The manway cover must be of approved type and designed to provide a secure closure of the manway.

(b) Manway flange and cover must be made of the metal prescribed in § 78.283–5 (a).

(c) All joints between manway covers and their seats must be made tight

against leakage of vapor and liquid by use of gaskets of suitable material.

§ 78.283–13 *Gauging, venting, loading and unloading, and air inlet devices extending through domes of tanks.* (a) When installed these devices, including their valves, must be of approved design and must be tightly closed. Protective housing of approved design covering all these devices must be installed. Unloading pipe must be securely anchored within the tank.

(b) Gauging, venting, loading and unloading, and air inlet devices, when installed must be provided with efficient valves, made of material complying with the requirements of § 78.283–5 (a). Provision must be made for closing pipe connections of valves.

§ 78.283–14 *Bottom outlets.* (a) Bottom outlet prohibited. Bottom sump of cast, fabricated, or forged metal is permissible. If used it must be welded to tank and must be made of material complying with requirements of § 78.283–5 (a).

§ 78.283–15 *Safety valves.* (a) The tank must be equipped with a safety valve at least 2 inches inside diameter mounted on top of expansion dome. Total valve discharge capacity must be sufficient to prevent building up pressure in tank in excess of 45 pounds per square inch.

(b) One safety valve must be provided for each tank or compartment thereof.

(c) The safety valve must be set to open at a pressure of 35 pounds per square inch and be vapor-tight at 28 pounds per square inch. (For tolerance see § 78.283–20 (a).)

(d) Safety valve flanges must be of cast, forged or fabricated material complying with the requirements of § 78.283–5 (a).

§ 78.283–16 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) All attachments to tank and dome must be applied by welding. Interior heater systems, when installed, must be so constructed that the breaking off of their external connections will not cause leakage of the contents of tanks.

§ 78.283–17 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

(b) Interior heater systems and plug flanges, must be of cast, forged or fabricated material complying with the requirements of § 78.283–5 (a).

§ 78.283–18 *Closures for openings.* (a) All plugs must be solid, made of materials prescribed in § 78.283–5 (a), with standard pipe thread, and must be of a length which will screw at least 6 threads inside the face of fitting or tank. Plugs, when inserted from the outside of tank heads must have the letter "S" at least ⅜ inch in size stamped with steel stamp or cast on the outside surface to indicate the plug is solid.

§ 78.283–19 *Tests of tanks.* (a) Each tank must be tested, before being put into service, by completely filling the tank and dome with water, or other liquid having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All closures, except safety valves, must be in place while test is made.

(b) If tanks are to be lagged, the test of tank must be made before lagging is applied.

(c) Calking of welded joints to stop leaks developed during the foregoing tests prohibited. Repairs in welded joints must be made as prescribed in § 78.283–7 (a).

(d) Tests of interior heater systems: Before interior heater systems are placed in service they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

§ 78.283–20 *Tests of safety valves.* (a) Valve must be tested before being put into service, by attaching to an air line and applying pressure. The valve must open at the pressure prescribed in § 78.283–15 (c) with a tolerance of plus or minus three (3) pounds.

§ 78.283–21 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103C–W and specification number of material used in tank shell and expansion dome in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. ICC–103C–W must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph, by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(6) Date on which interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(7) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.283–22 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish the car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of, or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

28. Amend entire § 78.284 (17 F. R. 9841, Nov. 1, 1952) (15 F. R. 8513, 8514, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.284) to read as follows:

§ 78.284 *Specification ICC–104–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.284–1 *Type.* (a) Tanks built under this specification must be cylindrical, with heads designed convex outward, and must have at least 1 expansion dome with manway, and such other external projections as are prescribed herein. When the interior of the tank is divided into compartments each compartment must have 2 heads designed convex outward, 1 expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.284–2 *Lagging.* (a) The tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than 1/8 inch in thickness and efficiently flashed around all openings so as to be weather-tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness equivalent to ½ that required for the shell.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.284–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 240 pounds per square inch.

§ 78.284–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than that specified in paragraph (b) of this section.

$$t=\frac{Pd}{2SE}$$

where
$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(1) The thickness of a dished head must be determined by the following formula, but in no case be less than that specified in paragraph (b) of this section:

$$t=\frac{5PL}{6SE}$$

where
$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of welded joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

(b) The minimum thickness of plates must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Expansion dome sheets | Tank heads | Expansion dome heads | Interior compartment heads |
|---|---|---|---|---|---|---|
| | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* |
| 60 inches or under | 7/16 | 1/4 | 5/16 | 1/2 | 5/16 | 5/16 |
| Over 60 to 78 inches | 7/16 | 5/16 | 5/16 | 1/2 | 5/16 | 5/16 |
| Over 78 to 96 inches | 1/2 | 3/8 | 5/16 | 1/2 | 5/16 | 3/8 |
| Over 96 to 112 inches | 1/2 | 7/16 | 5/16 | 9/16 | 5/16 | 7/16 |
| Over 112 to 122 inches | 1/2 | 1/2 | 5/16 | 3/8 | 5/16 | 1/2 |

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.284–5 (a), must be as prescribed in the above table. Where the cladding material does not have physical properties at least equal to that of the base plate prescribed in § 78.284–5 (a), minimum thickness of base plate must be as prescribed in the above table.

(d) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the cradle.

(e) For tanks built of one piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(f) For tanks without underframe the minimum thickness of bottom sheet must not be less than 5/16 inch.

(g) When tank is divided into compartments the interior head must comply with the requirements for interior compartment heads prescribed herein. When capacity of tank is reduced by moving in the exterior head a new exterior head of approved contour not less than ⅜ inch thickness must be applied. When the capacity is reduced by the insertion of a new interior head this head must comply with the requirements for interior compartment heads and the head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, must be provided with a tapped drain hole at their lowest point, and a tapped hole at top of tank. The top hole must be closed, and the bottom hole may be closed, with not less than ¾ inch nor more than 1½ inch solid pipe plugs having standard pipe threads.

§ 78.284–5 *Material.* (a) All plates for tank and expansion dome must be made of open-hearth boiler-plate flange quality steel to an approved specification. The carbon content of which shall not exceed 0.31 percent. These plates may also be clad with other metals, such as nickel.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification.

(c) Rivets, if used, must be of the same quality as used for steam boilers and other pressure vessels and be made of steel to an approved specification. When clad plates are used and attachments are riveted, the rivet heads inside the tank must be clad with the same material, or, rivets may be of the same material as the cladding, provided rivets have physical properties at least equivalent to rivets prescribed herein.

(d) All external projections must be made of materials specified herein.

(e) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.284–6 *Tank heads.* (a) Tank heads must be of approved contour and must be designed for pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3¾ inches except for interior heads of compartment tanks the knuckle radius must not be less than 1½ inches.

§ 78.284–7 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of A. A. R. Welding Code Appendix W.

§ 78.284–8 *Manway ring, safety valve flange, and bottom outlet nozzle flange or other attachments.* (a) The attachments may be riveted or fusion-welded. Riveted joints must be made metal to metal without interposition of other material. Rivets, if used, must be driven hot and calked inside. For computing rivet areas the effective diameter of a driven rivet is the diameter of its reamed hole, which hole must in no case exceed nominal diameter of rivet by more than 1/16 inch. Use of rivets of less than 5/8 inch nominal diameter prohibited. Fusion-welding for securing these attachments in place must be of double-welded butt joint type or double full-fillet lap joint type.

(b) *Calking.* All attachments riveted to tank must have the rivets calked, and the joints formed by the attachments, calked on the inside of tank.

§ 78.284–9 *Stress-relieving.* (a) All welding of the tank shell and of attachments welded directly thereto must be stress-relieved as a unit.

§ 78.284–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

§ 78.284–11 *Anchor rivets.* (a) If used, they may have their heads on the inside of the tank shell covered and protected from the lading by a liquid-tight housing of approved design. The lower portion of the housing must be fusion-welded to, and stress-relieved with the tank shell as a unit. After the rivets have been driven and calked, the top portion of the housing must be secured to the top of the lower portion by an approved method of welding, which welding need not be stress-relieved. A hole must be provided through tank shell, under each housing to permit making air pressure tests. Each test hole must be tightly closed after completion of test with an approved plug.

§ 78.284–12 *Expansion dome.* (a) The expansion dome must have a capacity measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside the dome, of at least 2 percent of the total capacity of the tank and dome combined, except that when safety valve or safety vent is applied to side of dome, the effective capacity of dome must be measured from top of safety valve or safety vent opening in the side of dome to inside top of shell of tank.

(b) The opening in manway ring must be at least 16 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter, the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, and the dome pocket is not closed off in an approved manner, dome pocket drain holes must be provided in the tank shell with nipples projecting inside the tank at least 1 inch.

(c) The dome head must be of approved contour and must be designed for pressure on concave side.

§ 78.284–13 *Closures for manways.* (a) The manway cover must be of approved type and designed to make it impossible to remove the cover while the interior of the tank is subjected to pressure.

(b) Manway covers must be made of cast, forged, or fabricated steel, malleable iron or other malleable metals. Manway rings, if riveted to dome of tank, must be of cast, forged, or fabricated steel, malleable iron or other malleable metals. Manway rings, if welded to dome of tank, must be made of cast, forged, or fabricated steel and be of good weldable quality in conjunction with metal of dome.

(c) All covers not hinged must be attached to outside of dome head by at least ⅜ inch chain or its equivalent.

(d) All joints between manway covers and their seats must be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

§ 78.284–14 *Gauging, bottom outlet valve operating rod, venting, loading and unloading, and air inlet devices extending through domes of tanks.* (a) Venting, loading, and unloading devices of approved design must be installed.

(b) Gauging, bottom outlet valve operating rod, and air inlet devices are not specification requirements.

(c) When installed, these devices, including their valves and fittings, must be of approved design, made of materials not subject to rapid deterioration by the lading. These devices, including their valves, must be provided with a protective housing. Unloading pipe must be securely anchored within the tank. Provisions must be made for closing pipe connections of valves.

§ 78.284–15 *Bottom outlets.* (a) The bottom outlet, when installed, must be made of metal not subject to rapid deterioration by the lading, be of approved construction, and be provided with a valve at its upper end and a liquid tight closure at its lower end.

(b) The valve operating mechanism and outlet nozzle construction must be such as to insure against unseating of valve due to stresses or shocks incident to transportation.

(c) Bottom outlet nozzle may be cast, fabricated, or forged metal. If outlet nozzle is welded to tank, it must be of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of tank.

(d) To provide for the attachment of standard unloading connections, the bottom of the main portion of the outlet nozzle or some fixed attachment thereto, must have external Unified Form Theads, 4 threads to the inch.

(e) For outlet nozzles that project 6 inches or more from shell of tank a "V" groove must be cut (not cast) in the upper part of outlet valve nozzle at a point immediately below lowest part of valve to a depth that will leave thickness of nozzle wall at the root of the "V" not over ⅜ inch. In the case of steam jacketed outlet nozzles this groove must be below the steam chamber but above the bottom of center sill construction. Where outlet nozzle is not a single piece, arrangement must be made to provide the equivalent of the breakage groove.

(f) The flange on the outlet nozzle must be of a thickness which will prevent distortion of the valve seat or valve by any change in contour of the shell resulting from expansion of lading, or other causes, and which will insure that accidental breakage of the outlet nozzle will occur at or below the "V" groove.

(g) The valve must have no wings or stem projecting below the "V" groove in the outlet nozzle. The valve and seat must be readily accessible or removable for repairs, including grinding.

(h) The valve operating mechanism must have means for compensating for variation in the vertical diameter of the tank produced by expansion, weight of the liquid contents, or other causes, and should operate from the interior of the tank, but in the event the rod is carried through the dome, leakage must be prevented by packing in stuffing box and cap nut.

(i) In no case must extreme projection of bottom outlet equipment extend to within 12 inches above top of rail. All bottom outlet reducers and closures and their attachments must be secured to car by at least ⅜ inch chains or its equivalent, except that outlet closure plugs may be attached by ¼ inch chain. When the bottom outlet closure is of the combination cap and valve type, the pipe connection to the valve must be closed by a plug or cap.

§ 78.284–16 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design mounted on expansion dome. Total valve discharge capacity must be sufficient to prevent building up of pressure in the tank in excess of 45 pounds per square inch.

(b) One safety valve must be provided for each tank, or compartment thereof, of 6,650 gallons capacity or less, and two safety valves for each tank, or compartment thereof, of over 6,650 gallons capacity.

(c) Each safety valve must be set to open at a pressure of 35 pounds per square inch and be vapor-tight at 28 pounds per square inch. (For tolerance see § 78.284–21 (a).)

(d) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped, must have one safety vent at least 1¾ inches inside diameter closed with a frangible disc of lead or other suitable material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closures must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids."

(e) Safety valve or safety vent flanges, if welded to dome, must be of cast, forged or fabricated metal, and be of good weldable quality in conjunction with metal of dome.

§ 78.284–17 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) All attachments to tank and dome must be applied by approved means. When attachments are riveted the edges of plates must be beveled so that the angle of the calking edge will be between 60 and 70 degrees with the flat surface of the attachment. The extreme calking edge distance, measured from center line of rivet hole, must be at least 1½ times the diameter of the hole plus ¼ inch. The joints formed by attachment of all riveted external projections must be calked on the inside. All rivet heads on the inside and outside of tank and dome must be calked. Split calking is prohibited. Interior heater systems, when installed, must be so constructed that the breaking off of their external connections will not cause leakage of contents of tank.

§ 78.284–18 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

(b) Interior heater systems and plug flanges, if welded to tank or dome, must be of cast, forged, or fabricated metal, and be of good weldable quality in conjunction with metal of tank or dome.

§ 78.284–19 *Closures for openings.* (a) All plugs must be solid, of good grade cast iron or equivalent, with standard pipe thread of a length which will screw at least 6 threads inside the face of fitting or tank. Plugs when inserted from the outside of tank must have the letter "S" at least ⅜ inch in size stamped with steel stamp or cast on the outside surface to indicate the plug is solid.

§ 78.284–20 *Tests of tanks.* (a) Each tank must be tested before being put into service and before lagging is applied by completely filling tank and dome with water, or other liquid of similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures, except safety valves or safety vents, must be in place while test is made.

(b) Calking of welded joints to stop leaks developed during the foregoing tests is prohibited. Repairs in welded joints must be made as prescribed in § 78.284–7 (a).

(c) Tests of interior heater systems: Before interior heater systems are placed in service they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

(d) Anchor rivet housing test: After anchor rivet housing, if applied, are in place these housings must be tested by applying an air pressure of 100 pounds per square inch through openings in tank shell and must be tight against leakage.

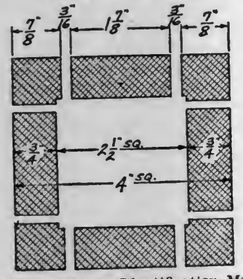
§ 78.284–21 *Tests of safety valves.* (a) Each valve must be tested, before being put into service, by attaching to an air line and applying pressure. The valve must not leak below 28 pounds per square inch pressure. The valve must open at the pressure prescribed in § 78.284–16 (c), with a plus or minus 3 pounds.

§ 78.284–22 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements

of this specification. These marks must be as follows:

(1) ICC–104–W in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the jacket in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of the tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.



(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, such as application of riveted anchors, etc., in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the jacket in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(6) Date on which the interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(7) Identification mark, illustrated herein, for approved manway closure must be stenciled on each side of dome jacket in line with the ladders and in a color contrasting to color of dome jacket.

Manhole Closure Identification Mark

(Reduced size)

(8) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the jacket in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(9) Tanks equipped with safety valves set to open at a pressure of 35 pounds per square inch, as prescribed in § 78.284–16 (e), must be stenciled "For Vapor Pressures Not Exceeding 40 Pounds Per Square Inch Absolute at 100 Degrees Fahrenheit" in letters and figures at least 1 inch high immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(10) Tanks made of clad plates must be stenciled on the jacket "(naming material) _____ clad tank". Lined tanks must be stenciled on the jacket "(naming material) _____ lined tank". These marks must be in letters at least 2 inches high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.284–23 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of, or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

29. Amend entire § 78.285 (18 F. R. 3145, June 2, 1953) (17 F. R. 9841, Nov. 1, 1952) (17 F. R. 7287, Aug. 9, 1952) (16 F. R. 11784, Nov. 21, 1951) (15 F. R. 8514, 8515, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.285) to read as follows:

§ 78.285 *Specification ICC–105A100–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.285–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward. The tank must be provided with a manway nozzle and cover on top of the tank of sufficient diameter to permit access to the interior of the tank and to provide for the proper mounting of venting, loading, unloading, sampling and safety valves, gauging device, thermometer well, and a protective housing on the cover. Other openings in the tank are prohibited.

§ 78.285–2 *Lagging.* (a) The tank shell and manway nozzle must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.075 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness to ½ that required for the shell.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.285–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint must be at least 495 pounds per square inch.

§ 78.285–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than that specified in paragraph (b) of this section.

$$t=\frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(b) The minimum thickness of plates must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Tank heads |
|---|---|---|---|
| | *Inch* | *Inch* | *Inch* |
| 87 inches or under | 7/16 | 1/2 | 7/16 |
| Over 87 to 96 inches | 9/16 | 9/16 | 9/16 |

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.285–6 (a) must be as prescribed in the above table. Where the cladding material does not have physical properties at least equal to that of the base plate prescribed in § 78.285–6 (a), minimum thickness of base plate must be as prescribed in the above table.

§ 78.285–5 *Manway nozzle opening.* (a) Opening in tank for manway nozzle must be reinforced in an approved manner.

§ 78.285–6 *Material.* (a) All plates for tank and manway nozzle must be made of open-hearth boiler-plate flange quality steel to an approved specification, the carbon content of which shall not exceed 0.31 percent. These plates may also be clad with other metals, such as nickel.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification. Use of cast iron prohibited.

(c) All external projections must be made of materials specified herein.

(d) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.285–7 *Tank heads.* (a) The tank head shape shall be an ellipsoidal of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be ½ the major axis.

§ 78.285–8 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of AAR Welding Code Appendix "W".

§ 78.285–9 *Stress relieving.* (a) All welding of the tank shell and of attachments welded directly thereto must be stress-relieved as a unit.

§ 78.285–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to the tank is prohibited.

§ 78.285–11 *Manway nozzle, cover, and protective housing.* (a) Manway nozzle must be of approved design of cast, forged or rolled steel at least 18 inches inside diameter and attached to tank by fusion welding. Fusion welding for securing this attachment in place must be of the double-welded butt joint type or double full-fillet lap joint type.

(b) Manway cover must be of forged or rolled steel at least 2¼ inches thick, machined to approved dimensions. Manway cover must be attached to manway nozzle by through or stud bolts not entering tank.

(c) The shearing value of the bolts attaching protective housing to manway cover must not exceed 70 percent of shearing value of bolts attaching manway cover to manway nozzle.

(d) All joints between manway cover and manway nozzle, and between manway cover and valves or other appurtenances mounted thereon, must be made tight against vapor pressure.

(e) Protective housing of cast or fabricated steel must be bolted to manway cover. Housing must be equipped with a suitable metal cover that can be securely closed. Housing cover on tanks used for the transportation of liquefied flammable gases must be provided with an opening equipped with an approved weather-proof covering and having an area at least equal to the total safety valve discharge area. Housing cover must have suitable stop to prevent cover striking loading or unloading connections and be hinged on one side only with approved riveted pin or rod with nuts and cotters. Openings in wall of housing must be equipped with screw plugs or other closures.

§ 78.285–12 *Venting, loading and unloading, gauging and sampling devices and thermometer well.* (a) Venting, loading and unloading valves must be of approved type, made of metal not subject to rapid deterioration by the lading, and must withstand a pressure of 100 pounds per square inch without leakage. The valves must be directly bolted to seatings on manway cover. Pipe connections of valves must be closed with approved screw plugs chained or otherwise fastened to prevent misplacement.

(b) Interior pipes of the loading and unloading valves, except as prescribed in paragraph (d) of this section, may be equipped with excess flow valves of an approved design.

(c) Gauging device, sampling valve, and thermometer well are not specification requirements. When used they must be of approved design, made of metal not subject to rapid deterioration by the lading, and must withstand a pressure of 100 pounds per square inch without leakage. Interior pipes of the gauging device and sampling valve, except as prescribed in paragraph (d) of this section, may be equipped with excess flow valves of an approved design. Interior pipe of thermometer well must be anchored in an approved manner to prevent breakage due to vibration. The thermometer well must be closed by an approved valve attached close to the manway cover and closed by a screw plug. Other approved arrangements that permit testing thermometer well for leaks without complete removal of the closure may be used.

(d) Tanks used for the transportation of liquefied flammable gases must have the interior pipes of the loading and unloading valves, gauging device and sampling valve equipped with excess flow valves of an approved design.

§ 78.285–13 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design, made of metal not subject to rapid deterioration by the lading and mounted on manway cover. The total valve discharge capacity must be sufficient to prevent building up of pressure in tank in excess of 75 pounds per square inch.

(b) The safety valves must be set to open at a pressure not exceeding 75 pounds per square inch. (For tolerance see § 78.285–17 (a)).

§ 78.285–14 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) Attachments, other than anchorage and those mounted on manway cover, are prohibited. Heater systems may be applied to exterior of tank by tank bands or other approved methods.

§ 78.285–15 *Closures for openings.* (a) Plugs must be of approved type, with standard pipe thread, and made of metal not subject to rapid deterioration by the lading.

§ 78.285–16 *Tests of tanks.* (a) Each tank must be tested by completely filling tank and manway nozzle with water or other liquid of similar viscosity having a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 100 pounds per square inch. The tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress.

(b) Calking of welded joints to stop leaks developed during the foregoing tests is prohibited. Repairs in welded joints must be made as prescribed in § 78.285–8 (a).

(c) Tests of exterior heater systems not a specification requirement.

§ 78.285–17 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The valve must open at a pressure not exceeding 75 pounds per square inch and be vapor tight at 60 pounds per square inch, which limiting pressures must not be affected by any auxiliary closure or other combination.

§ 78.285–18 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification as follows:

(1) ICC–105A100–W in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the jacket in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph, by the party assembling the completed car. These marks must also be stenciled on the jacket in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(6) Water capacity of the tank in pounds stamped plainly and permanently in letters and figures at least ⅜ inch high into the metal of the tank immediately below the mark specified in subparagraphs (2) and (3) of this paragraph. This mark must also be stenciled on the jacket immediately below the dome platform and either directly behind or within 3 feet of the right or left side of the ladder, or ladders if there is a ladder on each side of the tank, in letters and figures at least 2 inches high as follows:

WATER CAPACITY
000000 POUNDS

(7) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the jacket, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(8) Tanks made of clad plates must be stenciled on the jacket (naming material) _____ clad tank. Lined tanks must be stenciled on the jacket (naming material) _____ lined tank. These marks must be in letters at least 2 inches high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.285–19 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and numbers of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

30. Amend entire § 78.286 (18 F. R. 3148, June 2, 1953) (17 F. R. 9841, Nov. 1, 1952) (16 F. R. 11784, Nov. 21, 1951) (15 F. R. 8515, 8516, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.286) to read as follows:

§ 78.286 *Specification ICC–105A300–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.286–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward. The tank must be provided with manway nozzle and cover on top of the tank of sufficient diameter to permit access to the interior of the tank and to provide for the proper mounting of venting, loading, unloading, sampling, and safety valves, gauging device, thermometer well, and a protective housing on the cover. Other openings in the tank are prohibited.

§ 78.286–2 *Lagging.* (a) The tank shell and manway nozzle must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.075 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness equivalent to ½ that required for the shell.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.286–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint must be at least 750 pounds per square inch.

§ 78.286–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank and tank heads must be calculated by the following formula but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t = \frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure in pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(b) The minimum thickness of plates must be 11/16 inch.

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.286–6 (a), must be as prescribed in paragraph (b) of this section. Where the cladding material does not have physical properties at least equal to that of the base plate prescribed in § 78.286–6 (a), minimum thickness of base plate must be as prescribed in paragraph (b) of this section.

§ 78.286–5 *Manway nozzle opening.* (a) Opening in tank for manway nozzle must be reinforced in an approved manner.

§ 78.286–6 *Material.* (a) All plates for tank and manway nozzle must be made of open-hearth boiler-plate flange quality steel to an approved specification, the carbon content of which shall not exceed 0.31 percent. These plates may also be clad with other metals, such as nickel.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification. The use of cast iron is prohibited.

(c) All external projections must be made of materials specified herein.

(d) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.286–7 *Tank heads.* (a) The tank head shape shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be ½ of the major axis.

§ 78.286–8 *Welding.* (a) All joints must be fusion welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of AAR Welding Code Appendix "W".

§ 78.286–9 *Stress relieving.* (a) All welding of the tank shell and of attachments welded directly thereto, must be stress-relieved as a unit.

§ 78.286–10 *Tank mounting.* (a) The manner in which tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to the tank is prohibited.

§ 78.286–11 *Manway nozzle, cover and protective housing.* (a) Manway nozzle must be of forged or rolled steel at least 18 inches inside diameter. Manway nozzle must be of approved design and attached to tank by fusion-welding. Fusion welding for securing this attachment in place must be of the double-welded butt joint type or double full-fillet lap joint type.

(b) Manway cover must be of forged or rolled steel at least 2¼ inches thick (or nickel at least 2 inches thick when required by the lading), machined to approved dimensions. Manway cover must be attached to manway nozzle by through or stud bolts not entering tank.

(c) The shearing value of the bolts attaching protective housing to manway cover must not exceed 70 percent of shearing value of bolts attaching manway cover to manway nozzle.

(d) All joints between manway cover and manway nozzle, and between manway cover and valves or other appurtenances mounted thereon, must be made tight against vapor pressure.

(e) Protective housing of cast or fabricated steel must be bolted to manway cover. Housing must be equipped with a suitable metal cover that can be securely closed. Housing cover on tanks used for the transportation of liquefied flammable gases must be provided with an opening equipped with an approved weather proof covering and having an area at least equal to the total safety valve discharge area. Housing cover must have suitable stop to prevent cover striking loading or unloading connections and be hinged on one side only with approved riveted pin or rod with nuts and cotters. Openings in wall of housing must be equipped with screw plugs or other closures.

§ 78.286–12 *Venting, loading and unloading valves, gauging and sampling device and thermometer well.* (a) Venting, loading and unloading valves must be of approved type, made of metal not subject to rapid deterioration by the lading, and must withstand a pressure of 300 pounds per square inch without leakage. The valves must be directly bolted to seatings on manway cover. Pipe connections of the valves must be closed with approved screw plugs or otherwise fastened to prevent misplacement.

(b) The interior pipes of the loading and unloading valves, except as prescribed in paragraphs (d) and (e) of this section, may be equipped with excess flow valves of an approved design.

(c) Gauging device, sampling valve and thermometer well are not specification requirements. When used, they must be of approved design, made of metal not subject to rapid deterioration by lading, and must withstand a pressure of 300 pounds per square inch without leakage. Interior pipes of the gauging device and sampling valve, except as prescribed in paragraph (d) of this section, may be equipped with excess flow valves of an approved design. Interior pipe of the thermometer well must be anchored in an approved manner to prevent breakage due to vibration. The thermometer well must be closed by an approved valve attached close to the manway cover and closed by a screw plug. Other approved arrangements that permit testing thermometer well for leaks without complete removal of the closure may be used.

(d) Tanks for use in the transportation of liquefied flammable gases must have the interior pipes of the loading and unloading valves, gauging device and sampling valve equipped with excess flow valves of an approved design.

(e) Tanks for use in the transportation of chlorine must have the interior pipes of the liquid lines equipped with excess flow valves of an approved design.

§ 78.286–13 *Safety valves.* (a) The tank must be equipped with one or more safety valves of an approved design, made of metal not subject to rapid deterioration by lading and mounted on manway cover. The total valve discharge capacity must be sufficient to prevent building up of pressure in tank in exces of 225 pounds per square inch.

(b) The safety valve must be set to open at a pressure not exceeding 225 pounds per square inch. (For tolerance see § 78.286–17 (a).)

§ 78.286–14 *Fixtures, reinforcements and attachments not otherwise specified.* (a) Attachments, other than the anchorage, interior pipe bracing, and those mounted on manway cover, are prohibited. Heater systems may be applied to exterior of tank by tank bands or other approved methods.

§ 78.286–15 *Closures for openings.* (a) Plugs must be of approved type, with standard pipe thread, and of metal not subject to rapid deterioration by the lading.

§ 78.286–16 *Tests of tanks.* (a) Each tank must be tested, after anchorage is applied and before the tank lagging is applied, by completely filling tank and manway nozzle with water, or other liquid or similar viscosity, having a temperature which must not exceed 100 degrees Fahrenheit during test, and applying a pressure of 300 pounds per square inch. The tank must hold the prescribed pressure for at least 30 minutes without leakage or evidence of distress.

(b) Calking of welded joints to stop leaks developed during the foregoing tests prohibited. Repairs in welded joints must be made as prescribed in § 78.286–8 (a).

(c) Tests of exterior heater systems are not a specification requirement.

§ 78.286–17 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The valve must open at a pressure not exceeding 225 pounds per square inch and be vapor tight at 180 pounds per square inch, which limiting pressures must not be affected by any auxiliary closure or other combination.

§ 78.286–18 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–105A300–W in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the jacket in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph, by the party assembling the completed car. These marks must be stenciled on the jacket in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made and by whom, stenciled on the jacket.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(6) Water capacity of the tank in pounds stamped plainly and permanently in letters and figures at least ⅜ inch high into the metal of the tank immediately below the mark specified in subparagraphs (2) and (3) of this paragraph. This mark must also be stenciled on the jacket immediately below the dome platform and either directly behind or within 3 feet of the right or left side of ladder, or ladders if there is a ladder on each side of the tank, in letters and figures at least 2 inches high as follows:

WATER CAPACITY
000000 POUNDS

(7) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only" or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the jacket in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(8) Tanks made of clad plates must be stenciled on the jacket "_____ _____ (naming material) clad tank". Lined tanks must be stenciled on the jacket "_____ (naming material) lined tanks". These marks must be stenciled in letters at least 2 inches high, immediately above stenciled mark specified in subparagraph (7) of this paragraph.

§ 78.286–19 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

31. Amend entire § 78.287 (18 F. R. 3145, June 2, 1953) (16 F. R. 11784, Nov. 21, 1951) (15 F. R. 8516, 8517, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.287) to read as follows:

§ 78.287 *Specification ICC–105A400–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.287–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward. The tank must be provided with manway nozzle and cover on top of the tank of sufficient diameter to permit access to the interior of the tank and to provide for the proper mounting of venting, loading, unloading, sampling, and safety valves, gauging device, thermometer well, and a protective housing on the cover. Other openings in the tank are prohibited.

§ 78.287–2 *Lagging.* (a) The tank shell and manway nozzle must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.075 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems

are attached to exterior of tank, the lagging over each heater element may be reduced in thickness equivalent to ½ that required for the shell.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.287–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint must be at least 1,000 pounds per square inch.

§ 78.287–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank and tank heads must be calculated by the following formula but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t = \frac{Pd}{2SE}$$

where
$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure in pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(b) The minimum thickness of plates must be 1/16 inch.

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.287–6 (a), must be as prescribed in paragraph (b) of this section. Where the cladding material does not have physical properties at least equal to that of the base plate prescribed in § 78.287–6 (a), minimum thickness of base plate must be as prescribed in paragraph (b) of this section.

§ 78.287–5 *Manway nozzle opening.* (a) Opening in tank for manway nozzle must be reinforced in an approved manner.

§ 78.287–6 *Material.* (a) All plates for tank and manway nozzle must be made of open-hearth boiler-plate flange quality steel to an approved specification, the carbon content of which shall not exceed 0.31 percent. These plates may also be clad with other metals, such as nickel.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification. The use of cast iron is prohibited.

(c) All external projections must be made of materials specified herein.

(d) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.287–7 *Tank heads.* (a) The tank head shape shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be ½ of the major axis.

§ 78.287–8 *Welding.* (a) All joints must be fusion welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion welding in accordance with the requirements of AAR Welding Code Appendix "W".

§ 78.287–9 *Stress-relieving.* (a) All welding of the tank shell and of attachments welded directly thereto, must be stress-relieved as a unit.

§ 78.287–10 *Tank mounting.* (a) The manner in which tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to tank is prohibited.

§ 78.287–11 *Manway nozzle, cover and protective housing.* (a) Manway nozzle must be of forged or rolled steel at least 18 inches inside diameter. Manway nozzle must be of approved design and attached to tank by fusion-welding. Fusion-welding for securing this attachment in place must be of the double-welded butt joint type or double full-fillet lap joint type.

(b) Manway cover must be of forged or rolled steel at least 2¼ inches thick (or nickel at least 2 inches thick when required by the lading), machined to approved dimensions. Manway cover must be attached to manway nozzle by through or stud bolts not entering tank.

(c) The shearing value of the bolts attaching protective housing to manway cover must not exceed 70 percent of shearing value of bolts attaching manway cover to manway nozzle.

(d) All joints between manway cover and manway nozzle, and between manway cover and valves or other appurtenances mounted thereon, must be made tight against vapor pressure.

(e) Protective housing of cast or fabricated steel must be bolted to manway cover. Housing must be equipped with a suitable metal cover that can be securely closed. Housing cover on tanks used for the transportation of liquefied flammable gases must be provided with an opening equipped with an approved weather proof covering and having an area at least equal to the total safety valve discharge area. Housing cover must have suitable stop to prevent cover striking loading or unloading connections and be hinged on one side only with approved riveted pin or rod with nuts and cotters. Openings in wall of housing must be equipped with screw plugs or other closures.

§ 78.287–12 *Venting, loading and unloading valves, gauging and sampling device and thermometer well.* (a) Venting, loading and unloading valves must be of approved type, made of metal not subject to rapid deterioration by lading, and must withstand a pressure of 400 pounds per square inch without leakage. The valves must be directly bolted to seatings on manway cover. Pipe connections of the valves must be closed with approved screw plugs or otherwise fastened to prevent misplacement.

(b) The interior pipes of the loading and unloading valves, except as prescribed in paragraphs (d) and (e) of this section, may be equipped with excess flow valves of an approved design.

(c) Gauging device, sampling valve and thermometer well are not specification requirements. When used, they must be of approved design, made of metal not subject to rapid deterioration by lading, and must withstand a pressure of 400 pounds per square inch without leakage. Interior pipes of the gauging device and sampling valve, except as prescribed in paragraph (d) of this section, may be equipped with excess flow valves of an approved design. Interior pipe of thermometer well must be anchored in an approved manner to prevent breakage due to vibration. The thermometer well must be closed by an approved valve attached close to the manway cover and closed by a screw plug. Other approved arrangements that permit testing thermometer well for leaks without complete removal of the closure may be used.

(d) Tanks for use in the transportation of liquefied flammable gases must have the interior pipes of the loading and unloading valves, gauging device and sampling valve equipped with excess flow valves of an approved design.

(e) Tanks for use in the transportation of chlorine must have the interior pipes of the liquid lines equipped with excess flow valves of an approved design.

§ 78.287–13 *Safety valves.* (a) The tank must be equipped with one or more safety valves of an approved design, made of metal not subject to rapid deterioration by lading and mounted on manway cover. The total valve discharge capacity must be sufficient to prevent building up of pressure in tank in excess of 300 pounds per square inch.

(b) The safety valves must be set to open at a pressure not exceeding 300 pounds per square inch. (For tolerance see § 78.287–17 (a).)

§ 78.287–14 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) Attachments, other than the anchorage, interior pipe bracing, and those mounted on manway cover, are prohibited. Heater systems may be applied to exterior of tank by tank bands or other approved methods.

§ 78.287–15 *Closures for openings.* (a) Plugs must be of approved type, with standard pipe thread, and of metal not subject to rapid deterioration by the lading.

§ 78.287–16 *Tests of tanks.* (a) Each tank must be tested, after anchorage is applied and before the tank lagging is applied, by completely filling tank and manway nozzle with water, or other liquid of similar viscosity, having a temperature which must not exceed 100 degrees Fahrenheit during test, and applying a pressure of 400 pounds per square inch. The tank must hold the prescribed pressure for at least 30 minutes without leakage or evidence of distress.

(b) Calking of welded joints to stop leaks developed during the foregoing tests prohibited. Repairs in welded joints must be made as prescribed in § 78.287–8 (a).

(c) Tests of exterior heater systems not a specification requirement.

§ 78.287–17 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The valve must open at a pressure not exceeding 300 pounds per square inch and be vapor tight at 240 pounds per square inch, which limiting pressures must not be affected by any auxiliary closure or other combination.

§ 78.287–18 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–105A400–W in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the jacket in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must be stenciled on the jacket in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph, by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made and by whom, stenciled on the jacket.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(6) Water capacity of the tank in pounds stamped plainly and permanently in letters and figures at least ⅜ inch high into the metal of the tank immediately below the mark specified in subparagraphs (2) and (3) of this paragraph. This mark must also be stenciled on the jacket immediately below the dome platform and either directly behind or within 3 feet of the right or left side of ladder, or ladders if there is a ladder on each side of the tank, in letters and figures at least 2 inches high as follows:

WATER CAPACITY
000000 POUNDS

(7) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only" or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the jacket in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(8) Tanks made of clad plates must be stenciled on the jacket "_____ (naming material) clad tank". Lined tanks must be stenciled on the jacket "_____ (naming metarial) lined tanks." These marked must be stenciled in letters at least 2 inches high, immediately above stenciled mark specified in subparagraph (7) of this paragraph.

§ 78.287–19 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

32. Amend entire § 78.288 (19 F. R. 3264, June 3, 1954) (18 F. R. 3145, June 2, 1953) (17 F. R. 9841, 9842, Nov. 1, 1952) (16 F. R. 11785, Nov. 21, 1951) (15 F. R. 8517 to 8519, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.288) to read as follows:

§ 78.288 *Specification ICC–105A500–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.288–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward. The tank must be provided with a manway nozzle and cover on top of the tank of sufficient diameter to permit access to the interior of the tank and to provide for the proper mounting of venting, loading, unloading, sampling and safety valves, gauging device, thermometer well, and a protective housing on the cover. Other openings in the tank are prohibited.

§ 78.288–2 *Lagging.* (a) The tank shell and manway nozzle must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.075 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness equivalent to one-half that required for shell.

(b) Tanks for use in the transportation of liquefied carbon dioxide must have tank shell and manway nozzle lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.03 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour; except that the insulation thickness directly over the center sill may be reduced to give a thermal conductance not exceeding 0.04 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour; this reduction is to permit an anchorage which must not exceed 7 inches from top of center sill to bottom of tank.

(c) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.288–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint must be at least 1250 pounds per square inch.

§ 78.288–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t=\frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure, pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(b) The minimum thickness of plates must be 1 1/16 inch.

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.288–6 (a), must be as prescribed in paragraph (b) of this section. Where the cladding material does not have the physical properties at least equal to that of the base plate prescribed in § 78.288–6 (a), minimum thickness of base plate must be as prescribed in paragraph (b) of this section.

§ 78.288–5 *Manway nozzle opening.* (a) Opening in tank for manway nozzle must be reinforced in an approved manner.

§ 78.288–6 *Material.* (a) All plates for tank and manway nozzle must be of open-hearth boiler-plate flange quality steel to an approved specification, the carbon content of which shall not exceed 0.31 percent. These plates may also be clad with other metals, such as nickel.

(b) All plates for tank, manway nozzle and anchorage for tanks used in the transportation of liquefied carbon dioxide must be made of steel to an approved specification suitable for service at low temperatures.

(c) All castings used for fittings or attachments to tank must be made of material to an approved specification. The use of cast iron is prohibited.

(d) All external projections must be made of materials specified herein.

(e) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.288–7 *Tank heads.* (a) The tank head shape shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be ½ of the major axis.

§ 78.288–8 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of A. A. R. Welding Code Appendix "W".

§ 78.288–9 *Stress relieving.* (a) All welding of the tank shell and of attachments welded directly thereto must be stress-relieved as a unit.

§ 78.288–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to tank is prohibited.

§ 78.288–11 *Manway nozzle, cover and protective housing.* (a) Manway nozzle must be of forged or rolled steel at least 18 inches inside diameter. Manway nozzle must be of approved design and attached to tank by fusion-welding. Fusion-welding for securing this attachment in place must be of the double-welded butt joint type or double full-fillet lap joint type.

(b) Manway cover must be of forged or rolled steel at least 2¼ inches thick machined to approved dimensions. Manway cover must be attached to manway nozzle by through or stud bolts not entering tank.

(c) The shearing value of the bolts attaching protective housing to manway cover must not exceed 70 percent of shearing value of bolts attaching manway cover to manway nozzle.

(d) All joints between manway cover and manway nozzle, and between manway cover and valves or other appurtenances mounted thereon, must be made tight against vapor pressure.

(e) Protective housing of cast or fabricated steel must be bolted to manway cover. Housing must be equipped with a suitable metal cover that can be securely closed. Housing cover on tanks used for the transportation of liquefied flammable gases must be provided with an opening equipped with an approved weather-proof covering and having an area at least equal to the total safety valve discharge area. Housing cover must have suitable stop to prevent cover striking loading or unloading connections and be hinged on one side only with approved riveted pin or rod with nuts and cotters. Openings in wall of housing must be equipped with screw plugs or other closures.

§ 78.288–12 *Venting, loading and unloading valves, gauging and sampling device and thermometer well.* (a) Venting, loading and unloading valves must be of approved type, made of metal not subject to rapid deterioration by lading, and must withstand a pressure of 500 pounds per square inch without leakage. The valves must be directly bolted to seatings on manway cover. Pipe connections of valves must be closed with approved screw plugs chained or otherwise fastened to prevent misplacement.

(b) The interior pipes of the loading and unloading valves, except as prescribed in paragraphs (d) and (e) of this section, may be equipped with excess flow valves of an approved design.

(c) Gauging device, sampling valve and thermometer well are not specification requirements. When used, they must be of approved design, made of metal not subject to rapid deterioration by the lading, and must withstand a pressure of 500 pounds per square inch without leakage. Interior pipes of the gauging device and sampling valve, except as prescribed in paragraph (d) of this section, may be equipped with excess flow valves of an approved design. Interior pipe of thermometer well must be anchored in an approved manner to prevent breakage due to vibration. The thermometer well must be closed by an approved valve attached close to the manway cover and closed by a screw plug. Other approved arrangements that permit testing thermometer well for leaks without complete removal of the closure may be used.

(d) Tanks for use in the transportation of liquefied flammable gases must have the interior pipes of the loading and unloading valves, gauging device and sampling valve equipped with excess flow valves of an approved design.

(e) Tanks used for the transportation of chlorine must have the interior pipes of the liquid lines equipped with excess flow valves of an approved design.

§ 78.288–13 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design made of metal not subject to rapid deterioration by the lading and mounted on manway cover. The total valve discharge capacity must be sufficient to prevent building up of pressure in tank in excess of 375 pounds per square inch.

(b) The safety valves must be set to open at a pressure of not exceeding 375 pounds per square inch. (For tolerance see § 78.288–17 (a).)

(c) Tanks for use in the transportation of liquefied carbon dioxide must be equipped with one safety valve of approved design set to open at a pressure not exceeding 375 pounds per square inch and one frangible disc device of approved design set to function at a pressure less than the test pressure of the tank. The discharge capacity of each of these safety devices must be sufficient to prevent building up of pressure in tank in excess of 375 pounds per square inch. Tanks must also be equipped with two pressure-regulating valves of approved design, one set to open at 300 pounds per square inch pressure and one set to open at 333 pounds per square inch pressure. Each pressure-regulating valve and safety device must have its final discharge piped to the outside of the protective housing.

§ 78.288–14 *Fixtures, reinforcements and attachments not otherwise specified.* (a) Attachments, other than the anchorage and those mounted on manway nozzle and cover, are prohibited. Heater systems may be applied to exterior of tank by tank bands or other approved methods.

§ 78.288–15 *Closures for openings.* (a) Plugs must be of approved type, with standard pipe thread, and of metal not subject to rapid deterioration by the lading.

§ 78.288–16 *Tests of tanks.* (a) Each tank must be tested, after anchorage is applied and before the tank lagging is applied, by completely filling the tank and manway nozzle with water, or other liquid of similar viscosity, having a temperature which must not exceed 100 degrees Fahrenheit during test, and applying a pressure of 500 pounds per square inch. The tank must hold the prescribed pressure for at least 30 minutes without leakage or evidence of distress.

(b) Calking of welded joints to stop leaks developed during the foregoing tests is prohibited. Repairs in welded joints must be made as prescribed in § 78.288–8 (a).

(c) Tests of exterior heater systems are not a specification requirement.

§ 78.288–17 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The valve must open at a pressure not exceeding 375 pounds per square inch and be vapor tight at 300 pounds per square inch, which limiting pressures must not be affected by any auxiliary closures or other combination.

§ 78.288–18 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–105A500–W in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the jacket in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of the company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph, by the

party assembling the completed car. These marks must also be stenciled on the jacket in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(5) Date on which the safety valve was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(6) Water capacity of the tank in pounds stamped plainly and permanently in letters and figures at least ⅜ inch high into the metal of the tank immediately below the mark specified in subparagraphs (2) and (3) of this paragraph. This mark must also be stenciled on the jacket immediately below the dome platform and either directly behind or within 3 feet of the right or left side of ladder, or ladders if there is a ladder on each side of the tank, in letters and figures at least 2 inches high as follows:

WATER CAPACITY
000000 POUNDS

(7) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the jacket in letters at least 1 inch high immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(8) Tanks made of clad plates must be stenciled on the jacket "---------- (naming material) clad tank." Lined tanks must be stenciled on the jacket "---------- (naming material) lined tank." These marks must be stenciled in letters at least 2 inches high, immediately above the stenciled mark specified in subparagraph (7) of this paragraph.

§ 78.289–19 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

33. Amend entire § 78.289 (19 F. R. 3264, 3265, June 3, 1954) (18 F. R. 3145, June 2, 1953) (17 F. R. 9842, Nov. 1, 1952) (16 F. R. 11785, Nov. 21, 1951) (15 F. R. 8519, 8520, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., 78.289) to read as follows:

§ 78.289 *Specification ICC–105A600–W; lagged fusion-welded steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.289–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward. The tank must be provided with a manway nozzle and cover on top of the tank of sufficient diameter to permit access to the interior of the tank and to provide for the proper mounting of venting, loading, unloading, sampling and safety valves, gauging device, thermometer well, and a protective housing on the cover. Other openings in the tank are prohibited.

§ 78.289–2 *Lagging.* (a) The tank shell and manway nozzle must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.075 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness equivalent to ½ that required for shell.

(b) Tanks for use in transportation of liquefied carbon dioxide must have tank shell and manway nozzle lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.03 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour; except that the insulation thickness directly over the center sill may be reduced to give a thermal conductance not exceeding 0.04 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour; this reduction is to permit an anchorage which must not exceed 7 inches from top of center sill to bottom of tank.

(c) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.289–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint must be at least 1,500 pounds per square inch.

§ 78.289–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t = \frac{Pd}{2SE}$$

where
$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(b) The minimum thickness of plates must be 11/16 inch.

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.289–6 (a), must be as prescribed in paragraph (b) of this section. Where the cladding material does not have the physical properties at least equal to that of the base plate prescribed in § 78.289–6 (a), minimum thickness of base plate must be as prescribed in paragraph (b) of this section.

§ 78.289–5 *Manway nozzle opening.* (a) Opening in tank for manway nozzle must be reinforced in an approved manner.

§ 78.289–6 *Material.* (a) All plates for tank and manway nozzle must be of open-hearth boiler-plate flange quality steel to an approved specification, the carbon content of which shall not exceed 0.31 percent. These plates may also be clad with other metals, such as nickel.

(b) All plates for tank, manway nozzle and anchorage for tanks used in the transportation of liquefied carbon dioxide must be made of steel to an approved specification suitable for service at low temperatures.

(c) All castings used for fittings or attachments to tank must be made of material to an approved specification. The use of cast iron is prohibited.

(d) All external projections must be made of materials specified herein.

(e) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.289–7 *Tank heads.* (a) The tank head shape shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be ½ of the major axis.

§ 78.289–8 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with requirements of AAR Welding Code Appendix "W".

§ 78.289–9 *Stress relieving.* (a) All welding of the tank shell and of attachments welded directly thereto must be stress-relieved as a unit.

§ 78.289–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to the tank is prohibited.

§ 78.289–11 *Manway nozzle, cover and protective housing.* (a) Manway nozzle must be of forged or rolled steel at least 18 inches inside diameter. Manway nozzle must be of approved design and attached to tank by fusion-welding. Fusion welding for securing this attachment in place must be of the double-welded butt joint type or double full-fillet lap joint type.

(b) Manway cover must be of forged or rolled steel at least 2¼ inches thick machined to approved dimensions. Manway cover must be attached to manway nozzle by through or stud bolts not entering tank.

(c) The shearing value of the bolts attaching protective housing to manway cover must not exceed 70 percent of shearing value of bolts attaching manway cover to manway nozzle.

(d) All joints between manway cover and manway nozzle, and between manway cover and valves or other appurtenances mounted thereon, must be made tight against vapor pressure.

(e) Protective housing of cast or fabricated steel must be bolted to manway cover. Housing must be equipped with a suitable metal cover that can be securely closed. Housing cover on tanks used for the transportation of liquefied flammable gases must be provided with an opening equipped with an approved weather-proof covering and having an area at least equal to the total safety valve discharge area. Housing cover must have suitable stop to prevent cover striking loading or unloading connections and be hinged on one side only with approved riveted pin or rod with nuts and cotters. Openings in wall of housing must be equipped with screw plugs or other closures.

§ 78.289–12 *Venting, loading and unloading valves, gauging and sampling device and thermometer well.* (a) Venting, loading and unloading valves must be of approved type, made of metal not subject to rapid deterioration by lading, and must withstand a pressure of 600 pounds per square inch without leakage. The valves must be directly bolted to seatings on manway cover. Pipe connections of the valves must be closed with approved screw plugs chained or otherwise fastened to prevent misplacement.

(b) The interior pipes of the loading and unloading valves, except as prescribed in paragraphs (d) and (e) of this section, may be equipped with excess flow valves of an approved design.

(c) Gauging device, sampling valve and thermometer well are not specification requirements. When used, they must be of approved design, made of metal not subject to rapid deterioration by the lading, and must withstand a pressure of 600 pounds per square inch without leakage. Interior pipes of the gauging device and sampling valve, except as prescribed in paragraph (d) of this section, may be equipped with excess flow valves of an approved design. Interior pipe of thermometer well must be anchored in an approved manner to prevent breakage due to vibration. The thermometer well must be closed by an approved valve attached close to the manway cover and closed by a screw plug. Other approved arrangements that permit testing thermometer well for leaks without complete removal of the closure may be used.

(d) Tanks for use in the transportation of liquefied flammable gases must have the interior pipes of the loading and unloading valves, gauging device and sampling valve eqiupped with excess flow valves of an approved design.

(e) Tanks used for the transportation of chlorine must have the interior pipes of the liquid lines equipped with excess flow valves of an approved design.

§ 78.289–13 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design made of metal not subject to rapid deterioration by the lading and mounted on manway cover. The total valve discharge capacity must be sufficient to prevent building up of pressure in tank in excess of 450 pounds per square inch.

(b) The safety valves must be set to open at a pressure of not exceeding 450 pounds per square inch. (For tolerance see § 78.289–17 (a).)

(c) Tanks for use in the transportation of liquefied carbon dioxide must be equipped with one safety valve of approved design set to open at a pressure not exceeding 450 pounds per square inch and one frangible disc device of approved design set to function at a pressure less than the test pressure of the tank. The discharge capacity of each of these safety devices must be sufficient to prevent building up of pressure in tank in excess of 450 pounds per square inch. Tanks must also be equipped with two pressure-regulating valves of approved design, one set to open at 360 pounds per square inch pressure and one set to open at 400 pounds per square inch pressure. Each pressure-regulating valve and safety device must have its final discharge piped to the outside of the protective housing.

§ 78.289–14 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) Attachments, other than the anchorage and those mounted on the manway nozzle and cover, are prohibited. Heater systems may be applied to exterior of tank by tank bands or other approved method.

§ 78.289–15 *Closures for openings.* (a) Plugs must be of approved type, with standard pipe thread, and of metal not subject to rapid deterioration by the lading.

§ 78.289–16 *Tests of tanks.* (a) Each tank must be tested, after anchorage is applied and before the tank lagging is applied, by completely filling the tank and manway nozzle with water, or other liquid of similar viscosity, having a temperature which must not exceed 100 degrees Fahrenheit during test, and applying a pressure of 600 pounds per square inch. The tank must hold the prescribed pressure for at least 30 minutes without leakage or evidence of distress.

(b) Calking of welded joints to stop leaks developed during the foregoing tests prohibited. Repairs in welded joints must be made as prescribed in § 78.289–8 (a).

(c) Tests of exterior heater systems are not a specification requirement.

§ 78.289–17 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The valve must open at a pressure not exceeding 450 pounds per square inch and be vapor tight at 360 pounds per square inch, which limiting pressures must not be affected by any auxiliary closure or other combination.

§ 78.289–18 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–105A600–W in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the jacket in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of the company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the jacket in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (2) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(6) Water capacity of the tank in pounds stamped plainly and permanently in letters and figures at least ⅜ inch high into the metal of the tank immediately below the mark specified in subparagraphs (2) and (3) of this paragraph. This mark must also be stenciled on the jacket immediately below the dome platform and either directly behind or within 3 feet of the right or left side of ladder, or ladders if there is a ladder on each side of the tank, in letters and figures at least 2 inches high as follows:

WATER CAPACITY
000000 POUNDS

(7) When a tank car and its appurtenances are designed and authorized

for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the jacket in letters at least 1 inch high immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(8) Tanks made of clad plates must be stenciled on the jacket "_____ (naming material) clad tank." Lined tanks must be stenciled on the jacket "_____ (naming material) lined tank." These marks must be stenciled in letters at least 2 inches high, immediately above the stenciled mark specified in subparagraph (7) of this paragraph.

§ 78.289–19 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

34. Cancel entire § 78.290 (15 F. R. 8520 to 8523, Dec. 2, 1950) (49 CFR 78.290, 1950 Rev.)

35. Amend entire § 78.291 (19 F. R. 3265, June 3, 1954) (18 F. R. 5278, Sept. 1, 1953) (18 F. R. 806, Feb. 7, 1953) (17 F. R. 9842, Nov. 1, 1952) (16 F. R. 5330 to 5334, June 6, 1951) (16 F. R. 5768, June 16, 1951) (49 CFR 1950 Rev., 1954 Supp., 78.291) to read as follows:

§ 78.291 *Specification ICC–103AL–W; fusion-welded aluminum tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification, it means approval by the Association of American Railroads Committee on Tank Cars, as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.291–1 *Type.* (a) Tanks built under this specification must be cylindrical, with heads designed convex outward, and must have at least one expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.291–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and expension dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weathertight. When heater systems are attached to the exterior of tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.291–3 *Bursting pressure.* (a) The calculated bursting pressure based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 240 pounds per square inch.

§ 78.291–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t=\frac{Pd}{2SE}$$

where
$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch as follows:

ASTM B–178 Alloy 996A = 9,500 p. s. i.
ASTM B–178 Alloy 990A = 11,000 p. s. i.
ASTM B–178 Alloy M1A = 14,000 p. s. i.
ASTM B–178 Alloy GR20A = 25,000 p. s. i.
ASTM B–178 Alloy GS11A = 24,000 p. s. i.
ASTM B–178 Alloy GR40A = 30,000 p. s. i.

$E$ = efficiency of longitudinal welded joint = 90 percent.

(b) The minimum thickness of plates must be as follows:

| | Inch |
|---|---|
| Bottom sheet | 5/8 |
| Shell sheet | ½ |
| Expansion dome sheet | ½ |
| Tank head (dished) | 5/8 |
| Tank head (ellipsoidal) | ½ |
| Expansion dome head (dished or ellipsoidal) | ½ |

(c) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the cradle.

(d) For tanks built of one piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(e) The thickness of a dished tank head must be determined by the following formula, but shall in no case be less than that specified in paragaph (b) of this section:

$$t=\frac{5PL}{6SE}$$

where
$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure, pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side of head in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch (see paragraph (a) of this section);
$E$ = efficiency of welded joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

(f) The thickness of an ellipsoidal head shall be determined by the following formula:

$$t=\frac{Pd}{2SE}$$

where
$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure, pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch (see paragraph (a) of this section);
$E$ = efficiency of welded joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

§ 78.291–5 *Material.* (a) All plates for tank and expansion dome must be of an aluminum alloy to an approved specification and be suitable for fusion welding and not subject to rapid deterioration by the lading.

(b) Aluminum alloy castings for fittings or attachment to tank must be made of material to an approved specification.

(c) All rivets must be made of aluminum alloy to an approved specification They must be handled and driven in a manner that will insure the requisite strength.

(d) All external projections which may be in contact with the lading must be made of material specified herein.

§ 78.291–6 *Tank heads.* (a) Tank heads must be of approved contour, and may be dished or ellipsoidal for pressure on concave side.

(b) Dished heads must have main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 5 inches.

(c) Ellipsoidal tank head shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be ½ the major axis.

§ 78.291–7 *Welding.* (a) All joints must be fusion welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion welding to be performed by fabricators certified by the Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion welding in accordance with the requirements of AAR Welding Code, Appendix "W".

§ 78.291–8 *Manway ring, safety valve flange, and bottom outlet nozzle flange or other attachments.* (a) These attachments may be riveted or fusion welded. Riveted joints must be made metal to metal without interposition of other material. Rivets must be calked inside. For computing rivet areas the effective diameter of a driven rivet is the diameter of its reamed hole, which hole must in no case exceed nominal diameter of rivet by more than 1/16 inch. Use of rivets of less than 5/8" nominal diameter prohibited. Fusion welding for securing these attachments in place must be of double welded butt joint type or double full-fillet lap joint type.

(b) *Calking.* All attachments riveted to the tank must have the rivets calked and the joints formed by attachments calked on the inside of tank.

§ 78.291–9 *Stress relieving.* (a) Not a specification requirement.

§ 78.291–10 *Tank mounting.* (a) The manner in which tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to the tank is prohibited.

§ 78.291–11 *Expansion dome.* (a) The expansion dome must have a capacity, measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside of dome, of at least two per cent of the total capacity of the tank and dome combined, except that when safety valve or vent is applied to side of dome, the effective capacity of dome must be measured from top of safety valve or safety vent opening in the side of dome to inside top of shell of tank.

(b) The opening in manway ring must be at least 16 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter, the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, and the dome pocket is not closed off in an approved manner, dome pocket drain holes must be provided in the tank shell with nipples projecting inside the tank at least 1 inch.

(c) The dome head must be of approved contour. The dome head must be of an aluminum alloy.

(d) The dome shell thickness shall be calculated by the formula in § 78.291–4 (a).

(e) The dome head, if dished, must be dished to a radius not exceeding 96 inches. Thickness of the dished dome head shall be calculated by the formula in § 78.291–4 (e).

(f) Dome head may be an ellipsoid of revolution in which the major axis shall be equal to the diameter of the dome shell and the minor axis shall be one-half of the major axis. The thickness in this case shall be determined by using formula of the main head. (See § 78.291–4 (f).)

(g) Tank shell shall be reinforced by the addition of a plate equal to or greater than shell in thickness and the cross sectional area shall exceed metal removed for dome opening, or tank shell shall be reinforced by a seamless saddle plate equal to or greater than shell in thickness and butt welded to tank shell. The reinforcing saddle plate shall be provided with a flued opening having a vertical flange of the diameter of the dome for butt welding shell of dome to the flange. The reinforcing saddle plate shall extend about the dome a distance measured along shell of tank at least equal to the extension at top of tank. Other approved designs may be used.

§ 78.291–12 *Closure for manway.* (a) The manway cover must be of approved type and designed to make it impossible to remove the cover while the interior of the tank is subjected to pressure.

(b) Manway covers must be made of cast, forged or fabricated aluminum alloys or other approved materials. Manway rings must be made of cast, forged or fabricated aluminum alloys and must be of good weldable quality in conjunction with the metal of dome.

(c) All covers not hinged to tank must be attached to outside of the dome head, by at least ⅜ inch chain or its equivalent.

(d) All joints between manway covers and their seats must be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

§ 78.291–13 *Gauging, bottom outlet valve operating, venting, loading, and unloading, and air inlet devices extending through domes of tanks.* (a) Not specification requirements. When installed, these devices, including their valves, must be of approved designs and must be made of materials not subject to rapid deterioration by the lading. These devices including their valves must be provided with a protective housing. Unloading pipe must be securely anchored with the tank. Provision must be made for closing pipe connections of valves.

§ 78.291–14 *Bottom outlets.* (a) The bottom outlet, when installed must be made of material not subject to rapid deterioration by the lading, be of approved construction, and be provided with a valve at its upper end and a liquid-tight closure at its lower end.

(b) The valve operating mechanism and outlet nozzle constructions must be such as to insure against unseating of valve due to stresses or shocks incident to transportation.

(c) Bottom outlet nozzle may be cast, fabricated or forged metal. The nozzle must be of good weldable quality in conjunction with metal of tank.

(d) To provide for the attachment of standard unloading connections, the bottom of the main portion of the outlet valve nozzle, or some fixed attachment thereto, must be equipped with a flange or with external Unified Form Threads, 4 threads to the inch.

(e) For outlet nozzles that project six inches or more from shell of tank a "V" groove must be cut (not cast) in the upper part of outlet valve nozzle at a point immediately below the lowest part of valve to a depth that will leave thickness of nozzle wall at the root of the "V" not over ⅜ inch. In the case of steam jacketed outlet nozzles this groove must be below the steam chamber but above the bottom of center sill construction. Where outlet nozzle is not a single piece, arrangement must be made to provide the equivalent of the breakage groove.

(f) The flange on the outlet nozzle must be of a thickness which will prevent distortion of the valve seat or valve by any change in contour of the shell resulting from expansion of lading, or other causes, and which will insure that accidental breakage of the outlet nozzle will occur at or below the "V" groove.

(g) The valve must have no wings or stem projecting below the "V" groove in the outlet nozzle. The valve and seat must be readily accessible or removable for repairs, including grinding.

(h) The valve operating mechanism must have means for compensating for variation in the vertical diameter of the tank produced by expansion, weight of the liquid contents, or other causes, and should operate from the interior of the tank, but in the event the rod is carried through the dome, leakage must be prevented by packing in stuffing box and cap nut.

(i) In no case must extreme projection of bottom outlet equipment extend to within 12 inches above top of rail. All bottom outlet reducers and closures and their attachments must be secured to car by at least ⅜ inch chain or its equivalent, except that outlet closure plugs may be attached by ¼ inch chain. When the bottom outlet closure is of the combination cap and valve type, the pipe connection to the valve must be closed by a plug or cap.

§ 78.291–15 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design mounted on expansion dome. Total valve discharge capacity must be sufficient to prevent building up of pressure in the tank in excess of 45 pounds per square inch.

(b) One safety valve must be provided for each tank of 6,650 gallons capacity or less, and two safety valves for each tank of over 6,650 gallons capacity.

(c) Each safety valve must be set to open at a pressure of 35 pounds per square inch and be vapor-tight at 28 pounds per square inch. (For tolerance see § 78.291–20 (a).)

(d) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped must have one safety vent made of approved material at least 1¾ inches inside diameter closed with a frangible disc of suitable material, of a thickness that will rupture at a pressure not exceeding 45 pounds per square inch. Means for holding in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not For Flammable Liquids".

(e) Safety valve or safety vent flanges, if welded to dome, must be of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of dome.

§ 78.291–16 *Fixtures, reinforcements and attachments not otherwise specified.* (a) All attachments to tank and dome must be applied by approved means. When attachments are riveted the edges of plates must be beveled so that the angle of the calking edge will be between 60 and 70 degrees with the flat surface of the attachment. The extreme calking edge distance, measured from center line of rivet hole, must be at least 1½ times the diameter of the hole and not more than that distance plus ¼ inch. The joints formed by attachment of all riveted external projections must be calked on the inside. All rivet heads on the inside and outside of tank and dome must be calked. Split calking is prohibited. Interior heater systems, when installed, must be so constructed that the breaking off of their external connections

will not cause leakage of contents of tank.

§ 78.291–17 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

(b) Interior heater system and plug flanges, if welded to tank or dome, must be of cast, forged, or fabricated metal and be of good weldable quality in conjunction with metal of tank or dome.

§ 78.291–18 *Closures for openings.* (a) All plugs must be solid, of cast, rolled or forged metal of approved material with standard pipe thread, of a length which will screw at least six threads inside the face of fitting or tank. Plugs when inserted from the outside of tank must have the letter "S" at least ⅜ inch in size stamped with steel stamp or cast on the outside surface to indicate the plug is solid.

§ 78.291–19 *Test of tanks.* (a) Each tank must be tested, before being put into service, by completely filling tank and dome with water, or other liquid having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures, except safety valves or safety vents, must be in place while test is made.

(b) If tanks are to be lagged, the test of tank must be made before lagging is applied.

(c) Calking of welded joints to stop leaks developed during the foregoing tests prohibited. Repairs in welded joints must be made as prescribed in § 78.291–7 (a).

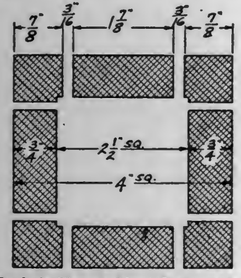
(d) Test of interior heater systems. Before interior heater systems are placed in service, they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

§ 78.291–20 *Tests of safety valves.* (a) Each valve must be tested, before being put into service, by attaching to an air line and applying pressure. The valve must not leak below 28 pounds pressure. The valve must open at the pressure prescribed in § 78.291–15 (c), with a plus or minus 3 pounds.

§ 78.291–21 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103AL–W and specification number of material used in tank shell and expansion dome in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. ICC–103AL–W must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.



(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least two inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(6) Date on which interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on tank, or jacket if lagged.

(7) Identification mark, illustrated herein, for approved manway closure must be stenciled on each side of dome, or jacket if lagged, in line with the ladders and in a color contrasting to color of dome.

Manhole Closure Identification Mark
(Reduced size)

(8) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.291–22 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to the car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and numbers of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and the car owner.

36. Amend entire § 78.292 (19 F. R. 3265, June 3, 1954) (16 F. R. 5334, 5335, June 6, 1951) (16 F. R. 5768, June 16, 1951) (49 CFR 1950 Rev., 1954 Supp., 78.292) to read as follows:

§ 78.292 *Specification ICC–103A–AL–W; fusion-welded aluminum tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification, it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.292–1 *Type.* (a) Tanks built under this specification must be cylindrical, with heads designed convex outward, and must have at least one expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.292–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to the exterior of tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.292–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 240 pounds per square inch.

§ 78.292–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t=\frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength pounds per square inch as follows:

ASTM B–178 Alloy 996A = 9,500 p. s. i.
ASTM B–178 Alloy 990A = 11,000 p. s. i.
ASTM B–178 Alloy M1A = 14,000 p. s. i.
ASTM B–178 Alloy GR20A = 25,000 p. s. i.
ASTM B–178 Alloy GS11A = 24,000 p. s. i.
ASTM B–178 Alloy GR40A = 30,000 p. s. i.

$E$ = efficiency of longitudinal welded joint = 90 percent.

(b) The minimum thickness of plates must be as follows:

| | Inch |
|---|---|
| Bottom sheet | ⅝ |
| Shell sheet | ½ |
| Expansion dome sheet | ½ |
| Tank head (dished) | ⅝ |
| Tank head (ellipsoidal) | ½ |
| Expansion dome head (dished or ellipsoidal) | ½ |

(c) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the cradle.

(d) For tanks built of one piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(e) The thickness of a dished tank head must be determined by the following formula but shall in no case be less than that specified in paragraph (b) of this section:

$$t=\frac{5PL}{6SE}$$

where

$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side of head in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch (see paragraph (a) of this section;
$E$ = efficiency of welded joint to shell = 100 percent.

(f) The thickness of an ellipsoidal head shall be determined by the following formula:

$$t=\frac{Pd}{2SE}$$

where

$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch (see paragraph (a) of this section).
$E$ = efficiency of welded joint to shell = 100 percent.

§ 78.292–5 *Material.* (a) All plates for tank and expansion dome must be made of an aluminum alloy to an approved specification and be suitable for fusion welding and not subject to rapid deterioration by the lading.

(b) Aluminum alloy castings used for fittings or attachment to tank must be made of material to an approved specification.

(c) All rivets must be of aluminum alloy to an approved specification. They must be handled and driven in a manner that will insure the requisite strength.

(d) All external projections which may be in contact with the lading must be made of material specified herein.

§ 78.292–6 *Tank heads.* (a) Tank heads must be of approved contour, and may be dished or ellipsoidal for pressure on concave side.

(b) Dished heads must have main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 5 inches.

(c) Ellipsoidal tank head shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be ½ of the major axis.

§ 78.292–7 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by the Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of AAR Welding Code Appendix "W".

§ 78.292–8 *Manway ring, safety valve flange and bottom outlet nozzle flange or other attachments.* (a) These attachments may be riveted or fusion-welded. Riveted joints must be made metal to metal without interposition of other material. Rivets must be calked inside and outside. For computing rivet areas, the effective diameter of a driven rivet is the diameter of its reamed hole, which hole must in no case exceed nominal diameter of rivet by more than 1/16 inch. Use of rivets of less than ⅝ inch nominal diameter prohibited. Fusion-welding for securing these attachments in place must be of double welded butt joint type or double full-fillet lap joint type.

(b) *Calking.* All attachments riveted to tank must have the rivets and the joints formed by attachments calked on the inside of tank.

§ 78.292–9 *Stress-relieving.* (a) Not a specification requirement.

§ 78.292–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing the anchor to the tank is prohibited.

§ 78.292–11 *Expansion dome.* (a) The expansion dome must have a capacity, measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside of dome, of at least one percent of the total capacity of the tank and dome combined, except that when safety vent is applied to side of dome, the effective capacity of dome must be measured from top of safety vent opening in the side of dome to inside top of shell of tank.

(b) The opening in manway ring must be at least 16 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, and the dome pocket is not closed off in an approved manner, dome pocket drain holes must be provided in the tank shell with nipples projecting inside the tank at least 1 inch.

(c) The dome head must be of approved contour. The dome head must be of an aluminum alloy.

(d) The dome shell thickness shall be calculated by the formula in § 78.292–4 (e).

(e) The dome head, if dished, must be dished to a radius not exceeding 96 inches. Thickness of the dished dome head shall be calculated by the formula in § 78.292–4 (e).

(f) Dome head may be an ellipsoid of revolution in which the major axis shall be equal to the diameter of the dome shell and the minor axis shall be ½ of the major axis. The thickness in this case shall be determined by using formula of the main head. (See § 78.292–4 (f).)

(g) Tank shell shall be reinforced by the addition of a plate equal to or greater than shell in thickness and the cross sectional area shall exceed metal removed from dome opening, or tank shell shall be reinforced by a seamless saddle plate equal to or greater than shell in thickness and butt welded to tank shell. The reinforcing saddle plate shall be provided with a flued opening having a vertical flange of the diameter of the dome for butt welding shell of dome flange. The reinforcing saddle plate shall extend about the dome a distance measured along shell of tank at least equal to the extension at top of tank. Other approved designs may be used.

§ 78.292–12 *Closure for manway.* (a) The manway cover must be of approved type and designed to provide a secure closure of the manway.

(b) Manway covers must be of cast, forged or fabricated aluminum alloys or other approved materials. Manway rings must be made of cast, forged or fabricated aluminum alloys and must be of good weldable quality in conjunction with the metal of dome.

(c) Chains, if used to attach manway covers to outside of dome head, must be at least ⅜ inch or its equivalent.

(d) All joints between manway covers and their seats must be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

§ 78.292–13 *Gauging, venting, loading and unloading, and air inlet devices extending through domes of tanks.* (a) When installed these devices must be of an approved design and made of materials not subject to rapid deterioration by the lading, and must be tightly closed. Protective housing not required, except as prescribed in paragraph (b) of this section. Unloading pipe must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves to provide for the loading and unloading of the contents, these devices including valves must be of an approved design and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.292–14 *Bottom outlets.* (a) Bottom outlet is prohibited, but tank may be equipped with a bottom washout nozzle of aluminum alloy not subject to rapid deterioration by the lading, which must be of approved construction com-

plying with the following requirements:

(1) The construction and closure of the bottom washout nozzle must be such that it is liquid tight and should the nozzle be broken, loss of contents will not occur.

(2) The extreme projection of the bottom washout nozzle must be at least 12 inches above the top of rail.

(3) Bottom washout nozzle may be cast, fabricated or forged metal. The nozzle must be of good weldable quality in conjunction with metal of tank.

(4) For bottom washout nozzles that project 6 inches or more from shell of tank, a "V" groove must be cut (not cast) in the upper part of bottom washout nozzle at a point immediately below lowest part of inside closure seat to a depth that will leave thickness of nozzle at the root of the "V" not over ⅜ inch. Where bottom washout nozzle is not a single piece, arrangement must be made to provide the equivalent of the breakage groove.

(5) The flange on the bottom washout nozzle must be of a thickness which will prevent distortion of the inside closure seat or closure casting by any change in contour of the shell, resulting from expansion of lading, or other causes, and which will insure that accidental breakage of the washout nozzle will occur at or below the "V" groove.

(6) The closure casting must not project below the "V" groove in the washout nozzle. The closure casting and seat must be readily accessible for repairs, including grinding.

§ 78.292–15 *Safety devices.* (a) The tank must be equipped with a safety valve or safety vent at least 1¾ inches inside diameter mounted on top of expansion dome. Total valve discharge capacity must be sufficient to prevent building up pressure in tank in excess of 45 pounds per square inch.

(b) At least one safety valve or vent must be provided for each tank.

(c) The safety valve, if used, must be set to open at a pressure of 35 pounds per square inch and be vapor tight at 28 pounds per square inch. (For tolerance see § 78.292–20 (a).)

(d) If tank is equipped with a safety vent it must be closed with a frangible disc of suitable material of a thickness that will rupture at a pressure not exceeding 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. Tanks may also be equipped with an approved device that will permit continuous venting.

(e) Safety valve or safety vent flanges, if welded to dome, must be of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of dome.

§ 78.292–16 *Fixtures, reinforcements and attachments not otherwise specified.* (a) All attachments to tank and dome must be applied by approved means. When attachments are riveted, the edges of plates must be beveled so that the angle of the calking edge will be between 60 and 70 degrees with the flat surface of the attachment. The extreme calking edge distance, measured from center line of rivet hole, must be at least 1½ times the diameter of the hole and not more than that distance plus ¼ inch. The joints formed by attachment of all riveted external projections must be calked on the inside. All rivet heads on the inside and outside of tank and dome must be calked. Split calking is prohibited. Interior heater systems, when installed, must be so constructed that the breaking off of their external connections will not cause leakage of contents of tank.

§ 78.292–17 *Interior heating systems.* (a) See §§ 78.260 and 78.261, heater systems.

(b) Interior heater system and plug flanges, if welded to tank or dome, must be of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of tank or dome.

§ 78.292–18 *Closures for openings.* (a) All plugs must be solid, of cast, rolled or forged metal of approved material with standard pipe thread, of a length which will screw at least 6 threads inside the face of fitting or tank. Plugs when inserted from the outside of tank must have the letter "S" at least ⅜ inch in size stamped with steel stamp or cast on the outside surface to indicate the plug is solid.

§ 78.292–19 *Test of tanks.* (a) Each tank must be tested, before being put into service, by completely filling tank and dome with water, or other liquid having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures except safety valves or safety vents, must be in place while test is made.

(b) If tanks are to be lagged, the test of tank must be made before lagging is applied.

(c) Calking of welded joints to stop leaks developed during the foregoing test is prohibited. Repairs in welded joints must be made as prescribed in § 78.292–7 (a).

(d) Test of interior heater systems. Before interior heater systems are placed in service, they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

§ 78.292–20 *Tests of safety valves.* (a) Valve must be tested before being put into service, by attaching to an air line and applying pressure. The valve must open at the pressure prescribed in § 78.292–15 (c) with a tolerance of minus 3 pounds.

§ 78.292–21 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103A–AL–W and specification number of material used in tank shell and expansion dome in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. ICC–103A–AL–W must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and dates of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph, by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank or jacket if lagged.

(6) Date on which interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(7) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.292–22 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and numbers of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

37. Amend entire § 78.293 (18 F. R. 806, Feb. 7, 1953) (16 F. R. 9381, Sept. 15, 1951) (16 F. R. 5335 to 5341, June 6, 1951) (16 F. R. 5768, June 16, 1951) (49 CFR 1950 Rev., 1954 Supp., 78.293) to read as follows:

§ 78.293 *Specification ICC–110A500–W; metallic arc fusion-welded steel tanks to be mounted on a car.* (a) Wherever the word "approved" is used in this specification, it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.293–1 *Type and general requirements.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward. All operating fittings must be located in one of the heads, and no openings of any sort are permitted in the cylindrical shell. Tanks must be securely attached to the car structure in a manner such that they may be removed for filling by the consignor and emptying by the consignee. Each tank must have a capacity of at least 1,600 pounds of water and not more than 2,600 pounds of water.

(b) The tanks must be fabricated by approved methods.

(c) For tanks made in foreign countries, a chemical analysis of material and all tests as specified must be carried out within the limits of the United States under supervision of a competent and disinterested inspector.

§ 78.293–2 *Thickness of plates.* (a) The wall thickness of the cylindrical portion of the tank must not be less than 11/32 inch and, in addition, must not be less than that calculated by the following formula:

$$t=\frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure in pounds per square inch, 1,250 pounds per square inch gauge minimum;
$d$ = inside diameter in inches;
$S$ = minimum specified ultimate tensile strength of plate in pounds per square inch;
$E$ = efficiency of butt-welded joint = 90 percent.

§ 78.293–3 *Material.* (a) All plates for the tank must be made of open-hearth or electric furnace boiler plate steel to an approved specification, the carbon content of which shall not exceed 0.31 percent. These plates may also be clad with other metals, such as nickel.

(b) All plates must have their heat number and the name or brand of the manufacturer legibly stamped on them at the rolling mill.

(c) Lining is not a specification requirement. If applied, must be approved as to material and method of application.

§ 78.293–4 *Tank heads.* (a) The tank heads must be hot pressed with a straight flange of at least 1½ inches and with a radius of dish not greater than the diameter of the tank. The inside knuckle radius must not be less than 6 percent of the inside diameter of the vessel.

(b) The heads must be of one piece and either designed torispherical or ellipsoidal in form and designed convex outward. The thickness of the heads shall not be less than that determined by the following formula:

$$t=\frac{5PL}{6SE}$$

(2) For ellipsoidal heads having a ratio of major to minor axis of 2 to 1

$$t=\frac{Pd}{2SE}$$

where

$t$ = minimum thickness in inches of finished head;
$P$ = minimum bursting pressure = 1,250 pounds per square inch gauge;
$S$ = minimum specified ultimate tensile strength of plate material in pounds per square inch;
$d$ = inside diameter in inches;
$L$ = inside radius of dish;
$E$ = 1.0 for heads made from one plate.

(c) Threads for openings for tank heads must be American Standard Taper, tapped to gauge, clean cut, even and without checks to insure tight joints. If the thickness of the heads is not sufficient to give an adequate length of thread, the thickness must be increased by welding into the head a plate of sufficient thickness and of the same material as the head. The outside diameter of such plate must be at least twice the nominal diameter of the threaded opening.

§ 78.293–5 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of A. A. R. Welding Code Appendix W.

§ 78.293–6 *Stress-relieving.* (a) All welding of the tank and of attachments welded directly thereto must be stress-relieved as a unit.

§ 78.293–7 *Tank mounting.* (a) The manner in which the tanks are supported on and securely attached to the car structure must be approved.

§ 78.293–8 *Protective rings.* (a) A plate ring flange must be welded to the outside of each head and extending a greater distance beyond the head than any fitting or attachment to the head, including the housing referred to in § 78.293–9 (a). This flange must be at least as thick as the shell plates and must slope or curve inward toward the axis such that the diameter at the outboard end is at least 2 inches less than the maximum diameter.

§ 78.293–9 *Protective housing and cover.* (a) All operating fittings shall be located in one head. Valves and other closures of openings in tank heads, except fusible plug vents and drain plugs, must be protected against accidental injury by a detachable cast or pressed shell housing at least 5/16 inch thick, which must not project beyond the protective ring on the end of the tank and must be securely fastened to the tank head. This housing must be provided with an opening having an area equal to the total safety valve or vent discharge area.

(b) The upper head of tanks mounted vertically on car structure must be completely covered by a light metal cover designed to exclude moisture, cinders, and other foreign matter, and to be displaced by pressure of gas discharged through safety valves or vents.

§ 78.293–10 *Venting, loading and unloading valves.* (a) These valves must be of approved type, made of metal not subject to rapid deterioration by lading, and must withstand a pressure of 500 pounds per square inch without leakage. The valves must be screwed directly into tank heads or attached to tank heads by other approved methods. Provision must be made for closing the pipe connections of the valves.

§ 78.293–11 *Safety valves or vents.* (a) Unless prohibited for type of service in which tank is used, the tank must be equipped with one or more safety valves or vents of approved type, made of metal not subject to rapid deterioration by the lading and screwed directly into tank heads or attached to tank heads by other approved method. The total valve or vent discharge capacity must be sufficient to prevent building up pressure in tank in excess of ¾ the test pressure; when safety vents of the fusible plug type are used, the required discharge capacity must be available in each head.

(b) Tanks mounted vertically on the car structure must have safety valves, or vents of the frangible disc type, which must be located on the upper head.

(c) Safety valves must be set to open and vents of the frangible disc type must function at a pressure of not exceeding 375 pounds per square inch. Vents of the fusible plug type must function at a temperature of not exceeding 175 degrees Fahrenheit. (For tolerance see § 78.293–14.)

§ 78.293–12 *Fixtures.* (a) Siphon pipes and their couplings on the inside of the tank head and lugs on the outside of the tank head for attaching the valve protection housing may be fusion-welded in place, provided they are properly heat-treated at the time the entire tank is heat-treated. All other fixtures and appurtenances, except as provided for in §§ 78.293–7, 78.293–8, 78.293–9, 78.293–10 and 78.293–11 are prohibited.

§ 78.293–13 *Tests of tanks.* (a) After heat-treatment each tank must be tested, before being put into service, by completely filling the tank with water or other liquid of a similar viscosity of a temperature which must not exceed 100 degrees Fahrenheit during the test and applying a pressure of 500 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress.

(b) Calking of welded joints to stop leaks developed during tests is prohibited. Repairs in welded joints must be made as prescribed in § 78.293–5.

§ 78.293–14 *Tests of safety valves and vents.* (a) Each valve must be tested by air or gas before being put into service and also at intervals as prescribed by retest table No. 2 of § 73.31 of this chap-

ter. The valve must open at a pressure not exceeding 375 pounds per square inch and be vapor tight at 300 pounds per square inch, which limiting pressures must not be affected by any auxiliary closure or other combination.

(b) For safety vents of the frangible disc type, a sample of the disc used must burst at a pressure of not exceeding 375 pounds per square inch and be vapor tight at 300 pounds per square inch.

(c) For safety vents of the fusible plug type, a sample of the fusible plugs used must function at a temperature of not exceeding 175 degrees Fahrenheit and be vapor tight at a temperature of 130 degrees Fahrenheit.

§ 78.293–15 *Alterations and maintenance of tanks.* (a) All prescribed markings on tanks must be kept legible. Copy of the said markings, in letters and figures of the prescribed size stamped on a brass plate secured to the tank, is authorized. Markings must not be changed except as follows:

(1) By application of additional marks not affecting the test pressure or water capacity; these must not obliterate previously applied marks.

(2) By application of test pressure marks, or alteration of such marks, to indicate a reduced test pressure; authorized only for tanks that have not failed in the 5-year test.

(3) By change of serial numbers or ownership marks, or both; report in sufficient detail so that previous serial number and ownership mark can be determined for each tank, arranged by lot numbers or by consecutive serial numbers, must be filed with the Bureau of Explosives.

§ 78.293–16 *Marking.* (a) Each tank must be plainly and permanently marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be stamped into the metal of one head or flange ring, in letters and figures at least ⅜ inch high, as follows:

(1) ICC–110A500–W.

(2) Serial number (immediately below the stamped mark specified in subparagraph (1) of this paragraph).

(3) Inspector's official mark (immediately below the stamped mark specified in subparagraph (2) of this paragraph).

(4) Name, mark (other than trademark) or initials of company or person for whose use the tanks are being made, which must be recorded with the Bureau of Explosives.

(5) Date of tank test (month and year), such as 1–54 for January 1954, so placed that dates of subsequent tests may easily be added thereto.

(6) Water capacity—0000 pounds.

(7) Tanks made of clad plates must be stenciled on the tank (naming material) _____ clad tank.

§ 78.293–17 *Inspection and reports.* (a) Purchaser of tank must provide for inspection by competent inspector as follows:

(1) The inspector must carefully inspect all plates from which tanks are to be made and records pertaining thereto, and plates which do not comply with the requirements of this specification must be rejected.

(2) The inspector must secure complete certified records, including chemical analyses and physical tests on samples taken from each heat of steel used in the manufacture of the plate.

(3) The inspector must report capacity in pounds of water and tare weight of each tank, and the minimum thickness of tank wall noted.

(4) The inspector must make such inspection as may be necessary to see that all the requirements of this specification are fully complied with, must see that the finished tanks are properly heat treated, and must witness all air and hydrostatic tests.

(5) The inspector must stamp his official mark on each accepted tank immediately below the serial number and make certified report (paragraph (b) of this section) to the builder, to the company or person for whose use the tanks are being made, to the builder of the car structure on which the tanks are to be mounted, if any, to the Bureau of Explosives, and to the Secretary, Mechanical Division, Association of American Railroads.

(b) Inspector's report required in this section must be in the following form:

(Place) _____
(Date) _____

STEEL TANKS

It is hereby certified that drawings were submitted for these tanks under A. A. R. Application for Approval No. _____ and approved by the A. A. R. Committee on Tank Cars under date of _____
Built for _____ Company
Location at _____
Built by _____ Company
Location at _____
Consigned to _____ Company
Location at _____
Quantity _____
Size _____ inches outside diameter by _____ inches long

Marks stamped into the head or chime of the tank are:

Specification ICC _____
Serial numbers _____ to _____ inclusive
Inspector's mark _____
Test date _____
Water capacity (See Record of Hydrostatic Tests).
Tare Weights (Yes or No). (See Record of Hydrostatic Tests.)
These tanks were made by process of _____

The steel used was identified as indicated by the attached list showing the serial number of each tank, followed by the heat number of the plate, head, and bottom used in the tank.

The steel used was verified as to chemical analysis and record thereof is attached hereto. The heat numbers were stamped into the metal.

All material, such as plates, billets, and seamless tubing, was inspected and each tank was inspected both before and after closing in the ends; all that was accepted was found free from seams, cracks, laminations, and other defects which might prove injurious to the strength of the tank. The processes of manufacture and heat treatment of tanks were supervised and found to be efficient and satisfactory.

The tank walls were measured and the minimum thickness noted was ____ inch. The outside diameter was determined by a close approximation to be ____ inches. The wall stress was calculated to be ____ pounds per square inch under an internal pressure of ____ pounds per square inch.

Hydrostatic tests, bend and tensile tests of material, and other tests as prescribed in this specification were made in the presence of the inspector and all material and tanks accepted were found to be in compliance with the requirements of this specification. Records thereof are attached hereto.

I hereby certify that all of these tanks proved satisfactory in every way and comply with the requirements of Interstate Commerce Commission Specification No. _____.

(c) Before a tank built under this specification is placed in service, the builder must furnish the owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in proper form certifying that the tank and its appurtenances comply with all the requirements of this specification, including information as to the serial numbers, date of test, and ownership marks on the tanks. In the event the owner of the tank instead of the builder elects to furnish appurtenances such as valve protection caps, loading and unloading valves or vents of the frangible disc or fusible plug type, the owner must furnish to the Bureau of Explosives and the Secretary, Mechanical Division, Association of American Railroads, a report in proper form certifying that these appurtenances comply with all the requirements of this specification.

(d) In case of alterations of or additions to tank or equipment from original design and construction or of repairs, there must be furnished to the owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in detail of the repairs, alterations or additions made to each tank covered by a particular application, showing the serial number of each tank involved and stating that heat-treatment called for by the particular type of repair authorized has been performed and, that after repairs, alterations, or additions, the tests prescribed in § 78.293–13 were made, results of hydrostatic tests reported, and tank marked as prescribed by retest Table No. 2 of § 73.31 of this chapter.

38. Amend entire § 78.294 (18 F. R. 3145, June 2, 1953) (17 F. R. 9842, Nov. 1, 1952) (17 F. R. 7287, Aug. 9, 1952 (49 CFR 1950 Rev., 1954 Supp., 78.294) to read as follows:

§ 78.294 *Specification ICC–105A100–AL–W; lagged fusion-welded aluminum tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

No. 123——10

§ 78.294–1 *Type.* (a) Tanks built under this specification must be cylindrical, with heads designed convex outward. The tank must be provided with a manway nozzle and cover on top of the tank of sufficient diameter to permit access to the interior of the tank and to provide for the proper mounting of venting, loading, unloading, sampling and safety valves, gauging device, thermometer well and a protective housing on the cover. Other openings in the tank are prohibited.

§ 78.294–2 *Lagging.* (a) The tank shell and manway nozzle must be lagged with an approved insulation material of a thickness so the thermal conductance is not more than 0.075 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than 1/8 inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to the exterior of the tank, the lagging over each heater element may be reduced in thickness equivalent to ½ that required for the shell.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.294–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 495 pounds per square inch.

§ 78.294–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula:

$$t = \frac{Pd}{2SE}$$

where
$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch as follows:

ASTM B–178 Alloy 996A = 9,500 p. s. i.
ASTM B–178 Alloy 990A = 11,000 p. s. i.
ASTM B–178 Alloy M1A = 14,000 p. s. i.
ASTM B–178 Alloy GR20A = 25,000 p. s. i.
ASTM B–178 Alloy GS11A = 24,000 p. s. i.
ASTM B–178 Alloy GR40A = 30,000 p. s. i.

$E$ = efficiency of longitudinal welded joint = 90 percent.

(b) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the cradle.

(c) The thickness of an ellipsoidal head shall be determined by the following formula:

$$t = \frac{Pd}{2SE}$$

where
$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure, pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch (see paragraph (a) of this section);
$E$ = efficiency of welded joint to shell = 100 percent.

§ 78.294–5 *Manway nozzle opening.* (a) Opening in tank for manway nozzle must be reinforced in an approved manner.

§ 78.294–6 *Material.* (a) All plates for tank and manway nozzle must be made of an aluminum alloy to an approved specification and be suitable for fusion welding and not subject to rapid deterioration by the lading.

(b) Aluminum alloy castings used for fittings or attachment to tank must be made of material to an approved specification.

(c) All external projections which may be in contact with the lading must be made of material specified herein.

§ 78.294–7 *Tank heads.* (a) Tank heads must be of approved contour and must be ellipsoidal for pressure on the concave side.

(b) Ellipsoidal tank head shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be ½ of the major axis.

§ 78.294–8 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of A. A. R. Welding Code Appendix W.

§ 78.294–9 *Stress relieving.* (a) Not a specification requirement.

§ 78.294–10 *Tank mounting.* (a) The manner in which tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to the tank is prohibited.

§ 78.294–11 *Manway nozzle, cover and protective housing.* (a) Manway nozzle must be of cast, forged, or fabricated aluminum alloy at least 18 inches inside diameter. Manway nozzle must be of approved design and attached to tank by fusion welding. Fusion welding for securing this attachment in place must be of the double-welded butt joint type or double full fillet lap joint type.

(b) Manway cover must be of forged or rolled aluminum alloy at least 2½ inches thick, or other approved material at least 2¼ inches thick, machined to approved dimensions. Manway cover must be attached to nozzle by through bolts not entering tank.

(c) The shearing value of the bolts attaching protective housing to manway cover must not exceed 70 percent of shearing value of bolts attaching manway cover to manway nozzle.

(d) All joints between manway cover and manway nozzle, and between manway cover and valves or other appurte-

nances mounted thereon, must be made tight against vapor pressure.

(e) Protective housing of cast or fabricated steel, or other approved materials must be bolted to manway cover. Housing must be equipped with a suitable metal cover that can be securely closed. Housing cover on tanks used for the transportation of liquefied flammable gases must be provided with an opening equipped with an approved weatherproof covering and having an area at least equal to the total safety valve discharge area. Housing cover must have suitable stop to prevent cover striking loading or unloading connections and be hinged on one side only with approved riveted pin or rod with nuts and cotters. Openings in wall of housing must be equipped with screw plugs or other closures.

§ 78.294–12 *Venting, loading and unloading, gauging and sampling devices.* (a) Venting, loading and unloading valves must be of approved type, made of metal not subject to rapid deterioration by the lading, and must withstand a pressure of 100 pounds per square inch without leakage. The valves must be directly bolted to seatings on manway cover. Pipe connections of valves must be closed with approved screw plugs chained or otherwise fastened to prevent misplacement.

(b) Interior pipes of the loading and unloading valves, except as prescribed in paragraph (d) of this section may be equipped with excess flow valves of approved design, and must be securely anchored.

(c) Gauging device, sampling valve and thermometer well are not specification requirements. When used, they must be of approved design, made of metal not subject to rapid deterioration by the lading, and must withstand a pressure of 100 pounds per square inch without leakage. Interior pipes of the gauging device and sampling valve, except as prescribed in paragraph (d) of this section, may be equipped with check valves of an approved design. Interior pipe of thermometer well must be anchored in an approved manner to prevent breakage due to vibration. The thermometer well must be closed by an approved valve attached close to the manway cover and closed by a screw plug. Other approved arrangements that permit testing thermometer well for leaks without complete removal of the closure may be used.

(d) Tanks for use in the transportation of liquefied flammable gases must have the interior pipes of the loading and unloading valves, gauging device and sampling valve equipped with check valves of an approved design.

§ 78.294–13 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design, made of metal not subject to rapid deterioration by lading and mounted on manway cover. The total valve discharge capacity must be sufficient to prevent building up of pressure in tank in excess of 75 pounds per square inch.

(b) The safety valves must be set to open at a pressure not exceeding 75 pounds per square inch. (For tolerance see § 78.294–17 (a).)

§ 78.294–14 *Fixtures, reinforcements, and attachments, not otherwise specified.* (a) Attachments, other than the anchorage, interior pipe bracing, and those mounted on manway cover, are prohibited. Heater systems may be applied to exterior of tank by tank bands or other approved method.

§ 78.294–15 *Closures for openings.* (a) Plugs must be of approved type, with standard pipe thread, and of metal not subject to rapid deterioration by the lading.

§ 78.294–16 *Tests of tanks.* (a) Each tank must be tested, after anchorage is applied and before the tank lagging is applied, by completely filling tank and manway nozzle with water or other liquid of similar viscosity, having a temperature which must not exceed 100 degrees Fahrenheit during test, and applying a pressure of 100 pounds per square inch. The tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress.

(b) Calking of welded joints to stop leaks developed during the foregoing tests is prohibited. Repairs in welded joints must be made as prescribed in § 78.294–8 (a).

(c) Tests of exterior heater systems are not a specification requirement.

§ 78.294–17 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The valve must open at a pressure not exceeding 75 pounds per square inch and be vapor tight at 60 pounds per square inch which limiting pressures must not be affected by any auxiliary closure or other combination.

§ 78.294–18 *Markings.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–105A100AL–W and specification number of material used in tank shell and manway nozzle in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. ICC–105A100AL–W must also be stenciled on the jacket in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the jacket in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(6) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the jacket in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(7) Water capacity of the tank in pounds stamped plainly and permanently in letters and figures at least ⅜ inch high into the metal of the tank immediately below the mark specified in subparagraphs (2) and (3) of this paragraph. This mark must also be stenciled on the jacket immediately below the dome platform and either behind or within 3 feet of the right or left side of ladder, or ladders, if there is a ladder on each side of the tank, in letters and figures at least 2 inches high as follows:

WATER CAPACITY
000000 POUNDS

§ 78.294–19 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retest must be rendered to the Bureau of Explosives and car owner.

39. Amend entire § 78.295 (17 F. R. 9842, Nov. 1, 1952) (49 CFR 1950 Rev., 1954 Supp., 78.295) to read as follows:

§ 78.295 *Specification ICC–106A800–NCI; fusion-welded nickel-chromium-iron alloy tanks with fusion-welded longitudinal barrel sections, to be mounted on a car.* (a) Wherever the word "approved" is used in this specification, it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c), and (d).

§ 78.295–1 *Type and general requirements.* (a) Tanks built under this specification must be cylindrical with heads designed convex inward. The end of the shell shall be flanged-in in such a manner that the heads are locked in independent of the strength of the fillet welds, as well as providing a chime to which handling hooks can be attached. The thickness of the cylindrical portion into which the head is driven and the thickness of the flat flanged-in ends shall be at least equal to the head thickness, whereas the cylindrical portion next to the circumferential welds joining the heads to the shell shall be thinned down to the shell plate thickness. All openings must be located in the heads. Tanks must be securely attached to the car structure in such a manner that they may be removed for filling by the consignor and emptying by the consignee. Each tank must have a capacity of at least 1,600 pounds and not more than 2,500 pounds of water.

(b) The tanks must be fabricated by approved methods.

(c) For tanks made in foreign countries, a chemical analysis of material and all tests as specified must be carried out within the limits of the United States under the supervision of a competent and disinterested inspector.

§ 78.295–2 *Thickness of plates.* (a) The wall thickness of tanks must be at least 13/32 inch and must be such that at the test pressure the calculated fiber stress in the wall of tank or in the longitudinal weld seam will not be in excess of 25,000 pounds per square inch, as calculated by the following formula:

$$S=\frac{P(1.3D^2-0.4d^2)}{D^2-d^2}$$

where

$P$ = interior test pressure in pounds per square inch;
$D$ = outside diameter in inches;
$d$ = inside diameter in inches;
$S$ = wall stress in pounds per square inch.

(b) Tank head shall have a thickness equal to at least twice the shell thickness and must also be of sufficient thickness to provide for the threading of openings therein as prescribed in § 78.295–4 (b).

§ 78.295–3 *Material.* (a) All plates and forgings for tank and heads shall be annealed uniform nickel-chromium-iron alloy of good welding quality, free from cracks, laminations, or other defects injurious to the finished tank, and shall have the following chemical composition and tensile properties:

| | |
|---|---|
| Nickel (plus cobalt) | 75.00 percent minimum. |
| Chromium | 12.00 to 15.00 percent. |
| Iron | 9.00 percent maximum. |
| Copper | 0.50 percent maximum. |
| Manganese | 1.00 percent maximum. |
| Carbon | 0.15 percent maximum. |
| Silicon | 0.50 percent maximum. |
| Sulfur | 0.02 percent maximum. |

(1) Tensile strength 80,000 to 110,000 pounds per square inch. Yield point (0.2 percent offset) 30,000 to 60,000 pounds per square inch. Elongation in 2 inches 35 percent minimum.

(2) A test specimen must be capable of being bent cold through 180 degrees flat on itself without cracking on the outside of the bent portion. The tensile and bend specimens must be taken from the finished rolled or forged material after annealing, and there must be at least one tensile and one bend test on specimen from each heat.

(b) All plates and forgings must have their heat number and name or brand of manufacturer legibly stamped on them at the mill.

§ 78.295–4 *Tank heads.* (a) The tank heads must be hot pressed, flanging and dishing being done in one heat, so as to make a flange at least 3 inches deep, a mean crown radius not greater than the inside diameter of the head and a mean knuckle radius equal to 3½ times the head thickness. They must be inserted into the tank shell and forgings with flange extending outward and have a snug driving fit into the shell.

(b) Threads for openings in tank heads for valves and vents must be American Standard taper, tapped to gauge, clean cut, even and without checks to insure tight joints.

§ 78.295–5 *Welding.* (a) All joints and seams shall be welded by qualified welders using approved methods of welding and approved filler rod having the same composition as the tank plate. Deposited metal must be fused smoothly and uniformly into plate surface at the top of the joint. All welds shall be free from voids or slag inclusions. Main longitudinal joint shall be double-welded butt joint made with a procedure insuring proper fusion and penetration. Heads shall be fillet welded to the end forgings with welds having a throat at least 25 percent greater than the head thickness. The circumferential welds joining the end forgings and shell shall be of the butt type with nickel-chromium-iron alloy backing strips to insure complete fusion. Welded joint shall be tested by specimens and radiographs.

(b) Alternate welding procedure: Longitudinal seams may be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints fabricated by means of fusion-welding must be in accordance with the requirements of AAR Welding Code, Appendix W.

§ 78.295–6 *Heat treatment.* (a) Each finished tank, before being subjected to the hydrostatic test, must be uniformly and properly heat-treated by heating to a temperature of 1,400 degrees Fahrenheit for 1½ hours in a nonoxidizing furnace atmosphere so as to remove any undue strains due to processes of manufacture.

§ 78.295–7 *Tank mounting.* (a) The manner in which tanks are mounted on and securely attached to the car structure must be approved.

§ 78.295–8 *Protective housing and cover.* (a) Valves and other closures of openings in tank heads, except fusible plug vents, must be protected against accidental injury by a detachable cast or pressed steel housing at least 3/16 inch thick, which must not project beyond the flanged ends of the tank and must be securely fastened to tank head. Housing must be provided with an opening having an area equal to the total safety valve or vent discharge area.

(b) The upper head of tanks mounted vertically on the car structure must be completely covered by a light metal cover designed to exclude moisture, cinders, and other foreign matter, and to be displaced by pressure of gas discharged through safety valves or vents.

§ 78.295–9 *Venting, loading and unloading valves.* (a) These valves must be of approved type, made of metal not subject to rapid deterioration by lading, and must withstand a pressure of 800 pounds per square inch without leakage. The valves must be screwed directly into tank heads or attached to tank heads by other approved methods. Provision must be made for closing the pipe connections of the valves.

§ 78.295–10 *Safety valves or vents.* (a) Unless prohibited for type of service in which tank is used, the tank must be equipped with one or more safety valves or vents of approved type, made of metal not subject to rapid deterioration by the lading and screwed directly into tank heads or attached to heads by other approved methods. The total valve or vent discharge capacity must be sufficient to prevent building up of pressure in tank in excess of ¾ of the test pressure; when safety vents of the fusible plug type are used, the required discharge capacity must be available in each head.

(b) Tanks mounted vertically on the car structure must have safety valves, or vents of the frangible disc type, which must be located on the upper head.

(c) Safety valves must be set to open and vents of the frangible disc type must function at a pressure of not exceeding 600 pounds per square inch. Vents of the fusible plug type must function at a temperature of not exceeding 175 degrees Fahrenheit. (For tolerance see § 78.295–13 (a), (b) and (c).)

§ 78.295–11 *Fixtures.* (a) Siphon pipes and their couplings on the inside of the tank head and lugs on the outside of the tank head for attaching the valve protective housing may be fusion-welded in place in accordance with A. A. R. Welding Code Appendix W, provided they are properly heat-treated in accordance with § 78.295–6 (a) at the time the entire tank is heat-treated. All other fixtures and appurtenances, except as provided in §§ 78.295–7, 78.295–8, 78.295–9 and 78.295–10, are prohibited.

§ 78.295–12 *Tests of tank.* (a) After heat-treatment tanks must be subjected to hydrostatic test in a water jacket, or other accurate method, operated so as to obtain reliable data. No tank shall have been subjected previously to internal pressure within 100 pounds of the test pressure. Each tank must be tested to 800 pounds per square inch. Pressure must be maintained for 30 seconds and sufficiently longer to insure complete expansion of tank. Pressure gauge must permit reading to accuracy of 1 percent. Expansion gauge must permit reading of total expansion to accuracy of 1 percent. Expansion must be recorded in cubic centimeters.

(b) Permanent volumetric expansion must not exceed 10 percent of total volumetric expansion at test pressure.

(c) Each finished tank must be subjected to interior air pressure test of at least 100 pounds per square inch under conditions favorable to detection of any leakage. No leaks shall appear.

(d) Repairs of leaks detected in manufacture or test must be made by the same process as employed in manufacture of tank. Calking, soldering, or similar repairing is prohibited.

§ 78.295–13 *Tests of safety valves and vents.* (a) Each valve must be tested by air or gas before being put into service. The valve must open at a pressure of not exceeding 600 pounds per square inch and be vapor tight at 480 pounds per square inch which limiting pressures must not be affected by any auxiliary closure of other combination.

(b) For safety vents of the frangible disc type. A sample of the discs used must burst at a pressure of not exceeding 600 pounds per square inch and be vapor-tight at 480 pounds per square inch.

(c) For safety vents of the fusible plug type. A sample of the fusible plugs used must function at a temperature of not exceeding 175 degrees Fahrenheit, and be vapor-tight at a temperature of 130 degrees Fahrenheit.

§ 78.295–14 *Alterations and maintenance of tanks.* (a) All prescribed markings on tanks must be kept legible. Copy of the said markings, in letters and figures of the prescribed size stamped on a brass plate secured to the tank, is authorized. Markings must not be changed except as follows:

(1) By application of additional marks not affecting the test pressure or water capacity; these must not obliterate previously applied marks.

(2) By application of test pressure marks, or alteration of such marks, to indicate a reduced test pressure; authorized only for tanks that have not failed in the 5-year test.

(3) By change of serial numbers or ownership marks, or both. A report must be filed with the Bureau of Explosives in sufficient detail so that previous serial number and ownership mark can be determined for each tank, arranged by lot numbers or by consecutive serial numbers.

§ 78.295–15 *Marking.* (a) Each tank must be plainly and permanently marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be stamped into the metal of one head or chime, in letters and figures at least ⅜ inch high, as follows:

(1) ICC–106A800NCT.

(2) Serial number immediately below the stamped mark specified in subparagraph (1) of this paragraph.

(3) Inspector's official mark immediately below the stamped mark specified in subparagraph (2) of this paragraph.

(4) Name, mark (other than trademark), or initials of company or person for whose use the tanks are being made, which must be recorded with the Bureau of Explosives.

(5) Date of tank test (month and year), such as 1–54 for January 1954, so placed that date of subsequent tests may easily be added thereto.

(6) Water capacity—0000 pounds.

§ 78.295–16 *Inspection and reports.* (a) Purchaser of tanks must provide for inspection by a competent inspector as follows:

(1) The inspector must carefully inspect all plates from which tanks are to be made, and records pertaining thereto, and plates which do not comply with the requirements of this specification must be rejected.

(2) The inspector must secure complete certified records, including chemical analyses and physical tests on samples taken from each heat of steel used in the manufacture of the plate.

(3) The inspector must report capacity in pounds of water and tare weight of each tank and the minimum thickness of tank wall noted.

(4) The inspector must make such inspection as may be necessary to see that all the requirements of this specification are fully complied with, must see that the finished tanks are properly heat-treated, and must witness all air and hydrostatic tests.

(5) The inspector must stamp his official mark on each accepted tank immediately below the serial number, and make certified report (see paragraph (b) of this section) to the builder, to the company or person for whose use the tanks are being made, to the builder of the car structure on which the tanks are to be mounted, if any, to the Bureau of Explosives, and to the Secretary, Mechanical Division, Association of American Railroads.

(b) Inspector's report required herein must be in the following form:

(Place) _____
(Date) _____

STEEL TANKS

It is hereby certified that drawings were submitted for these tanks under A. A. R. Application for Approval No. _____ and approved by the A. A. R. Committee on Tank Cars under date of _____
Built for _____ Company
Location at _____
Built by _____ Company
Location at _____
Consigned to _____ Company
Location at _____
Quantity _____
Size _____ inches outside diameter by _____ inches long

Marks stamped into the head or chime of the tank are:

Specification ICC _____
Serial numbers _____ to _____ inclusive
Inspector's mark _____
Owner's mark _____
Test date _____
Watercapacity (See Record of Hydrostatic Tests)
Tare weights (Yes or No.) (See Record of Hydrostatic Tests.)

These tanks were made by process of _____

The steel used was identified as indicated by the attached list showing the serial number of each tank, followed by the heat number of the plate, head, and bottom used in the tank.

The steel used was verified as to chemical analysis and record thereof is attached hereto. The heat numbers were stamped into the metal.

All material, such as plates, billets, and seamless tubing, was inspected both before and after closing in the ends; all that was accepted was found free from seams, cracks, laminations, and other defects which might prove injurious to the strength of the tank. The processes of manufacture and heat treatment of tanks were supervised and found to be efficient and satisfactory.

The tank walls were measured and the minimum thickness noted was _____ inch. The outside diameter was determined by a close approximation to be _____ inches. The wall stress was calculated to be _____ pounds per square inch under an internal pressure of _____ pounds per square inch.

Hydrostatic tests, bend and tensile tests of material, and other tests, as prescribed in this specification were made in the presence of the inspector and all material and tanks accepted were found to be in compliance with the requirements of this specification. Records thereof are attached hereto.

I hereby certify that all of these tanks proved satisfactory in every way and comply with the requirements of Interstate Commerce Commission Specification No. _____.

[1] If the tests are made by a method involving the measurement of the amount of liquid forced into the tank by the test pressure then the basic data, on which the calculations are made, such as the pump factors, temperature of liquid, coefficient of compressibility of liquid, etc., must also be given.

[2] Do not include protective housing and cover but state whether with or without valves.

(Signed) _____

(c) Before a tank built under this specification is placed in service, the builder must furnish to the owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in proper form certifying that the tank and its equipment comply with all the requirements of this specification including information as to the serial numbers, dates of test, and ownership marks on the tanks.

(d) In the event the owner of the tank instead of the builder elects to furnish the appurtenances such as valve protection caps, loading and unloading valves, and safety valves or vents of the frangible disc or fusible plug type, the owner must furnish to the Bureau of Explosives, and to the Secretary, Mechanical Division, Association of American Railroads, a report in proper form certifying that these appurtenances comply with all the requirements of this specification.

(e) In case of alterations of or additions to tanks or equipment from original design and construction or of repairs, there must be furnished to the owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in detail of the repairs, alterations, or additions made to each tank covered by a particular application showing the serial number of each tank involved and stating that heat-treatment called for by the particular type of repair authorized has been performed and that after repairs, alterations, or additions the tests prescribed in § 78.295–12, were made, results of hydrostatic tests reported, and tanks marked as prescribed by retest table No. 2 of § 73.31 of this chapter.

40. Amend entire § 78.296 (17 F. R. 9842 to 9844, Nov. 1, 1952) (49 CFR 1950 Rev., 1954 Supp., 78.296) to read as follows:

§ 78.296 *Specification ICC–103B100–W; rubber lined fusion-welded steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.296–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward, and must have at least 1 expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.296–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to the exterior of tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.296–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 495 pounds per square inch.

§ 78.296–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t=\frac{Pd}{2SE}$$

where
$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(b) The minimum thickness of plates must be as follows:

| Inside diameter of tanks | Bottom sheet | Shell sheet | Tank head | Dome shell | Dome head |
|---|---|---|---|---|---|
| | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* |
| 87 inches or under | ½ | ½ | ½ | 3/8 | 3/8 |
| Over 87 to 96 inches | 9/16 | 9/16 | 9/16 | 7/16 | 3/8 |

(c) Tank must be lined with rubber at least 5/32 inch thick except over all rivets and seams formed by attachments where the lining must be double thickness. The lining must overlap at least 1½ inches at all edges, which must be straight and be beveled to an angle of approximately 45 degrees. A rubber reinforcement pad at least 4½ feet square and at least ½ inch thick must be applied by vulcanizing to the lining on bottom of tank directly under the dome. Edges of pad must be beveled to an angle of approximately 45 degress. An opening in this pad for sump is permitted. No rubber shall be under tension when applied except that due to conformation over rivet heads. Interior of tank must be free from scale, oxidation, moisture, and all foreign matter during the lining operation.

(d) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the cradle.

§ 78.296–5 *Material.* (a) All plates for tank and expansion dome must be made of open-hearth boiler-plate flange quality steel to an approved specification, the carbon content of which shall not exceed 0.31 percent.

(b) All castings used for fittings or attachments to tank must be of material to an approved specification. The use of cast iron prohibited.

(c) Rivets, if used, must be of the same quality as used for steam boilers and other pressure vessels and be made of steel to an approved specification.

(d) Each tank must be lined with acid-resisting rubber, vulcanized or bond directly or otherwise attached to the metal tank, to provide a non-porous laminated lining.

(e) All external projections must be made of materials specified herein.

§ 78.296–6 *Tank heads.* (a) The tank head shape shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be ½ of the major axis.

§ 78.296–7 *Welding.* (a) All joints must be fusion welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by the Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of A. A. R. Welding Code, Appendix W.

§ 78.296–8 *Manway ring, safety valve flange, sump flange or other attachments.* (a) These attachments must be secured to tank by fusion-welding. Fusion welding for securing attachments in place must be of the double-welded butt joint type or double full-fillet lap joint type. All projection edges of plates and castings on inside of tank must be rounded and free from fins or other irregular projections. Castings must be free from porosity.

§ 78.296–9 *Stress relieving.* (a) All welding of the tank shell and of attachments welded directly thereto must be stress-relieved as a unit.

§ 78.296–10 *Tank mounting.* (a) The manner in which tank is supported on and securely attached to the car structure must be approved.

§ 78.296–11 *Expansion dome.* (a) The expansion dome must have a capacity, measured from the inside top of shell of tank to bottom of manway cover of at least 1 percent of the capacity of tank and dome combined.

(b) The opening for manway, before lining, must be at least 18 inches in diameter, the opening in the tank shell at the dome shall be fully cut out or flued to the inside diameter of the dome, which shall not exceed 42 inches. Tank shell at dome must be reinforced in an approved manner.

(c) Dome head must be made of steel and to an approved contour. If dished, the knuckle radius shall be at least 6 percent of the spherical dish radius, and the thickness shall not be less than that specified in § 78.296–4 (b). The inside spherical radius shall not be in excess of the diameter of the dome. Dome head may be flued for attachment of a manway flange having a minimum inside diameter of 18 inches.

§ 78.296–12 *Closures for manway.* (a) The manway cover must be of approved type and designed to provide a secure closure of the manway.

(b) Manway cover must be made of a suitable metal of approved thickness, and must be attached to manway flange by through bolts not entering the tank. The top, bottom where exposed to lading, and edge of manway cover must be rubber covered as prescribed in §§ 78.296–4 (c)

and 78.296–5 (d). Through bolt holes must be lined with rubber at least ⅛ inch in thickness. Cover made of metal not affected by lading need not be rubber covered. All rubber surfaces on outside of tank or fittings must be protected with an age-resisting coating. All attachments must be made of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of manway cover.

(c) The shearing value of the bolts attaching the protective housing to manway cover must not exceed 70 percent of shearing value of bolts attaching manway cover to manway flange.

(d) All joints between manway cover and manway flange, and between manway cover and valves or any appurtenances mounted thereon, must be made tight against vapor pressure.

§ 78.296–13 *Venting, loading and unloading, gauging, and air inlet devices.* (a) These devices must be of approved design and withstand a pressure of 100 pounds per square inch without leakage. They must be bolted to fittings or seatings on the manway cover. Connections to valves must be closed with blind flanges bolted tightly over valve outlets, chained or otherwise fastened to prevent misplacement. Interior pipes of these devices extending into the tank shell, must be anchored at their lower ends.

(b) Venting, loading and unloading, gauging, and air inlet devices made of material affected by the lading must have all surfaces rubber covered as prescribed in §§ 78.296–4 (c) and 78.296–5 (d).

(c) Protective housing of cast or fabricated steel must be bolted to manway cover. Housing must be equipped with a suitable metal cover that can be securely closed. Housing cover must have a suitable stop to prevent cover striking loading and unloading connections and be hinged on one side only with approved riveted pin or rod with nuts and cotters. Opening in wall of housing must be equipped with screw plugs or other closures.

§ 78.296–14 *Bottom outlet.* (a) Bottom outlet is prohibited. Bottom sump is permissible. If used it must be welded to tank and must be of cast, fabricated or forged metal of good weldable quality in conjunction with metal of tank.

§ 78.296–15 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design, made of material not subject to rapid deterioration by lading and mounted on manway cover. The total valve discharge capacity must be sufficient to prevent building up of pressure in tank in excess of 75 pounds per square inch.

(b) The safety valves must be set to open at a pressure not exceeding 75 pounds per square inch. (For tolerance see § 78.296–20 (a).)

§ 78.296–16 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) Attachments, other than the anchorage, sump, and those mounted on manway cover, are prohibited. Interior heater systems, when installed, must be made of material not affected by the lading. They must be constructed so that the breaking off of their external connections will not cause leakage of contents of tank.

§ 78.296–17 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

(b) Interior heater system closure flanges welded to tank or dome, must be made of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of tank or dome.

§ 78.296–18 *Closures for openings.* (a) Closures for all openings must have all surfaces exposed to the lading rubber covered or be made of material not affected by the lading.

§ 78.296–19 *Tests of tanks.* (a) Each tank must be tested, before rubber lining is applied, by completely filling the tank and dome with water, or other liquids having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 100 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures, except safety valves, must be in place while test is made. After tank is rubber lined, no further tests are required.

(b) If tanks are to be lagged the test of tanks must be made before lagging is applied.

(c) Calking of welded joints to stop leaks developed during the foregoing tests prohibited. Repairs in welded joints must be made as prescribed in § 78.296–7 (a).

(d) Test of interior heater system. Before interior heater systems are placed in service they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

§ 78.296–20 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The value must open at a pressure not exceeding 75 pounds per square inch and be vapor tight at 65 pounds per square inch, which limiting pressures must not be effected by any auxiliary closure or other combination.

§ 78.296–21 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103B100–W in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. This mark must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, such as application of riveted anchors, etc., in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) "Rubber lined tank—pressure test not required", stenciled on tank, or jacket if lagged, instead of record of test of tank.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom stenciled on the tank, or jacket if lagged.

(6) Date on which interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(7) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.296–22 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and the car owner.

41. Add § 78.297 (15 F. R. 8523, Dec. 2, 1950) (49 CFR 78.297, 1950 Rev.) to read as follows:

§ 78.297 *Specification ICC–103D–W; fusion welded alloy steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification, it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.297–1 *Type.* (a) Tanks built under this specification must be cylindrical, with heads designed convex outward, and must have at least 1 expansion dome with manway, and such other external projections as are prescribed herein. When the interior of the tank is divided into compartments, each compartment must have 2 heads designed convex outward, 1 expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.297–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the inside surface of the metal jacket shall be given a protective coating.

§ 78.297–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 240 pounds per square inch.

§ 78.297–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t=\frac{Pd}{2SE}$$

where
$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(1) The thickness of a dished head must be determined by the following formula, but in no case be less than that specified in paragraph (b) of this section:

$$t=\frac{5PL}{6SE}$$

where
$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of welded joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

(b) The minimum thickness of plates must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Expansion dome sheets | Tank heads | Expansion dome heads | Interior compartment heads |
|---|---|---|---|---|---|---|
| | Inch | Inch | Inch | Inch | Inch | Inch |
| 60 inches or under | 7/16 | 3/8 | 7/16 | 3/8 | 7/16 | 7/16 |
| Over 60 to 78 inches | 7/16 | 7/16 | 7/16 | 3/8 | 7/16 | 7/16 |
| Over 78 to 96 inches | 1/2 | 3/8 | 7/16 | 3/8 | 7/16 | 3/8 |
| Over 96 to 112 inches | 1/2 | 7/16 | 7/16 | 9/16 | 7/16 | 7/16 |
| Over 112 to 122 inches | 1/2 | 1/2 | 7/16 | 5/8 | 7/16 | 1/2 |

(c) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the cradle.

(d) For tanks built on 1 piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(e) When tank is divided into compartments the interior heads must comply with the requirements for interior compartment heads prescribed herein. When capacity of tank is reduced by moving in the exterior head a new exterior head of approved contour not less than ⅜ inch thickness must be applied. When the capacity is reduced by the insertion of a new interior head this head must comply with the requirements for interior compartment heads and the exterior head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, must be provided with a tapped drain hole at their lowest point, and a tapped hole at top of tank. The top hole must be closed, and the bottom hole may be closed, with not less than ¾ inch nor more than 1½ inch solid pipe plugs having standard pipe threads.

§ 78.297–5 *Material.* (a) All plates for tank and expansion dome, must be to an approved specification and be made of a metal capable of resisting the action of nitric acid as follows: The maximum corrosion rate in inches penetration per month in the standard 65 percent boiling nitric acid test shall be 0.006" for the straight chromium-bearing stainless steel and 0.0015" for any of the chromium nickel alloys and modified chromium nickel type, this figure to be an average of five 48-hour periods.

(b) All alloy castings and forgings used for fittings or attachments to tank must be to an approved specification and not subject to rapid deterioration by the lading.

§ 78.297–6 *Tank heads.* (a) Tank heads must be of approved contour and must be designed for pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3¾ inches except for interior heads of compartment tanks the knuckle radius must not be less than 1½ inches.

§ 78.297–7 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with requirements of AAR Welding Code Appendix "W".

§ 78.297–8 *Manway ring, safety valve flange, and sump flange or other attachments.* (a) These attachments must be fusion-welded to tank or dome. Fusion-welding for securing these attachments in place must be of the double-welded butt joint type or double full-fillet lap joint type.

§ 78.297–9 *Heat treatment.* (a) All welding of the tank shell and of attachments welded directly thereto must be heat treated as a unit to remove stresses and at the proper temperature to obtain the corrosion resistance specified in § 78.297–5 (a).

§ 78.297–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to the tank is prohibited.

§ 78.297–11 *Expansion dome.* (a) The expansion dome must have a capacity measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside dome, of at least 2 percent of the total capacity of the tank and dome combined.

(b) The opening for manway must be at least 16 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter, the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, dome pocket drain holes must be provided in the tank shell with nipples extending inside the tank at least 1 inch.

(c) The dome head must be of approved contour and must be designed for pressure on concave side.

§ 78.297–12 *Closures for manway.* (a) The manway cover must be of approved type and designed to make it impossible to remove the cover while the interior of the tank is subjected to pressure.

(b) Manway ring and cover must be made of the metal prescribed in § 78.297–5 (a) or (b), whichever applies.

(c) All joints between manway covers and their seats must be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

§ 78.297–13 *Gauging, bottom outlet valve operating rod, venting, loading and unloading, and air inlet devices extending*

*through dome of tank.* (a) Not specification requirements. When installed, these devices including their valves and fittings must be of approved design, made of materials not subject to rapid deterioration by the lading. These devices including their valves must be provided with a protective housing. Unloading pipe must be securely anchored within the tank. Provision must be made for closing pipe connections of valves.

§ 78.297–14 *Bottom outlets.* (a) The bottom outlet, when installed, must be made of metal not subject to rapid deterioration by the lading, be of approved construction, and be provided with a valve at its upper end and a liquid tight closure at its lower end.

(b) The valve operating mechanism and outlet nozzle construction must be such as to insure against unseating of valve due to stresses or shocks incident to transportation.

(c) Bottom outlet nozzle may be cast, fabricated or forged metal. If outlet nozzle is welded to tank, it must be of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of tank.

(d) To provide for the attachment of standard unloading connections, the bottom of the main portion of the outlet nozzle or some fixed attachments thereto, must have Unified Form Threads, threads to the inch.

(e) For outlet nozzles that extend inches or more from shell of tank a "V" groove must be cut (not cast) in the upper part of outlet nozzle at a point immediately below lowest part of valve to a depth that will leave thickness of nozzle wall at the root of the "V" not over ⅜ inch. In the case of steam-jacketed outlet nozzles this groove must be below the steam chamber but above the bottom of center sill construction. Where outlet nozzle is not a single piece, arrangement must be made to provide the equivalent of the breakage groove.

(f) The flange on the outlet nozzle must be of a thickness which will prevent distortion of the valve seat or valve by any change in contour of the shell resulting from expansion of lading, or other causes, and which will insure that accidental breakage of the outlet nozzle will occur at or below the "V" groove.

(g) The valve must have no wings or stem projecting below the "V" groove in the outlet nozzle. The valve and seat must be readily accessible or removeable for repairs, including grinding.

(h) The outlet valve operating mechanism must have means for compensating for variation in the vertical diameter of the tank produced by expansion, weight of the liquid contents, or other causes, and should operate from the interior of the tank, but in the event the rod is carried through the dome, leakage must be prevented by packing in stuffing box and cap nut.

(i) In no case must extreme projection of bottom outlet equipment extend to within 12 inches above top of rail. All bottom outlet reducers and closures and their attachments must be secured to the car by at least ⅜ inch chain or its equivalent, except that outlet closure plugs or outlet closure flange and ¾ inch solid screw drain plug may be attached by ¼ inch chain. When the bottom outlet closure is of the combination cap and valve type, the pipe connection to the valve must be closed by a plug or cap.

§ 78.297–15 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design at least 2 inches inside diameter mounted on top of expansion dome. Total valve discharge capacity must be sufficient to prevent building up pressure in tank in excess of 45 pounds per square inch.

(b) One or more safety valves must be provided for each tank or compartment thereof.

(c) The safety valve must be set to open at a pressure of 35 pounds per square inch and be vapor tight at 28 pounds per square inch. For tolerance see § 78.297–20 (a).

(d) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped must have 1 safety vent at least 1¾ inches inside diameter closed with a frangible disc of lead or other suitable material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids."

(e) Safety valve or safety vent flanges must be of cast, forged, or fabricated metal not subject to rapid deterioration by the lading, and be of good weldable quality in conjunction with metal of dome.

§ 78.297–16 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) All attachments to tank and dome must be applied by welding. Interior heater systems, when installed, must be so constructed that the breaking off of their external connections will not cause leakage of the contents of the tank.

§ 78.297–17 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

(b) Interior heater systems and plug flanges, must be of cast, forged or fabricated material complying with the requirements of § 78.297–5 (a) or (b), whichever applies.

§ 78.297–18 *Closures for openings.* (a) All plugs must be solid, made of materials not subject to rapid deterioration by the lading, with standard pipe thread, and must be of a length which will screw at least 6 threads inside the face of fitting or tank. Plugs, when inserted from the outside of tank heads must have the letter "S" at least ⅜ inch in size stamped with steel stamp or cast on the outside surface to indicate the plug is solid.

§ 78.297–19 *Tests of tanks.* (a) Each tank must be tested, before being put into service, by completely filling the tank and dome with water, or other liquid having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All closures, except safety valves or vents, must be in place while test is made.

(b) If tanks are to be lagged, the test of tank must be made before lagging is applied.

(c) Calking of welded joints to stop leaks developed during the foregoing tests prohibited. Repairs in welded joints must be made as prescribed in § 78.297–7 (a).

(d) Tests of interior heater systems. Before interior heater systems are placed in service they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

§ 78.297–20 *Tests of safety valves.* (a) Valve must be tested before being put into service, by attaching to an air line and applying pressure. The valve must open at the pressure prescribed in § 78.297–15 (c) with a tolerance of plus or minus 3 pounds.

§ 78.297–21 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103D–W and specification number of material used in tank shell and expansion dome in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. ICC–103D–W must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph, by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(6) Date on which interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(7) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.297–22 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish the car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of, or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

42. Add § 78.298 (15 F. R. 8523, Dec. 2, 1950) (49 CFR 78.298, 1950 Rev.) to read as follows:

§ 78.298 *Specification ICC–103E–W; fusion-welded alloy steel tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification, it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.298–1 *Type.* (a) Tanks built under this specification must be cylindrical, with heads designed convex outward, and must have at least 1 expansion dome with manway, and such other external projections as are prescribed herein. When the interior of the tank is divided into compartments, each compartment must have 2 heads designed convex outward, 1 expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.298–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the inside surface of the metal jacket shall be given a protective coating.

§ 78.298–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 240 pounds per square inch.

§ 78.298–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t=\frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(1) The thickness of a dished head must be determined by the following formula, but in no case be less than that specified in paragraph (b) of this section:

$$t=\frac{5PL}{6SE}$$

where

$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of welded joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

(b) The minimum thickness of plates must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Expansion dome sheets | Tank heads | Expansion dome heads | Interior compartment heads |
|---|---|---|---|---|---|---|
| | Inch | Inch | Inch | Inch | Inch | Inch |
| 60 inches or under | 7/16 | ¼ | 5/16 | ½ | 5/16 | 5/16 |
| Over 60 to 78 inches | 7/16 | 5/16 | 5/16 | ½ | 5/16 | 5/16 |
| Over 78 to 96 inches | ½ | ⅜ | 5/16 | ½ | 5/16 | ⅜ |
| Over 96 to 112 inches | ½ | 7/16 | 5/16 | 9/16 | 5/16 | 7/16 |
| Over 112 to 122 inches | ½ | ½ | 5/16 | ⅝ | 5/16 | ½ |

(c) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the cradle.

(d) For tanks built of 1 piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(e) When tank is divided into compartments the interior heads must comply with the requirements for interior compartment heads prescribed herein. When capacity of tank is reduced by moving in the exterior head a new exterior head of approved contour not less than ⅜ inch thickness must be applied. When the capacity is reduced by the insertion of a new interior head this head must comply with the requirements for interior compartment heads and the exterior head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, must be provided with a tapped drain hole at their lowest point, and a tapped hole at the top of tank. The top hole must be closed, and the bottom hole may be closed, with not less than ¾ inch nor more than 1½ inch solid pipe plugs having standard pipe threads.

§ 78.298–5 *Material.* (a) All plates for tank and expansion dome, must be to an approved specification and be made of metal capable of resisting the action of nitric acid as follows: The maximum corrosion rate in inches penetration per month in the standard 65 percent boiling nitric acid test shall be 0.006" for the straight chromium-bearing stainless steel and 0.0015" for any of the chromium nickel alloys and modified chromium nickel type, this figure to be an average of five 48-hour periods.

(b) All alloy castings and forgings used for fittings or attachments to tank must be to an approved specification and not subject to rapid deterioration by the lading.

§ 78.298–6 *Tank heads.* (a) Tank heads must be of approved contour and must be designed for pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3¾ inches except for interior heads of compartment tanks the knuckle radius must not be less than 1½ inches.

§ 78.298–7 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with requirements of AAR Welding Code Appendix "W".

§ 78.298–8 *Manway ring, safety valve flange, and sump flange or other attachments.* (a) These attachments must be fusion-welded to tank or dome. Fusion welding for securing these attachments in place must be of the double-welded butt joint type or double full-fillet lap joint type.

§ 78.298–9 *Heat treatment.* (a) All welding of the tank shell and of attachments welded directly thereto must be heat treated as a unit to remove stresses and at the proper temperature to obtain the corrosion resistance specified in § 78.298–5 (a).

§ 78.298–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to the tank is prohibited.

§ 78.298–11 *Expansion dome.* (a) The expansion dome must have a capac-

ity measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside dome, of at least 2 percent of the total capacity of the tank and dome combined.

(b) The opening for manway must be at least 16 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter, the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, dome pocket drain holes must be provided in the tank shell with nipples extending inside the tank at least 1 inch.

(c) The dome head must be of approved contour and must be designed for pressure on concave side.

§ 78.298–12 *Closures for manway.* (a) The manway cover must be of bolted type, bolted and hinged type, or other approved types, and designed to provide a secure closure of the manway.

(b) Manway ring and cover must be made of the metal prescribed in § 78.298–5 (a) or (b), whichever applies.

(c) All joints between manway covers and their seats must be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

§ 78.298–13 *Gauging, venting, loading and unloading, and air inlet devices extending through domes of tanks.* (a) Not specification requirements. When installed these devices must be of an approved design, made of material not subject to rapid deterioration by the lading, and be tightly closed. Protective housing not required, except as prescribed in paragraph (b) of this section. Unloading pipe must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves to provide for the loading and unloading of the contents, these devices including valves must be of an approved design and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.298–14 *Bottom outlets.* (a) Bottom outlet is prohibited, but tank may be equipped with a bottom washout nozzle of metal not subject to rapid deterioration by the lading, which must be of approved construction complying with the following requirements.

(b) The construction and closure of the bottom washout nozzle must be such that it is liquid tight and should the nozzle be broken, loss of contents will not occur.

(c) The extreme projection of the bottom washout nozzle must be at least 12 inches above the top of rail.

(d) Bottom washout nozzle may be of cast, fabricated, or forged metal and must be of good weldable quality in conjunction with metal of tank.

(e) The closure of the washout nozzle must be equipped with a ¾ inch solid screw plug. Plug must be secured to car structure or washout chamber by at least a ¼ inch chain.

(f) For bottom washout nozzles that project 6 inches or more from shell of tank, a "V" groove must be cut (not cast) in the upper part of bottom washout nozzle at a point immediately below lowest part of inside closure seat to a depth that will leave thickness of nozzle wall at the root of the "V" not over ⅜ inch. Where bottom washout nozzle is not a single piece, arrangement must be made to provide the equivalent of the breakage groove.

(g) The flange on the bottom washout nozzle must be of a thickness which will prevent distortion on the inside closure seat or closure casting by any change in contour of the shell, resulting from expansion of lading, or other causes, and which will insure that accidental breakage of the washout nozzle will occur at or below the "V" groove.

(h) The closure casting must not project below the "V" groove in the washout nozzle. The closure casting and seat must be readily accessible for repairs, including grinding.

§ 78.298–15 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design at least 2 inches inside diameter mounted on top of expansion dome. Total valve discharge capacity must be sufficient to prevent building up pressure in tank in excess of 45 pounds per square inch.

(b) One or more safety valves must be provided for each tank or compartment thereof.

(c) The safety valve must be set to open at a pressure of 35 pounds per square inch and be vapor-tight at 28 pounds per square inch. For tolerance see § 78.298–20 (a).

(d) Tanks used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety valves, but if not so equipped must have 1 safety vent at least 1¾ inches inside diameter closed with a frangible disc of lead or other suitable material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents must be stenciled "Not for Flammable Liquids".

(e) Safety valve or safety vent flanges must be of cast, forged, or fabricated metal not subject to rapid deterioration by the lading, and be of good weldable quality in conjunction with metal of dome.

§ 78.298–16 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) All attachments to tank and dome must be applied by welding. Interior heater systems, when installed, must be so constructed that the breaking off of their external connections will not cause leakage of the contents of the tank.

§ 78.298–17 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

(b) Interior heater systems and plug flanges must be of cast, forged or fabricated material complying with the requirements of § 78.298–5 (a) or (b), whichever applies.

§ 78.298–18 *Closures for openings.* (a) All plugs must be solid, made of materials not subject to rapid deterioration by the lading, with standard pipe thread, and must be of a length which will screw at least 6 threads inside the face of fitting or tank. Plugs, when inserted from the outside of tank heads must have the letter "S" at least ⅜ inch in size stamped with steel stamp or cast on the outside surface to indicate the plug is solid.

§ 78.298–19 *Tests of tanks.* (a) Each tank must be tested, before being put into service, by completely filling the tank and dome with water, or other liquid having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All closures, except safety valves or vents, must be in place while test is made.

(b) If tanks are to be lagged, the test of tank must be made before lagging is applied.

(c) Calking of welded joints to stop leaks developed during the foregoing tests prohibited. Repairs in welded joints must be made as prescribed in § 78.298–7 (a).

(d) Tests of interior heater systems. Before interior heater systems are placed in service they must be tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

§ 78.298–20 *Tests of safety valves.* (a) Valve must be tested before being put into service, by attaching an air line and applying pressure. The valve must open at the pressure prescribed in § 78.298–15 (c) with a tolerance of plus or minus 3 pounds.

§ 78.298–21 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103E–W and specification number of material used in tank shell and expansion dome in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. ICC–103E–W must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(6) Date on which interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(7) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only," or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.298–22 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish the car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of, or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

43. Add § 78.299 (15 F. R. 8523, Dec. 2, 1950) (49 CFR 78.299, 1950 Rev.) to read as follows:

§ 78.299 *Specification ICC–103A–N–W; fusion welded nickel or nickel alloy tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.299–1 *Type.* (a) Tanks built under this specification must be cylindrical, with heads designed convex outward, and must have at least 1 expansion dome with manway, and such other external projections as are prescribed herein. When the interior of the tank is divided into compartments, each compartment must have 2 heads designed convex outward, 1 expansion dome with manway, and such other external projections as are prescribed herein.

§ 78.299–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and expansion dome must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the inside surface of the metal jacket shall be given a protective coating.

§ 78.299–3 *Bursting pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 240 pounds per square inch.

§ 78.299–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula but in no case shall the wall thickness be less than that specified in paragraph (b) of this section:

$$t=\frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(1) The thickness of a dished head must be determined by the following formula, but in no case be less than that specified in paragraph (b) of this section:

$$t=\frac{5PL}{6SE}$$

where

$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$L$ = main inside radius to which head is dished measured on concave side in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of welded joint.

When head is formed from one piece, the efficiency may be considered as 100 percent.

(b) The minimum thickness of plates must be as follows:

| Inside diameter of tanks | Bottom sheets | Shell sheets | Expansion dome sheets | Tank heads | Expansion dome heads | Interior compartment heads |
|---|---|---|---|---|---|---|
| | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* | *Inch* |
| 60 inches or under | 7/16 | ¼ | 5/16 | ½ | 5/16 | 5/16 |
| Over 60 to 78 inches | 7/16 | 5/16 | 5/16 | ½ | 5/16 | 5/16 |
| Over 78 to 96 inches | ½ | 3/8 | 5/16 | ½ | 5/16 | 3/8 |
| Over 96 to 112 inches | ½ | 7/16 | 5/16 | 9/16 | 5/16 | 7/16 |
| Over 112 to 122 inches | ½ | ½ | 5/16 | 5/8 | 5/16 | ½ |

(c) The minimum width of bottom sheet of tank must be 60 inches, measured on the arc, but in all cases the width must be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the cradle.

(d) For tanks built of 1 piece cylindrical sections, the thickness specified for bottom sheet must apply to the entire cylindrical shell.

(e) When tank is divided into compartments the interior heads must comply with the requirements for interior compartment heads prescribed herein. When capacity of tank is reduced by moving in the exterior head a new exterior head of approved contour not less than ⅜ inch thickness must be applied. When the capacity is reduced by the insertion of a new interior head this head must comply with the requirements for interior compartment heads and the exterior head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, must be provided with a tapped drain hole at their lowest point, and a tapped hole at top of tank. The top hole must be closed, and the bottom hole may be closed, with not less than ¾ inch nor more than 1½ inch solid pipe plugs having standard pipe threads.

§ 78.299–5 *Material.* (a) All plates for tank and expansion dome must be made of nickel or nickel alloy to an approved specification.

(b) All castings used for fittings or attachments to tank must be made of material to an approved specification.

(c) All external projections must be made of materials specified herein.

§ 78.299–6 *Tank heads.* (a) Tank heads must be of approved contour and must be designed for pressure on concave side and to main inside radius not exceeding 10 feet. The inside knuckle radius must not be less than 3¾ inches except for interior heads of compartment tanks the knuckle radius must not be less than 1½ inches.

§ 78.299–7 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with requirements of AAR Welding Code Appendix "W".

§ 78.299–8 *Manway rings, safety vent flange, and bottom washout nozzle flange or other attachments.* (a) These attachments must be fusion-welded. Fusion-welding for securing these attachments in place must be of the double-welded butt joint type or double-full-fillet-lap joint type.

§ 78.299–9 *Stress relieving or heat treatment.* (a) Not a specification requirement.

§ 78.299–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to tank is prohibited.

§ 78.299–11 *Expansion dome.* (a) The expansion dome must have a capacity measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside of dome, of at least 1 percent of the total capacity of the tank and dome combined.

(b) The opening for manway must be at least 16 inches in diameter. The opening in the tank shell within the dome must be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter, the opening must be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, dome pocket drain holes must be provided in the tank shell with nipples extending inside the tank at least 1 inch.

(c) The dome head must be of approved contour and must be designed for pressure on concave side.

§ 78.299–12 *Closures for manway.* (a) The manway cover must be of bolted type, bolted and hinged type, or other approved types, and designed to provide a secure closure of the manway.

(b) Manway covers must be made of cast, forged or fabricated nickel or nickel alloy. Manway rings must be made of cast, forged or fabricated nickel or nickel alloy and be of good weldable quality in conjunction with the metal of the dome.

(c) Chains, if used to attach manway covers to outside of dome head, must be at least ⅜ inch or its equivalent.

(d) All joints between manway covers and their seats must be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

§ 78.299–13 *Gauging, venting, loading and unloading, and air inlet devices extending through domes of tanks.* (a) Not specification requirements. When installed these devices must be of an approved design, made of material not subject to rapid deterioration by the lading, and be tightly closed. Protective housing is not required, except as prescribed in paragraph (b) of this section. Unloading pipe must be securely anchored within the tank.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves to provide for the loading and unloading of the contents, these devices including valves must be of an approved design and be provided with a protective housing. Provision must be made for closing pipe connections of valves.

§ 78.299–14 *Bottom outlets.* (a) Bottom outlet is prohibited, but tank may be equipped with a bottom washout nozzle of metal not subject to rapid deterioration by the lading, which must be of approved construction complying with the following requirements.

(b) The construction and closure of the bottom washout nozzle must be such that it is liquid tight and should the nozzle be broken, loss of contents will not occur.

(c) The extreme projection of the bottom washout nozzle must be at least 12 inches above the top of rail.

(d) Bottom washout nozzle may be of cast, fabricated, or forged metal and must be of good weldable quality in conjunction with metal of tank.

(e) The closure of the washout nozzle must be equipped with a ¾ inch solid screw plug. Plug must be secured to car structure or washout chamber by at least a ¼ inch chain.

(f) For bottom washout nozzles that project 6 inches or more from shell of tank, a "V" groove must be cut (not cast) in the upper part of bottom washout nozzle at a point immediately below lowest part of inside closure seat to a depth that will leave thickness of nozzle wall at the root of the "V" not over ⅜ inch. Where bottom washout nozzle is not a single piece, arrangement must be made to provide the equivalent of the breakage groove.

(g) The flange on the bottom washout nozzle must be of a thickness which will prevent distortion of the inside closure seat or closure casting by any change in contour of the shell, resulting from expansion of lading, or other causes, and which will insure that accidental breakage of the washout nozzle will occur at or below the "V" groove.

(h) The closure casting must not project below the "V" groove in the washout nozzle. The closure casting and seat must be readily accessible for repairs, including grinding.

§ 78.299–15 *Safety vents.* (a) Safety valves are prohibited, but a safety vent must be applied.

(b) Each tank or compartment thereof must be equipped with 1 safety vent at least 1¾ inches inside diameter closed with a frangible disc of lead or other suitable material of a thickness that will rupture at not more than 45 pounds per square inch. Means for holding disc in place must be such as to prevent distortion or damage to disc when applied. Safety vent closure must be chained or otherwise fastened to prevent misplacement.

(c) Safety vent flanges, if welded to dome, must be of cast, forged, or fabricated metal and be of good weldable quality in conjunction with metal of dome.

§ 78.299–16 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) All attachments to tank and dome must be applied by approved means. Interior heater ssytems, when installed, must be so constructed that the breaking off of their external connections will not cause leakage of contents of tank.

§ 78.299–17 *Interior heater systems.* (a) See §§ 78.260 and 78.261, heater systems.

(b) Interior heater systems and plug flanges, if welded to tank or dome must be of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of tank or dome.

§ 78.299–18 *Closures for openings.* (a) All plugs must be solid, of good grade cast nickel or equivalent, with standard pipe threads of a length which will screw at least 6 threads inside the face of fitting or tank. Plugs, when inserted from the outside of tank heads, must have the letter "S" at least ⅜ inch in size stamped with steel stamp or cast on the outside surface to indicate the plug is solid.

§ 78.299–19 *Tests of tanks.* (a) Each tank must be tested, before being put into service, by completely filling the tank and dome with water, or other liquid having similar viscosity, of a temperature which must not exceed 100 degrees Fahrenheit during the test, and applying a pressure of 60 pounds per square inch. Tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All closures, except safety valves or vents, must be in place while test is made.

(b) If tanks are to be lagged, the test of tank must be made before lagging is applied.

(c) Calking of welded joints to stop leaks developed during the foregoing tests prohibited. Repairs in welded joint must be made as prescribed in § 78.299–7 (a).

(d) Tests of interior heater systems. Before interior heater systems are placed in service they must tested with hydrostatic pressure and must be tight at 200 pounds per square inch.

§ 78.299–20 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–103A–N–W and specification number of material used in tank shell and expansion dome in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. ICC–103A–N–W must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph, by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank, or jacket if lagged.

(5) Date on which the interior heater systems were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the tank or jacket if lagged.

(6) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only" or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.299–21 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish the car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs, to, alterations of, or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and car owner.

44. Add § 78.300 (15 F. R. 8523, Dec. 2, 1950) (49 CFR 78.300, 1950 Rev.) to read as follows:

§ 78.300 *Specification ICC–105A300–AL–W; lagged fusion-welded aluminum tanks to be mounted on or forming part of a car.* (a) Wherever the word "approved" is used in this specification, it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.300–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward. The tank must be provided with a manway nozzle and cover on top of the tank of sufficient diameter to permit access to the interior of the tank and to provide for the proper mounting of venting, loading, unloading, sampling and safety valves, gauging device, thermometer well, and a protective housing on the cover. Other openings in the tank are prohibited.

§ 78.300–2. *Lagging.* (a) The tank shell and manway nozzle must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.075 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to the exterior of the tank, the lagging over each heater element may be reduced in thickness equivalent to ½ that required for the shell.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.300–3 *Bursting pressure.* (a) The calculated bursting pressure based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 750 pounds per square inch.

§ 78.300–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank must be calculated by the following formula, but in no case shall the wall thickness be less than that specified in § 78.300–4 (c):

$$t = \frac{Pd}{2SE}$$

where

$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure, pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch as follows:

ASTM B–178 Alloy GR20A = 25,000 p. s. i.
ASTM B–178 Alloy GS11A = 24,000 p. s. i.
ASTM B–178 Alloy GR40A = 30,000 p. s. i.

$E$ = efficiency of longitudinal welded joint = 90 percent.

(b) The thickness of an ellipsoidal head shall be determined by the following formula:

$$t = \frac{Pd}{2SE}$$

where

$t$ = thickness of plate in inches;
$P$ = calculated bursting pressure pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of welded joint to shell = 100 percent.

(c) The minimum thickness of plates and heads must be ¾ inch.

§ 78.300–5 *Manway nozzle opening.* (a) Opening in tank for manway nozzle must be reinforced in an approved manner.

§ 78.300–6 *Material.* (a) All plates for tank and manway nozzle must be of an aluminum alloy to an approved specification and be suitable for fusion-welding and not subject to rapid deterioration by the lading.

(b) Aluminum alloy castings used for fittings or attachments to tank must be made of material to an approved specification.

(c) All external projections which may be in contact with the lading must be made of material specified herein.

§ 78.300–7 *Tank heads.* (a) Tank heads must be of approved contour and must be ellipsoidal for pressure on concave side.

(b) Ellipsoidal tank head shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be ½ the major axis.

§ 78.300–8 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of A. A. R. Welding Code Appendix W.

§ 78.300–9 *Stress-relieving.* (a) Not a specification requirement.

§ 78.300–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to tank is prohibited.

§ 78.300–11 *Manway nozzle, cover and protective housing.* (a) Manway nozzle must be of forged, pressed or fabricated aluminum alloy at least 18 inches inside diameter. Manway nozzle must be of approved design and attached to tank by fusion-welding. Fusion-welding for securing this attachment in place must be of the double-welded butt joint type.

(b) Manway cover must be of forged or rolled aluminum alloy at least 2⅝ inches thick, or other approved material at least 2¼ inches thick machined to approved dimensions. Manway cover must be attached to manway nozzle by through or stud bolts not entering tank.

(c) The shearing value of the bolts attaching protective housing to manway cover must not exceed 70 percent of shearing value of bolts attaching manway cover to manway nozzle.

(d) All joints between manway cover and manway nozzle, and between manway cover and valves or other appurtenances mounted thereon, must be made tight against vapor pressure.

(e) Protective housing of cast or fabricated steel, or other approved material, must be bolted to manway cover. Housing must be equipped with a suitable metal cover that can be securely closed. Housing cover on tanks used for the transportation of liquefied flammable gases must be provided with an opening equipped with an approved weather-proof covering and having an area at least equal to the total safety valve discharge area. Housing cover must have suitable stop to prevent cover striking loading or unloading connections and be hinged on one side only with approved riveted pin, rod with nuts and cotters or rod with suitable washers welded on ends. Openings in wall of housing must be equipped with screw plugs or other closures.

§ 78.300–12 *Venting, loading and unloading valves, gauging and sampling device and thermometer well.* (a) Venting, loading and unloading valves must be of approved type, made of metal not subject to rapid deterioration by lading, and must withstand a pressure of 300 pounds per square inch without leakage. The valves must be directly bolted to seatings on manway cover. Pipe connections of the valves must be closed with approved screw plugs chained or otherwise fastened to prevent misplacement.

(b) The interior plugs of the loading and unloading valves, except as prescribed in paragraph (d) of this section, may be equipped with excess flow valves of an approved design.

(c) Gauging device, sampling valve and thermometer well are not specification requirements. When used, they must be of approved design, made of metal not subject to rapid deterioration by lading and must withstand a pressure

of 300 pounds per square inch without leakage. Interior pipes of the gauging device and sampling valve, except as prescribed in paragraph (d) of this section, may be equipped with excess flow valves of an approved design. Interior pipe of thermometer well must be anchored in an approved manner to prevent breakage due to vibration. The thermometer well must be closed by an approved valve attached close to the manway cover and closed by a screw plug. Other approved arrangements that permit testing thermometer well for leaks without complete removal of the closure may be used.

(d) Tanks used for the transportation of liquefied flammable gases must have the interior pipes of the loading and unloading valves, gauging device and sampling valve equipped with excess flow valves of an approved design.

§ 78.300–13 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design, made of metal not subject to rapid deterioration by the lading and mounted on manway cover. The total valve discharge capacity must be sufficient to prevent building up of pressure in tank in excess of 225 pounds per square inch.

(b) The safety valves must be set to open at a pressure of not exceeding 225 pounds per square inch. (For tolerance see § 78.300–17 (a).)

§ 78.300–14 *Fixtures, reinforcements, and attachments not otherwise specified.* (a) Attachments, other than the anchorage, interior pipe bracing and those mounted on the manway nozzle and cover, are prohibited. Heater systems may be applied to exterior of tank by tank bands or other approved method.

§ 78.300–15 *Closures for openings.* (a) Plugs must be of approved type, with standard pipe thread, and of metal not subject to rapid deterioration by the lading.

§ 78.300–16 *Tests of tanks.* (a) Each tank must be tested, after anchorage is applied and before tank lagging is applied, by completely filling the tank and manway nozzle with water or other liquid of similar viscosity, having a temperature which must not exceed 100 degrees Fahrenheit during test, and applying a pressure of 300 pounds per square inch. The tank must hold the prescribed pressure for at least 30 minutes without leakage or evidence of distress. All closures, except safety valves, must be in place while test is made.

(b) Calking of welded joints to stop leaks developed during the foregoing tests prohibited. Repairs in welded joints must be made as prescribed in § 78.300–8 (a).

(c) Tests of exterior heater systems are not a specification requirement.

§ 78.300–17 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The valve must open at a pressure not exceeding 225 pounds per square inch and be vapor tight at 180 pounds per square inch, which limiting pressures must not be affected by any auxiliary closure or other combination.

§ 78.300–18 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification. These marks must be as follows:

(1) ICC–105A300AL–W and specification number of material used in tank shell and manway nozzle in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads of the tank by the tank builder. ICC–105A-300AL–W must also be stenciled on the jacket in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph, by the party assembling the completed car. These marks must also be stenciled on the jacket in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, place where test was made, and by whom, stenciled on the jacket.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom, stenciled on the jacket.

(6) Water capacity of the tank in pounds stamped plainly and permanently in letters and figures at least ⅜ inch high into the metal of the tank immediately below the mark specified in subparagraph (2) and (3) of this paragraph. This mark must also be stenciled on the jacket immediately below the dome platform and either directly behind or within 3 feet of the right or left side of ladder, or ladders, if there is a ladder on each side of the tank, in letters and figures at least 2 inches high as follows:

WATER CAPACITY
000000 POUNDS

(7) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the jacket, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

§ 78.300–19 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to the car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and numbers of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and the car owner.

45. Add § 78.301 (15 F. R. 8523, Dec. 2, 1950) (49 CFR 78.301, 1950 Rev.) to read as follows:

§ 78.301 *Specification ICC–109A300–W; fusion welded steel tanks to be mounted on or forming a part of a car.* (a) Wherever the word "approved" is used in this specification it means approval by the Association of American Railroads Committee on Tank Cars as prescribed in § 78.259 (a), (b), (c) and (d).

§ 78.301–1 *Type.* (a) Tanks built under this specification must be cylindrical with heads designed convex outward. The tank must be provided with a manway nozzle and cover on top of the tank of sufficient diameter to permit access to the interior of the tank, and to provide for the proper mounting of venting, loading, unloading, sampling and safety valves, gauging device, thermometer well and a protective housing on the cover.

§ 78.301–2 *Lagging.* (a) Not a specification requirement. If applied, the tank shell and manway nozzle must be lagged with an approved insulation material of a thickness so that the thermal conductance is not more than 0.225 B. t. u. per square foot, per degree Fahrenheit differential in temperature per hour at 60 degrees. The entire insulation must be covered with a metal jacket not less than ⅛ inch in thickness and efficiently flashed around all openings so as to be weather tight. When heater systems are attached to exterior of tank, the lagging over each heater element may be reduced in thickness.

(b) Before lagging is applied, the tank surface and the inside surface of the metal jacket shall be given a protective coating.

§ 78.301–3 *Bursting-pressure.* (a) The calculated bursting pressure, based on the lowest tensile strength of the plate and the efficiency of the longitudinal welded joint, must be at least 750 pounds per square inch.

§ 78.301–4 *Thickness of plates.* (a) The wall thickness in the cylindrical portion of the tank and tank heads must be calculated by the following formula; but in no case shall the wall thickness be less than that specified in § 78.301–4 (b):

$$t=\frac{Pd}{2SE}$$

where
$t$ = thickness in inches of thinnest plate;
$P$ = calculated bursting pressure in pounds per square inch;
$d$ = inside diameter in inches;
$S$ = minimum ultimate tensile strength in pounds per square inch;
$E$ = efficiency of longitudinal welded joint = 90 percent.

(b) The minimum thickness of plates must be 11/16 inch.

(c) The minimum thickness of clad plates, where cladding material has physical properties at least equal to that of the base plate prescribed in § 78.301–6 (a), must be as prescribed in paragraph (b) of this section. Where the cladding material does not have physical properties at least equal to that of the base plate prescribed in § 78.301–6 (a), minimum thickness of base plate must be as prescribed in paragraph (b) of this section.

§ 78.301–5 *Manway nozzle opening.* (a) Opening in tank for manway nozzle must be reinforced in an approved manner.

§ 78.301–6 *Material.* (a) All plates for tank and manway nozzle must be made of open hearth boiler-plate flange quality steel to an approved specification, the carbon content of which shall not exceed 0.31 percent. These plates may also be clad with other metals such as nickel.

(b) All castings used for fittings or attachments to tank must be of material to an approved specification. The use of cast iron is prohibited.

(c) All external projections must be made of materials specified herein.

(d) Lining or interior coating is not a specification requirement. If applied, it must be approved as to material.

§ 78.301–7 *Tank heads.* (a) The tank head shape shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be ½ the major axis.

§ 78.301–8 *Welding.* (a) All joints must be fusion-welded by a process which investigation and laboratory tests by the Mechanical Division of the Association of American Railroads have proved will produce satisfactory results. Fusion-welding to be performed by fabricators certified by Association of American Railroads as qualified to meet the requirements of this specification. All joints must be fabricated by means of fusion-welding in accordance with the requirements of A. A. R. Welding Code Appendix W.

§ 78.301–9 *Stress-relieving.* (a) All welding of the tank shell and of attachments welded directly thereto must be stress-relieved as a unit.

§ 78.301–10 *Tank mounting.* (a) The manner in which the tank is supported on and securely attached to the car structure must be approved.

(b) The use of rivets as a means of securing anchor to tank is prohibited.

§ 78.301–11 *Manway nozzle, cover and protective housing.* (a) Manway nozzle must be of forged or rolled steel at least 18 inches inside diameter. Manway nozzle must be of approved design and attached to tank by fusion-welding. Fusion-welding for securing this attachment in place must be of the double-welded butt joint type or double full-fillet lap joint type.

(b) Manway cover must be forged or rolled steel at least 2¼ inches thick machined to approved dimensions. Manway cover must be attached to manway nozzle by through or stud bolts not entering tank.

(c) The shearing value of the bolts attaching protective housing to manway cover must not exceed 70 percent of shearing value of bolts attaching manway cover to manway nozzle.

(d) All joints between manway cover and manway nozzle, and between manway cover and valves or other appurtenances mounted thereon, must be made tight against vapor pressure.

(e) Protective housing of cast or fabricated steel must be bolted to manway cover. Housing must be equipped with a a suitable metal cover that can be securely closed. Housing cover must have a suitable stop to prevent cover striking loading or unloading connections and be hinged on one side only with an approved riveted pin or rod with nuts and cotters. Openings in wall of housing must be equipped with screw plugs or other closures.

§ 78.301–12 *Venting, loading and unloading valves, gauging and sampling device, and thermometer well.* (a) Venting loading and unloading valves must be of approved type, made of metal not subject to rapid deterioration by lading, and must withstand a pressure of 300 pounds per square inch without leakage. The valves must be directly bolted to seatings on manway cover. Pipe connections of the valves must be closed with approved screw plugs or otherwise fastened to prevent misplacement.

(b) The interior pipes of the loading and unloading valves, sampling valve and gauging device may be equipped with excess flow valves of an approved design.

(c) Gauging device, sampling valve and thermometer well are not specification requirements. When used they must be of approved design, made of metal not subject to rapid deterioration by the lading, and must withstand a pressure of 300 pounds per square inch without leakage. Interior pipe of thermometer well must be anchored in an approved manner to prevent breakage due to vibration. The thermometer well must be closed by an approved valve attached close to the manway cover and closed by a screw plug. Other approved arrangements that permit testing thermometer well for leaks without complete removal of the closure may be used.

§ 78.301–13 *Bottom outlets.* (a) Bottom outlet for discharge of lading is prohibited, but tank may be equipped with a bottom washout of metal not subject to rapid deterioration by the lading, which must be of approved construction complying with the following requirements:

(1) The extreme projection of the bottom washout must be at least 12 inches above the top of rail.

(2) Bottom washout nozzle must be of cast, forged or fabricated metal of good weldable quality in conjunction with the metal of the tank, and must be applied by welding.

(3) The bottom washout must be designed and constructed with a double closure, each capable of withstanding 300 pounds per square inch test pressure and 225 pounds per square inch working pressure without leakage. The inside or top closure must be such that loss of lading will not occur should the nozzle be broken, and preferably should consist of a plug with a tapered seat so that any tank pressure will effect tight closure independent of means of securing the plug. The outside or bottom closure must be a flange with a test plug not larger than ¾ inch pipe plug. Flange and plug must be chained to prevent loss.

(4) For bottom washout nozzles that project 6 inches or more from shell of tank, a "V" groove must be cut (not cast) in the upper part of bottom washout nozzle at a point immediately below lowest part of inside closure seat to a depth that will leave thickness of nozzle wall at the root of the "V" not over ⅜ inch. Where bottom washout nozzle is not a single piece, arrangement must be made to provide the equivalent of the breakage groove.

(5) The opening in the tank bottom for the bottom washout nozzle must be reinforced in an approved manner, and the washout nozzle must be of a thickness to insure that accidental breakage will occur at or below the "V" groove.

(6) The closure casting must not project below the "V" groove in the washout nozzle. The closure casting and seat must be readily accessible for repairs, including grinding.

(7) Joints between closures and their seats may be gasketed with suitable material.

§ 78.301–14 *Safety valves.* (a) The tank must be equipped with one or more safety valves of approved design, made of metal not subject to rapid deterioration by lading and mounted on manway cover. The safety valve must be set to open at a pressure of not exceeding 225 pounds per square inch. (For tolerance see § 78.301–18 (a).)

§ 78.301–15 *Fixtures, reinforcements and attachments not otherwise specified.* (a) All attachments to tank and nozzle must be applied by approved means. Heater systems may be applied to exterior of tank by tank bands or other approved method.

§ 78.301–16 *Closures for openings.* (a) Plugs must be of an approved type, with standard pipe thread, and of metal not subject to rapid deterioration by the lading.

§ 78.301–17 *Tests of tanks.* (a) Each tank must be tested, after anchorage is applied and before tank lagging is applied, by completely filling the tank and manway nozzle with water or other liquid of similar viscosity, having a temperature which must not exceed 100 degrees Fahrenheit during test, and applying a pressure of 300 pounds per square inch. The tank must hold the prescribed pressure for at least 30 minutes without leakage or evidence of distress.

(b) Calking of welded joints to stop leaks developed during the foregoing

tests is prohibited. Repairs in welded joints must be made as prescribed in § 78.301–8 (a).

(c) Tests of exterior heater systems are not a specification requirement.

§ 78.301–18 *Tests of safety valves.* (a) Each valve must be tested by air or gas before being put into service. The valve must open at a pressure not exceeding 225 pounds per square inch and be vapor tight at 180 pounds per square inch, which limiting pressure must not be affected by an auxiliary closure or other combination.

§ 78.301–19 *Marking.* (a) Each tank must be marked, thus certifying that the tank complies with all the requirements of this specification as follows:

(1) ICC–109A300–W in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of both outside heads by the tank builder. This mark must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high by the party assembling the completed car.

(2) Initials of tank builder and date of original test of tank in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (1) of this paragraph.

(3) Initials of company and date of additional tests performed by the party assembling the completed car, in those cases where the tank builder does not complete the fabrication of tank, in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the stamped marks specified in subparagraph (2) of this paragraph by the party assembling the completed car. These marks must also be stenciled on the tank, or jacket if lagged, in letters and figures at least 2 inches high immediately below the stenciled mark specified in subparagraph (1) of this paragraph by the party assembling the completed car.

(4) Date on which the tank was last tested, pressure to which tested, place where test was made, and by whom stenciled on the tank, or jacket if lagged.

(5) Date on which the safety valves were last tested, pressure to which tested, place where test was made, and by whom stenciled on the jacket.

(6) Water capacity of the tank in pounds stamped plainly and permanently in letters and figures at least ⅜ inch high into the metal of the tank immediately below the mark specified in subparagraph (3) of this paragraph. This mark must also be stenciled on the tank, or jacket if lagged, immediately below the dome platform and either directly behind or within 3 feet of the right or left side of the ladder on each side of the tank, in letters and figures at least 2 inches high as follows:

WATER CAPACITY
000000 POUNDS

(7) When a tank car and its appurtenances are designed and authorized for the transportation of a particular commodity only, the name of that commodity followed by the word "only", or such other wording as may be required to indicate the limits of usage of the car, must be stenciled on each side of the tank, or jacket if lagged, in letters at least 1 inch high, immediately above the stenciled mark specified in subparagraph (1) of this paragraph.

(8) Tanks made of clad plates must be stenciled on the tank, or jacket if lagged, "_____ (naming material) clad tank." Lined tanks must be stenciled on the tank, or jacket if lagged, "_____ (naming material) lined tank." These marks must be stenciled in letters at least 2 inches high, immediately above stenciled mark specified in subparagraph (7) of this paragraph.

§ 78.301–20 *Reports.* (a) Before a tank car is placed in service, the party assembling the completed car must furnish to car owner and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification. In case of welded repairs to, alterations of or additions to tanks or equipment from original design and construction, all of which must be approved, there must be furnished to the same parties a report in detail of the welded repairs, alterations or additions made to each tank covered by a particular application, showing the initials and number of each tank involved. Reports of retests must be rendered to the Bureau of Explosives and the car owner.

46. Cancel entire Appendices A, B, C, and D (20 F. R. 8111, 8112, Oct. 28, 1955) (19 F. R. 1286, 1287, Mar. 6, 1954) (17 F. R. 7288, 7289, Aug. 9, 1952) (16 F. R. 5340, 5341, June 6, 1951) (19 F. R. 3265, June 3, 1954) (15 F. R. 8523 to 8543, Dec. 2, 1950) (49 CFR 1950 Rev., 1954 Supp., Part 78 Appendices A, B, C, and D).

## Subchapter B—Carriers by Motor Vehicles

[Ex Parte No. MC–43]

## PART 207—LEASE AND INTERCHANGE OF VEHICLES

### LEASE AND INTERCHANGE OF VEHICLES BY MOTOR CARRIERS

At a general session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 18th day of June A. D. 1956.

It appearing that by orders entered herein on February 2, 1955, November 15, 1955, and January 23, 1956, certain sections, or parts of certain sections of the rules prescribed in the above-entitled proceeding by order of May 8, 1951, as subsequently amended, or the applicability of the rules, or sections thereof, to specified groups of authorized carriers, are to become effective on July 1, 1956;

It further appearing that there is pending before the Congress a Bill, S. 898, to amend the Interstate Commerce Act with respect to the authority of this Commission to regulate the use by motor carriers (under leases, contracts, or other arrangements) of motor vehicles not owned by them, in the furnishing of transportation;

And it further appearing that it would be undesirable to the public interest if the said sections or parts of sections were to become effective while the Congress is considering whether to approve legislation dealing with the subject:

*It is ordered,* That the effective date of the following provisions of the order entered in this proceeding on May 8, 1951, as subsequently modified, be, and it is hereby, postponed until further order:

(1) The provision of § 207.4 (a) (3) which requires that any contract, lease, or other arrangement for the use of equipment shall specify a period "which shall not be less than 30 days";

(2) That part of § 207.4 (a) (5) reading: "* * * *Provided, however,* That such compensation shall not be computed on the basis of any division or percentage of any applicable rate or rates on any commodity or commodities transported in said vehicle or on a division or percentage of any revenue earned by said vehicle during the period for which the lease is effective."

(3) Section 207.5 (c) which requires that drivers be changed at the point of interchange of vehicles on joint-line movements, only insofar as the same applies to authorized carriers by motor vehicle of passenger automobiles, commercial trucks, buses, and related vehicle traffic, and of perishable commodities in refrigerated equipment;

(4) That portion of § 207.5 (c) (1) immediately following the semicolon therein, relating to drivers of special equipment used to transport articles or commodities, which, because of their size, weight, or shape, require the use of special equipment, and reading "and that, until March 1, 1956, such drivers may make the inspection required by § 207.5 (e) of these rules and regulations on behalf of any carrier party to the through movement"; and

(5) All of the rules insofar as they apply to authorized carriers of household goods as defined by the Commission.

(49 Stat. 546, as amended; 49 U. S. C. 304)

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary.*

[F. R. Doc. 56–5023; Filed, June 25, 1956; 8:50 a. m.]

# PROPOSED RULE MAKING

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

### [ 26 CFR (1954) Part 1 ]

INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing, in duplicate, to the Commissioner of Internal Revenue, Attention: T:P, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in sections 111, 115, and 7805 of the Internal Revenue Code of 1954 (68A Stat. 33, 35, and 917; 26 U. S. C. 111, 115, and 7805).

[SEAL] O. GORDON DELK, *Acting Commissioner of Internal Revenue.*

The following regulations for taxable years beginning after December 31, 1953, and ending after August 16, 1954, are hereby prescribed under sections 102, 103, 109, 110, 111, 112, 113, 114, 115, 118, 119, 120, and 121 of the Internal Revenue Code of 1954:

Sec.
1.102 Statutory provisions; gifts and inheritances.
1.102–1 Gifts and inheritances.
1.103 Statutory provisions; interest on certain governmental obligations.
1.103–1 Interest upon State obligations.
1.103–2 Dividends from shares and stock of Federal agencies or instrumentalities.
1.103–3 Interest upon notes secured by mortgages executed to Federal agencies or instrumentalities.
1.103–4 Interest upon United States obligations.
1.103–5 Treasury bond exemption in the case of trusts or partnerships.
1.103–6 Interest upon United States obligations in the case of nonresident and foreign corporations not engaged in business in the United States.
1.109 Statutory provisions; improvements by lessee on lessor's property.
1.109–1 Exclusion from gross income of lessor of real property of value of improvements erected by lessee.
1.110 Statutory provisions; income taxes paid by lessee corporation.
1.110–1 Income taxes paid by lessee corporation.
1.111 Statutory provisions; recovery of bad debts, prior taxes, and delinquent accounts.
1.111–1 Recovery of certain items previously deducted or credited.
1.112 Statutory provisions; certain combat pay of members of the Armed Forces.
1.112–1 Compensation of members of the Armed Forces of the United States for service in a combat zone during an induction period, or for service while hospitalized as a result of such combat zone service.
1.113 Statutory provisions; mustering-out payments for members of the Armed Forces.
1.113–1 Mustering-out payments for members of the Armed Forces.
1.114 Statutory provisions; sports programs conducted for the American National Red Cross.
1.114–1 Proceeds from certain sports programs conducted for the benefit of the American National Red Cross.
1.115 Statutory provisions; income of States, municipalities, etc.
1.115–1 Bridges to be acquired by State or political subdivisions.
1.118 Statutory provisions; contributions to the capital of a corporation.
1.118–1 Contributions to the capital of a corporation.
1.119 Statutory provisions; meals or lodging furnished for the convenience of the employer.
1.119–1 Meals or lodging furnished for the convenience of the employer.
1.120 Statutory provisions; statutory subsistence allowance received by police.
1.120–1 Statutory subsistence allowance received by police.
1.121 Statutory provisions; cross-references to other acts.

§ 1.102 *Statutory provisions; gifts and inheritances.*

SEC. 102. *Gifts and inheritances*—(a) *General rule.* Gross income does not include the value of property acquired by gift, bequest, devise, or inheritance.

(b) *Income.* Subsection (a) shall not exclude from gross income—

(1) The income from any property referred to in subsection (a); or

(2) Where the gift, bequest, devise, or inheritance is of income from property, the amount of such income.

Where, under the terms of the gift, bequest, devise, or inheritance, the payment, crediting, or distribution thereof is to be made at intervals, then, to the extent that it is paid or credited or to be distributed out of income from property, it shall be treated for purposes of paragraph (2) as a gift, bequest, devise, or inheritance of income from property. Any amount included in the gross income of a beneficiary under subchapter J shall be treated for purposes of paragraph (2) as a gift, bequest, devise, or inheritance of income from property.

§ 1.102–1 *Gifts and inheritances*—(a) *General rule.* Property received as a gift, or received under a will or under statutes of descent and distribution, is not includible in gross income, although the income from such property is includible in gross income. An amount of principal paid under a marriage settlement is a gift. However, see section 71 and the regulations thereunder for rules relating to alimony or allowances paid upon divorce or separation. Section 102 does not apply to prizes and awards (see section 74 and § 1.74–1) nor to scholarships and fellowship grants (see section 117 and the regulations thereunder).

(b) *Income from gifts and inheritances.* The income from any property received as a gift, or under a will or statute of descent and distribution shall not be excluded from gross income under paragraph (a) of this section.

(c) *Gifts and inheritances of income.* If the gift, bequest, devise, or inheritance is of income from property, it shall not be excluded from gross income under paragraph (a) of this section. Section 102 provides a special rule for the treatment of certain gifts, bequests, devises, or inheritances which by their terms are to be paid, credited, or distributed at intervals. Except as provided in section 663 (a) (1) and paragraph (d) of this section, to the extent any such gift, bequest, devise, or inheritance is paid, credited, or to be distributed out of income from property, it shall be considered a gift, bequest, devise, or inheritance of income from property. Section 102 provides the same treatment for amounts of income from property which is paid, credited, or to be distributed under a gift or bequest whether the gift or bequest is in terms of a right to payments at intervals (regardless of income) or is in terms of a right to income. To the extent the amounts in either case are paid, credited, or to be distributed at intervals out of income, they are not to be excluded under section 102 from the taxpayer's gross income.

(d) *Effect of subchapter J.* Any amount required to be included in the gross income of a beneficiary under sections 652, 662, or 668 shall be treated for purposes of this section as a gift, bequest, devise, or inheritance of income from property. On the other hand, any amount excluded from the gross income of a beneficiary under section 663 (a) (1) shall be treated for purposes of this section as property acquired by gift, bequest, devise, or inheritance.

(e) *Income taxed to grantor or assignor.* Section 102 is not intended to tax a donee upon the same income which is taxed to the grantor of a trust or assignor of income under section 61 or sections 671 through 677, inclusive.

§ 1.103 *Statutory provisions; interest on certain governmental obligations.*

SEC. 103. *Interest on certain governmental obligations*—(a) *General rule.* Gross income does not include interest on—

(1) The obligations of a State, a Territory, or a possession of the United States, or any political subdivision of any of the foregoing, or of the District of Columbia;

(2) The obligations of the United States; or

(3) The obligations of a corporation organized under Act of Congress, if such corporation is an instrumentality of the United States and if under the respective Acts authorizing the issue of the obligations the interest is wholly exempt from the taxes imposed by this subtitle.

(b) *Exception.* Subsection (a) (2) shall not apply to interest on obligations of the United States issued after September 1, 1917 (other than postal savings certificates of deposit, to the extent they represent deposits made before March 1, 1941), unless under the respective Act authorizing the issuance thereof such interest is wholly exempt from the taxes imposed by this subtitle.

(c) *Cross references.* For provisions relating to the taxable status of—

(1) Bonds and certificates of indebtedness authorized by the First Liberty Bond Act, see sections 1 and 6 of that Act (40 Stat. 35, 36; 31 U. S. C. 746, 755);

(2) Bonds issued to restore or maintain the gold reserve, see section 2 of the Act of March 14, 1900 (31 Stat. 46; 31 U. S. C. 408);

(3) Bonds, notes, certificates of indebtedness, and Treasury bills authorized by the Second Liberty Bond Act, see sections 4, 5 (b) and (d), 7, 18 (b), and 22 (d) of that Act, as amended (40 Stat. 290; 46 Stat. 20, 775; 40 Stat. 291, 1310; 55 Stat. 8; 31 U. S. C. 752a, 754, 747, 753, 757c);

(4) Bonds, notes, and certificates of indebtedness of the United States and bonds of the War Finance Corporation owned by certain nonresidents, see section 3 of the Fourth Liberty Bond Act, as amended (40 Stat. 1311, § 4; 31 U. S. C. 750);

(5) Certificates of indebtedness issued after February 4, 1910, see section 2 of the Act of that date (36 Stat. 192; 31 U. S. C. 769);

(6) Consols of 1930, see section 11 of the Act of that date (36 Stat. 192; 31 U. S. C. 751);

(7) Obligations and evidences of ownership issued by the United States or any of its agencies or instrumentalities on or after March 28, 1942, see section 4 of the Public Debt Act of 1941, as amended (c. 147, 61 Stat. 180; 31 U. S. C. 742a);

(8) Commodity Credit Corporation obligations, see section 5 of the Act of March 8, 1938 (52 Stat. 108; 15 U. S. C. 713a-5);

(9) Debentures issued by Federal Housing Administrator, see sections 204 (d) and 207 (1) of the National Housing Act, as amended (52 Stat. 14, 20; 12 U. S. C. 1710, 1713);

(10) Debentures issued to mortgagees by United States Maritime Commission, see section 1105 (c) of the Merchant Marine Act, 1936, as amended (52 Stat. 972; 46 U. S. C. 1275);

(11) Federal Deposit Insurance Corporation obligations, see section 15 of the Federal Deposit Insurance Act (64 Stat. 890; 12 U. S. C. 1825);

(12) Federal Home Loan Bank obligations, see section 13 of the Federal Home Loan Bank Act, as amended (49 Stat. 295, § 8; 12 U. S. C. 1433);

(13) Federal savings and loan association loans, see section 5 (h) of the Home Owners' Loan Act of 1933, as amended (48 Stat. 133; 12 U. S. C. 1464);

(14) Federal Savings and Loan Insurance Corporation obligations, see section 402 (e) of the National Housing Act (48 Stat. 1257; 12 U. S. C. 1725);

(15) Home Owners' Loan Corporation bonds, see section 4 (c) of the Home Owners' Loan Act of 1933, as amended (48 Stat. 644, c. 168; 12 U. S. C. 1463);

(16) Obligations of Central Bank for Cooperatives, production credit corporations, production credit associations, and banks for cooperatives, see section 63 of the Farm Credit Act of 1933 (48 Stat. 267; 12 U. S. C. 1138c);

(17) Panama Canal bonds, see section 1 of the Act of December 21, 1904 (34 Stat. 5; 31 U. S. C. 743), section 8 of the Act of June 28, 1902 (32 Stat. 484; 31 U. S. C. 744), and section 39 of the Tariff Act of 1909 (36 Stat. 117; 31 U. S. C. 745);

(18) Philippine bonds, etc., issued before the independence of the Philippines, see section 9 of the Philippine Independence Act (48 Stat. 463; 48 U. S. C. 1239);

(19) Postal savings bonds, see section 10 of the Act of June 25, 1910 (36 Stat. 817; 39 U. S. C. 760);

(20) Puerto Rican bonds, see section 3 of the Act of March 2, 1917, as amended (50 Stat. 844; 48 U. S. C. 745);

(21) Treasury notes issued to retire national bank notes, see section 18 of the Federal Reserve Act (38 Stat. 268; 12 U. S. C. 447);

(22) United States Housing Authority obligations, see sections 5 (e) and 20 (b) of the United States Housing Act of 1937 (50 Stat. 890, 898; 42 U. S. C. 1405, 1420);

(23) Virgin Islands insular and municipal bonds, see section 1 of the Act of October 27, 1949 (63 Stat. 940; 48 U. S. C. 1403).

§ 1.103-1 *Interest upon obligations of a State, Territory, etc.* Interest upon the obligations of a State, Territory, or a possession of the United States, or any political subdivision thereof, or the District of Columbia is exempt from the income tax. Obligations issued by or on behalf of the State, Territory, or possession of the United States, or a duly organized political subdivision acting by constituted authorities empowered to issue such obligations, are the obligations of a State, Territory, or possession of the United States, or a political subdivision thereof. The term "political subdivision", within the meaning of the exemption, denotes any division of the State, Territory, or possession of the United States which is a municipal corporation, or to which has been delegated the right to exercise part of the sovereign power of the State, Territory, or possession of the United States. As thus defined, a political subdivision of a State, Territory, or possession of the United States may or may not, for the purpose of exemption, include special assessment districts so created, such as road, water, sewer, gas, light, reclamation, drainage, irrigation, levee, school, harbor, port improvement, and similar districts and divisions of a State, Territory, or possession of the United States.

§ 1.103-2 *Dividends from shares and stock of Federal agencies or instrumentalities*—(a) *Issued before March 28, 1942.* (1) Section 26 of the Federal Farm Loan Act of July 17, 1916 (12 U. S. C. 931), provides that Federal land banks and national farm-loan associations, including the capital and reserve or surplus therein and the income derived therefrom, shall be exempt from taxation, except taxes upon real estate. Section 7 of the Federal Reserve Act of December 23, 1913 (12 U. S. C. 531), provides that Federal reserve banks, including the capital stock and surplus therein and the income derived therefrom, shall be exempt from taxation, except taxes upon real estate. Section 13 of the Federal Home Loan Bank Act (12 U. S. C. 1433) provides that the Federal Home Loan Bank including its franchise, its capital, reserves, and surplus, its advances, and its income shall be exempt from all taxation, except taxes upon real estate. Section 5 (h) of the Home Owners' Loan Act of 1933 (12 U. S. C. 1464 (h)) provides that shares of Federal savings and loan associations shall, both as to their value and the income therefrom, be exempt from all taxation (except surtaxes, estate, inheritance, and gift taxes) imposed by the United States. Under the above-mentioned provisions, income consisting of dividends on stock of Federal land banks, national farm-loan associations, Federal home loan banks, and Federal reserve banks is not, in the case of stock issued before March 28, 1942, subject to the income tax; and income consisting of dividends on share accounts of Federal savings and loan associations is not, in the case of shares issued before March 28, 1942, subject to the normal tax on income. For taxability of such income in the case of such stock or shares issued on or after March 28, 1942, see section 6 of the Public Debt Act of 1942 (31 U. S. C. 742a) and paragraph (b) of this section. For the time at which a stock or share is issued within the meaning of this section, see paragraph (b) of this section.

(2) Regardless of the exemption from income tax of dividends paid on the stock of Federal reserve banks, dividends paid by member banks are treated like dividends of ordinary corporations.

(3) Dividends on the stock of the central bank for cooperatives, the production credit corporations, production credit associations, and banks for cooperatives, organized under the provisions of the Farm Credit Act of 1933, constitute income to the recipients, subject to both the normal tax and surtax (see section 63 of the Farm Credit Act of 1933 (12 U. S. C. 1138c)).

(b) *Issued on or after March 28, 1942.* (1) By virtue of the provisions of section 6 of the Public Debt Act of 1942, the tax exemption provisions set forth in paragraph (a) of this section with respect to income consisting of dividends on stock of the Federal land banks, national farm-loan associations, and Federal reserve banks, or on share accounts of Federal savings and loan associations, are not applicable in the case of dividends on such stock or shares issued on or after March 28, 1942.

(2) For the purposes of this section, a stock or share is deemed to be issued at the time and to the extent that payment therefor is made to the agency or instrumentality. The date of issuance of the certificate or other evidence of ownership of such stock or share is not determinative if payment is made at an earlier or later date. Where old stock is retired in exchange for new stock of a different character or preference, the new stock shall be deemed to have been issued at the time of the exchange rather than when the old stock was paid for. These rules may be illustrated by the following examples:

*Example (1).* A, the owner of an investment share account, consisting of 10 shares, in a Federal savings and loan association, has a single certificate issued before March 28, 1942, evidencing such ownership. In order that A may dispose of half of such shares, the association at his request issues, after March 27, 1942, two 5-share certificates in substitution for the 10-share certificate. The shares evidenced by the two new certificates are deemed to have been issued before March 28, 1942, the shares having been paid for before such date.

*Example (2).* The X Bank, a member of a Federal reserve bank, owns 50 shares of Federal reserve bank stock, evidenced by a single stock certificate issued before March 28, 1942. On December 31, 1942, the X Bank reduces the amount of its capital stock, as a result of which it is required to reduce the amount of its Federal reserve bank stock to 40 shares. It surrenders the 50-share certificate to the Federal reserve bank and receives a new 40-share certificate. The 40 shares evidenced by such certificate are deemed to have been issued before March 28, 1942. On December 31, 1943, the X Bank increases the amount of its capital stock, as a result of which it is required to purchase 10 additional shares of the Federal reserve bank stock. The Federal reserve bank issues a 10-share certificate evidencing ownership of the new shares. Of the 50 shares then owned by the X Bank, 40 were issued prior to March 28, 1942, and 10 were issued after March 27, 1942.

*Example (3).* A, the owner of a savings share account in the amount of $100 in a Federal savings and loan association, has a passbook containing a certificate issued prior to March 28, 1942, evidencing such ownership. Subsequent to March 27, 1942, A deposits $10,000 in the account. With respect to the $10,000 deposit, the share is deemed to have been issued after March 27, 1942.

§ 1.103-3 *Interest upon notes secured by mortgages executed to Federal agencies or instrumentalities.* Section 26 of the Federal Farm Loan Act of July 17, 1916 (12 U. S. C. 931), and section 210 of such act, as added by section 2 of the act of March 4, 1923 (12 U. S. C. 1111), provide that first mortgages executed to Federal land banks, joint-stock land banks, or Federal intermediate credit banks, and the income derived therefrom, shall be exempt from taxation. Accordingly, income consisting of interest on promisory notes held by such banks and secured by such first mortgages is not subject to the income tax.

§ 1.103-4 *Interest upon United States obligations*—(a) *Issued before March 1, 1941.* (1) Interest upon obligations of the United States issued on or before September 1, 1917, is exempt from tax. In the case of obligations issued by the United States after September 1, 1917, and in the case of obligations of a corporation organized under Act of Congress, if such corporation is an instrumentality of the United States, the interest is exempt from tax only if and to the extent provided in the acts authorizing the issue thereof, as amended and supplemented.

(2) Interest on Treasury bonds issued before March 1, 1941, is exempt from Federal income taxes except surtaxes imposed upon the income or profits of individuals, associations, or corporations. However, interest on an aggregate of not exceeding $5,000 principal amount of such bonds is also exempt from surtaxes. Interest in excess of the interest on an aggregate of not exceeding $5,000 principal amount of such bonds is subject to surtax and must be included in gross income.

(3) Interest credited to postal savings accounts upon moneys deposited before March 1, 1941, in postal savings banks is wholly exempt from income tax.

(b) *Issued on or after March 1, 1941.* (1) Under the provisions of sections 4 and 5 of the Public Debt Act of 1941, interest upon obligations issued on or after March 1, 1941, by the United States, or any agency or instrumentality thereof, shall not have any exemption, as such, from Federal tax except in respect of any such obligations which the Federal Maritime Board and Administration (formerly United States Maritime Commission) or the Federal Housing Administration has, before March 1, 1941, contracted to issue at a future date. The interest on such obligations so contracted to be issued shall bear such tax-exemption privileges as were at the time of such contract provided in the law authorizing their issuance. For the purposes hereof, under section 4 (a) of the Public Debt Act of 1941, a Territory and a possession of the United States (or any political subdivisions thereof), and the District of Columbia, and any agency or instrumentality of any one or more of the foregoing, shall not be considered as an agency or instrumentality of the United States.

(2) In the case of obligations issued as the result of a refunding operation, as, for example, where a corporation exchanges bonds for previously issued bonds, the refunding obligations are deemed, for the purposes of this section, to have been issued at the time of the exchange rather than at the time the original bonds were issued.

§ 1.103-5 *Treasury bond exemption in the case of trusts or partnerships.* (a) When the income of a trust is taxable to beneficiaries, as in the case of a trust the income of which is to be distributed to the beneficiaries currently, each beneficiary is entitled to exemption as if he owned directly a proportionate part of the Treasury bonds held in trust. When, on the other hand, income is taxable to the trustee, as in the case of a trust the income of which is accumulated for the benefit of unborn or unascertained persons, the trust, as the owner of the bonds held in trust, is entitled to the exemption on account of such ownership. In general, see sections 652 (b) and 662 (b) and the regulations thereunder.

(b) As the income of a partnership is taxable to the individual partners, each partner is entitled to exemption as if he owned directly a proportionate part of the bonds held by the partnership. For rules relating to partially tax-exempt interest see section 702 (a) (7) and the regulations thereunder.

§ 1.103-6 *Interest upon United States obligations in the case of nonresident aliens and foreign corporations, not engaged in business in the United States.* By virtue of section 4 of the Victory Liberty Loan Act of March 3, 1919 (31 U. S. C. 750), amending section 3 of the Fourth Liberty Bond Act of July 9, 1918 (31 U. S. C. 750), the interest received on and after March 3, 1919, on bonds, notes, and certificates of indebtedness of the United States while beneficially owned by a nonresident alien individual, or a foreign corporation, partnership, or association, if such individual, corporation, partnership, or association is not engaged in business in the United States, is exempt from income taxes. Such exemption applies only to such bonds, notes, or certificates as have been issued before March 1, 1941. Interest derived by a nonresident alien individual, or by a foreign corporation, partnership, or association on such bonds, notes, or certificates issued on or after March 1, 1941, is subject to tax as in the case of taxpayers generally as provided in § 1.103-4 (b).

§ 1.109 *Statutory provisions; improvements by lessee on lessor's property.*

SEC. 109. *Improvements by lessee on lessor's property.* Gross income does not include income (other than rent) derived by a lessor of real property on the termination of a lease, representing the value of such property attributable to buildings erected or other improvements made by the lessee.

§ 1.109-1 *Exclusion from gross income of lessor of real property of value of improvements erected by lessee.* (a) Income derived by a lessor of real property upon the termination, through forfeiture or otherwise, of the lease of such property and attributable to buildings erected or other improvements made by the lessee upon the leased property is excluded from gross income. However, where the facts disclose that such buildings or improvements represent in whole or in part a liquidation in kind of lease rentals, the exclusion from gross income shall not apply to the extent that such buildings or improvements represent such liquidation. The exclusion applies only with respect to the income realized by the lessor upon the termination of the lease and has no application to income, if any, in the form of rent, which may be derived by a lessor during the period of the lease and attributable to buildings erected or other improvements made by the lessee. It has no application to income which may be realized by the lessor upon the termination of the lease but not attributable to the value of such buildings or improvements. Neither does it apply to income derived by the lessor subsequent to the termination of the lease incident to the ownership of such buildings or improvements.

(b) The provisions of this section may be illustrated by the following example:

*Example.* The A Corporation leased in 1945 for a period of 50 years unimproved real property to the B Corporation under a lease providing that the B Corporation erect on the leased premises an office building costing $500,000, in addition to paying the A Corporation a lease rental of $10,000 per annum beginning on the date of completion of the improvements, the sum of $100,000 being placed in escrow for the payment of the rental. The building was completed on January 1, 1950. The lease provided that all improvements made by the lessee on the leased property would become the absolute property of the A Corporation on the termination of the lease by forfeiture or otherwise and that the lessor would become entitled on such termination to the remainder of the sum, if any, remaining in the escrow fund. The B Corporation forfeited its lease on January 1, 1955, when the improvements had a value of $100,000. Under the provisions of section 109, the $100,000 is excluded from gross income. The amount of $50,000 representing the remainder in the escrow fund is forfeited to the A Corporation and is included in the gross income of that taxpayer. As to the basis of the property in the hands of the A Corporation, see § 1.1019-1.

§ 1.110 *Statutory provisions: income taxes paid by lessee corporation.*

SEC. 110. *Income taxes paid by lessee corporation.* If—

(1) A lease was entered into before January 1, 1954,

(2) Both lessee and lessor are corporations, and

(3) Under the lease, the lessee is obligated to pay, or to reimburse the lessor for, any part of the tax imposed by this subtitle on the lessor with respect to the rentals derived by the lessor from the lessee,

then gross income of the lessor does not include such payment or reimbursement, and no deduction for such payment or reimbursement shall be allowed to the lessee. For purposes of the preceding sentence, a lease shall be considered to have been entered into before January 1, 1954, if it is a renewal or continuance of a lease entered into before such date and if such renewal or continuance was made in accordance with an option contained in the lease on December 31, 1953.

§ 1.110–1 *Income taxes paid by lessee corporation.* (a) If a lease was entered into before January 1, 1954, if both lessee and lessor are corporations, and if, under the lease, the lessee is obligated to pay, or to reimburse the lessor for, any portion of the tax imposed by subtitle A upon the lessor with respect to the rentals derived by the lessor from such lease, such payment or reimbursement of tax shall be excluded from gross income of the lessor and no deduction therefor shall be allowed to the lessee. For purposes of this section, a renewal or continuance after December 31, 1953, of a lease entered into before January 1, 1954, shall be considered a lease entered into before January 1, 1954, if such renewal or continuance is made in accordance with an option contained in the original lease on December 31, 1953, or in accordance with an option contained (on December 31, 1953) in an instrument by which the original lease was renewed or continued. Thus, assume that a corporation lessor and a corporation lessee enter into a lease on January 1, 1947. The lease expires on December 31, 1953, but may be renewed for two years at the option of the lessee. On December 31, 1953, the lessee exercises his option, and the parties further agree, in writing, that the terms of the lease may be extended for an additional two years at the lessee's option. On December 31, 1955, the lessee exercises his option. The renewal period covering 1954 and 1955 are controlled by the provisions of section 110. Similarly, section 110 is applicable to the second two-year period to which the lease has been extended. However, section 110 would not be applicable to any further extension of the terms of the lease, since such further extension would not be made pursuant to an option existing on December 31, 1953.

(b) In the case of a lease to which the provisions of section 110 are not applicable, any amounts paid or reimbursed by the lessee corporation with respect to taxes imposed by subtitle A upon the lessor corporation for rentals derived by the lessor corporation under such lease shall be included in the gross income of the lessor corporation and shall, if otherwise allowable, be allowed as a deduction to the lessee corporation.

§ 1.111 *Statutory provisions; recovery of bad debts, prior taxes, and delinquency amounts.*

SEC. 111. *Recovery of bad debts, prior taxes, and delinquency amounts*—(a) *General rule.* Gross income does not include income attributable to the recovery during the taxable year of a bad debt, prior tax, or delinquency amount, to the extent of the amount of the recovery exclusion with respect to such debt, tax, or amount.

(b) *Definitions.* For purposes of subsection (a)—

(1) *Bad debt.* The term "bad debt" means a debt on account of the worthlessness or partial worthlessness of which a deduction was allowed for a prior taxable year.

(2) *Prior tax.* The term "prior tax" means a tax on account of which a deduction or credit was allowed for a prior taxable year.

(3) *Delinquency amount.* The term "delinquency amount" means an amount paid or accrued on account of which a deduction or credit was allowed for a prior taxable year and which is attributable to failure to file return with respect to a tax, or pay a tax, within the time required by the law under which the tax is imposed, or to failure to file return with respect to a tax or pay a tax.

(4) *Recovery exclusion.* The term "recovery exclusion", with respect to a bad debt, prior tax, or delinquency amount, means the amount, determined in accordance with regulations prescribed by the Secretary or his delegate, of the deductions or credits allowed, on account of such bad debt, prior tax, or delinquency amount, which did not result in a reduction of the taxpayer's tax under this subtitle (not including the accumulated earnings tax imposed by section 531 or the tax on personal holding companies imposed by section 541) or corresponding provisions of prior income tax laws (other than subchapter E of chapter 2 of the Internal Revenue Code of 1939, relating to World War II excess profits tax), reduced by the amount excludable in previous taxable years with respect to such debt, tax, or amount under this section.

(c) *Special rules for accumulated earnings tax and for personal holding company tax.* In applying subsections (a) and (b) for the purpose of determining the accumulated earnings tax under section 531 or the tax under section 541 (relating to personal holding companies)—

(1) A recovery exclusion allowed for purposes of this subtitle (other than section 531 or section 541) shall be allowed whether or not the bad debt, prior tax, or delinquency amount resulted in a reduction of the tax under section 531 or the tax under section 541 for the prior taxable year; and

(2) Where a bad debt, prior tax, or delinquency amount was not allowable as a deduction or credit for the prior taxable year for purposes of this subtitle other than of section 531 or section 541 but was allowable for the same taxable year under section 531 or section 541, then a recovery exclusion shall be allowable if such bad debt, prior tax, or delinquency amount did not result in a reduction of the tax under section 531 or the tax under section 541.

§ 1.111–1 *Recovery of certain items previously deducted or credited*—(a) *General.* Section 111 provides that income attributable to the recovery during any taxable year of bad debts, prior taxes, and delinquency amounts shall be excluded from gross income to the extent of the "recovery exclusion" with respect to such items. The rule of exclusion so prescribed by statute applies equally with respect to all other losses, expenditures, and accruals made the basis of deductions from gross income for prior taxable years, including war losses referred to in section 127 of the Internal Revenue Code of 1939, but not including deductions with respect to depreciation, depletion, amortization, or amortizable bond premiums. The term "recovery exclusion" as used in this section means an amount equal to the portion of the bad debts, prior taxes, and delinquency amounts (the items specifically referred to in section 111), and of all other items subject to the rule of exclusion which, when deducted or credited for a prior taxable year, did not result in a reduction of any tax of the taxpayer under subtitle A (other than the accumulated earnings tax imposed by section 531 or the personal holding company tax imposed by section 541) of the Internal Revenue Code or corresponding provisions of prior income tax laws (other than the World War II excess profits tax imposed under subchapter E of chapter 2 of the Internal Revenue Code of 1939).

(1) *Section 111 items.* The term "section 111 items" as used in this section means bad debts, prior taxes, delinquency amounts, and all other items subject to the rule of exclusion, for which a deduction or credit was allowed for a prior taxable year. If a bad debt was previously charged against a reserve by a taxpayer on the reserve method of treating bad debts, it was not deducted, and it is therefore, not considered a section 111 item. Bad debts, prior taxes, and delinquency amounts are defined in section 111 (b) (1), (2), and (3), respectively. An example of a delinquency amount is interest on delinquent taxes. An example of the other items not expressly referred to in section 111 but nevertheless subject to the rule of exclusion is a loss sustained upon the sale of stock and later recovered, in whole or in part, through an action against the party from whom such stock had been purchased.

(2) *Definition of "recovery."* Recoveries result from the receipt of amounts in respect of the previously deducted or credited section 111 items, such as from the collection or sale of a bad debt, refund or credit of taxes paid, or cancellation of taxes accrued. Care should be taken in the case of bad debts which were treated as only partially worthless in prior years to distinguish between the item described in section 111, that is, the part of such debt which was deducted, and the part not previously deducted, which is not a section 111 item and is considered the first part collected. The collection of the part not deducted is not considered a "recovery." Furthermore, the term "recovery" does not include the gain resulting from the receipt of an amount on account of a section 111 item which, together with previous such receipts, exceeds the deduction or credit previously allowed for such item. For instance, a $100 corporate bond purchased for $40 and later deducted as worthless is subsequently collected to the extent of $50. The $10 gain (excess of $50 collection over $40 cost) is not a recovery of a section 111 item. Such gain is in no case excluded from gross income under section 111, regardless of whether the $40 recovery is or is not excluded.

(3) *Treatment of debt deducted in more than one year by reason of partial worthlessness.* In the case of a bad debt deducted in part for two or more prior years, each such deduction of a part of the debt is considered a separate section 111 item. A recovery with respect to such debt is considered first a recovery of those items (or portions thereof), resulting from such debt, for which there are recovery exclusions. If there are recovery exclusions for two or more items resulting from the same bad debt, such items are considered recovered in the order of the taxable years for which they were deducted, beginning with the latest. The recovery exclusion for any such item is determined by considering the recovery exclusion with respect to the prior year for which such item was deducted as being first used to offset all other applicable recoveries in the year in which the bad debt is recovered.

(4) *Special provisions as to worthless bonds, etc., which are treated as capital losses.* Certain bad debts arising from the worthlessness of securities and certain nonbusiness bad debts are treated as losses from the sale or exchange of capital assets. See sections 165 (g) and 166 (d). The amounts of the deductions allowed for any year under section 1211 on account of such losses for such year are considered to be section 111 items. Any part of such losses which, under section 1211, is a deduction for a subsequent year through the capital loss carryover (any later receipt of an amount with respect to such deducted loss is a recovery) is considered a section 111 item for the year in which such loss was sustained.

(b) *Computation of recovery exclusion*—(1) *Amount of recovery exclusion allowable for year of recovery.* For the year of any recovery, the section 111 items which were deducted or credited for one prior year are considered as a group and the recovery thereon is considered separately from recoveries of any items which were deducted or credited for other years. This recovery is excluded from gross income to the extent of the recovery exclusion with respect to this group of items as (*i*) determined for the original year for which such items were deducted or credited (see subparagraph (2) of this paragraph) and (ii) reduced by the excludable recoveries in intervening years on account of all section 111 items for such original year. A taxpayer claiming a recovery exclusion shall submit, at the time the exclusion is claimed, the computation of the recovery exclusion claimed for the original year for which the items were deducted or credited, and computations showing the amount recovered in intervening years on account of the section 111 items deducted or credited for the original year.

(2) *Determination of recovery exclusion for original year for which items were deducted or credited.* (i) The recovery exclusion for the taxable year for which section 111 items were deducted or credited (that is, the "original taxable year") is the portion of the aggregate amount of such deductions and credits which could be disallowed without causing an increase in any tax of the taxpayer imposed under subtitle A (other than the accumulated earnings tax imposed by section 531 or the personal holding company tax imposed by section 541) of the Internal Revenue Code or corresponding provisions of prior income tax laws (other than the World War II excess profits tax imposed under subchapter E of chapter 2 of the Internal Revenue Code of 1939). For the purpose of such recovery exclusion, consideration must be given to the effect of net operating loss carryovers and carrybacks or capital loss carryovers.

(ii) This rule shall be applied by determining the recovery exclusion as the aggregate amount of the section 111 items for the original year for which such items were deducted or credited reduced by whichever of the following amounts is the greatest:

(*a*) The difference between (*1*) the taxable income for such original year and (*2*) the taxable income computed without regard to the section 111 items for such original year.

(*b*) In the case of a taxpayer subject to any income tax in lieu of normal tax or surtax or both (except the alternative tax on capital gains imposed by section 1201, which is disregarded), the difference between (*1*) the income subject to such tax for such original year and (*2*) the income subject to such tax computed without regard to the section 111 items for such original year.

(Neither the amount determined under (*1*) nor the amount under (*2*) of (*a*) or (*b*) of this subdivision shall in any case be considered less than zero.) For this determination of the recovery exclusion, the aggregate of the section 111 items must be further decreased by the portion thereof which caused a reduction in tax in preceding or succeeding taxable years through any net operating loss carryovers or carrybacks or capital loss carryovers affected by such items. This decrease is the aggregate of the largest amount determined for each of such preceding and succeeding years under (*a*) and (*b*) of this subdivision, the computation of each carryover or carryback to the preceding or succeeding year being made under (*1*) of (*a*) and (*b*) of this subdivision with regard to the section 111 items for the original year and such computation being made under (*2*) of (*a*) and (*b*) of this subdivision without regard to such items. For the purpose of the preceding sentence, the computations under both (*1*) and (*2*) of (*a*) and (*b*) of this subdivision shall be made without regard to any section 111 items for such preceding or succeeding year and the carryovers and carrybacks to such year shall be determined without regard to any section 111 items for years subsequent to the original year.

(iii) The determination of the recovery exclusion for original taxable years subject to the provisions of the Internal Revenue Code of 1939 shall be made under § 39.22 (b) (12)–1 (b) (2) of Regulations 118.

(3) *Example.* The provisions of this paragraph may be illustrated by the following example:

*Example.* A single individual with no dependents has for his 1954 taxable year the following income and deductions:

| | With deduction of section 111 items | Without deduction of section 111 items |
|---|---|---|
| Gross income | $25,000 | $25,000 |
| Less deductions: | | |
| Depreciation | 20,000 | 20,000 |
| Business bad debts and taxes | 6,300 | |
| Personal exemption | 600 | 600 |
| | 26,900 | 20,600 |
| Taxable income or (loss) | (1,900) | 4,400 |
| Adjustment under section 172 (d) (4) | 600 | |
| Net operating loss | (1,300) | |

The full amount of the net operating loss of $1,300 is carried back and allowed as a deduction for 1952. The aggregate of the section 111 items for 1954 is $6,300 (bad debts and taxes). The recovery exclusion on account of section 111 items for 1954 is $600, determined by reducing the $6,300 aggregate of the section 111 items by $5,700, i. e., the sum of (1) the difference between the amount of the taxable income for 1954 computed without regard to the section 111 items ($4,400) and the amount of the taxable income for 1954 (not less than zero) computed by taking such items into account, and (2) the amount of the net operating loss ($1,300) which caused the reduction in tax for 1952 by reason of the carryback provisions. If in 1956 the taxpayer recovers $400 of the bad debts, all of the recovery is excluded from the income by reason of the recovery exclusion of $600 determined for the original year 1954. If in 1957 the taxpayer recovers an additional $300 of the bad debts, only $200 is excluded from gross income. That is, the recovery exclusion of $600 determined for the original year 1954 is reduced by the $400 recovered in 1956, leaving a balance of $200 which is used in 1957. The balance of the amount recovered in 1957, $100 ($300 less $200), is included in gross income for 1957.

(c) *Provisions as to taxes imposed by section 531 (relating to the accumulated earnings tax) and section 541 (relating to the tax on personal holding companies).* A recovery exclusion allowed for purposes of subtitle A (other than section 531 or section 541) of the Internal Revenue Code shall also be allowed for the purpose of determining the accumulated earnings tax under section 531 or the personal holding company tax under section 541 regardless of whether or not the section 111 items on which such recovery exclusion is based resulted in a reduction of the tax under section 531 or section 541 (or corresponding provisions of prior income tax laws) for the prior taxable year. Furthermore, if there is recovery of a section 111 item which was not allowable as a deduction or credit for the prior taxable year for purposes of subtitle A (not including section 531 or section 541) or corresponding provisions of prior income tax laws (other than subchapter E of chapter 2 of the Internal Revenue Code of 1939, relating to World War II excess profits tax), but was allowable for such prior taxable year in determining the tax under section 531 or section 541 (or corre-

sponding provisions of prior income tax laws) then for the purpose of determining the tax under section 531 or section 541 a recovery exclusion shall be allowable with respect to such recovery if the section 111 item did not result in a reduction of the tax under section 531 or section 541 (or corresponding provisions of prior income tax laws).

§ 1.112 *Statutory provisions; certain combat pay of members of the Armed Forces.*

SEC. 112. *Certain combat pay of members of the Armed Forces*—(a) *Enlisted personnel.* Gross income does not include compensation received for active service as a member below the grade of commissioned officer in the Armed Forces of the United States for any month during any part of which such member—

(1) Served in a combat zone during an induction period, or

(2) Was hospitalized as a result of wounds, disease, or injury incurred while serving in a combat zone during an induction period; but this paragraph shall not apply for any month during any part of which there are no combatant activities in any combat zone as determined under subsection (c) (3) of this section.

(b) *Commissioned officers.* Gross income does not include so much of the compensation as does not exceed $200 received for active service as a commissioned officer in the Armed Forces of the United States for any month during any part of which such officer—

(1) Served in a combat zone during an induction period, or

(2) Was hospitalized as a result of wounds, disease, or injury incurred while serving in a combat zone during an induction period; but this paragraph shall not apply for any month during any part of which there are no combatant activities in any combat zone as determined under subsection (c) (3) of this section.

(c) *Definitions.* For purposes of this section—

(1) The term "commissioned officer" does not include a commissioned warrant officer.

(2) The term "combat zone" means any area which the President of the United States by Executive Order designates, for purposes of this section or corresponding provisions of prior income tax laws, as an area in which Armed Forces of the United States are or have (after June 24, 1950) engaged in combat.

(3) Service is performed in a combat zone only if performed on or after the date designated by the President by Executive Order as the date of the commencing of combatant activities in such zone, and on or before the date designated by the President by Executive Order as the date of the termination of combatant activities in such zone; except that June 25, 1950, shall be considered the date of the commencing of combatant activities in the combat zone designated in Executive Order 10195.

(4) The term "compensation" does not include pensions and retirement pay.

(5) The term "induction period" means any period during which, under laws heretofore or hereafter enacted relating to the induction of individuals for training and service in the Armed Forces of the United States, individuals (other than individuals liable for induction by reason of a prior deferment) are liable for induction for such training and service.

§ 1.112–1 *Compensation of members of the Armed Forces of the United States for service in a combat zone during an induction period, or for service while hospitalized as a result of such combat-zone service.* (a) In addition to the exemptions and credits otherwise applicable, section 112 provides that there shall be excluded from gross income:

(1) Compensation received for active service as a member below the grade of commissioned officer in the Armed Forces of the United States for any month during any part of which such number (i) served in a combat zone during an induction period, or (ii) was hospitalized at any place as a result of wounds, disease, or injury incurred while so serving provided that during all of such month there are combatant activities in some combat zone.

(2) In the case of compensation received for active service as a commissioned officer in the Armed Forces of the United States for any month during any part of which such officer (i) served in a combat zone during an induction period, or (ii) was hospitalized at any place as a result of wounds, disease, or injury incurred while so serving provided that during all of such month there are combatant activities in some combat zone, so much of such compensation as does not exceed $200.

(b) The exclusions under section 112 and this section are applicable only if active service is performed in a combat zone during an induction period. Compensation is subject to exclusion whether or not it is received outside a combat zone or while the recipient is hospitalized or in a year different from that in which the service was rendered for which the compensation is paid. Service is performed in a combat zone only if it is performed in an area which the President of the United States has designated by Executive order, for the purpose of section 112, as an area in which Armed Forces of the United States are or have engaged in combat, and only if it is performed on or after the date designated by the President by Executive order as the date of the commencing of combatant activities in such zone and on or before the date designated by the President by Executive order as the date of the termination of combatant activities in such zone. Section 112 (c) (3) provides that June 25, 1950, shall be considered the date of commencing of combatant activities in the combat zone designated in Executive Order 10195. In Executive Order 10585 the President designated January 31, 1955, as of midnight thereof, as the date of termination of combatant activities in the combat zone designated in Executive Order 10195. If a member of the Armed Forces serves in a combat zone for any part of a month during an induction period, he is entitled to the exclusion for such month to the same extent as if he has served in such zone, for the entire month. If a member of the Armed Forces is hospitalized for a part of a month as a result of wounds, disease, or injury incurred while serving in such zone during an induction period, he is entitled to the exclusion for the entire month provided there are some combatant activities in any combat zone during all of such month.

(c) If an individual is hospitalized for wound, disease, or injury while serving in a combat zone, the wound, disease, or injury will, unless the contrary clearly appears, be presumed to have been incurred while serving in a combat zone. In certain cases, however, a wound, disease, or injury may have been incurred while serving in a combat zone even though the individual was not hospitalized for it while so serving. And, in exceptional cases, a wound, disease, or injury will not have been incurred while serving in a combat zone even though the individual was hospitalized for it while so serving.

(d) These principles may be illustrated by the following examples (in each case service is performed in a combat zone during an induction period):

*Example (1).* An individual is hospitalized in a combat zone for a specific disease after having served in such zone for three weeks. The incubation period of such disease is from two to four weeks. Such disease was incurred while serving in the combat zone.

*Example (2).* The facts are the same as in example (1) except that the incubation period is one year. Such disease was not incurred while serving in the combat zone.

*Example (3).* A member of the Air Force, stationed outside the combat zone, is shot while participating in an aerial flight over the combat zone, but is not hospitalized until he returns to his home base. Such injury was incurred while serving in a combat zone.

*Example (4).* An individual is hospitalized for a specific disease three weeks after having departed from a combat zone. The incubation period of such disease is from two to four weeks. Such disease was incurred while serving in a combat zone.

(e) An individual is hospitalized only until such time as his status as a hospital patient ceases by reason of his discharge from the hospital.

(f) The term "induction period" means any period in which individuals are generally subject to induction into the Armed Forces of the United States under the Universal Military Training and Service Act (50 App. U. S. C. 451) or under similar acts hereafter enacted. The term does not apply to any period in which individuals are not generally subject to induction but are subject to induction by reason of a prior deferment.

(g) The term "commissioned officer" does not include a commissioned warrant officer, and, accordingly, a commissioned warrant officer is entitled to the exclusion allowed to enlisted personnel under section 112 (a). The term "compensation", for the purpose of this section, does not include pensions and retirement pay. As to who are members of the Armed Forces of the United States, see section 7701 (a) (15).

(h) These exclusions are applicable without regard to the marital status of the recipient of the compensation, and if a husband and wife both meet the requirements of the statute, then each is entitled to the benefit of an exclusion. In the case of a husband and wife domiciled in a State recognized for Federal income tax purposes as a community property State, any exclusion from gross income under section 112 operates before apportionment of the gross income of the spouses in accordance with community property law. For example, a man and his wife are domiciled in a community property State and he is entitled, as a commissioned officer, to the benefit of the exclusion of $200 for each month under section 112 (b). He receives $1,000 as compensation for active service for three months in a combat zone. Of such amount, $600 is excluded from gross income under section 112 (b) and only $400 is taken into account in determining the gross income of both husband and wife.

(i) A member of the Armed Forces is in active service if he is actually serving in the Armed Forces of the United States. Periods during which a member of the Armed Forces is absent from duty on account of sickness, wounds, leave, internment by the enemy, or other lawful cause are periods of active service. A member of the Armed Forces in active service in a combat zone who there becomes a prisoner of war or missing in action is deemed, for the purpose of section 112 and this section, to continue in active service in the combat zone for the period for which he is entitled to such status for military pay purposes. These exclusions apply to compensation received by a member of the Armed Forces for services rendered while in active service even though payment is received subsequent to discharge or release from active service. Compensation credited to a decedent's account for a period subsequent to the established date of his death and received by his estate will be excluded under section 112 from the gross income of the estate to the same extent that it would have been excluded from the gross income of the decedent if he had lived and received such compensation.

§ 1.113 *Statutory provisions; mustering-out payments for members of the Armed Forces.*

SEC. 113. *Mustering-out payments for members of the Armed Forces.* Gross income does not include amounts received during the taxable year as mustering-out payments with respect to service in the Armed Forces of the United States.

§ 1.113–1 *Mustering-out payments for members of the Armed Forces.* For the purposes of the exclusion from gross income under section 113 of mustering-out payments with respect to service in the Armed Forces, mustering-out payments are payments made to any recipients pursuant to the provisions of the Mustering-out Payment Act of 1944 and the Veterans Readjustment Assistance Act of 1952. (See 38 U. S. C. 691e and 1011–1016.)

§ 1.114 *Statutory provisions; sports programs conducted for the American National Red Cross.*

SEC. 114. *Sports programs conducted for the American National Red Cross*—(a) *General rule.* In the case of a taxpayer which is a corporation primarily engaged in the furnishing of sports programs, gross income does not include amounts received as proceeds from a sports program conducted by the taxpayer if—

(1) The taxpayer agrees in writing with the American National Red Cross to conduct such sports program exclusively for the benefit of the American National Red Cross;

(2) The taxpayer turns over to the American National Red Cross the proceeds from such sports program, minus the expenses paid or incurred by the taxpayer—

(A) Which would not have been so paid or incurred but for such sports program, and

(B) Which would be allowable as a deduction under section 162 (relating to trade or business expenses) but for subsection (b) of this section; and

(3) The facilities used for such program are not regularly used during the taxable year for the conduct of sports programs to which this subsection applies.

For purposes of this subsection, the term "proceeds from such sports program" includes all amounts paid for admission to the sports program, plus all proceeds received by the taxpayer from such program or activities carried on in connection therewith.

(b) *Treatment of expenses.* Expenses described in subsection (a) (2) shall be allowed as a deduction under section 162 only to the extent that such expenses exceed the amount excluded from gross income by subsection (a) of this section.

§ 1.114–1 *Proceeds from certain sports programs conducted for the benefit of the American National Red Cross*—(a) *In general.* Under section 114, a corporation primarily engaged in the furnishing of sports programs may exclude from its gross income amounts received as proceeds from a sports program conducted by such corporation if each of the following requirements is met:

(1) The corporation agrees in writing with the American National Red Cross to conduct such sports program exclusively for the benefit of the American National Red Cross;

(2) The corporation turns over to the American National Red Cross all the proceeds from such sports program, less only the expenses paid or incurred by such corporation which would not have been paid or incurred but for such sports program and which would be allowable as deductions as ordinary and necessary business expenses under section 162 (a) except for the provisions of section 114 (b); and

(3) The facilities of the corporation used in conducting such sports program are not regularly used during the taxable year for the conduct of sports programs to which section 114 (a) applies.

(b) *Certain corporations ineligible.* Section 114 does not apply in the case of a corporation organized or operated primarily to conduct or furnish, or to participate in the conduct or furnishing of, one or more sports programs for the American National Red Cross.

(c) *Proceeds from a sports program.* The proceeds from a sports program conducted for the benefit of the American National Red Cross include all amounts received by the conducting corporation, irrespective of when received, on account of such sports program, which amounts would be includible in the gross income of such conducting corporation, except for the provisions of section 114. Where the activities carried on in connection with the sports program include the sale or rental of radio, television, or movie rights, refreshments, souvenirs, parking facilities, programs, advertising, or other goods and services, whether sold or rented directly or through concessionaires, the amounts received by the conducting corporation from such sports program include all amounts received from such activities, but only where such amounts would not have been received by the conducting corporation but for the presentation of the particular sports program. Where the conducting corporation receives payments for concessions on an annual or seasonal basis, and such payments are not increased because of the particular sports program, such payments are not considered as proceeds from such sports program, and any expenses paid or incurred by the conducting corporation on account of such concession operations may not be taken into account under section 114 (a) (2) in determining the net amount of the proceeds from such sports program which the conducting corporation is required to turn over to the American National Red Cross; nor are the proceeds of a sports program considered to include amounts received by the conducting corporation which do not constitute gross income of such corporation, such as admissions taxes or the breakage on a pari-mutual wagering pool which is required to be paid over to the State.

(d) *Sports programs.* (1) Section 114 applies where the program furnished by the conducting corporation consists of sports events such as baseball, football, basketball, or racing but it does not apply to programs or events such as motion pictures, circuses, or dances which are not ordinarily considered to be competitive sporting events.

(2) A sports program includes all of the events normally making up a full program in the particular sport. A single race of a racing program consisting of more than one race would not constitute a sports program, nor would one baseball or basketball game of a doubleheader program constitute a sports program.

(e) *Treatment of expenses.* Expenses described in section 114 (a) (2) shall be allowable as deductions under section 162 only to the extent that such expenses exceed the amount excluded from gross income under section 114 (a).

§ 1.115 *Statutory provisions; income of States, municipalities, etc.*

SEC. 115. *Income of states, municipalities, etc.*—(a) *General rule.* Gross income does not include—

(1) Income derived from any public utility or the exercise of any essential governmental function and accruing to a State or Territory, or any political subdivision thereof, or the District of Columbia; or

(2) Income accruing to the government of any possession of the United States, or any political subdivision thereof.

(b) *Contracts made before September 8, 1916; relating to public utilities.* Where a State or Territory, or any political subdivision thereof, or the District of Columbia, before September 8, 1916, entered in good faith into a contract with any person, the object and purpose of which was to acquire, construct, operate, or maintain a public utility—

(1) If—

(A) By the terms of such contract the tax imposed by this subtitle is to be paid out of the proceeds from the operation of such public utility before any division of such proceeds between the person and the State, Territory, political subdivision, or the District of Columbia, and

(B) A part of such proceeds for the taxable year would (but for the imposition of the tax imposed by this subtitle) accrue directly to or for the use of such State, Territory, political subdivision, or the District of Columbia,

then a tax on the taxable income from the operation of such public utility shall be levied, assessed, collected, and paid in the manner and at the rates prescribed in this subtitle, but there shall be refunded to such State, Territory, political subdivision, or the District of Columbia (under regulations prescribed by the Secretary or his delegate) an amount which bears the same relation to the amount of the tax as the amount which (but for the imposition of the tax imposed by this subtitle) would have accrued directly to or for the use of such State, Territory, political subdivision, or the District of Columbia, bears to the amount of the taxable income from the operation of such public utility for such taxable year.

(2) If by the terms of such contract no part of the proceeds from the operation of the public utility for the taxable year would, irrespective of the tax imposed by this subtitle, accrue directly to or for the use of such State, Territory, political subdivision, or the District of Columbia, then the tax on the taxable income of such person from the operation of such public utility shall be levied, assessed, collected, and paid in the manner and at the rates prescribed in this subtitle.

(c) *Contracts made before May 29, 1928, relating to bridge acquisitions.* Where a State or political subdivision thereof, pursuant to a contract entered into before May 29, 1928, to which it is not a party, is to acquire a bridge—

(1) If—

(A) By the terms of such contract the tax imposed by this subtitle is to be paid out of the proceeds from the operation of such bridge before any division of such proceeds, and

(B) A part of such proceeds for the taxable year would (but for the imposition of the tax imposed by this subtitle) accrue directly to or for the use of or would be applied for the benefit of such State or political subdivision,

then a tax on the taxable income from the operation of such bridge shall be levied, assessed, collected, and paid in the manner and at the rates prescribed in this subtitle, but there shall be refunded to such State or political subdivision (under regulations to be prescribed by the Secretary or his delegate) an amount which bears the same relation to the amount of the tax as the amount which (but for the imposition of the tax imposed by this subtitle) would have accrued directly to or for the use of or would be applied for the benefit of such State or political subdivision bears to the amount of the taxable income from the operation of such bridge for such taxable year. No such refund shall be made unless the entire amount of the refund is to be applied in part payment for the acquisition of such bridge.

(2) If by the terms of such contract no part of the proceeds from the operation of the bridge for the taxable year would, irrespective of the tax imposed by this subtitle, accrue directly to or for the use of or be applied for the benefit of such State or political subdivision, then the tax on the taxable income from the operation of such bridge shall be levied, assessed, collected, and paid in the manner and at the rates prescribed in this subtitle.

§ 1.115–1 *Bridges to be acquired by State or political subdivisions.* (a) Any State or political subdivision thereof claiming a refund under the provisions of section 115 (c) of an amount equal to all or a portion of any income tax levied, assessed, collected, and paid, shall file a claim therefor on Form 843 (to which there shall be attached as exhibits the matter hereinafter prescribed) with the district director of internal revenue for the internal revenue district in which the tax was paid, which claim shall be executed on behalf of such State or political subdivision thereof by the treasurer or other fiscal officer thereof and shall contain:

(1) A statement of the name of the taxpayer, of the amount of tax levied, assessed, collected, and paid for the taxable year or period in respect of which the claim is made, and the amount of refund thereby sought;

(2) A full statement of the facts considered by the claimant sufficient to entitle it to receive the refund, including copies of all contracts and other documents bearing on the case, and a statement that the claim is submitted under the provisions of section 115 (c);

(3) A showing which will establish to the satisfaction of the district director that the fiscal officer presenting the claim has authority to receive the amount of the refund on behalf of the State or political subdivision which he assumes to represent and to apply without delay the entire amount of such refund in part payment for the acquisition of such bridge, including copies of the laws, ordinances, or similar enactments considered by the claimant sufficient to establish its authority to receive the refund and so to apply it, together with a statement that such fiscal officer will receive and immediately so apply the entire amount of the refund; and

(4) A statement, verified by a written declaration that it is made under the penalties of perjury, made by or on behalf of the taxpayer that the taxpayer thereby joins with and concurs in the request of the State or political subdivision thereof that a refund of an amount equal to all or a portion of the tax previously paid by such taxpayer be made to such State or political subdivision, that the taxpayer agrees to receive the amount refunded from the State or political subdivision to which it is paid and immediately to apply the entire amount of such refund in part payment for the acquisition of such bridge, and that if for any reason the contract which is the basis of the claim for refund is not fully executed and performed, the taxpayer will repay to the United States upon its demand the entire amount of the refund with interest at 6 percent per annum from the date the refund is made without seeking or claiming the benefit of any statute of limitations which prior thereto may have run against the United States.

(b) No refund shall be made of any amount in excess of the amount of the tax levied, assessed, collected, and paid by the taxpayer for any taxable year or period. A separate claim shall be made in respect of each separate taxable year or period. If by the terms of the contract on which the claim is based two or more States or political subdivisions of a State or States are entitled to acquire the bridge, the claim for refund in respect of each separate taxable year or period must be made jointly by the States or political subdivisions thereof so entitled. The amount refunded under section 115 (c) and this section is not considered an overpayment, within the meaning of section 6611, relating to interest on overpayments, and no interest shall be allowed or paid upon the amount of the refund.

(c) A check or voucher in payment of a claim for refund allowed under section 115 (c) will be drawn in the name of the fiscal officer or officers having authority, as established under paragraph (a) (3) of this section, to receive the same, and will contain an express provision that it is issued for the sole purpose and subject to the conditions prescribed in section 115 (c) and this section.

§ 1.118 *Statutory provisions; contributions to the capital of a corporation.*

SEC. 118. *Contributions to the capital of a corporation*—(a) *General rule.* In the case of a corporation, gross income does not include any contribution to the capital of the taxpayer.

(b) *Cross reference.* For basis of property acquired by a corporation through a contribution to its capital, see section 362.

§ 1.118–1 *Contributions to the capital of a corporation.* In the case of a corporation, section 118 provides an exclusion from gross income with respect to any contribution of money or property to the capital of the taxpayer. Thus, if a corporation requires additional funds for conducting its business and obtains such funds through voluntary pro rata payments by its shareholders, the amounts so received being credited to its surplus account or to a special account, such amounts do not constitute income, although there is no increase in the outstanding shares of stock of the corporation. In such a case the payments are in the nature of assessments upon, and represent an additional price paid for, the shares of stock held by the individual shareholders, and will be treated as an addition to and as a part of the operating capital of the company. Section 118 also applies to contributions to capital made by persons other than shareholders. For example, the exclusion applies to the value of land or other property contributed to a corporation by a governmental unit or by a civic group for the purpose of inducing the corporation to locate its business in a particular community, or for the purpose of enabling the corporation to expand its operating facilities. However, the exclusion does not apply to any money or property transferred to the corporation in consideration for goods or services rendered, or to subsidies paid for the purpose of inducing the taxpayer to limit production. See section 362 for the basis of property acquired by a corporation through a contribution to its capital by its stockholders or by nonstockholders.

§ 1.119 *Statutory provisions; meals or lodging furnished for the convenience of the employer.*

SEC. 119. *Meals or lodging furnished for the convenience of the employer.* There shall be excluded from gross income of an employee the value of any meals or lodging furnished to him by his employer for the convenience of the employer, but only if—

(1) In the case of meals, the meals are furnished on the business premises of the employer, or

(2) In the case of lodging, the employee is required to accept such lodging on the business premises of his employer as a condition of his employment.

In determining whether meals or lodging are furnished for the convenience of the employer, the provisions of an employment contract or of a State statute fixing terms of employment shall not be determinative of whether the meals or lodging are intended as compensation.

§ 1.119–1 *Meals and lodging furnished for the convenience of the employer*—(a) *Meals.* (1) The value of meals furnished to an employee by his employer shall be excluded from the employee's gross income if two tests are met: (i) The meals are furnished on the business premises of the employer, and (ii) the meals are furnished for the convenience of the employer. The exclusion shall apply irrespective of whether under an employment contract or a statute fixing the terms of employment such meals are furnished as compensation.

(2) The question of whether meals are furnished for the convenience of the employer is one of fact to be determined by analysis of all the facts and circumstances in each case. Ordinarily, meals furnished to the employee during the working day will be deemed furnished for the convenience of the employer. Likewise, meals furnished immediately preceding or immediately following working hours of the employee will be deemed to be for the convenience of the employer if the furnishing of such meals serves a business purpose of the employer other than providing additional or indirect compensation to the employee. Meals furnished on nonworking days, or at times when the employee's presence on the employer's business premises does not serve a business purpose of the employer, do not qualify for the exclusion. If the employee is required to occupy living quarters on the business premises of his employer as a condition of his employment (as defined in paragraph (b) of this section), the exclusion applies to the value of any meals furnished to the employee on such premises. There is no requirement that the employee accept such meals as a condition of employment to qualify for the exclusion.

(b) *Lodging.* (1) The value of lodging furnished to an employee by his employer shall be excluded from the employee's gross income if three tests are met: (i) The lodging is furnished on the business premises of the employer, (ii) the lodging is furnished for the convenience of the employer, and (iii) the employee is required to accept such lodging as a condition of his employment. The phrase "required as a condition of his employment" means required in order for the employee to perform properly the duties of his employment. The exclusion shall apply irrespective of whether under an employment contract or a statute fixing the terms of employment such lodging is furnished as compensation.

(c) *Rules.* (1) For purposes of this section, the term "business premises of the employer" generally means the place of employment of the employee. For example, meals and lodging furnished in the employer's home to a domestic servant would constitute meals and lodging furnished on the business premises of the employer. Similarly, meals furnished to cowhands while herding their employer's cattle on leased land would be regarded as furnished on the business premises of the employer.

(2) The exclusion provided by section 119 applies only to meals and lodging furnished in kind, without charge or cost to the employee. If the employee has an option to receive additional compensation in lieu of meals or lodging in kind, or is required to reimburse the employer for meals or lodging furnished in kind, the value of such meals and lodging is not excluded from gross income. However, the mere fact that an employee, at his option, may decline to accept meals and lodging tendered in kind will not of itself require inclusion of the value thereof in gross income. Cash allowances for meals or lodging received by an employee are includible in gross income to the extent that such allowances constitute compensation.

(d) *Examples.* The provisions of section 119 may be illustrated by the following examples:

*Example (1).* A waitress who works from 7 a. m. to 4 p. m. is furnished without charge two meals a workday. In order to insure that the waitress will commence work on time, the employer encourages her to have her breakfast on his business premises before starting work, although she is not required to have her breakfast there. She is required to have her lunch on such premises. The waitress is permitted to exclude the value of these meals from her gross income under paragraph (a) of this section.

*Example (2).* The waitress in example (1) is allowed to have meals on the employer's premises without charge on her days off. The waitress is not permitted to exclude the value of such meals from her gross income.

*Example (3).* A Civil Service employee of a State is employed at an institution and is required by his employer to be available for duty at any time. Accordingly, the employer furnishes the employee with meals and lodging at the institution. Under the applicable State statute, his meals and lodging are regarded as part of the employee's compensation. The employee would nevertheless be entitled to exclude the value of such meals and lodging from his gross income.

*Example (4).* An employee of an institution is given the choice of residing at the institution free of charge, or of residing elsewhere and receiving a cash allowance in addition to his regular salary. If he elects to reside at the institution the value to the employee of the lodging furnished by the employer will be includible in the employee's gross income because his residence at the institution is not required in order for him to perform properly the duties of his employment.

§ 1.120 *Statutory provisions; statutory subsistence allowance received by police.*

SEC. 120. *Statutory subsistence allowance received by police*—(a) *General rule.* Gross income does not include any amount received as a statutory subsistence allowance by an individual who is employed as a police official by a State, a Territory, or a possession of the United States, by any political subdivision of any of the foregoing, or by the District of Columbia.

(b) *Limitations.* (1) Amounts to which subsection (a) applies shall not exceed $5 per day.

(2) If any individual receives a subsistence allowance to which subsection (a) applies, no deduction shall be allowed under any other provision of this chapter for expenses in respect of which he has received such allowance, except to the extent that such expenses exceed the amount excludable under subsection (a) and the excess is otherwise allowable as a deduction under this chapter.

§ 1.120–1 *Statutory subsistence allowance received by police.* (a) Section 120 excludes from the gross income of an individual employed as a police official by a State, Territory, or possession of the United States, by any of their political subdivisions, or by the District of Columbia, any amount received as a statutory subsistence allowance to the extent that such allowance does not exceed $5 per day. For purposes of this section, the term "statutory subsistence allowance" means an established amount, apart from salary or other compensation, which is authorized under the laws of a State, a Territory, or a possession of the United States, by any political subdivision of any of the foregoing, or by the District of Columbia, to be paid to an individual who is employed as a police official of such governmental unit for meals and other incidental expenses in connection with his official duties. A subsistence allowance paid to a police official by any of the foregoing governmental units which is not so provided by statute may not be excluded from gross income under the provisions of section 120. The term "police official" includes an employee of any of the foregoing governmental units who has police duties, such as a sheiff, a detective, a policeman, or a State police trooper, however designated.

(b) The exclusion provided by section 120 is to be computed on a daily basis, that is, for each day for which the statutory allowance is paid. If the statute providing the allowance does not specify the daily amount of such allowance, the allowance shall be converted to a daily basis for the purpose of applying the limitation provided herein. For example, if a State statute provides for a weekly subsistence allowance, the daily amount is to be determined by dividing the weekly amount by the number of days for which the allowance is paid. Thus, if a State trooper receives a weekly statutory subsistence allowance of $40 for 5 days of the week, the daily amount would be $8, that is, $40 divided by 5. However, for purposes of this section, only $5 per day may be excluded, or $25 on a weekly basis.

(c) Expenses in respect of which the allowance under section 120 is paid may not be deducted under any provision of the income tax laws except to the extent that (1) such expenses exceed the amount of the exclusion, and (2) the excess is otherwise allowable as a deduction. For example, if a State statute provides a subsistence allowance of $3 per day and the taxpayer, a State trooper, incurs expeditures of $4.50 for meals while away from home overnight on official police duties only $3 would be excludable under this section. Expenses relating to such exclusion ($3) may not be deducted under any provision of the income tax laws. However, the remaining $1.50 may be an allowable deduction under section 162 as traveling expenses while away from home in the performance of official duties. See § 1.162–2.

§ 1.121 *Statutory provisions; cross references to other acts.*

SEC. 121. *Cross references to other acts.*—(a) For exemption of—

(1) Adjustments of indebtedness under wage earners' plans, see section 679 of the Bankruptcy Act (52 Stat. 938; 11 U. S. C. 1079);

(2) Allowances and expenditures to meet losses sustained by persons serving the United States abroad, due to appreciation of foreign currencies, see the Acts of March 6, 1934 (48 Stat. 466; 5 U. S. C. 118c) and April 25, 1938 (52 Stat. 221; 5 U. S. C. 118c–1);

(3) Amounts credited to the Maritime Administration under section 9 (b) (6) of the Merchant Ship Sales Act of 1946, see section 9 (c) (1) of that Act (60 Stat. 48; 50 U. S. C. App. 1742);

(4) Benefits under World War Adjusted Compensation Act, see section 308 of that Act, as amended (43 Stat. 125; 44 Stat. 887, § 3; 38 U. S. C. 618);

(5) Benefits under World War Veterans' Act, 1924, see section 3 of the Act of August 12, 1935 (49 Stat. 609; 38 U. S. C. 454a);

(6) Dividends and interest derived from certain preferred stock by Reconstruction Finance Corporation, see section 304 of the Act of March 9, 1933, as amended (49 Stat. 1185; 12 U. S. C. 51d);

(7) Earnings of ship contractors deposited in special reserve funds, see section 607 (h) of the Merchant Marine Act, 1936, as amended (52 Stat. 961, § 28; 46 U. S. C. 1177);

(8) Income derived from Federal Reserve banks, including capital stock and surplus, see section 7 of the Federal Reserve Act (38 Stat. 258; 12 U. S. C. 531);

(9) Income derived from Ogdensburg bridge across Saint Lawrence River, see section 4 of the Act of June 14, 1933, as amended (54 Stat. 259, § 2);

(10) Income derived from Owensboro bridge across Ohio River and nearby ferries, see section 4 of the Act of August 14, 1937 (50 Stat. 643);

(11) Income derived from Saint Clair River bridge and ferries, see section 4 of the Act of June 25, 1930, as amended (48 Stat. 140, § 1);

(12) Leave compensation payments under section 6 of Armed Forces Leave Act of 1946, see section 7 of that Act (60 Stat. 967; 37 U. S. C. 36);

(13) Mustering-out payments made to or on account of veterans under the Mustering-Out Payment Act of 1944, see section 5 (a) of that Act (58 Stat. 10; 38 U. S. C. 691e);

(14) Railroad retirement annuities and pensions, see section 12 of the Railroad Retirement Act of 1935, as amended (50 Stat. 316; 45 U. S. C. 228*l*);

(15) Railroad unemployment benefits, see section 2 (e) of the Railroad Unemployment Insurance Act, as amended (52 Stat. 1097; 53 Stat. 845, § 9; 45 U. S. C. 352);

(16) Special pensions of persons on Army and Navy medal of honor roll, see section 3 of the Act of April 27, 1916 (39 Stat. 54; 38 U. S. C. 393);

(17) Gain derived from the sale or other disposition of Treasury Bills, issued after June 17, 1930, under the Second Liberty Bond Act, as amended, see Act of June 17, 1930 (C. 512, 46 Stat. 775; 31 U. S. C. 754).

(b) For extension of military income-tax-exemption benefits to commissioned officers of Public Health Service in certain circumstances, see section 212 of the Public Health Service Act (58 Stat. 689; 42 U. S. C. 213).

## FEDERAL RESERVE SYSTEM

### [ 12 CFR Part 222 ]

BANK HOLDING COMPANIES

FORM TO BE USED IN REGISTERING

The Board of Governors of the Federal Reserve System is considering the adoption of a form (Form F. R. Y–5) [1] to be used by a bank holding company in registering with the Board pursuant to the Bank Holding Company Act of 1956 (70 Stat. 133).

The proposed form is designed to provide for the submission by each bank holding company in its registration statement of the information required to be submitted pursuant to section 5 (a) of the Bank Holding Company Act of 1956.

This notice is published pursuant to section 4 of the Administrative Procedure Act and section 2 of the rules of procedure of the Board of Governors of the Federal Reserve System (12 CFR 262.2).

To aid in the consideration of this matter the Board will be glad to receive from interested persons any relevant data, views, or arguments. Although such material may be sent directly to the Board it is preferable that it be sent to the Federal Reserve Bank of the district which will forward it to the Board to be considered. All such material should be submitted in writing to be received not later than July 16, 1956.

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM,
[SEAL] S. R. CARPENTER,
*Secretary.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

IDAHO

NOTICE OF FILING OF PLAT OF SURVEY

JUNE 18, 1956.

Notice is hereby given that the plat of original survey of the following-described lands, accepted December 21, 1955, will be officially filed in the Land Office, Boise, Idaho, effective at 10:00 a. m. on the 35th day after the date of this notice:

BOISE MERIDIAN

T. 43 N., R. 10 E.,
Sec. 1, Lots 1, 2, 3, 4, SW¼;
Sec. 2, Lots 1, 2, 3, 4, S½NW¼, S½;
Secs. 3 to 11, inclusive;
Sec. 12, Lots 1, 2, 3, 4, W½NW¼, SW¼;
Sec. 13, Lots 1, 2, 3, 4, SW¼NE¼, W½, W½SE¼, SE¼SE¼;
Secs. 14 to 36, inclusive.

[1] Filed as part of the original document. Copies available upon request to the Board of Governors of the Federal Reserve System, Washington 25, D. C., or to any Federal Reserve Bank.

T. 44 N., R. 10 E.,
Sec. 7, Lots 1, 2, 3, 4;
Sec. 18, Lots 1, 2, 3, 4, 5, 6, 7, 8, SE¼SW¼;
Sec. 19, all;
Sec. 20, Lots 1, 2, 3, 4, 5, SW¼NE¼, S½NW¼, S½;
Sec. 21, Lots 1, 2, 3, 4, 5, S½SW¼, SW¼SE¼;
Sec. 27, Lots 1, 2, 3, 4, W½SW¼;
Sec. 28, Lot 1, NW¼NE¼, S½NE¼, NW¼, S½;
Secs. 29 to 33, inclusive;
Sec. 34, Lots 1, 2, 3, SW¼NE¼, W½, W½SE¼, SE¼SE¼;
Sec. 35, Lots 1, 2.

The areas described aggregate 28,458.97 acres.

All the lands described are within the exterior boundaries of the St. Joe National Forest. Lands were withdrawn for Coeur d'Alene Forest Reserve by Proclamation of November 6, 1906, name was changed to Coeur d'Alene National Forest July 1, 1908 and later changed to St. Joe National Forest July 1, 1911.

Anyone having a valid settlement or other right to any of these lands initiated prior to the dates of the withdrawals of the lands should assert the same within 3 months from the date on which the plat is officially filed by filing an application under appropriate public land law, setting forth all facts relevant thereto.

All inquiries relating to these lands should be addressed to the Manager, Land Office, P. O. Box 2237, Boise, Idaho.

NOLAN F. KEIL,
*Manager, Land Office.*

[F. R. Doc. 56–4993; Filed, June 25, 1956; 8:45 a. m.]

ALASKA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

The Department of the Interior, Bureau of Land Management, has filed an application, Serial No. Anchorage 032449, for the withdrawal of the lands described below, from all forms of appropriation under the public land laws including the mining laws but excepting the mineral leasing laws and the Materials Act. The applicant desires the land for public recreational purposes.

For a period of 60 days from the date of publication of this notice, persons having cause may present their objections in writing to the undersigned official of the Bureau of Land Management, Department of the Interior, Box 480, Anchorage, Alaska.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands involved in the application are:

Four parcels of unsurveyed land located on the south shore of Chilkoot Lake, the Chilkoot River, and the north shore of Lutak Inlet in approximate latitude 59°40′ N., longitude 136°35′ W. described as follows:

Area 1: Commencing at meander corner No. 1 of U. S. Survey No. 161 called corner

No. 1 of Area 1, thence S. 89° 30′ W. for 14 chains to corner No. 2 of Area 1, thence N. 20° W. for 39 chains to corner No. 3, thence N. 70° E. a distance of 6.9 chains to corner No. 4 of Area 1, on the west shore of the Chilkoot River, thence meander in a southeasterly direction along the west shore of the Chilkoot River and Lutak Inlet for approximately 45 chains to meander corner No. 1 of Area 1, the point of beginning, embracing approximately 37 acres.

Area 2: Commencing at meander corner No. 4 of Area 1, extend across Chilkoot River N. 70° E. to the east shore of the Chilkoot River to a point called meander corner No. 1 of Area 2, thence N. 70° E. for 14 chains to corner No. 2 of Area 2, thence S. 20° E. for 14 chains to meander corner No. 3 of Area 2 on the north shore of Lutak Inlet, thence meander in a westerly direction along the north shore of Lutak Inlet to the mouth of the Chilkoot River, thence in a northerly direction along the east shore of the Chilkoot River for approximately 26 chains to meander corner No. 1 of Area 2, the point of beginning, embracing approximately 16 acres.

Area 3: Commencing at corner No. 3 of Area 1, proceed N. 1° 30′ W. for 48.75 chains to corner No. 1 of Area 3 the point of beginning, thence N. 88° W. for 12 chains to corner No. 2 of Area 3, thence N. 0° 30′ W. for 8.75 chains to the south shore of Chilkoot Lake to meander corner No. 3, said point being at approximate latitude 59°20′05″ N., longitude 135°33′45″ W., thence meander in an easterly direction along the south shore of Chilkoot Lake for 12 chains to meander corner No. 4, thence S. 0° 30′ W. a distance of 6.3 chains to corner No. 1 of Area 3, the point of beginning, embracing approximately 9 acres.

Area 4: Commencing at meander corner No. 4 of Area 3, extend across the Chilkoot River N. 0° 30′ E. to the north shore of the Chilkoot River to a point called meander Corner No. 1 of Area 4, thence N. 0° 30′ E. for 16.25 chains to corner No. 2 of Area 4, thence N. 89° W. for 13 chains to the east shore of Chilkoot Lake to corner No. 3 of Area 4, thence meander in a southeasterly direction to meander corner No. 1, the point of beginning, embracing approximately 13 acres.

ROGER R. ROBINSON,
*Operations Supervisor.*

[W–039237]

WYOMING

STOCK DRIVEWAY WITHDRAWAL NO. 128; WYOMING NO. 13, REDUCED

By virtue of the authority contained in in section 10 of the act of December 29, 1916 (49 Stat. 865), as amended by the act of January 29, 1929, (45 Stat. 1144; 43 U. S. C. 300), and in section 7 of the act of June 28, 1934 (48 Stat. 1272), as amended by the act of June 26, 1936, (49 Stat. 1976; 43 U. S. C. 315f) and pursuant to the authority delegated by the Director, Bureau of Land Management, in section 2.5, Order No. 541, dated April 21, 1954 (19 F. R. 2473), it is ordered as follows:

Subject to valid rights and the provisions of existing withdrawals, Departmental Order dated March 18, 1920, establishing Stock Driveway No. 128, Wyoming No. 13, under section 10 of the act of December 29, 1916 (39 Stat. 865, 43 U. S. C. 300) is hereby revoked as far as it affects the following described lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 46 N., R. 92 W.,
Sec. 18: Lot 25.
T. 46 N., R. 93 W.,
Sec. 13: Lot 5.

The area described totals 47.63 acres.

This revocation is made in furtherance of an exchange under section 8 of the act of June 28, 1934 (48 Stat. 1272) as amended by section 3 of the act of June 26, 1936 (49 Stat. 1976; 43 U. S. C. 315g) by which the offered land will benefit a Federal land program. This restoration is therefore not subject to the provisions contained in the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended, granting preference rights to veterans of World War II and the Korean Conflict and others.

LOWELL M. PUCKETT,
*State Supervisor.*

[F. R. Doc. 56–5010; Filed, June 25, 1956; 8:48 a .m.]

[W–034452]

WYOMING

STOCK DRIVEWAY WITHDRAWAL NO. 144; WYOMING NO. 18, REDUCED

By virtue of the authority contained in section 10 of the act of December 29, 1916, (39 Stat. 865), as amended by the act of January 29, 1929, (45 Stat. 1144; 43 U. S. C. 300), and in section 7 of the act of June 28, 1934, (48 Stat. 1272), as amended by the act of June 26, 1936, (49 Stat. 1976; 43 U. S. C. 315f) and pursuant to the authority delegated by the Director, Bureau of Land Management, by section 2.5, Order No. 541, dated April 21, 1954 (19 F. R. 2473), it is ordered as follows:

Subject to valid rights and the provisions of existing withdrawals, Departmental Order dated May 30, 1944, establishing Stock Driveway No. 144, Wyoming No. 18, under section 10 of the Act of December 29, 1916 (39 Stat. 865; 43 U. S. C. 300) is hereby revoked so far as it affects the following described lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 35 N., R. 80 W.,
Sec. 32: SW¼NE¼, N½SW¼, NW¼SE¼.

The area described totals 160 acres.

This revocation is made in furtherance of an exchange under section 8 of the act of June 28, 1934 (48 Stat. 1272), as amended by section 3 of the act of June 26, 1936 (49 Stat. 1976; 43 U. S. C. 315g), by which the offered land will benefit a Federal land program. This restoration is, therefore, not subject to the provisions contained in the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended, granting preference rights to veterans of World War II and the Korean conflict, and others.

ALASKA

ORDER REVOKING PROCLAMATIONS OF MAY 20, 1943, OF ASSISTANT SECRETARY OF THE INTERIOR, ESTABLISHING RESERVES FOR INHABITANTS OF NATIVE VILLAGES OF SHISHMAREF AND WHITE MOUNTAIN, ALASKA

Whereas by proclamations of May 20, 1943, of the Assistant Secretary of the Interior, certain lands in Alaska were reserved for the exclusive use and occupancy of the native inhabitants of the villages of Shishmaref and White Mountain, Alaska; and

Whereas such proclamations provided, among other things, that they should become effective upon their approval by a majority of the natives residing in the area, voting in the manner prescribed in section 2 of the act of May 1, 1936 (49 Stat. 1250; 48 U. S. C. 358a); and

Whereas the natives of the villages of Shishmaref and White Mountain have rejected the reservations:

Now, therefore, pursuant to the authority contained in the said section 2 of the act of May 1, 1936, the said proclamations of May 20, 1943, are hereby revoked.

WESLEY A. D'EWART,
*Assistant Secretary of the Interior.*

## GENERAL SERVICES ADMINISTRATION

[Project 3-DC-01]

FEDERAL OFFICE BUILDINGS

PROSPECTUS FOR PROPOSED BUILDINGS IN SOUTHWEST REDEVELOPMENT AREA OF DISTRICT OF COLUMBIA

EDITORIAL NOTE: This prospectus of proposed Project Number 3-DC-01 is published pursuant to section 412 (f) of the Public Buildings Purchase Contract Act of 1954 as amended by Public Law 150, 84th Congress, which requires publication in the FEDERAL REGISTER, for a period of ten consecutive days from date of submission to the Committees on Public Works of the Senate and House of Representatives.

Project Number 3-DC-01 (Revised)

MARCH 14, 1956.

FORMAL PROSPECTUS FOR PROPOSED BUILDING UNDER TITLE I PUBLIC LAW 519, 83D CONGRESS, 2D SESSION

FEDERAL OFFICE BUILDING, WASHINGTON, D. C.

1. *Brief description of proposed building.* The project contemplates the erection of a group of three Federal Office Buildings on a site to be acquired by the Government facing on the proposed Tenth Street Mall in the southwest redevelopment area of Washington, D. C. Each building will be multistoried. An aggregate of approximately 643,000 square feet of net assignable space will be provided.

2. *Estimated maximum cost and financing.* a. Maximum cost of site and buildings, $25,250,000.

b. Proposed contract term, 30 years.

c. Maximum rate of interest on purchase contract, 4 percent.

3. *Certificates of need.* As the project is intended to provide relocation of numerous Federal agencies now in temporary buildings, no specific allocation of space can be made at this time. Upon completion of the facility, assignment and reassignment will be made in accordance with existing law. Therefore, requirement for Certificate of Need otherwise required by section 411 (e) of the Public Buildings Purchase Contract Act of 1954 was waived in Public Law 150, 84th Congress. Certification is hereby made as to the need for service and garage space.

4. *Non-availability of existing space.* Suitable space owned by the Government is not available; and suitable rental space is not available at a price commensurate with that to be afforded through the contract proposed.

5. *Estimated annual managerial, custodial, heat, and utility costs.* (Services to be supplied by Government), $675,000.

6. *Estimated annual tax liability, upkeep and maintenance.* a. Taxes, post construction (contract period), $321,625.

b. Upkeep and maintenance (to be provided by Government), $96,000.

7. *Current annual housing costs.* Rents and other housing costs currently paid by the Government for agencies to be housed in the building to be erected, $509,000 p. a.

*Determination of need.* It has been determined that (1) the needs for space for the permanent activities of the Federal Government in this particular area cannot be satisfied by utilization of any existing suitable property now owned by the Government, and (2) the best interests of the United States will be served by taking action hereunder.

Submitted at Washington, D. C., on June 1, 1956.

Approved:

FRANKLIN G. FLOETE,
*Administrator of General Services.*

8. *Statement of Director, Bureau of the Budget.* Reflected in letter (copy attached).

EXECUTIVE OFFICE OF THE PRESIDENT

BUREAU OF THE BUDGET

WASHINGTON 25, D. C.

JUNE 13, 1956.

Project 3-DC-01 (Revised 3-14-56).
3 Multi-storied Federal Office Buildings.
Southwest Redevelopment Area, Washington, D. C.

MY DEAR MR. FLOETE: Pursuant to section 411 (e) (8) of the Public Buildings Purchase Contract Act of 1954 (Public Law 519), the (Revised March 14, 1956) proposal for a group of three Federal Office Buildings, transmitted with your letter of June 1, 1956, has been examined and in my opinion "is necessary and in conformity with the policy of the President." This approval is given with the following understanding:

1. Revision reflects the application of more definite plans for integration of the facility with the proposed Tenth Street Mall developed subsequent to approval of the project last July. Effective integration requires construction of three building units in lieu of one, as originally proposed. Garage space of 134,250 square feet not contemplated in original project is provided. Number of employees, utilization of space and cost factors are relatively the same.

2. That the stated project cost of $25,250,000 (including $2,500,000 for a site to be acquired) is a maximum figure.

3. That the reported annual operating cost of existing Tempos 4, 5, and T; i. e., $1.00 per square foot, represents minimum maintenance in anticipation of demolition, and that temporary Government buildings actually cost more to maintain than the proposed new buildings.

4. That the proposed buildings will house approximately 10% of Federal employees presently housed in temporary buildings, and that the specific allocation of agencies in the proposed buildings is to be determined later by General Services Administration.

5. That every effort will be made to design and construct space conducive to maximum efficient utilization of both site and buildings and to take advantage of any revision of cost downward which may be found possible as the plans develop and negotiations are advanced.

6. That this approval supersedes Mr. Hughes' letter of July 22, 1955.

You appreciate, of course, that this project will receive a more detailed review as to cost and space utilization prior to the approval of the lease-purchase agreement.

Sincerely yours,

(Signed) PERCIVAL BRUNDAGE,
*Director.*

Hon. FRANKLIN G. FLOETE,
*Administrator,*
*General Services Administration,*
*Washington 25, D. C.*

## HOUSING AND HOME FINANCE AGENCY

### Public Housing Administration

CHARLES M. CORMACK

DELEGATION RELATING TO GALVESTON PROJECTS

The delegation to Charles M. Cormack relating to certain Galveston housing projects, 21 F. R. 4327, is amended to read as follows:

Charles M. Cormack is hereby authorized to exercise all the powers, authorities, duties, and functions of the Commissioner of the Public Housing Administration, an agency of the United States of America, and of the United States of America with respect to the low-rent housing projects of the Housing Authority of the City of Galveston identified as Projects Tex-17-1, Oleander Homes, 17-2, Palm Terrace, 17-3, Magnolia Homes, 17-4, 17-5, 17-6, all of which are known as Cedar Terrace.

The powers delegated herein may not be redelegated. However, they may be exercised by a person designated to serve in an "Acting" capacity during absence from duty of the said Charles M. Cormack, who is authorized to designate any person under his supervision to serve in an "Acting" capacity, for periods not exceeding 30 days, during his absence.

Date approved: June 20, 1956.

CHARLES E. SLUSSER,
*Commissioner.*

[F. R. Doc. 56-5002; Filed, June 25, 1956; 8:47 a. m.]

VARIOUS OFFICIALS

DELEGATIONS OF FINAL AUTHORITY

Section II, Delegations of Final Authority, is amended as follows:

Effective July 1, 1956 paragraph E13 is amended by deleting from the list of officials designated therein "Assistant Director for Management and Disposition, Washington Field Office" and "Chief of the Disposition Section, Washington Field Office" and by inserting in place thereof "Assistant Director for Management and Disposition, Washington Regional Office (for matters in the areas of jurisdiction of the Fort Worth Regional Office and the Washington Regional Office)" and "Chief of the Disposition Section, Washington Regional Office (for matters in the areas of jurisdiction of the Fort Worth Regional Office and the Washington Regional Office)."

Effective July 1, 1956 paragraph E14, delegating certain powers to the Assistant Director for Management and Disposition, Fort Worth Field Office, is hereby revoked.

Date approved: June 19, 1956.

[SEAL] CHARLES E. SLUSSER,
*Commissioner.*

## SECURITIES AND EXCHANGE COMMISSION

[File No. 24D-1493]

TRIANGLE URANIUM CORP.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

JUNE 20, 1956.

I. Triangle Uranium Corporation, a Nevada corporation, having filed with this Commission on November 5, 1954, a notification on Form 1-A relating to a proposed offering of 5,000,000 shares of its common stock, 1 cent par value, at 5 cents per share for an aggregate of $250,000, for the purpose of obtaining an exempton from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder;

II. The Commission having reasonable cause to believe that the terms and conditions of Regulation A have not been complied with and that the notification and offering circular contain untrue statements of material facts and omit to state material facts required to be stated therein or necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, particularly with respect to the following:

1. The commencement of the offering prior to the expiration of the waiting period provided by Rule 218.

2. The failure to file, as required by Rule 221, copies of an advertisement and other sales literature used in connection with said offering.

3. The failure to file reports of sales in accordance with Rule 224.

4. The failure to disclose that Weber Investment Co., the underwriter, and the issuer were under common control and that Weber Investment Co. was therefore an affiliate of the issuer during periods when offers and sales of said securities were being made.

5. The failure to amend the notification and offering circular to disclose that Weber Investment Co., the underwriter, is no longer registered with this Commission as a broker-dealer and has gone out of business.

III. *It is ordered*, Pursuant to Rule 223 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for a hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place of said hearing will be promptly given by the Commission.

*It is further ordered*, That this Order and Notice shall be served upon Triangle Uranium Corporation, 1112 Fremont Avenue, Las Vegas, Nevada, 2460 Kiesel Avenue, Ogden, Utah, and 244 32d Street, Ogden, Utah, personally or by registered mail or by confirmed telegraphic notice, and shall be published in the FEDERAL REGISTER.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[24W-1767]

EASTERN ENGINEERING ASSOCIATES, INC.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

JUNE 20, 1956.

I. Eastern Engineering Associates, Inc., with principal offices located at 720 21st Street South, Arlington, Virginia, having filed with the Commission on March 24, 1955 a Notification on Form 1-A and an Offering Circular, and subsequently having filed amendments thereto, relating to a proposed offering of $102,000 principal amount 4% debenture bonds and 12,000 shares of $1.00 par com-

mon stock, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder; and

II. The Commission having reasonable cause to believe that the terms and conditions of Regulation A have not been complied with in that the company has failed to file reports of sales on Form 2–A as required by Rule 224 of Regulation A, and has ignored requests by the Commission's staff for such reports.

III. *It is ordered,* Pursuant to Rule 223 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place for said hearing will be promptly given by the Commission.

*It is further ordered,* That this order and notice shall be served upon Eastern Engineering Associates, Inc. and Mr. Donald R. J. White, 720 21st Street South, Arlington, Virginia, personally or by registered mail or by confirmed telegraphic notice, and shall be published in the FEDERAL REGISTER.

By the Commission.

[24W–1713]

ABS TRASH CO., INC.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

JUNE 20, 1956.

I. ABS Trash Company, Inc., a Delaware corporation, with principal offices formerly located at 411 11th Street SW., Washington, D. C., having filed with the Commission on October 26, 1954 a Notification on Form 1–A and an Offering Circular, and subsequently having filed amendments thereto, relating to a proposed offering of 3,000,000 shares of 1 cent par 7 percent Preferred Series A Stock at 10 cents per share, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder; and

II. The Commission having reasonable cause to believe that the terms and conditions of Regulation A have not been complied with in that the company failed to file reports of sales on Form 2–A as required by Rule 224 of Regulation A, and has ignored requests by the Commission's staff for such reports.

III. *It is ordered,* Pursuant to Rule 223 (a) of the General Rules and Regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; and that notice of the time and place for said hearing will be promptly given by the Commission.

*It is further ordered,* That this order and notice shall be served upon ARS Trash Company, Inc., Alvin N. Roth, 3103 Walnut Street NE., Washington, D. C., and Aaron Iskovitz, 906 New York Avenue NW., Washington, D. C., personally or by registered mail or by confirmed telegraphic notice and shall be published in the FED. RAL REGISTER.

[File No. 24D–1156]

CAL-MEX OIL CORP.

ORDER TEMPORARILY SUSPENDING EXEMPTION, STATEMENT OF REASONS THEREFOR, AND NOTICE OF OPPORTUNITY FOR HEARING

JUNE 20, 1956.

I. Cal-Mex Oil Corporation, 306 Jackson Street, Taft, California, having filed with the Commission on June 9, 1953, a notification on Form 1-A and an offering circular and having subsequently filed amendments thereto, relating to a proposed public offering of 300,000 shares of its $1 par value common stock, for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3 (b) thereof and Regulation A promulgated thereunder; and

II. The Commission having reasonable cause to believe:

1. That the terms and conditions of Regulation A have not been complied with in that: the issuer has failed to file on Form 2–A reports of sales as required by Rule 224 of Regulation A.

2. That the offering circular contains untrue statements of material facts and omits to state material facts necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading, particularly with respect to:

a. The size of the working interest owned by Cal-Mex Oil Corporation in land situated in Neosho County, Kansas, and

b. The oil reserves under the acreage held under lease by Cal-Mex Oil Corporation; and

3. That the offering, if made or continued, would be made in such a manner as to operate as a fraud or deceit upon the purchaser in that material changes in the condition of the company since June 15, 1953 are not reflected in the material filed by Cal-Mex Oil Corporation under Regulation A, concerning, among others:

a. The identity of the officers and directors of Cal-Mex Oil Corporation,

b. The interests of such officers and directors in Cal-Mex Oil Corporation,

c. The financial condition of Cal-Mex Oil Corporation, and

d. The property interests held by Cal-Mex Oil Corporation.

*It is ordered,* Pursuant to Rule 223 (a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for a hearing; that, within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing, and that notice of the time and place for said hearing will be promptly given by the Commission.

*It is further ordered,* That this Order and Notice shall be served upon Cal-Mex Oil Corporation, 306 Jackson Street, Taft, California, Harry A. Benner, 306 Jackson Street, Taft, California, Oscar A. Peters, 122 Camino Uno SW, Rt. 1, Box P66, Albuquerque, New Mexico and James L. Davis, 2913 Niles Street, Bakersfield, California personally or by registered mail or by confirmed telegraphic notice, and shall be published in the FEDERAL REGISTER.

By the Commission.

## TITLE 3—THE PRESIDENT

### PROCLAMATION 3143

WITHDRAWAL OF TRADE AGREEMENT CONCESSION AND ADJUSTMENT IN RATE OF DUTY WITH RESPECT TO TOWELING OF FLAX, HEMP, OR RAMIE

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

1. WHEREAS, under the authority vested in him by the Constitution and the statutes, including section 350 (a) of the Tariff Act of 1930, as amended, the President on October 30, 1947, entered into a trade agreement with certain foreign countries, which trade agreement consists of the General Agreement on Tariffs and Trade and the related Protocol of Provisional Application thereof, together with the Final Act Adopted at the Conclusion of the Second Session of the Preparatory Committee of the United Nations Conference on Trade and Employment (61 Stat. (Parts 5 and 6) A7, A11, and A2050), and, by Proclamation No. 2761A of December 16, 1947 (61 Stat. 1103), proclaimed such modifications of existing duties and other import restrictions of the United States and such continuance of existing customs or excise treatment of articles imported into the United States as were then found to be required or appropriate to carry out the said trade agreement on and after January 1, 1948;

2. WHEREAS item 1010 in Part I of Schedule XX (original) annexed to the said General Agreement (61 Stat. (Part 5) A1264) reads as follows:

| Tariff Act of 1930 paragraph | Description of Products | Rate of Duty |
|---|---|---|
| 1010 | Woven fabrics, not including articles finished or unfinished, of flax, hemp, ramie, or other vegetable fiber, except cotton, or of which these substances or any of them is the component material of chief value, not specially provided for. | 10% ad val. |

3. WHEREAS, in accordance with Article II of the said General Agreement and by virtue of the said Proclamation No. 2761A, the United States duty treatment of toweling (i. e. fabrics chiefly used for making towels) of flax, hemp, or ramie, or of which these substances or any of them is the component material of chief value, described in the said item 1010 is the application to the said toweling of the rate of duty specified in the column designated "Rate of Duty" in the said item 1010, which treatment reflects the duty concession granted in the said General Agreement with respect to the said toweling;

4. WHEREAS the United States Tariff Commission has submitted to me its report of an investigation, including a hearing, under section 7 of the Trade Agreements Extension Act of 1951, as amended (65 Stat. 72; 67 Stat. 472; 69 Stat. 162), on the basis of which it has found that the said toweling is, as a result in part of the duty reflecting the concession granted thereon in the said General Agreement, being imported into the United States in such increased quantities, both actual and relative, as to cause serious injury to the domestic industry producing like or directly competitive products;

5. WHEREAS the said Tariff Commission has further found that in order to remedy the serious injury to the said domestic industry it is necessary to restore the rate of duty originally imposed on the said toweling by paragraph 1010 of the Tariff Act of 1930, namely, 40 per centum ad valorem, and has accordingly recommended the withdrawal of the duty concession granted in the said General Agreement with respect to the said toweling;

6. WHEREAS, I find that the withdrawal for an indefinite period of the duty concession granted in the said General Agreement with respect to the said toweling, to permit the application to such products of the original rate of duty imposed thereon under paragraph 1010 of the Tariff Act of 1930, is necessary to remedy the serious injury to the said domestic industry; and

7. WHEREAS upon the withdrawal of the said concession the rate of duty

## CODIFICATION GUIDE—Con.

## CODIFICATION GUIDE—Con.

which will apply to the said toweling will be 40 per centum ad valorem:

NOW, THEREFORE, I, DWIGHT D. EISENHOWER, President of the United States of America, acting under the authority vested in me by section 350 of the Tariff Act of 1930, as amended, and section 7 (c) of the Trade Agreements Extension Act of 1951, and in accordance with the provisions of Article XIX of the said General Agreement, do proclaim that, effective after the close of business July 25, 1956, and until otherwise proclaimed by the President, the duty concession granted in the said General Agreement with respect to toweling (i. e. fabrics chiefly used for making towels) of flax, hemp, or ramie, or of which these substances or any of them is the component material of chief value, described in item 1010 in Part I of Schedule XX (original) of the said General Agreement, shall be withdrawn, and Proclamation No. 2761A of December 16, 1947, shall be suspended insofar as it applies to the said toweling described in the said item 1010.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington this 25th day of June in the year of our Lord nineteen hundred and fifty-six, [SEAL] and of the Independence of the United States of America the one hundred and eightieth.

DWIGHT D. EISENHOWER

By the President:

JOHN FOSTER DULLES,
*Secretary of State.*

### Chapter IV—Commodity Stabilization Service and Commodity Credit Corporation, Department of Agriculture

**Subchapter C—International Wheat Agreement**

PART 481—WHEAT AND WHEAT-FLOUR EXPORT PAYMENT PROGRAM (IWA)

SUBPART—TERMS AND CONDITIONS OF 1956–57 PROGRAM

GENERAL

Sec.
481.725 General statement.

ELIGIBILITY FOR PAYMENT BY THE SECRETARY

481.730 General conditions of eligibility.
481.731 Program period.
481.732 Date of exportation.
481.733 Exports to designated countries.
481.734 Excess quantities exported.
481.735 Reports.
481.736 Proof of export.
481.737 Reentry or diversion.
481.738 Wheat and flour exported prior to sale.

EXPORT PAYMENT RATES AND ANNOUNCEMENTS

481.740 Announcements of rates.
481.741 Determination of rates.
481.742 Conversion factors.
481.743 Statement of status of purchases and sales.
481.744 Maximum and minimum prices.

CONFIRMATION OF SALE

481.748 Confirmation of eligibility.
481.749 Eligibility for entry in the Wheat Council's records.

DESIGNATED COUNTRIES

481.753 Designated countries.

REPORTS

481.755 Notice of sale.
481.756 Declaration of sale and evidence of sale.
481.757 Notice of export.
481.758 Additional reports.

APPLICATION FOR PAYMENT

481.760 Application for payment.
481.761 Public Voucher Form CSS 21.
481.762 Documents required to evidence exportation by exporter.
481.763 Submission of vouchers for payment.

OBLIGATION AND DEFAULT

481.765 Exporter's agreement with the Secretary.
481.766 Cancellation of sale or failure to export.

MISCELLANEOUS PROVISIONS

Sec.
481.770 Records and accounts.
481.771 Assignments.
481.772 Good faith.
481.773 Amendment and termination.
481.774 Persons not eligible.
481.775 Submission of reports.

481.788 United States.
481.789 3:31 e. s. t.

AUTHORITY: §§ 481.725 to 481.789 issued under sec. 2, 63 Stat. 945, 946, sec. 104, 64 Stat. 198, 67 Stat. 358; 7 U. S. C. 1641, 1642.

GENERAL

§ 481.725 *General statement.* In order to encourage the sale and exportation by commercial exporters of wheat produced in the United States and flour processed in the United States from such wheat and in order to exercise the rights, obtain the benefits and fulfill the obligations of the United States under the International Wheat Agreement, the Secretary of Agriculture (referred to in this subpart as the Secretary), pursuant to the authority conferred by section 32, Public Law 320, 74th Congress, as amended, offers to make payments to exporters under the terms and conditions stated in this subpart. Information pertaining to the operation of this program and forms prescribed for use thereunder can be obtained upon request directed to the address shown in § 481.775, or from the Director, Commodity Stabilization Service Office, U. S. Department of Agriculture, located in the cities listed in § 481.763.

ELIGIBILITY FOR PAYMENT BY THE SECRETARY

§ 481.730 *General conditions of eligibility.* (a) Payment under this subpart will be made to an exporter in connection with the net quantity of wheat or flour exported to a designated country from the United States and the net quantity of wheat or flour in customs bond in Canada exported to a designated country from Canadian ports, excluding West Coast Canadian ports, pursuant to a sale to a foreign buyer for which he receives a confirmation by the Director, Grain Division, Commodity Stabilization Service, (referred to in this subpart as the Director), in accordance with § 481.748, subject to the additional conditions set forth in this subpart. Payment also will be made to an exporter for wheat or flour exported prior to sale and for which the exporter has received a confirmation by the Director, subject to the conditions contained in § 481.738.

(b) A sale which involves wheat produced outside the United States, or flour processed from any such wheat, or a mixture which is partly derived from wheat produced outside the United States is not eligible for confirmation by the Director for export payment. However, in the event that the Director determines that such a mixture is exported unintentionally, payment may be made but only on that portion, which it is established to his satisfaction, as having been produced in the United States.

(c) In any case where the Wheat Council, subsequent to confirmation by the Director, determines that a sale, or any part thereof, is ineligible to be, or to remain, recorded because of non-compliance with the applicable regulations of the importing country governing purchase and importation under the Wheat Agreement, payment may be withheld or required to be refunded if already made.

(d) Wheat or flour exported pursuant to any CCC program wherein the price reflects an export allowance shall not be eligible for payment under this subpart.

§ 481.731 *Program period.* Sales entered into after the effective date of this offer and not later than Dec. 31, 1956, for recording against the 1956–57 Wheat Agreement guaranteed quantities are eligible for payment under this offer. Sales must be entered into during periods in which an announced rate is in effect, and in reliance thereon, in order to be eligible for payment.

§ 481.732 *Date of exportation.* (a) Wheat or flour sold for recording against the Wheat Agreement 1956–57 guaranteed quantities must be exported during the period August 1, 1956 to July 31, 1957, inclusive, unless exportation prior or subsequent to that period is authorized (1) by announcement issued in connection with the daily export payment rate announcement (see § 481.740), or (2) in specific cases by prior approval of the Director.

(b) Wheat or flour sold for export in a specified export rate period must be exported before the end of that period in order for the exporter to obtain the export payment rate applicable to that sale, unless an extension is obtained changing the export date to a later period. In the event that export takes place after the specified rate period and the exporter has not obtained an extension to change the export date to a later period, the export payment rate will be that which was in effect at time of sale, or time of giving Notice of Sale, whichever is lower, for the period in which actual export takes place. It will be the policy to grant an extension if it can be shown that exportation under the contract has been delayed by circumstances beyond the exporter's or importer's control and is not due to intentional violation of the contract.

§ 481.733 *Exports to designated countries.* Exports of wheat or flour under this program shall be made only to the country named in the Notice of Sale and the Declaration of Sale unless the exporter obtains, prior to export, authority from the Director to export to a designated country other than the purchasing country named in the Notice of Sale and Declaration of Sale.

§ 481.734 *Excess quantities exported.* Payment will not be made on quantities loaded on vessels or exported by rail or truck which exceed by more than 1 percent the quantity shown on the Declaration of Sale, or, in the case of bulk wheat a loading tolerance as specified in the contract but which shall not exceed 5 percent of the contract quantity on parcel shipments or 10 percent of the contract quantity on full cargo shipments, unless clearance is obtained from the Director, in which case a new Declaration of Sale and a new Confirmation of Sale for the additional quantity is required. Payment will be made without additional clearance where, in the case of flour or bagged wheat, the loaded quantity does not exceed the contract quantity by more than 1 percent, and in the case of bulk wheat the loaded quantity does not exceed the contract quantity by more than 1 percent, or a loading tolerance as specified in the contract, whichever is greater, but such loading tolerance shall not exceed 5 percent of the contract quantity on parcel shipments and 10 percent of the contract quantity on full cargo shipments.

§ 481.735 *Reports.* The exporter shall submit the reports and documents specified in §§ 481.755 to 481.758, inclusive.

§ 481.736 *Proof of export.* Proof of export, and specified supporting documents, must be submitted in accordance with § 481.762.

§ 481.737 *Reentry or diversion.* If any quantity of wheat or flour exported under this subpart is unloaded in the United States or Canada prior to being imported into some country other than the United States or Canada, or because of the exporter's action or with his consent is at any time unloaded in the United States or Canada or diverted to another country while en route, payment may be withheld, or if payment already has been made, the exporter may be required to make such refund or other adjustment as deemed appropriate by the Administrator, Commodity Stabilization Service (referred to in this subpart as the Administrator):

*Provided,* That if the wheat or flour with respect to which payment may be withheld or refund required under this section is lost, destroyed or damaged, the amount of the payment withheld or refund required shall not exceed the amount realized or which might reasonably be realized by the exporter over the price at which it was sold to the designated country. The exporter shall notify the Director immediately upon becoming cognizant of any unloading or diversion of wheat or flour with respect to which payment may be withheld or refund required under this section and furnish information as to the condition of such wheat or flour and any claim he may have in connection with any damage or loss thereto or destruction thereof.

§ 481.738 *Wheat and flour exported prior to sale.* (a) In connection with the quantity of wheat and flour exported prior to sale, payments will be made only on that portion thereof which has been reported in accordance with paragraph (b) of this section and only on sales made by the actual exporter of such wheat or flour, and not to any other party who buys such wheat or flour and resells it to a designated country.

(b) In order to receive export payment the exporter must have reported the exportation of such wheat or flour to the Director within one week after the date of such exportation as defined in § 481.786, unless additional time for reporting is granted by the Director. This report, which will be considered as a certification by the exporter, must include the following information:

(1) Date of exportation.

(2) Port of exportation.

(3) Country and port of original destination of wheat and flour.

(4) Name of ocean vessel upon which loaded.

(5) Quantity:

(i) Wheat in bushels.

(ii) Flour in net hundredweight.

(6) Class and grade of wheat; or type and extraction of flour.

(7) The report shall also contain a statement that the vessel contains wheat or flour sold to a designated country under the terms of the Wheat Agreement by the exporter filing the report, as provided in paragraph (c) of this section.

(c) Only wheat or flour which is loaded on a vessel which also carries wheat or flour which has been sold by the same exporter to a designated country as provided in this subpart shall be reported under paragraph (b) of this section, and shall be eligible for export payment when sold. In the case of full cargo shipments the unsold portion shall not exceed one-third of the total cargo. In the case of part cargo lots the unsold portion shall not exceed 2,000 metric tons.

(d) At such time as the wheat or flour is sold to a designated country, the exporter shall report the sale to the Director as provided in § 481.755, and shall submit all other reports and documents as required by this subpart. In reporting the sale the exporter must state that the wheat or flour sold was reported to the Director, as provided in paragraph (b) of this section. This may be done by the use of the code word "Abroad."

(e) The export rate applicable to such sale shall be that rate in effect at time of sale, or time of giving Notice of Sale, whichever is the lower, for the current export rate period which applies (1) to the port from which the wheat or flour was exported, and (2) to the designated country shown in the Notice of Sale and the Declaration of Sale, or the country of final destination, whichever is lower.

(f) In addition to the documents required under § 481.762, the exporter will be required in the case of flour to submit with Public Voucher Form CSS 21 a document which carries a description of such flour. The exporter should obtain separate bill or bills of lading for both the unsold and sold quantities of wheat or flour exported.

(g) All other conditions of this subpart, except as modified by paragraphs (a), (b), (c), (d) and (e) of this section are applicable to sales described in this section

EXPORT PAYMENT RATES AND ANNOUNCEMENTS

§ 481.740 *Announcement of rates.* Export payment rates will be announced from Washington, D. C., daily or at intervals of up to 7 days. Announcement of rates will be released at approximately 3:31 p. m., e. s. t. (see § 481.789), and will remain in effect through 3:30 p. m., e. s. t., on the expiration date stated in the announcement at which time a new announcement will be made. No rates will be announced on Saturday, and rates effective at 3:31 p. m., e. s. t., on Friday will be considered as in effect through 3:30 p. m., e. s. t., of the market day succeeding Saturday unless the announcement specifically provides otherwise. Announcement will be available through a press release, ticker service, and through Commodity Stabilization Service Offices at Portland (Oregon), Minneapolis, Kansas City (Missouri), Dallas, Chicago, Cincinnati, and New Orleans. Different rates of payment based upon export ports or areas, destinations, period of exportation, or other factors may be announced for the same period.

§ 481.741 *Determination of rates.* The rate in effect at the time of sale to the foreign buyer in the country of destination or the time of giving Notice of Sale as required by § 481.755 (a), whichever rate is the lower, shall be the rate applicable to the sale. The supporting evidence of sale submitted by the exporter in form prescribed in § 481.756 (d), will be the basis for determining the time of sale. The following are factors which may be determinative of the time of sale.

(a) Time of filing by the exporter of a cablegram or time of mailing of a written acceptance of a definite offer to purchase received from the foreign buyer.

(b) Time of receipt by the exporter of a cablegram or other written acceptance from the foreign buyer of a definite offer by the exporter to sell or the time of receipt by the exporter of a cablegram or other written notification from his agent that the foreign buyer has accepted a definite offer by the exporter to sell.

(c) Time of filing by the exporter of a cablegram or time of mailing of a written confirmation of the booking of a shipment or shipments to be made pursuant to an open offer of the exporter to sell or a standing order of the buyer to purchase. It must be clear from the evidence, however, that the exporter is empowered by the terms of the open offer or standing order to firm the contract by issuing a confirmation. For example, if he is authorized to confirm the sale at a price which may be established at his option, the evidence must show that such is the understanding between buyer and seller, otherwise it will be necessary for the buyer also to confirm the price, and receipt of the buyer's confirmation will establish the time of sale.

(d) Sales may be made through a third principal party, but in such cases, in determining the time of sale, no substantially greater lapse of time for receipt of buyer's confirmation will be recognized than would have elapsed had the exporter been dealing directly with the ultimate foreign buyer. In such a transaction, the evidence of sale required by § 481.756 (d) shall include documents exchanged between the exporter, the ultimate foreign buyer, and the intermediate third party.

(e) A sale shall not be considered as entered into until the purchase price has been established, and time of sale shall be the earliest date on which a firm contract exists between buyer and seller and on which a firm price has been established. In order to receive payment at the announced rate in effect at the time of sale, it is important that the exporter give timely Notice of Sale as required by § 481.755 (a), and present documentary evidence that the sale was consummated at such time.

(f) If export is wholly by truck or rail and the time of sale cannot be determined on the basis of the factors set forth in paragraph (a), (b) or (c) of this section, or by any other means, the sale will be deemed to have been made at the time of issuance of inland bill of lading, or if none is issued, at the time of clearance through United States Customs. If export is by ocean carrier and time of sale cannot be determined as outlined above, the sale will be deemed to have been made at the time of issuance of ocean carrier bill of lading, or if none is issued, at the time the wheat or flour is loaded on board ocean carrier.

(g) If the time of day at which the sale was consummated is not established and two payment rates are in effect on the day the sale was consummated, the time of consummation of sale will be deemed to be at the time the lower of the two rates was in effect.

§ 481.742 *Conversion factors.* The following conversion factors shall be applied to the announced rate to determine the rate applicable to a particular type of flour:

| | Factor |
|---|---|
| Wheat flour (including clears), derived from conventional milling practices which are generally accepted in the milling industry in the United States as representing a 72 percent extraction operation | 1.000 |
| Semolina and farina | 1.000 |
| Wheat flour, derived from conventional milling practices which are generally accepted in the milling industry in the United States as representing an 80 percent extraction operation | .919 |
| Whole wheat flour | .717 |

§ 481.743 *Statement of status of purchases and sales.* There will be issued not less often than weekly, a statement as to the progress of purchases and sales by individual importing and exporting countries against their guaranteed quantities. Any exporter upon request, addressed to the office indicated in § 481.775, will be furnished with such information as is available as to the status of the fulfillment of guaranteed quantities under the Wheat Agreement.

§ 481.744 *Maximum and minimum prices.* Maximum and/or minimum prices at which wheat may be sold under the Wheat Agreement will be announced from time to time by CSS. The Wheat Agreement provides that to such maximum prices may be added such marketing costs and carrying charges as may be agreed between buyer and seller, and that such carrying charges may accrue

for the buyer's account only after an agreed date specified in the contract under which the wheat is sold. (See § 481.755 (b) (3) (1).)

CONFIRMATION OF ELIGIBILITY

§ 481.748 *Confirmation of eligibility.* (a) Upon receipt of the Notice of Sale required by § 481.755, the Director will confirm the eligibility of the sale or any part thereof, by telegram, for payment upon proof that the conditions set forth in this subpart have been met, unless he determines that the transaction is ineligible for entry in the records of the Wheat Council under the provisions of the Wheat Agreement or unless he determines that the transaction would not obtain for the U. S. the maximum benefits under the Wheat Agreement. Accordingly, it may be to the exporter's advantage in some instances to ascertain from the office indicated in § 481.775 prior to making a sale, whether the sale may be confirmed as eligible. It shall be the responsibility of the exporter to protect himself (for example, by inserting an appropriate provision into his sales contract) against the possibility that the transaction will not be confirmed. It shall not be the duty or responsibility of the Director, to guarantee that a transaction which appears to the exporter prior to sale to be eligible for recording in the Wheat Council's records, will be confirmed as eligible.

(b) In the telegram of confirmation the Director may utilize the code letters "CEP", to indicate "Confirmed as Eligible for Payment."

(c) Assigning of numbers: Each confirmation will be assigned a number which shall be called the CSS Sale Number. This number will be included in the Confirmation of eligibility, and thereafter shall be shown on the Declaration of Sale (see § 481.756), the Notice of Export (see § 481.757), and Voucher Form CSS–21, and in all correspondence with reference to the transaction.

§ 481.749 *Eligibility for entry in the Wheat Council's records.* The Wheat Agreement provides that:

(a) *Wheat.* A transactions or part of a transaction in wheat-grain between participating exporting and importing countries is eligible for entry in the Wheat Council's records against guaranteed quantities of those countries for a crop year:

(1) Provided (i) it is at a price not higher than the maximum nor lower than the minimum (i. e., the equivalents of the basic maximum and minimum prices) in effect during the crop year in which the loading periods specified in the transaction fall and (ii) the exporting and importing countries have not agreed that it shall not be entered against their guaranteed quantities, and

(2) To the extent that (i) both the importing and exporting countries concerned have unfilled quantities for the crop year, and (ii) the loading period specified in the transaction falls within that crop year.

(b) *Flour.* If a commercial contract or governmental agreement on the sale and purchase of flour contains a statement, or if the exporting country and the importing country concerned inform the Wheat Council that they are agreed, that the price of such flour is consistent with the maximum and minimum price in effect during the crop year in which the loading period specified in the transaction falls, the wheat-grain equivalent of such flour shall, subject to the conditions prescribed in paragraph (a) (1) and (2), of this section, be entered in the Wheat Council's records against the guaranteed quantities of those countries. If there is not such statement or agreement as specified in this paragraph, either country involved in the transaction may request the Wheat Council to decide whether the quantity sold should be entered in its records and the Wheat Council shall decide whether the price at which the flour was sold justified the entry of the transaction in the records.

DESIGNATED COUNTRIES

§ 481.753 *Designated countries.* A designated country shall be any country or territory which has been designated by announcement issued in connection with export payment rates provided for in § 481.740. Nothing in this subpart shall be deemed to authorize the exportation of wheat or flour in violation of any statute, order or regulation now in existence or hereafter established.

REPORTS

§ 481.755 *Notice of Sale*—(a) *Time.* (1) The exporter shall file a Notice of Sale, normally as soon as possible after consummation of the sale (see § 481.755). (In order to comply with the terms of the Wheat Agreement, the exporting country's report of transactions must reach the Wheat Council in London not later than 10 days after date of consummation.)

(2) The order in which transactions are reported (time of filing telegraphic notice or time of giving telephonic notice) assumes importance when guaranteed quantities are near to being filled. Notices of Sale should normally be filed by telegraph or by telephone. Telephone notices should be confirmed immediately by telegraph.

(3) If notice is not given by telephone, and the exporter desires to take advantage of the current rate of payment, the telegram reporting sale must be filed by 3:30 p. m., e. s. t., on the expiration date for such rate as shown in the rate announcement.

(4) A Notice of Sale may include all sales made to any one designated country during any 24-hour period ending at 3:30 p. m., e. s. t. It shall be normal practice when such multiple sales are submitted in one telegraphic Notice of Sale to assign one CSS Sale Number to apply to all sales to a particular country shown in that telegram. Every sale reported in a separate telegram will be assigned an individual Sale Number.

(b) *Information required.* In giving Notice of Sale the exporter must report the following information:

(1) Date of Sale.

(2) Contract quantity:

(i) Wheat in bushels.

(ii) For bulk wheat the contract loading tolerance, if any, in percentage, but not in excess of five percent on parcel shipments or ten percent on full cargo shipments.

(iii) Flour in net hundredweight.

(3) Sale price:

(i) In the case of wheat, the sale price must be shown on an f. o. b. vessel bulk basis, except that on exports from West Coast ports price may be given on an in-store basis. In addition, the coast of export must be shown. If, because of marketing costs and carrying charges as provided for in § 481.744, the sales price exceeds the maximum price, the Notice of Sale must show the total price and the amount thereof included for marketing costs and carrying charges, each shown separately. The f. o. b. or the in-store price shown shall include all charges and commissions necessary to the sale and moving of the wheat to the f. o. b. or the in-store position. For example, a selling agent's commission shall be included, whereas guaranteed out-turn insurance shall not be included.

(ii) In case of flour, the sales price need not be shown, but in the notice must contain a certification that buyer and seller agree that the price of the flour is consistent with the prices specified in the Wheat Agreement. This may be reported by the code word "AKORD."

(4) Purchasing country.

(5) Name of purchaser. (Where the sale involves more than one purchaser, the Notice of Sale should contain the name of one purchaser and the word "others".)

(6) The number of the import license, buying permit, or similar authorization applicable to the sale, for those countries where such is required for IWA transactions, unless otherwise authorized by the Director. (Where the sale involves more than one purchaser, the Notice of Sale should contain one license number and the word "others".)

(7) Delivery period specified in contract.

(8) Class and grade of wheat.

(9) The word "Abroad" for wheat or flour exported prior to sale. (See § 481.738 (d).)

(10) Such additional information in individual cases as may be requested by the Director.

§ 481.756 *Declaration of Sale and evidence of sale*—(a) *Time of submission and required copies.* (1) The exporter shall prepare a Declaration of Sale (Wheat Agreement Form No. 1) and mail or deliver it normally within two days after receipt of the Confirmation of Eligibility. (See § 481.775.)

(2) The Declaration of Sale must be submitted in triplicate where there is only one buyer, and in quadruplicate where there is more than one buyer. The original and all copies shall be signed in an original signature by the exporter or his authorized representative. One copy of the Declaration of Sale will be acknowledged and returned to the exporter.

(3) One Declaration of Sale normally should be submitted by the exporter for each sale identified by a Sale Number assigned in the Confirmation of Eligibility (See § 481.748 (b)), although this is not mandatory. If more than one Declaration of Sale is submitted, the letters A, B, C, etc., shall be added to the Wheat Agreement Sale Number on the respective declaration.

(b) *Information required.* The information to be entered on the Wheat Agreement Form No. 1 Declaration of Sale, is as follows:

(1) The Wheat Agreement Sale Number as assigned in the Confirmation of Eligibility.

(2) Date and time of sale.

(3) Name of purchaser, or purchasers.

(4) The number of each import license, buying permit, or similar authorization applicable to the sale, for those countries where such are required for IWA transactions. The applicable number(s) shall be entered following each buyer's name. All applicable numbers shall be so entered even though such numbers were reported in the Notice of Sale.

(5) Quantity sold:

(i) Wheat in bushels. If, in the case of bulk wheat, the sales contract provides for a loading tolerance, the amount of such tolerance but not to exceed five percent on parcel shipments or ten percent on full cargo shipments, given in percentage figures shall be entered directly following the quantity sold.

(ii) Flour in net hundredweight.

(6) Purchasing country. If the country of final destination is other than the purchasing country, the country of final destination shall be shown as a parenthetical entry following the name of the purchasing country.)

(7) Delivery period specified in the contract.

(8) Class and grade of wheat or type and extraction of flour. In the case of flour, the class of wheat from which the flour was milled and the approximate ash content must be shown. For example: "Hard Spring 0.48 Ash". For blended flours, the most predominant class of wheat contained in the blend should be shown. For example: "Blended (predominantly) Hard Winter 0.70 Ash".

(9) Price and the basis upon which price is determined:

(i) The sales price in the case of wheat must be given on an f. o. b. vessel, bulk basis, on exports from Gulf and East Coast ports and on an in-store or f. o. b. vessel, bulk basis, on exports from the West Coast ports. If, because of marketing costs and carrying charges as provided for in § 481.744, the sale price of wheat exceeds the maximum price, the declaration shall show the total price and the amount thereof included for marketing costs and carrying charges, each shown separately. The f. o. b. or the in-store price shown shall include all charges and commissions necessary to the sale and the moving of the wheat to the f. o. b. or the in-store position. For example, a selling agent's commission shall be included, whereas guaranteed outturn insurance shall not be included.

(10) Export rate per bushel of wheat or per hundredweight of flour in effect as determined by § 481.741.

(11) Coastal area from which it is anticipated exportation will be made.

(12) Such additional information in individual cases as may be requested by the Director.

(c) *Name in which filed.* The Declaration of Sale must be filed in the name of the exporter who has sold the wheat or flour to a foreign buyer. Persons or firms selling wheat or flour to others who resell such wheat or flour to foreign buyers are not exporters. If a sale is made under a trade name, the Declaration of Sale may be filed under such name provided the name of the actual exporter and the relationship between the two is clearly established by an appropriate signature on the Declaration and all related documents, such as:

American Milling Company
(Trade Name)
U. S. Milling Company
(s) John Smith, Secretary

(d) *Evidence of sale.* Supporting evidence of sale, in one copy only, must be filed with each Declaration of Sale. Such evidence may be in the form of certified true copies of offer and acceptance or other documentary evidence of sale including contracts between exporter and buyer. In transactions involving a third principal party (see § 481.741 (d)) the evidence shall include documents exchanged between the exporter, the ultimate foreign buyer, and the intermediate third party. In the case of flour the exporter must also furnish a signed statement or other acceptable evidence, such as an exchange of cables, to the effect that buyer and seller agree that the price of the flour is consistent with prices specified in the Wheat Agreement.

§ 481.757 *Notice of export*—(a) *Time of submission and required copies.* Only one Notice of Export, Wheat Agreement Form No. 2, is required in connection with any one Declaration of Sale. Such Notice of Export must be mailed or delivered by the exporter normally within three days after date of export of the last shipment against the quantity shown as sold on the applicable Declaration of Sale, unless such time of filing is extended by the Director. (See § 481.775.)

(b) *Information required.* The Notice of Export shall contain the following information:

(1) Wheat Agreement Sale Number.

(2) Date of export of final shipment.

(3) Country of destination.

(4) Total quantity actually loaded on all shipments made in connection with applicable Declaration of Sale.

(i) Wheat in bushels, excluding dockage.

(ii) Flour in net hundredweight.

(5) The U. S. coastal area or areas from which the wheat or flour was exported. If more than one coastal area is involved, the quantity exported from each should be shown.

§ 481.758 *Additional reports.* The exporter shall file such additional reports as may be required from time to time by the Director, subject to the approval of the Bureau of the Budget.

APPLICATION FOR PAYMENT

§ 481.760 *Application for payment.* The exporter shall make an application for payment under this program in the manner set forth in §§ 481.761 and 481.763.

§ 481.761 *Public Voucher Form CSS–21.* An original and two (2) copies of Form CSS–21 must be prepared and submitted together with the evidence of exportation set forth in § 481.762. Supplies of Form CSS–21 and detailed instructions regarding the preparation and submission of Form CSS–21 and supporting documents may be obtained from the CSS Commodity Offices listed in § 481.763 or from the office indicated in § 481.775.

§ 481.762 *Documents required to evidence exportation by exporters*—(a) *Bills of lading or Shipper's Export Declaration.* Each voucher must be supported by one copy of the applicable onboard ocean carrier bill of lading signed by an agent of the ocean carrier which shows that the wheat or flour is destined for the buyer identified with the Declaration of Sale and supporting evidence, unless otherwise approved by the Director. Where loss, destruction or damage occurs subsequent to loading on-board ocean carrier but prior to issuance of on-board bill of lading, one copy of a Loading Tally Sheet or similar document may be submitted in lieu of such bill of lading; or if exported wholly by rail or truck, one copy of the Shipper's Export Declaration authenticated by the appropriate United States Customs official which identifies the shipment(s) and shows date of clearance into the foreign country. If the final destination of the shipment is a designated country not shown on the ocean bill of lading, the exporter also shall furnish an authenticated copy of Shipper's Export Declaration showing country of final destination. In the case of wheat, the voucher must also be supported by one copy of an Export Grain Inspection Certificate issued by an inspector holding a license under the United States Grain Standards Act. Where shipment is exported from a Canadian port, the voucher also must be supported by one copy each of the following documents:

(1) For wheat:

(i) A signed or certified true copy of the bill of lading or other document covering the movement of the wheat from the United States to Canada, and

(ii) A signed or certified true copy of document evidencing the holding of the wheat in customs bond in Canada.

(2) For flour:

(i) A signed or certified true copy of the bill of lading or other document covering the movement of the flour from the United States to Canada, and

(ii) A statement by the exporter, certified as being a true and correct statement, that the flour for which export payment is claimed is the same flour covered by the bill of lading or other document as required by subdivision (i) of this subparagraph.

(b) *Shipper or consignor other than exporter.* If the shipper or consignor named in the on-board ocean bill(s) of lading or the Shipper's Export Declaration(s), covering wheat or flour exported is other than the exporter named in the Notice of Sale and Declaration of Sale, waiver by such shipper or consignor of any interest in the claim in favor of

such exporter is required. Such waiver must clearly identify the on-board ocean bill(s) of lading or Shipper's Export Declaration(s) submitted to evidence exportation. If the shipper or consignor is neither the exporter named in the Notice of Sale and Declaration of Sale, nor the consignee identified with the Declaration of Sale and supporting evidence of sale, the exporter must submit, in addition to the waiver a certification by such shipper or consignor that he acted only as a freight forwarder, agent of exporter, or agent of consignee, and not as buyer and seller of the wheat or flour shown on the documents submitted to evidence exportation.

(c) In the event of export prior to sale such additional documents as required by § 481.738 (f) must also accompany the voucher.

§ 481.763 *Submission of voucher for payment.* Vouchers and required supporting documents should be submitted to the office listed below which services the State in which the exporter's invoicing office is located.

OFFICE

Director, Commodity Stabilization Service Office, U. S. Department of Agriculture, 623 South Wabash Avenue, Chicago 5, Ill.: Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

Director, Commodity Stabilization Service Office, U. S. Department of Agriculture, 500 South Ervay Street, Dallas 1, Texas: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas.

Director, Commodity Stabilization Service Office, U. S. Department of Agriculture, Fedelity Building, 911 Walnut Street, Kansas City 6, Mo.: Colorado, Kansas, Missouri, Nebraska, Wyoming.

Director, Commodity Stabilization Service Office, U. S. Department of Agriculture, 1006 West Lake Street, Minneapolis 8, Minnesota: Minnesota, Montana, North Dakota, South Dakota, Wisconsin.

Director, Commodity Stabilization Service Office, U. S. Department of Agriculture, 1218 Southwest Washington Street, Portland 5, Oregon: Arizona, California, Idaho, Nevada, Oregon, Utah, Washington.

OBLIGATION AND DEFAULT

§ 481.765 *Exporter's agreement with the Secretary.* The Notice of Sale by the exporter and the Confirmation of Eligibility by the Director shall constitute an agreement by the exporter to export the quantity of wheat or flour within the prescribed period stated in the Notice of Sale and in accordance with this subpart in consideration of the undertaking of the Secretary to make an export payment.

§ 481.766 *Cancellation of sale or failure to export.* (a) The exporter shall notify the Director promptly in every case where, after giving Notice of Sale as required in § 481.755, a sale is canceled by the exporter or by the importer, and he must state the reason for such cancellation. The exporter also shall notify the Director promptly when, for any reason, it becomes apparent to him that he will not be able to fulfill his obligation under this subpart by making shipment within the prescribed period.

(b) If the Administrator, after affording an exporter the opportunity to present evidence, determines that such exporter due to the cancellation of a sale or failure to export or for other reasons, has failed to discharge fully any obligation assumed by him under this subpart such exporter may be denied the right to continue participating in this or any subsequent program for such period as the Administrator may determine or until the exporter has complied with such terms as the Administrator may prescribe. Such terms, among other things, may:

(1) Require the refund of payments previously made to the exporter in an amount equivalent to twenty (20) percent of the payment applicable to the quantity of wheat or flour with respect to which the exporter has failed to fulfill his obligation, or

(2) Require the making of future shipments not in excess of such quantity at a payment rate which is reduced by an amount equivalent to twenty (20) percent of the payment rate applicable to such quantity, or

(3) Require a combination of subparagraphs (1) and (2) of this paragraph.

MISCELLANEOUS PROVISIONS

§ 481.770 *Records and accounts.* Each exporter shall maintain accurate records showing sales and deliveries of wheat or flour exported or to be exported in connection with this program. Such records, accounts, and other documents relating to any transaction in connection with this program shall be available during regular business hours for inspection and audit by authorized employees of the United States Department of Agriculture, and shall be preserved for two years after date of export.

§ 481.771 *Assignments.* No exporter shall, without the written consent of the director, assign any right of the exporter under this subpart. The exporter may, however, name a joint payee on Voucher Form CSS–21.

§ 481.772 *Good faith.* If the Administrator after affording the exporter an opportunity to present evidence determines that such exporter has not acted in good faith in connection with any transaction under this subpart such exporter may be denied the right to continue participating in this program or the right to receive payment under this subpart in connection with any sales previously made under this program, or both. Such exporter may also be required to refund any payment received by him in connection with the transaction in which he is determined not to have acted in good faith. Any such action shall not affect any other right of the Department of Agriculture or the government by way of the premises.

§ 481.773 *Amendment and termination.* This offer may be amended or terminated at any time by public announcement of such amendment or termination. Any such amendment or termination shall not be applicable to sales for export (which otherwise comply with the terms of this offer) made before the effective time and date of such amendment or termination.

§ 481.774 *Persons not eligible.* No member or delegate to Congress, or resident commissioner, shall be admitted to any benefit that may arise therefrom, but this provision shall not be construed to extend to a payment made to a corporation for its general benefit.

§ 481.775 *Submission of reports.* The Notice of Sale, Declaration of Sale, Notice of Export, and related reports required under this subpart to be submitted to the Director should be addressed as follows:

Chief, Wheat Agreement Branch, Grain Division, Commodity Stabilization Service (in telegrams: "CSS"), U. S. Department of Agriculture, Washington, D. C.

DEFINITIONS

§ 481.780 *Administrator.* "Administrator" means the Administrator of the Commodity Stabilization Service.

§ 481.781 *Director.* "Director" means the Director of the Grain Division, Commodity Stabilization Service.

§ 481.782 *Wheat Agreement.* "Wheat Agreement" means the 1956 International Wheat Agreement, signed in Washington, D. C., in May 1956.

§ 481.783 *Wheat Council.* "Wheat Council" means the International Wheat Council established by Article XIII of the Wheat Agreement.

§ 481.784 *Wheat.* "Wheat" means wheat grown in the United States and as defined in the Official Grain Standards of the United States. The quantity of wheat exported which is eligible for export payment shall be determined by deducting from the total weight of the shipment, the weight of any dockage indicated on the inspection certificate issued at the time of loading for export.

§ 481.785 *Flour.* "Flour" means flour processed in the United States from wheat as defined in § 481.784, including semolina and farina, but shall not include wheat products produced during a continuing process of manufacturing processed wheat products other than flour or flour mixes which are composed principally of wheat-flour. The quantity of flour exported which is eligible for export payment shall be determined by deducting from the net weight of the shipment, the weight of any enrichment, or other additive (including Creta Praeperata), in excess of one-half of one percent of the combined net weight of the flour and additive.

§ 481.786 *Export.* Wheat or flour shall be deemed to have been "exported" when loaded on board an ocean carrier, or, if shipment to the designated country is wholly by truck or rail, when the shipment clears United States Customs.

§ 481.787 *Ocean carrier.* "Ocean carrier" means the vessel on which final shipment from the United States or Canada, other than shipments between such countries, is intended to be made pursuant to a sale confirmed under this program.

§ 481.788 *United States.* "United States" means the continental United States except that as used in § 481.737, Reentry or Diversion, the term "United States", includes the Territories and possessions of the United States.

§ 481.789 *3:31 e. s. t.* "3:31 e. s. t.", as used in this subpart means 3:31 eastern standard time, except that when Washington, D. C., is on daylight saving time #3:31 e. s. t. means 3:31 eastern daylight saving time (2:31 eastern standard time).

*Effective time and date.* This offer shall be effective on June 25, 1956 at 3:31 p. m., e. s. t.; however, sales may not be made for recording against the 1956–57 Wheat Agreement guaranteed quantity of any importing country until authorized in the daily export payment rate announcement. (See § 481.740.)

*Right to waive any requirement.* The Administrator, CSS, if he deems such action desirable in order to prevent undue hardship, may with respect to any transaction or transactions hereunder waive any requirement of this subpart, if such action is in the best interests of the program. Any such waiver shall be in writing and shall contain a full statement of the reasons therefor.

NOTE: The record keeping and reporting requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 21st day of June 1956.

[SEAL] EARL M. HUGHES,
*Administrator,*
*Commodity Stabilization Service.*

[F. R. Doc. 56–5049; Filed, June 26, 1956; 8:49 a. m.]

# TITLE 7—AGRICULTURE

## Chapter I—Agricultural Marketing Service (Standards, Inspections, Marketing Practices), Department of Agriculture

### Subchapter K—Federal Seed Act

### PART 201—FEDERAL SEED ACT REGULATIONS

MISCELLANEOUS AMENDMENTS

On May 27 and October 19, 1955, there were published in the FEDERAL REGISTER (20 F. R. 3745 and 7879) notices of rule making and notices of hearings with respect to proposed amendments of the rules and regulations of the Secretary of Agriculture under the Federal Seed Act (7 CFR 201.1 et seq., as amended). After consideration of all relevant matters presented at the hearings, or in writing, pursuant to said notices, and under authority of section 402 of the Federal Seed Act (7 U. S. C. 1592), said regulations are hereby amended as follows:

1. In § 201.34 *Kind, variety, and type; designation as hybrid,* new paragraphs (d) and (e) are added to read as follows, respectively:

(d) *Name of variety.* The name of each variety of agricultural or vegetable seed is the name determined in accordance with the following considerations:

(1) The variety name shall represent a subdivision of a kind, which is characterized by growth, plant, fruit, seed, or other characters by which it can be differentiated from other sorts of the same kind.

(2) Except as otherwise provided in this section, the name of a new variety shall be the name given by the originator or discoverer of the variety, except that in the event the originator or discoverer of a new unnamed variety, at the time seed of the variety is first introduced into channels of commerce of the United States for sale to the public, cannot or chooses not to name the variety, the name of the variety shall be the first name under which the seed is introduced into such commerce. However, if the variety name so provided is in a language not using the Roman alphabet, the variety shall be given a name by the person authorized under this paragraph to name the variety, in a language using the Roman alphabet.

(3) The variety name shall not be misleading.

(4) The status under the Federal Seed Act of a variety name is not modified by the registration of such name as a trademark.

(5) Names of varieties which through broad general usage prior to the effective date of this section were recognized variety names, except for hybrid seed corn, shall be considered variety names without regard to the principles stated in subparagraph (2) of this paragraph.

(6) The variety name for any variety of hybrid seed corn first introduced into commercial channels in the United States for sale prior to October 20, 1951, shall be any name used for such variety in such channels prior to that date. The variety name for any variety of hybrid seed corn first introduced into commercial channels in the United States for sale on or after October 20, 1951, shall be the name assigned in accordance with subparagraphs (1) through (4) of this paragraph.

(e) *List of variety names.* Variety names for the kinds listed include the following: (Names enclosed in parentheses are synonyms. This list does not preclude the use of names not on the list but entitled to be recognized under paragraph (d) of this section).

(1) *Beans (vegetable snapbeans).*

Asgrow Black Valentine (Stringless Black Valentine; Black Valentine Stringless).

2. Section 201.36b *Name of kind and variety; designation as hybrid* is amended to read as follows:

§ 201.36b *Name of kind and variety; designation as hybrid.* (a) The representation of the name of a kind or kind and variety of seed in any advertisement subject to the act shall be confined to the name of the kind or kind and variety determined in accordance with § 201.34. The name shall not have associated therewith words or terms that create a misleading impression as to the history or characteristics of the kind or kind and variety. Descriptive terms and firm names may be used in kind or variety names provided the descriptive terms or firm names are a part of the name or variety of seed; for example, Stringless Green Pod, Detroit Dark Red, Black Seeded Simpson and Henderson Bush Lima. Seed shall not be designated as hybrid seed in any advertisement subject to the act unless it comes within the definition of "hybrid" in § 201.2 (y).

(b) Terms descriptive as to color, shape, size, habit of growth, disease-resistance, or other characteristics of the kind or variety may be associated with the name of the kind or variety provided it is done in a manner which clearly indicates the descriptive term is not a part of the name of the kind or variety; for example, Oshkosh pepper (yellow), Copenhagen Market (round head) cabbage, and Kentucky Wonder pole bean.

(c) Terms descriptive of quality or origin, terms descriptive of the basis for representations made, and terms taken from trade-marks may be associated with the name of the kind or variety of seed provided the terms are clearly identified as being other than part of the name of the kind or variety; for example, Fancy quality redtop, Idaho origin alfalfa, Growers' affidavit of variety Atlas sorgo, and Ox brand Golden Cross corn.

(d) Terms descriptive of the manner or method of production or processing the seed (for example, certified, registered, delinted, scarified, treated, and hulled), may be associated with the name of the kind or variety of seed, providing such terms are not misleading.

(3) In the list in § 201.31 the 4th item is amended to read as follows:

Beans, garden (varieties other than Improved Tendergreen (Resistant Tendergreen), King Green, Logan, Processor, Ranger, Rival, Seminole, Tenderbest, Tenderlong 15, Topcrop, Topmost, Wade, White-seeded Tendergreen, and Woodruff's Hyscore, 75.

and the 5th item is amended to read as follows:

Beans, garden (varieties Improved Tendergreen (Resistant Tendergreen), King Green, Logan, Processor, Ranger, Rival, Seminole, Tenderbest, Tenderlong 15, Topcrop, Topmost, Wade, White-seeded Tendergreen, and Woodruff's Hyscore), 70.

The interpretation on labeling and advertisement as to variety of hybrid seed corn in § 201.300 is superseded by the amendments set forth above.

The amendments shall become effective July 28, 1956.

The amendment of § 201.22 of the regulations proposed by the American Seed Trade Association concerning the period within which germination tests must be made is not adopted. The proposal of said Association to amend § 201.31 of the regulations to lower the germination standards generally for garden beans also is not adopted, but under the amendments set forth above the germination standards are lowered for specified varieties of garden beans.

(Sec. 402, 53 Stat. 1285, 7 U. S. C. 1592)

Done at Washington, D. C., this 22d day of June 1956.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

## Chapter VIII—Commodity Stabilization Service (Sugar), Department of Agriculture

### Subchapter B—Sugar Requirements and Quotas

[Sugar Reg. 811, Amdt. 2]

### PART 811—CONTINENTAL SUGAR REQUIREMENTS AND AREA QUOTAS

*Basis and purpose.* The purpose of Sugar Regulation 811 is to determine, pursuant to section 201 of the Sugar Act of 1948, as amended (hereinafter called the "act"), the amount of sugar needed to meet the requirements of consumers in the continental United States for the calendar year 1956 and to establish, pursuant to sections 202, 204 and 211 of the act, sugar quotas for the supplying areas in terms of short tons of sugar, raw value, equal to the quantity determined by the Secretary of Agriculture to be needed in 1956. This regulation also establishes pursuant to section 207 the quantity of quota that may be filled by direct-consumption sugar and pursuant to section 208, quotas of liquid sugar which may be entered into the continental United States.

Amendments to the act, made by Public Law 545, 84th Congress, 2d Session, and signed by the President May 29, 1956, and effective January 1, 1956, change the procedure for establishing quotas, and authorizes the Secretary to restrict importations of sugar from foreign countries not participating in the International Sugar Agreement as provided in such agreement. The act also requires that the Secretary shall revise the determination of sugar requirements at such times during the calendar year as may be necessary. It now appears that an increase in the estimate of requirements for the calendar year 1956 is necessary. The purpose of this amendment is to make such determination conform to the requirements indicated on the basis of the factors specified in section 201 of the act and to establish quotas in accordance with the provisions of the recently amended act, and to give effect to such quotas.

The quotas established herein differ from those in effect under Sugar Regulation 811, Amendment 1 (21 F. R. 2805). To permit areas for which larger quotas or prorations are hereby established to plan to market in an orderly manner the larger quantity of sugar, it is essential that this amendment be made effective immediately. Therefore, it is hereby determined and found that compliance with the notice, procedure and effective date requirements of the Administrative Procedure Act (60 Stat. 237; 5 U. S. C. 1001), is impracticable, unnecessary and contrary to the public interest. The amendments made herein shall become effective upon publication in the FEDERAL REGISTER.

In view of the extensive changes in this regulation, and for the sake of clarity and convenient reference all sections of the regulation are republished as hereby amended as follows:

Sec.
811.80 Sugar requirements, 1956.
811.81 Basic quotas for domestic areas.
811.82 Basic quotas for other areas.
811.83 [Reserved.]
811.84 Proration of quota for foreign countries other than Cuba and the Republic of the Philippines.
811.85 Direct-consumption portion of quotas or prorations.
811.86 Liquid sugar quotas.
811.87 Restrictions on marketing and shipment.
811.88 Inapplicability of quota regulations.

AUTHORITY: §§ 811.80 to 811.88 issued under sec. 403, 61 Stat. 932, as amended: 7 U. S. C. 1153. Interpret or apply secs. 201, 202, 204, 207, 208, 209, 210, 212 and 411; 61 Stat. 923, 924, 925, 927, 928, as amended, 929; 7 U. S. C. 1112, 1114, 1117, 1118, 1120, 1122; secs. 6, 7, 11, 17 Pub. Law 545, 84th Cong.

§ 811.80 *Sugar requirements, 1956.* The amount of sugar needed to meet the requirements of consumers in the continental United States for the calendar year 1956 is hereby determined to be 8,575,000 short tons, raw value.

§ 811.81 *Basic quotas for domestic areas.* There are hereby established, pursuant to subsection (a) of section 202 of the act, for domestic sugar producing areas for the calendar year 1956 the following quotas:

| Area: | *Quotas in terms of short tons, raw value* |
|---|---|
| Domestic beet sugar | 1,863,731 |
| Mainland cane sugar | 560,019 |
| Hawaii | 1,052,000 |
| Puerto Rico | 1,080,000 |
| Virgin Islands | 12,000 |

§ 811.82 *Basic quotas for other areas.* There are hereby established, pursuant to subsections (b) and (c) of section 202 of the act, for foreign countries for the calendar year 1956, the following quotas:

| Area: | *Quotas in terms of short tons, raw value* |
|---|---|
| Republic of the Philippines | 980,000 |
| Cuba | 2,906,160 |
| Other foreign countries | 121,090 |

§ 811.83 [Reserved.]

§ 811.84 *Proration of quotas for foreign countries other than Cuba and the Republic of the Philippines*—(a) *Prorations.* Pursuant to subsection (c) of section 202 of the act the 1956 quota for foreign countries other than Cuba and the Republic of the Philippines is hereby prorated, as adjusted to the extent required by section 411 of the act, as follows:

| Country: | *Prorations as adjusted short tons, raw value* |
|---|---|
| Dominican Republic | 33,877 |
| El Salvador | 4,141 |
| Haiti | 3,278 |
| Mexico | 14,046 |
| Nicaragua | 7,823 |
| Peru | 51,871 |
| Unspecified countries | 6,054 |
| Total | 121,090 |

(b) *Entries from unspecified countries.* The portion of any quota or deficit prorated for the calendar year 1956 in this section to unspecified countries may be filled by sugar from any country other than those specified in this part but the quantity entered from any unspecified country shall not exceed one per centum of the total quota and deficits for foreign countries other than Cuba and the Republic of the Philippines prorated in this section: *Provided, however,* That pursuant to section 411 of the act total importations of sugar into the United States from unspecified countries not participating in the International Sugar Agreement shall not exceed 2,340 tons, the quantity imported from such countries prior to the effective date of this regulation.

§ 811.85 *Direct-consumption portion of quotas or prorations*—(a) *Domestic areas.* Pursuant to subsections (a), (b) and (c) of section 207 of the act, the quotas established in § 811.81 for the following listed areas may be filled by direct-consumption sugar not in excess of the following amount for each such area:

| Area: | *Direct-consumption sugar short tons, raw value* |
|---|---|
| Hawaii | 29,616 |
| Puerto Rico | 126,033 |
| Virgin Islands | 0 |

(b) *Other areas.* (1) Pursuant to subsections (d), (e) and (h) of section 207 of the act, the quotas established in § 811.82 for the following listed areas may be filled by direct-consumption sugar not in excess of the following amount for each such area:

| Area: | *Direct-consumption sugar short tons, raw value* |
|---|---|
| Republic of the Philippines | 59,920 |
| Cuba | 375,000 |
| Other foreign countries | 41,171 |

(2) Notwithstanding the foregoing limitation, the following listed countries may enter within the limits of the prorations established in § 811.84 a minimum quantity of sugar for direct consumption equal to the quantities listed below for each such country:

| Country: | *Direct-consumption sugar pounds, raw value* |
|---|---|
| Canada | 7,552 |
| Colombia | 857 |
| Costa Rica | 2,168 |
| Dominican Republic | 2,400,558 |
| El Salvador | 4,041,686 |
| Haiti | 376,163 |
| Hong Kong | 42,987 |
| Mexico | 1,287,589 |
| Nicaragua | 9,059,531 |
| Peru | 4,377,617 |
| United Kingdom | 144,490 |

§ 811.86 *Liquid sugar quotas.* There are hereby established, pursuant to section 208 of the act, for foreign countries for the calendar year 1956 quotas for liquid sugar as follows:

| Country: | *Liquid sugar, wine gallons, 72 percent total sugar content* |
|---|---|
| Cuba | 7,970,558 |
| Dominican Republic | 830,894 |
| British West Indies | 300,000 |
| Other foreign countries | 0 |

§ 811.87 *Restrictions on importing, marketing and shipment.* Pursuant to section 209 of the act, all persons are hereby prohibited, during the calendar year 1956 from:

(a) Bringing or importing into the continental United States from the Territory of Hawaii, Puerto Rico, the Virgin Islands, or foreign countries, (1) any sugar or liquid sugar after the applicable quota or the adjusted proration of any such quota, or the limitation imposed upon the entry of sugar within any such proration as provided in § 811.84 (b), has been filled, or (2) any direct-consumption sugar after the direct-consumption portion of any such quota or proration thereof has been filled.

(b) Shipping, transporting, or marketing in interstate commerce, or in competition with sugar or liquid sugar shipped, transported, or marketed in interstate or foreign commerce, any sugar or liquid sugar produced from sugar beets or sugarcane grown in either the domestic beet sugar area or the mainland cane sugar area after the quota for such area has been filled.

§ 811.88 *In applicability of quota regulations.* Pursuant to section 212 of the act, §§ 811.81 to 811.87 shall not apply to (a) the first ten short tons, raw value, or sugar or liquid sugar imported from any foreign country, other than Cuba and the Republic of the Philippines, in the calendar year 1956; (b) the first ten short tons, raw value, of sugar or liquid sugar imported from any foreign country, other than Cuba and the Republic of the Philippines in the calendar year 1956 for religious sacramental, educational, or experimental purposes; (c) liquid sugar imported from any foreign country other than Cuba and the Republic of the Philippines, in individual sealed containers not in excess of one and one-tenth gallons each; or (d) any sugar or liquid sugar imported, brought into, or produced or manufactured in the United States for the distillation of alcohol, or for livestock feed or for the production of livestock feed.

*Statement of bases and considerations.* The Sugar Act of 1948, as amended by Public Law 545, 84th Congress, signed by the President on May 29, 1956, became effective for the purposes of this determination on January 1, 1956. Totals of the sugar quotas for foreign and domestic areas are revised by the amendment when requirements of consumers in the continental United States exceed a total of 8,350,000 tons, raw value, as determined by the Secretary.

Consumers' requirements had been established at 8,450,000 tons on May 1, 1956, 100,000 tons of which is subject to redistribution under the amendment to the act.

Supplies and requirements currently appear to be in fairly good balance in the eastern part of the nation which depends upon foreign and domestic offshore sugar for its supplies. This determination, although increasing the estimate of consumers' requirements by an additional 125,000 tons to a total of 8,575,000 tons, adds only 1,250 tons to the quotas of foreign countries and does not affect the quotas of offshore domestic areas. Accordingly, the determination does not materially affect the availability of sugar to east coast refineries. The order makes available to the domestic beet sugar area and the mainland cane sugar area quota increases as provided in the amendment to the act. The quota for the domestic beet sugar area is increased by 63,731 tons and the quota for the mainland cane sugar area by 60,019 tons.

Effective distribution this year through June 9 appears to be approximately 114,000 tons in excess of that for the corresponding period of last year. Final quotas in 1955 totalled 8,400,000 tons and total distribution during that year approximated the same amount. After consideration of changes in invisible inventories and constructive deliveries, it appears that consumption in 1955 approximated 8,500,000 tons. Sugar distribution through June 9 of this year amounted to 3,573,000 tons, or 183,000 tons in excess of that for the corresponding period of last year, but when allowance is made for constructive deliveries, which supplemented supplies in 1955, deliveries so far this year effectively exceed those in the corresponding period of 1955 by 114,000 tons.

To give effect to the increase in total sugar requirements made effective by this order and to changes in the distribution of quotas in excess of 8,350,000 as required by Public Law 545, amendments have been made to §§ 811.80, 811.81, 811.82, 811.84 and 811.85 of Sugar Regulation 811, pursuant to the respective sections of the act referred to in each of the sections of the regulation. These amendments to the regulation make the following changes: (1) the quotas for domestic areas are increased by 123,750 tons to a total of 4,567,750 tons, with the increase divided 51.5 percent to the Domestic Beet Sugar Area and 48.5 percent to the Mainland Cane Sugar Area; (2) the quotas for foreign countries other than the Republic of the Philippines are increased by 1,250 tons to 3,027,250 tons which is prorated to such foreign countries; (3) the total direct-consumption portion of the quota for foreign countries other than Cuba and the Republic of the Philippines is increased by 17 tons; and (4) the prorations of quotas for foreign countries have been adjusted to carry out the objectives of section 411 of the amended act.

Section 411 authorizes the Secretary to carry out Article 7 of the International Sugar Agreement. That article provides that countries participating in the agreement restrict importation of sugar from countries not participating in the agreement to the level of importations from countries not participating in the agreement, as a group, in any one of the years, 1951, 1952 or 1953. Prorations of quotas established by this order reflect the adjustment, based on total importations in 1953 from countries not participating in the International Sugar Agreement, necessary to carry out the requirements of section 411.

Done at Washington, D. C., this 22d day of June 1956. Witness my hand and the seal of the Department of Agriculture.

[SEAL] TRUE D. MORSE,
*Acting Secretary.*

[F. R. Doc. 56-5072; Filed, June 26, 1956; 8:54 a. m.]

## TITLE 14—CIVIL AVIATION

### Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 4]

PART 610—MINIMUM EN ROUTE IFR ALTITUDES

MISCELLANEOUS AMENDMENTS

The minimum en route IFR altitudes appearing hereinafter have been coordinated with interested members of the industry in the regions concerned insofar as practicable. The altitudes are adopted without delay in order to provide for safety in air commerce. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 610 is amended as follows: (Listed items to be placed in appropriate sequence in the sections indicated.)

Section 610.1001 *Direct routes; U. S.* is amended to read:

From Advance, Mo., LFR; to Little Rock, Ark., LFR; MEA 1,700.

From Advance, Mo., LFR; to Paducah, Ky., LF/RBN; MEA 1,700.

From Albany, Ga., LFR; to Alma, Ga., LFR; MEA 1,600.

From Albany, Ga., LFR; to Cross City, Fla., LFR; MEA 1,400.

From Alexandria, La., LFR; to Monroe, La., LFR; MEA 1,700.

From Alexandria, La., VOR; to Monroe, La., VOR; MEA 1,700.

From Allentown, Pa., LFR or VOR; to North Philadelphia, Pa., LFR; MEA 2,500.

From Allentown, Pa., LFR or VOR; to Wilkes-Barre, Pa., LFR; MEA 3,500.

From Altoona, Pa., LFR; to Selinsgrove, Pa., VOR or LF/RBN; MEA 4,000.

From Amarillo, Tex., LFR; to Roswell, N. Mex., LFR; MEA 5,600.

From Ambrose INT, N. J.; to Newark, N. J., LFR; MEA 1,500.

From Anton Chico, N. Mex., VOR; to Clovis AFB, N. Mex., LF/RBN; MEA 9,500.

From Arcata, Calif., LFR; to Fort Jones INT, Calif.; MEA 6,000.

From Asbury Park, N. J., FM; to Lakehurst, N. J., LFR; MEA 1,500.

From Asbury Park, N. J., FM; to Newark, N. J., LFR; MEA 1,500.

From Asbury Park, N. J., FM; to Point Pleasant INT, N. J. (via 177° crs from Newark LFR); MEA 1,500.

From Asheville, N. C., LF/RBN; to Charlotte, N. C., LFR; MEA 6,500.

## TITLE 15—COMMERCE AND FOREIGN TRADE

### Chapter III—Bureau of Foreign Commerce, Department of Commerce

**Subchapter B—Export Regulations**

[8th Gen. Rev. of Export Regs., Amdt. 1[1]]

PART 370—SCOPE OF EXPORT CONTROL BY DEPARTMENT OF COMMERCE

PART 371—GENERAL LICENSES

PART 372—PROVISIONS FOR INDIVIDUAL AND OTHER VALIDATED LICENSES

PART 373—LICENSING POLICIES AND RELATED SPECIAL PROVISIONS

PART 385—EXPORTATIONS OF TECHNICAL DATA

MISCELLANEOUS AMENDMENTS

1. Part 370, Scope of Export Control by Department of Commerce, is amended by adding thereto a new § 370.9 to read as follows:

§ 370.9 *Shipments which transit a Subgroup A country en route to a non-Subgroup A destination.* The exportation from the United States of commodities which will be unladen from a vessel or aircraft in a Subgroup A country or which will move in-transit through a Subgroup A country en route to a non-

[1] This amendment was published in Current Export Bulletin No. 765, dated June 14, 1956.

Subgroup A destination is hereby prohibited unless a validated license specifically authorizing the transshipment or in-transit shipment, or both, shall have been granted by the Department of Commerce, except:

(a) An exportation made to West Berlin which will transit East Germany (the Soviet Zone of Germany and the Soviet Sector of Berlin), and

(b) An exportation to a non-Subgroup A destination of a non-Positive List commodity which is exportable under a general license directly from the United States to the Subgroup A country of transit or unlading.

NOTE: See § 372.16 with respect to filing applications for validated licenses to export commodities which will be unladen from a vessel or aircraft in a Subgroup A country or which will move in-transit through a Subgroup A country en route to a non-Subgroup A destination.

This part of the amendment shall become effective as of July 16, 1956.

2. Section 371.2 *General provisions*, paragraph (c) *Applicability*, subparagraph (1) *Prohibited shipments* is amended to read as follows:

(1) *Prohibited shipments.* (i) No general license set forth in this subchapter may be used to effect an exportation to a destination for which such general license has been suspended or revoked.

(ii) In addition, except as provided by the provisions of § 370.9, of this subchapter, no general license may be used to effect an exportation which will be unladen from a vessel or aircraft in a Subgroup A country or which will move in-transit through a Subgroup A country en route to a non-Subgroup A destination.

This part of the amendment shall become effective as of July 16, 1956.

3. Section 372.4 *Applications for validated licenses*, paragraph (a) *Who may apply*, subparagraph (2) *Order party* is amended to read as follows:

(2) *Order party.* (i) Where the applicant did not receive the order directly from the foreign purchaser or ultimate consignee named in the application, or through his or their agents abroad, the application must also be signed by the person in the United States who originally received the order (the order party) as well as by the applicant. The "order party" is that person in the United States who conducted the direct negotiations or correspondence with the foreign purchaser or ultimate consignee and who, as a result of these negotiations, received the order from the foreign purchaser or ultimate consignee. The signature of the order party on the application is not required on an application filed by a person acting for the account of a foreign principal where the foreign principal is in fact the exporter, as defined in subparagraph (1) of this paragraph.

(ii) The order party should not be shown as an applicant in the space provided for the applicant on the application form. The license, when issued, will show as licensee only the party shown as applicant on the application form.

This part of the amendment shall become effective as of September 15, 1956.

4. Section 372.5 *How to file an application for a validated license*, paragraph (a) *Form and manner of filing* is amended to read as follows:

(a) *Form and manner of filing.* (1) An application for a validated license must be submitted on Form FC–419[2] (Revised Jan. 1956), Application for Export License accompanied by Form FC–116,[2] Acknowledgment Card. An application is incomplete and will be returned to the applicant unless accompanied by an acknowledgment card with both portions completely and correctly filled out.

(2) All terms, conditions, provisions, and instructions, including the applicant's certification, contained in such form or forms are hereby incorporated as a part of the Export Regulations.

NOTE: 1. *Facsimiles of Form FC–419 (Revised Jan. 1956).* Exporters may print facsimiles of Form FC–419 (Revised Jan. 1956) with printed answers to many of the questions, provided the facsimiles are identical with the official form in size, color of ink, and typographic arrangement.

2. *Preparation of Form FC–419* (Revised Jan. 1956). The following instructions apply to the preparation of applications submitted on Form FC–419 (Revised Jan. 1956), Application for Export License, for all types of validated export licenses issued by the Bureau of Foreign Commerce, except as modified by special licensing procedures and provisions contained in the Export Regulations.

*Item 1.* The date of application must be shown.

*Item 2.* The applicant's reference number may be used for applicant's convenience.

*Item 3.* The country of final (ultimate) destination is to be entered, not a country through which the exportation may travel in transit to its final destination. Exporters are responsible for placing a statement of ultimate destination and prohibition against diversion on Shipper's Export Declaration, bill of lading and commercial invoice for various export shipments. Omission of the statement, or unauthorized diversion of commodities from country of final (ultimate) destination, not in accordance with the statement, are violations of the Export Regulations subject to denial of export privileges and to criminal penalties.

*Item 4.* The person named as ultimate consignee shall be the person abroad who is actually to receive the material for the designated end use. A bank, freight forwarder, forwarding agent, or other intermediary is not acceptable as an ultimate consignee, but should be disclosed as an intermediate consignee.

*Item 5.* An intermediate consignee may be a bank, forwarding agent, or other intermediary in a foreign country who participates as an agent for the exporter or for the purchaser or ultimate consignee for the purpose of effecting delivery of the exportation to the purchaser or ultimate consignee. All known intermediate consignees must be named. If no intermediary is to be used, state "None," if unknown state "Unknown." If no entry is made in this item, the applicant represents that there is no intermediate consignee.

*Item 6.* The name and address of the applicant must be entered.

*Item 7.* The name and address of the person, other than applicant, authorized by the applicant to receive the license, if issued, should be entered.

*Item 8.* If applicant is exporting for the account of a foreign principal, the name and address of the foreign principal must be shown and an explanation of the transaction given in full. If no entry is made in this item, the applicant represents that he is exporting for his own account.

*Item 9.* The person named as purchaser should be the person abroad who has entered into the export transaction with the applicant or Order Party. If such person is the same as the ultimate consignee, applicant should state "Same as Item 4"; if such person is the same as the intermediate consignee, applicant should state "Same as Item 5." If no entry is made in this item, the applicant represents that the ultimate consignee is the foreign purchaser.

*Item 10.* Leave blank if applicant is the producer of the commodities to be exported. Applicant so represents where item is blank. If applicant is not the producer, give supplier's name and address, or state "Unknown," if unknown.

*Item 11 (a).* Give the quantity to be shipped, using units specified in Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States,[3] (unless otherwise specified in the Export Regulations) and also in trade units, where different.

*Item 11 (b).* Commodities must be described in terms which correspond with the commodity descriptions in Schedule B. Additional details as prescribed by the Export Regulations must be furnished to the extent necessary for identification of the specific items so classified. Include characteristics shown on Positive List such as basic ingredients, composition, type, size, gauge, grade, horsepower, etc.

*Item 11 (c).* The Schedule B number, Processing Code, and related commodity group number, if any, must be shown in this column. (Unless the Processing Code is followed by a related commodity group number, a separate application must be filed for each entry on the Positive List of Commodities.)

*Item 11 (d).* Unit price should be shown except where a large variety of products within a single Schedule B classification makes such a breakdown extremely difficult. In such cases only total price need be shown. The applicant must show total price in the customary form of quotation such as f. o. b. (factory), f. a. s. (named port), c. i. f., or other form. The particular form of price quotation must be specified. Where the normal trade practice in a given commodity makes it impracticable to establish a firm contract price, the precise terms upon which the price is to be ascertained and from which the contract price may be objectively determined must be stated on the application. A mere statement by the exporter of "market price, at the time of delivery of shipment" or other such general statement of price, will not be acceptable.

*Item 12.* End use of commodities covered by this application will be an important factor in determining issuance of license. Statement by ultimate consignee (and purchaser, if not same) as to ultimate destination and end use must be submitted for certain exportations as required by the regulations. (Applicant's reference to such statement does not relieve him of responsibility to fully disclose any additional or different information he may know.) Applicant must indicate clearly the end use intended by the ultimate consignee, stating what will be produced or manufactured, or what services will be rendered, and give the country or countries where this will take place. A complete and detailed description is required.

*Item 13.* Enter additional information pertinent to the transaction or required by the Export Regulations such as special certifications, names of parties in interest not disclosed elsewhere, explanation of documents attached, etc.

*Item 14.* Application must be signed by applicant, or by an officer or duly authorized agent of the applicant. (If signed by agent of the applicant, title and firm name of agent must be shown.)

*Item 15.* Where the applicant did not receive the order directly from the foreign purchaser or ultimate consignee named in the application, or through his or their agents abroad, the person in the United States who conducted the direct negotiations with the foreign party and originally received the order (the Order Party) must sign the application and complete this item.

3. *Preparation of Form FC–116.* An Acknowledgment Card, Form FC–116, with both portions completely and correctly filled out, must accompany each license application.

This card must be made out in the name of the applicant, as shown in the item entitled "Applicant's Name and Address" of Form FC–419 (Revised Jan. 1956). Upon receipt of the application, the Bureau of Foreign Commerce will enter on the card the case number assigned to the application and the date of receipt, detaching and returning to the applicant the return portion (applicant's copy).

If the application is submitted by an agent, or if the applicant wishes an agent to receive an Acknowledgment Card, the upper portion only (applicant's copy) of an additional acknowledgment card may be filled out in the name of the agent and submitted with the application.

The date of application, applicant's reference number (if any), country of destination, Schedule B number, and processing code (and related commodity group number, if any) must be the same as the corresponding entries on Form FC–419 (Revised Jan. 1956). Only a brief commodity description is required to be shown on Form FC–116.

This part of the amendment shall become effective as of September 15, 1956.

5. Section 372.5 *How to file an application for a validated license*, Note 1 following paragraph (i) *Second applications* is amended to read as follows:

NOTE 1. *Submission of new application.* When an application has been returned without action to the applicant and is being resubmitted, a new application should ordinarily not be filled out. However, a new application should be submitted where the necessary alterations on the old application would be too difficult to make or would be illegible, or where the old application is on a form other than Form FC–419 (Revised Jan. 1956). When a new application is submitted, the original application must be attached to the new application.

This part of the amendment shall become effective as of September 15, 1956.

6. Part 372, Provisions for Individual and Other Validated Licenses, is amended by adding thereto a new § 372.16 to read as follows:

§ 372.16 *License applications for commodities which transit a Subgroup A country en route to a non-Subgroup A destination.* (a) An application for a license to export a commodity (Positive List or non-Positive List) which will be unladen from a vessel or aircraft in a Subgroup A country or which will move in transit through a Subgroup A country en route to a non-Subgroup A destination (see § 370.9 of this Subchapter) shall be prepared on Form FC–419 (Revised Jan. 1956) in accordance with the instructions contained in § 372.5 and in this section. Where the intermediate consignee in the Subgroup A country of unlading or transit is unknown at the time of filing the license application, the Subgroup A country of unlading or transit shall be shown in the commodity description item of the application form by a statement such as "To be transshipped at (name of transshipment point) and destined to (name of country)."; or, "To be shipped to (name of country of destination) via (name of country)."

(b) Except as set forth below, a validated license issued under the provisions of this section will name the intermediate consignee in the Subgroup A country of unlading or transit approved by Bureau of Foreign Commerce.

(c) Where the license application indicates that the intermediate consignee in the Subgroup A country of unlading or transit is unknown, the license will name the Subgroup A country of unlading or transit approved by the Bureau of Foreign Commerce. However, in accordance with the provisions of § 372.4 (c) (2) (iii), the exporter is obliged to obtain an amendment of the export license before shipment is made in those instances where the license does not include the name of the intermediate consignee in the Subgroup A country of unlading or transit.

This part of the amendment shall become effective as of July 16, 1956.

7. Part 373, Licensing Policies and Related Special Provisions is amended by adding a new § 373.7 to read as follows:

§ 373.7 *Commodities exported for exhibition.* When a person in the United States applies for a license to export a commodity for display at a trade fair or other exhibition, with the intention of returning it to the United States, forwarding it for display at another trade fair or exhibition, or selling it abroad to a yet undetermined purchaser during or after exhibition (as distinguished from instances where it is intended to sell the commodities prior to exhibition or where they will be sold during or after exhibition to a known purchaser abroad), the application for an export license does not require the support of an ultimate consignee statement or import certificate, or other documentation issued by the country of ultimate destination. However, such application shall include the following certification:

These commodities are to be exported for exhibition from ---------- to ----------
(Date) (Date)
at ---------- to be
(Official name of fair or exhibition)
held at ---------- and if they are not
(Location)
returned to the United States at the end of the exhibition they will not be otherwise disposed of without prior authorization of the Bureau of Foreign Commerce.

When it is decided that the exhibited commodities are not to be returned to the United States, the request made to the Bureau of Foreign Commerce for authorization to display the commodities at another fair or exhibition or to otherwise dispose of the commodities shall be made by means of a letter setting forth the proposed disposition, the license number, the BFC Case number, the ultimate destination, the commodity description, the quantity, and the Schedule B number of the commodity, as well as the name, address, and identity of each party to the transaction. In addition, except where the request is for permission to exhibit at another fair or other exhibition, the letter shall be accompanied by all documents required in support of an application for an export license to the proposed destination. The Bureau of Foreign Commerce will validate and issue Form FC–L–58 "Authorization to Dispose of Commodities Shipped to Trade Fairs"[4] for approved requests. If it is subsequently desired to forward the commodities for display at another fair or other exhibition or to make any other use or disposition of the commodities not authorized by the validated Form FC–L–58, an amendment of the form shall be requested by means of a letter to the Bureau of Foreign Commerce containing the same information and documentation as that described above.

This part of the amendment shall become effective as of July 16, 1956.

8. Section 373.32 *Petroleum products*, paragraph (a) *Application requirements*, subparagraph (4) is amended to read as follows:

(4) Applications to export petroleum products, Schedule B. Nos. 501400 through 505900, to Burma, Cambodia, Ceylon, Hong Kong, India, Indonesia, Laos, Macao, British Malaya, Pakistan, Philippines, Singapore, Taiwan (Formosa), Thailand or Viet Nam, shall be accompanied by a statement signed by the ultimate consignee setting forth the information listed below. This requirement does not apply to license applications covering the export of these petroleum products, classified under a single entry on the Positive List, where the total value of the commodity, as shown on the export order, is $100 or less.

(i) The quantity of stock the ultimate consignee has on hand (in units of quantity as shown on the Positive List) as of the time the order was placed for each commodity covered by the application;

(ii) The date such order was placed;

(iii) The quantity of such commodities the ultimate consignee expects to receive from all sources other than the license applicant within 90 days after such order was placed; and

(iv) The monthly rate of consumption, including resale, by the ultimate consignee of the commodities covered by the application.

[2] Form FC–419 and Form FC–116 may be obtained at all Department of Commerce Field Offices and from the Bureau of Foreign Commerce, Department of Commerce, Washington 25, D. C. Filed as part of original document.

[3] For sale by Superintendent of Documents, United States Government Printing Office, Washington 25, D. C., and by all Department of Commerce Field Offices.

[4] Filed as part of original document.

This part of the amendment shall become effective as of June 14, 1956.

9. Section 373.65 *Ultimate consignee and purchaser statements*, paragraph (c) (1) *General* is amended by adding the following at the end of subdivision (iii): "Where the commodity description on the Ultimate Consignee/Purchaser Statement is not readily identifiable with that shown on the license application, the applicant should add an explanatory note in the commodity description column on the license application to make the relationship clear."

10. Section 373.66 *Austria*, paragraph (a) *Austrian import identification number* is amended to read as follows:

(a) *Austrian import identification number.* Each applicant for a license to export commodities to Austria shall show in the commodity description column on the Application for Export License (Form FC–419 Revised Jan. 1956), the Austrian Import Identification Number on which the application is based. These numbers run in series from 1,000 to 399,999 inclusive, and in all instances will be preceded by the letters "IKN".

This part of the amendment shall become effective as of September 15, 1956.

11. Section 385.4 *Exportations to Subgroup A destinations, paragraph* (c) *Completion of application form and acknowledgment card*, subparagraph (1) is amended to read as follows:

(1) Form FC–419 (Revised Jan. 1956) shall be completed as provided in § 372.5 of this subchapter, except that the items for producer, quantity to be shipped, Schedule B number, and price, shall be left blank. The commodity description item shall contain a general statement which specifies the form(s) of the technical data (blueprints, manuals, etc.). In addition, the words "TD License" shall be entered across the top of Form FC–419 immediately above the printed words "United States of America".

This part of the amendment shall become effective as of September 15, 1956.

(Sec. 3, 63 Stat. 7, as amended; 50 U. S. C. App. 2023. E. O. 9630, 10 F. R. 12245, 3 CFR, 1945 Supp., E. O. 9919, 13 F. R. 59, 3 CFR, 1948 Supp.)

*This is the expiration date of a period of suspension held in abeyance. See explanation in paragraph (a) (1) of this section.

(Sec. 3, 63 Stat. 7, as amended; 50 U. S. C. App. 2023. E. O. 9630, 10 F. R. 12245, 3 CFR, 1945 Supp., E. O. 9919, 13 F. R. 59, 3 CFR, 1948 Supp.)

LORING K. MACY,
*Director,*
*Bureau of Foreign Commerce.*

[F. R. Doc. 56–5008; Filed, June 26, 1956; 8:46 a. m.]

[1] This amendment was published in Current Export Bulletin No. 765, dated June 14, 1956.

Schedule B number, the entry to be superseded is identified by a numerical reference in parentheses following the commodity description in the revised entry:

| Dept. of Commerce Schedule B No. | Commodity | Unit | Processing code and related commodity group | GLV dollar-value limits | Validated license required |
|---|---|---|---|---|---|
| 630301 | Aluminum plates and sheets, flat and coiled, special alloys only* (including corrugated) (0.006 inch and over in thickness) (report perforated sheets in 619600) | Lb. | NONF | 100 | RO |
| 630310 | Aluminum bars and rods, rolled (report special alloys bars and rods in 630320; aluminum bus bars in 709495) [1] | Lb. | NONF 12 | 100 | RO |
| 630320 | Aluminum extruded and drawn shapes and tubes, except drawn bars, rods, and wire, special alloys only* [1] | Lb. | NONF 12 | 100 | RO. |
| 630340 | Aluminum castings and forgings, rough and semifinished, special alloys only* [1] | Lb. | NONF | 100 | RO |
| 630610 | Aluminum wire (under 3/16 inch) and cable, bare, except aluminum cable, steel reinforced (ACSR), special alloys only* (specify by name) (report welding rods and wires in 619640) [1] | Lb. | NONF | 100 | RO |
| 630650 | Aluminum semifabricated forms, n. e. c., special alloys only* (specify by name) [1] | Lb. | NONF | 100 | RO |
| 707507 | X-ray diffraction tubes and valves [2] | No. | SATE 1 | None | RO |
| 707509 | Parts, n. e. c., specially fabricated for X-ray diffraction tube blanks in 529350) [1] | | SATE 1 | None | RO |
| 707560 | Air-conditioning and refrigerating equipment, n. e. c., operated by gas, electric, gasoline, and kerosene (report parts, n. e. c. (electric, gas, gasoline, and kerosene operated) [3] | | SATE | None | RO |
| 761010 | Tubular heat exchangers designed to operate at pressures of 300 psi and above or with all flow contact surfaces made of any of the following materials: aluminum, nickel, titanium, zirconium, or alloys containing 10 percent or more chromium or nickel, either separately or combined, and specially fabricated parts thereof (report tubing shipped as spares or replacements under tubular products according to material) [3] | Lb. | GIEQ | 100 | RO |
| 766070 | Industrial process indicating (measuring), recording, controlling instruments, test and specially fabricated parts, n. e. c. [8th Gen. Rev. of Export Regs., Amdt. P. L. 1 [1]]

## PART 399—POSITIVE LIST OF COMMODITIES AND RELATED MATTERS

### MISCELLANEOUS AMENDMENTS

1. Section 399.1 *Appendix A—Positive List of Commodities* is amended in the following particulars:

a. The following commodities are added to the Positive List:

| Dept. of Commerce Schedule B No. | Commodity | Unit | Processing code and related commodity group | GLV dollar-value limits | Validated license required |
|---|---|---|---|---|---|
| 699098 | Synthetic quartz crystals [1] | | RARA 50 | 50 | RO |
| 707507 | X-ray apparatus and parts, n. e. c.: Radiographic or fluoroscopic X-ray tubes and valves, flash discharge type [1] | No. | SATE 1 | None | RO |
| 707509 | Parts, n. e. c., specially fabricated for radiographic X-ray tubes and valves, flash discharge type (specify by name) (report glass tube blanks in 529460) [1] | | SATE 1 | None | RO |
| 707560 | X-ray goniometers and parts: Plastics and plastic materials: Cellulose plastic materials (report manufactured plastic products in 981510 and 981590): Ethyl cellulose in all unfinished forms [2] | | SATE | None | RO |
| 836150 | Research laboratory apparatus and equipment, n. e. c., and specially fabricated parts, n. e. c. (report ultrasonic cleaners and bowl-type centrifuges in 775360): | Lb. | RESN | 100 | RO |
| 910080 | Gas analysis apparatus, laboratory type [1] [2] | No. | SATE | None | RO |
| 910080 | Parts, n. e. c., specially fabricated for gas analysis apparatus, laboratory type [1] | | SATE | 25 | RO |

[1] This commodity is subject to the IC/DV procedure (see § 373.2 of this subchapter), effective July 2, 1956.
[2] This commodity may be exported under the Foreign Distribution licensing procedure (see Part 378 of this subchapter).

This part of the amendment shall become effective as of 12:01 a. m., May 24, 1956.

b. The following commodities are deleted from the Positive List:

| Dept. of Commerce Schedule B No. | Commodity |
|---|---|
| 709495 | Pole line, transmission, and distribution hardware, n. e. c., and specially fabricated parts, n. e. c.: Aluminum bus bars. Chemical and pharmaceutical processing and manufacturing machines, n. e. c., and specially fabricated parts, n. e. c. (report spinning pumps in 719086; report laboratory type gas analysis apparatus in 910080 under Schedule B No. 771140 according to type of furnace, e. g., electric smelting and refining furnaces for the production of chemicals, 707415): |
| 775035 | Equipment for the production or concentration of deuterium oxide.[1] |

[1] Electrolytic cells for the production or concentration or deuterium oxide are retained on the Positive List under the fourth entry for Schedule B No. 775035. Catalytic exchangers for the production or concentration of deuterium oxide are retained on the Positive List, if meeting listed specifications, under Schedule B Nos. 771140 or 771200 (1st entry).

This part of the amendment shall become effective as of 12:01 a. m., May 17, 1956.

c. The revised entries set forth below are substituted for entries presently on the Positive List. Where the Positive List contains more than one entry under a

[1] This amendment was published in Current Export Bulletin No. 764, dated May 17, 1956.

| Dept. of Commerce Schedule B No. | Commodity | Unit | Processing code and related commodity group | GLV dollar-value limits | Validated license required |
|---|---|---|---|---|---|
| 775055 | Electrolytic cells. (4)[22] | ---------- | GIEQ 1 | 250 | RO |
| 775055 | Equipment, n. e. c., for the production of chlorine (gaseous or liquid), sodium, and magnesium. (5)[23] | ---------- | GIEQ 1 | 250 | RO |
| 775055 | Equipment, n. e. c., for the production of hydrogen. (8)[22] | ---------- | GIEQ 1 | 250 | RO |
| 775055 | Towers and columns having any of the following characteristics: (a) Any tower or column using a catalyst; (b) towers or columns utilizing fractionating trays and bubble caps; (c) towers or columns containing alloy steel of 1 percent or more chrome and one-half percent or more molybdenum and/or nickel; and (d) towers or columns designed to operate at pressures of 360 psi or over. (16)[23] | ---------- | GIEQ 1 | 250 | RO |
| | Processing vessels, non-mixing, n. e. c., and specially fabricated accessories and parts, n. e. c. (specify by name): | | | | |
| 775330 | Towers and columns having any of the following characteristics, and specially fabricated parts therefor: (a) Any tower or column using a catalyst, (b) towers or columns utilizing fractionating trays and bubble caps; (c) towers or columns containing alloy steel of 1 percent or more chrome and one-half percent or more molybdenum and/or nickel; and (d) towers or columns designed to operate at pressures of 360 psi or over.[20] | ---------- | GIEQ 1[a] | 250 | RO |
| | Parts for commercial automobiles, trucks, and busses: | | | | |
| 792610 | Parts and accessories, n. e. c., specially fabricated, for assembly, except: air cleaners, ammeters; brake extension handles; bumpers; clearance lights; dashboard plugs; door locks and handles; fog lights; gas tank caps; heaters; horns; hub caps; hydraulic truck dumping hoists; lighters; oil filter clamps; oil filters; oil pressure switches; oil purifiers; oil rectifiers; parking lights; power take-offs for trucks; radiator caps; radiator ornaments; reflex signals, road traffic; shock absorbers; speedometers; spotlights; stop lights; taxicab meters; thermostats; third axle assemblies; tire locks; windshield wipers; and specially fabricated parts for the excepted items (excludes accessories and complete knockdown vehicles; complete knockdown vehicles should be reported in the proper car, truck, or bus classification, whether the integral components are shipped simultaneously or in a series of partial shipments).[19] | ---------- | TRAN 6 | 500 | R |
| 792620 | Parts, n. e. c., specially fabricated, for spares, replacement, or manufacture into larger components (including automobile bodies and knee-action springs, except: air cleaners; brake extension handles; bumpers; door locks and handles; gas tank caps; horns; hub caps; hydraulic truck dumping hoists; oil filter clamps; oil filters; oil purifiers; oil rectifiers; parking lights; radiator caps; radiator ornaments; reflex signals, road traffic; stop lights; thermostats; third axle assemblies; windshield wipers, and specially fabricated parts for the excepted items.[19] | ---------- | TRAN 6 | 500 | R |
| 796148 | Well cars, used and rebuilt, with a load capacity of 80 tons or over.[22] | No. | TRAN 12 | None | R |
| 796182 | Parts and accessories, n. e. c., specially fabricated for well cars with a load capacity of 80 tons or over.[23] | ---------- | TRAN 12 | 1,000 | R |
| 829940 | Radium emanation (Radon), radium salts and compounds, all forms (including radium needles and radium ore concentrate) (state radium content) (report paints containing radium in 843800).[24] | ---------- | DRUG | None | RO |
| 829940 | Radioisotopes, cyclotron-produced or naturally occurring, and compounds and preparations thereof, except radioisotopes having an atomic number 3 through 83, and compounds and preparations thereof.[16][24] | ---------- | DRUG | None | RO |
| 919060 | Spectrophotometers (including, but not limited to, mass and other type spectrometers, and leak detectors, mass spectrometer type). (1) (3)[15] | No. | SATE | None[b] | RO |
| 919060 | Parts, n. e. c., specially fabricated for spectrophotometers (including, but not limited to, mass and other type spectrometers and leak detectors, mass spectrometers type) except glossmeters and reflectometers. (2) (4)[18] | ---------- | SATE | 25 | RO |

[a] For export control purposes, "special alloys" of aluminum are defined as those in which (1) the average copper content is 1 percent or more irrespective of other elements or (2) the average copper content is less than 1 percent and (a) the zinc content is 4 percent or more, or (b) the silicon content is 3.5 percent or more, or (c) the magnesium content is 9.5 percent or more.

[15] The letter "E" is deleted in the column headed "Commodity Lists," indicating that the commodity may no longer be exported under the Periodic Requirements Licensing procedure (see Part 376 of this subchapter), effective June 18, 1956.

[18] The commodity coverage is revised without substantive change.

[20] The commodity coverage has been decreased.

[22] The commodity coverage is increased, effective May 24, 1956.

[23] The commodity coverage is revised by transferring (a) electrolytic cells to the fourth entry presently on the Positive List under Schedule B No. 775055 and (b) tubular condensers or heat exchangers, if meeting listed specifications, to the Positive List entries under Schedule B Nos. 771140 or 771200 (first entry).

[24] Two entries are substituted for the single entry presently on the Positive List under Schedule B No. 829940.

[25] The Positive List entries for mass spectrometers and leak detectors, mass spectrometer type, and specially fabricated parts (919060) are combined with the Positive List entries for spectrophotometers and specially fabricated parts (919060) with no change in commodity coverage.

**This part of the amendment shall become effective as of May 17, 1956, unless otherwise indicated in the footnotes.**

**Shipments of any commodities removed from general license to Country Group R and Country Group O destinations as a result of changes set forth in parts 1a or 1c of this amendment which were on dock for lading, on lighter, laden aboard an exporting carrier, or in transit to a port of exit pursuant to actual orders for export prior to 12:01 a. m., May 24, 1956, may be exported under the previous general license provisions up to and including June 18, 1956. Any such shipment not laden aboard the exporting carrier on or before June 18, 1956 requires a validated license for export.**

2. Section 399.2 *Appendix B—Commodity interpretations* is amended by the addition of a new interpretation to read as follows:

INTERPRETATION 15: OPTICAL CURVE GENERATORS

An optical curve generator as listed on the Positive List of Commodities, Schedule B No. 775030, is defined, for export control purposes, as a machine which produces spherical and/or aspherical curved surfaces on blanks of optical glass or similar material by means of a grinding wheel moving over the surface of a blank in a path of generation governed by cams and linkages which may be preset to produce a predetermined curvature.

The coverage on the Positive List is specifically limited to machines using as a surface shaping medium a grinding wheel which has diamonds or other abrasive material impregnated in its cutting surface. Lens grinders, surfacers, and polishers which produce curved surfaces by utilizing loose abrasives are not covered by the Positive List.

This part of the amendment shall become effective as of May 17, 1956.

(Sec. 3, 63 Stat. 7, as amended; 50 U. S. C. App. 2023. E. O. 9630, 10 F. R. 12245, 3 CFR, 1945 Supp., E. O. 9919, 13 F. R. 59, 3 CFR, 1948 Supp.)

# TITLE 16—COMMERCIAL PRACTICES

## Chapter I—Federal Trade Commission

### Subchapter B—Trade Practice Conference Rules

[File No. 21-464]

### PART 34—NURSERY INDUSTRY

### TRADE PRACTICE RULES

Due proceedings having been held under the trade practice conference procedure in pursuance of the act of Congress approved September 26, 1914, as amended (Federal Trade Commission Act), and other provisions of law administered by the Commission:

*It is now ordered*, That the Group I trade practice rules as hereinafter set forth, which have been approved by the Commission in this proceeding, be promulgated as of June 27, 1956.

*Statement by the Commission.* Trade practice rules for the Nursery Industry, as hereinafter set forth, are promulgated by the Federal Trade Commission under the trade practice conference procedure.

The industry for which these rules are established is composed of persons, firms, corporations, and organizations engaged in the sale, offering for sale, or distribution of all types of trees, small fruit plants, shrubs, vines, ornamentals, herbaceous annuals, biennials and perennials, bulbs, corms, rhizomes, and tubers which are offered for sale or sold to the general public. Included are products propagated sexually or asexually and whether grown in a commercial nursery or collected from the wild state. Such products are customarily used for outdoor planting. Not included are florists' or greenhouse plants solely for inside culture or use and annual vegetable plants. Likewise, gladiolus bulbs and corms are excluded inasmuch as they are covered by trade practice rules promulgated January 17, 1952.

The rules are directed to the maintenance of free and fair competition in the industry and to the prevention and elimination of various practices deemed to be violative of laws administered by the Commission. They are to be applied to such end and to the exclusion of any acts or practices which suppress competition or otherwise restrain trade.

Proceedings under which the rules have been established were instituted pursuant to an industry application. Regional trade practice conferences were held under Commission auspices in Chicago on August 11, 1954, in San Francisco on September 14, 1954, and in New York City on September 28, 1954, at which proposals for rules were submitted for the consideration of the Commission. Thereafter proposed rules were published by the Commission and made available to all industry members and other interested or affected parties upon public notice whereby they were afforded opportunity to present their views, including such pertinent information, suggestions, or amendments as they desired to offer, and to be heard in the premises. Pursuant to such notice, public hearings were held in Washington, D. C., on January 9, 1956, and in Chicago on January 19, 1956, and all matters there presented, or otherwise received in the proceeding, were duly considered by the Commission.

Following such hearings, and upon full consideration of the entire matter, final action was taken by the Commission whereby it approved the rules as hereinafter set forth.

The rules as approved become operative thirty (30) days after the date of promulgation.

*The rules.* These rules promulgated by the Commission are designed to foster and promote the maintenance of fair competitive conditions in the interest of protecting industry, trade, and the public. It is to this end, and to the exclusion of any act or practice which fixes or controls prices through combination or agreement, or which unreasonably restrains trade or suppresses competition, or otherwise unlawfully injures, destroys, or prevents competition, that the rules are to be applied.

GROUP I

*General statement.* The unfair trade practices embraced in the rules herein are considered to be unfair methods of competition, unfair or deceptive acts or practices, or other illegal practices, prohibited under laws administered by the Federal Trade Commission; and appropriate proceedings in the public interest will be taken by the Commission to prevent the use, by any person, partnership, corporation, or other organization subject to its jurisdiction, of such unlawful practices in commerce.

Sec.
34.0 Definitions.
34.1 Deception (general).
34.2 Deception through use of names.
34.3 Substitution of products.
34.4 Size and grade designations.
34.5 Deception as to blooming, fruiting, or growing ability.
34.6 Plants collected from the wild state.
34.7 Misrepresentation as to character of business.
34.8 Deceptive guarantees.
34.9 Deceptive "salesmen wanted" advertisements.
34.10 Misrepresentation with respect to collection of accounts.
34.11 Deception as to origin or source of industry products.
34.12 Exclusive deals.
34.13 Tie-in sales; coercing purchase of one product as a prerequisite to the purchase of other products.
34.14 Deceptive pricing.
34.15 Enticing away employees of competitors.
34.16 Use of the word "free."
34.17 Use of lottery schemes.
34.18 Defamation of competitors or false disparagement of their products.
34.19 Prohibited forms of trade restraints (unlawful price fixing, etc.).
34.20 Prohibited discrimination.
34.21 Aiding or abetting use of unfair trade practices.

AUTHORITY: §§ 34.0 to 34.21 issued under sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45.

§ 34.0 *Definitions*—(a) *Industry products.* As used in this part, the term "industry products" includes all types of trees, small fruit plants, shrubs, vines, ornamentals, herbaceous annuals, biennials and perennials, bulbs, corms, rhizomes, and tubers which are offered for sale or sold to the general public. Included are products propagated sexually or asexually and whether grown in a commercial nursery or collected from the wild state. Such products are customarily used for outdoor planting. Not included are florists' or greenhouse plants solely for inside culture or use and annual vegetable plants. Likewise, gladiolus bulbs and corms are excluded inasmuch as they are covered by trade practice rules promulgated January 17, 1952.

(b) *Industry members.* Any person, firm, corporation, or organization engaged in the sale, offering for sale, or distribution in commerce of industry products, as defined in paragraph (a) of this section.

(c) *Lining-out stock.* Includes all plant material coming from propagating houses, beds, or frames, and young material such as seedlings, rooted or unrooted cuttings, grafts or layers, of suitable size to transplant either in the nursery row or in containers for "growing on."

(d) *Nursery-grown stock.* Plants propagated and grown under cultivation, or plants transplanted from the wild and grown under cultivation for at least one full growing season.

§ 34.1 *Deception (general).* (a) It is an unfair trade practice to sell, offer for sale, or distribute industry products by any method, or under any circumstance or condition, which has the capacity and tendency or effect of deceiving purchasers or prospective purchasers as to quantity, size, grade, kind, species, age, maturity, condition, vigor, hardiness, number of times transplanted, growth ability, growth characteristics, rate of growth or time required before flowering or fruiting, price, origin or place where grown, or in any other material respect.

(b) The inhibitions of this section shall apply to every type of advertisement or method of representation, whether in newspaper, periodical, sales catalog, by radio or television, by sales representatives, or otherwise.

(c) Among practices inhibited by the foregoing are direct or indirect representations:

(1) That plants have been propagated by grafting or bud selection methods, when such is not the fact.

(2) That industry products are healthy, will grow anywhere without the use of fertilizer, or will survive and produce without special care, when such is not the fact.

(3) That plants will bloom the year round, or will bear an extraordinary number of blooms of unusual size or quality, when such is not the fact.

(4) That an industry product is a new variety, when in fact it is a standard variety to which the industry member has given a new name.

(5) That an industry product cannot be purchased through usual retail outlets, or that there are limited stocks available, when such is not the fact.

(6) That industry products offered for sale will be delivered in time for the next (or any specified) seasonal planting when the industry member is aware of factors which make such delivery improbable.

(7) That the appearance of an industry product is normal or usual when the appearance so represented is in fact abnormal or unusual.

(8) That the root system of any plant is appreciably larger than that which actually exists, whether accomplished by means of packaging, balling, or otherwise.

(9) That bulblets are bulbs.

(10) That an industry product is a rare or unusual item when such is not the fact. [Rule 1]

§ 34.2 *Deception through use of names.* (a) In the sale, offering for sale, or distribution of an industry product, it is an unfair trade practice for any industry member to use a name for such product which has the capacity and tendency or effect of deceiving purchasers or prospective purchasers as to its true identity.

(b) When an industry product has a generally recognized and well-established common name, it is proper to use such name as a designation therefor, either alone or in conjunction with the correct botanical name of the product.

(c) When an industry product does not have a generally recognized and well-established common name, and a name other than the correct botanical name of the product is applied thereto, such other name shall be immediately accompanied by either the correct botanical name of the product, or a description of the nature and properties of the product which is of sufficient detail as to prevent confusion and deception of

purchasers and prospective purchasers as to the true identity of the product.

NOTE: *Industry Recommendation:* The industry recommends that in administering this section the Commission give consideration to the use of plant names listed in horticultural works such as Hortus Second, 1941, L. H. Bailey; Manual of Cultivated Plants, Rev. Ed. 1949, L. H. Bailey; Standard Cyclopedia of Horticulture, 2d Ed. 1925 (with reissues), L. H. Bailey; Check List of Native and Naturalized Trees of the United States, U. S. D. A. Agricultural Handbook 41, 1953, E. L. Little; Manual of Cultivated Trees and Shrubs Hardy in North America, 2d Ed. 1940, A. Rehder; Native Woody Plants of the United States, U. S. D. A. Misc. Publication 303, 1938, W. R. Van Dersal; Standardized Plant Names, 2d Ed. American Joint Committee on Horticultural Nomenclature, 1942; and to plant-name listings of well-recognized, nonprofit horticultural societies and organizations, such as the American Rose Society.

[Rule 2]

§ 34.3 *Substitution of products.* With respect to industry products offered for sale by an industry member, it is an unfair trade practice for any member of the industry:

(a) To ship or deliver industry products which do not conform to representations made prior to securing the order, or to specifications upon which the sale is consummated, without advising the purchaser of the substitution and obtaining his consent thereto prior to making shipment or delivery; or

(b) To falsely represent the reason for making a substitution: *Provided, however,* That nothing in this section is intended to inhibit the shipment of products different from those ordered, prior to obtaining the purchaser's consent to such substitution, when the order is received by the industry member near the close of the planting season for the products ordered and the substitution involved relates but to a product or products the total price of which is comparatively small, and when:

(1) At the commencement of the planting season for the products ordered the industry member had a supply of such products sufficient to meet normal and reasonably expected orders therefor, and such supply has been exhausted; and

(2) The products substituted are of similar variety and of equal or greater value to those ordered by the purchaser and no additional charge is made therefor; and

(3) Notice of the substitution, with adequate identification of the substituted item or items, and with commitment of the industry member to refund any purchase price received for the substituted products if such products are not acceptable to the purchaser and to compensate the purchaser for any expense involved in the return of the substituted products if refund is conditioned on the return thereof, is given the purchaser at the time of his receipt of such products;

*And provided, further,* That nothing in this section is to be construed as sanctioning the dissemination of an advertisement of an industry product or products or the personal solicitation of orders therefor unless at the time of such dissemination or solicitation the industry member has a supply of such product or products sufficient to meet normal and reasonably expected orders therefor. [Rule 3]

§ 34.4 *Size and grade designations.* (a) In the sale, offering for sale, or distribution of industry products, it is an unfair trade practice for an industry member to use any term, designation, number, letter, mark or symbol, as a size or grade designation for any industry product in a manner or under any circumstance having the capacity and tendency or effect of deceiving purchasers or prospective purchasers with respect to the actual size or grade of such products.

(b) Under this section industry members offering lining-out stock for sale shall specify conspicuously and accurately the size and age of such stock when failure to do so has the capacity and tendency or effect of deceiving purchasers or prospective purchasers.

(c) Nothing in this section is to be construed as inhibiting the designation of the size or grade of an industry product by use of a size or grade designation for which a standard has been established which is generally recognized in the industry when the identity of such standard is conjunctively disclosed, the product qualifies for the designation under such standard, and no deception of purchasers or prospective purchasers results in the use of such designation.

NOTE: It is the consensus of the industry that the grade and size standard set forth in American Standard For Nursery Stock, as revised April 15, 1951, and in the addendum thereto entitled "Bulbs, Corms and Tubers" (now incorporated in American Standard for Nursery Stock as revised April 15, 1956) is generally recognized in the industry, and that use of the size and grade designations therein set forth, in accordance with the requirements of the standard for the designations, in the marketing of industry products to which such standard relates, will prevent deception and confusion of purchasers and prospective purchasers of such products.

[Rule 4]

§ 34.5 *Deception as to blooming, fruiting, or growing ability.* (a) In the sale, offering for sale, or distribution of industry products, it is an unfair trade practice for any industry member to deceive purchasers or prospective purchasers as to the ability of such products:

(1) To bloom, flower, or fruit within a specified period of time; or

(2) To produce crops within a specified period of time, or to give multiple crops each year, or to produce crops in unfavorable climatic regions; or

(3) To bear fruit through self-pollinization; or

(4) To grow, flourish, and survive irrespective of the climatic conditions, the care exercised in or after planting, or the soil characteristics of the locality in which they are to be planted.

NOTE: Under this section, when flower bulbs are of such immaturity as not reasonably to be expected to bloom and flower the first season of their planting, such fact shall be clearly and conspicuously disclosed in all advertisements and sales promotional literature relating to such products: *Provided, however,* That such disclosure need not be made when sales are confined to nurseries and commercial growers for their use as planting stock.

(b) It is also an unfair trade practice to sell, offer for sale, or distribute industry products which have been used in the commercial greenhouse production of cut flowers (e. g., greenhouse bench or bed-grown rose bushes) without adequately and nondeceptively disclosing that such products were used in the commercial greenhouse production of cut flowers and discarded after having served their usefulness in such production. [Rule 5]

§ 34.6 *Plants collected from the wild state.* It is an unfair trade practice to sell, offer for sale, or distribute industry products collected from the wild state without disclosing that they were collected from the wild state: *Provided, however,* That if collected plants are grown in the nursery row for at least one growing season before being marketed, such disclosure is not required. [Rule 6]

§ 34.7 *Misrepresentation as to character of business.* (a) In the sale, offering for sale, or distribution of industry products, it is an unfair trade practice for any industry member to represent or imply that he is a grower or propagator of such products or any portion thereof, or that he has any other experience or qualification either relating to the growing or propagation of such products or which enables him to be of assistance to purchasers or prospective purchasers in the selection by them of the kinds or types of products or the placement thereof when such is not the fact, or in any other manner to misrepresent the character, nature, or extent of his business.

NOTE: Among practices subject to the inhibitions of this section are representations by an industry member to the effect that he is a landscape architect when his training, experience, and knowledge do not qualify him for such representation.

(b) It is also an unfair trade practice to use the word "guild," "club," "association," "council," "society," "foundation," or any other word of similar import or meaning, as part of a trade name, or otherwise, in such a manner as to indicate that the business is other than a commercial enterprise operated for profit, unless such be true in fact. [Rule 7]

§ 34.8 *Deceptive guarantees.* (a) It is an unfair trade practice to represent, in advertising or otherwise, that a nursery product is "guaranteed" unless the nature and extent of such guarantee is conjunctively disclosed and without deceptively minimizing the terms and conditions relating to the obligations of the guarantor.

(b) It is also an unfair trade practice to use or cause to be used any guarantee in which the obligations of the guarantor are impracticable of fulfillment, or in respect to which the guarantor fails or refuses to observe his liabilities thereunder. [Rule 8]

§ 34.9 *Deceptive "salesmen wanted" advertisements.* In connection with the promotion or the sale of industry products, it is an unfair trade practice for an industry member to use or cause to be used any advertisement which, directly or by implication, is false, misleading, or deceptive concerning:

(a) The salary, commission, income, earnings, or other form of remuneration which agents, canvassers, solicitors, sales representatives, or sales-contact personnel may expect to receive; or

(b) The opportunities to become a local manager, district supervisor, field representative, or to start in an established nursery or landscape business; or

(c) Any form of inducement which leads the prospective salesman to believe he will be employed as anything other than a commission agent. [Rule 9]

§ 34.10 *Misrepresentation with respect to collection of accounts.* It is an unfair trade practice for an industry member to use collection letters, notices, forms, or other communications purporting to emanate from his "legal department," when in fact he does not maintain a legal department for the collection of accounts; or to use the names of fictitious or nonexisting collection agencies, or to represent that collection offices set up by him are independent, bona fide collection agencies, or to use simulated legal forms or other intimidating or threatening methods to induce payment. [Rule 10]

§ 34.11 *Deception as to origin or source of industry products.* (a) It is an unfair trade practice to sell, offer for sale, or advertise an industry product under any representation which has the capacity and tendency or effect of deceiving purchasers or prospective purchasers as to the origin or source of such product (e. g., by use of the term "Holland" to describe bulbs which were grown in the U. S. A.): *Provided, however,* That when a plant has an accepted common name which incorporates a geographical term, the mere use of such common name does not constitute a misrepresentation as to source or origin (e. g., "Colorado Blue Spruce," "Arizona Cypress," "Black Hills Spruce," "California Privet," "Japanese Barberry," etc.).

(b) It is also an unfair trade practice to advertise, sell, or offer for sale an industry product of foreign origin without adequate and nondeceptive disclosure of the name of the foreign country from which it came, where the failure to make such disclosure has the capacity and tendency or effect of deceiving purchasers or prospective purchasers. [Rule 11]

§ 34.12 *Exclusive deals.* It is an unfair trade practice for any member of the industry engaged in commerce,[1] in the course of such commerce, to make a sale or contract for sale of any industry product, for use, consumption, or resale within any place under the jurisdiction of the United States, or fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement, or understanding that the purchaser thereof shall not use or deal in the goods of a competitor or competitors of the seller, where the effect of such sale or contract for sale, or such condition, agreement, or understanding, may be substantially to lessen competition or tend to create a monopoly in any line of commerce. [Rule 12]

§ 34.13 *Tie-in sales; coercing purchase of one product as a prerequisite to the purchase of other products.* The practice of coercing the purchase of one or more products as a prerequisite to the purchase of one or more other products, where the effect may be substantially to lessen competition or tend to create a monopoly or unreasonably to restrain trade, is an unfair trade practice. [Rule 13]

§ 34.14 *Deceptive pricing.* (a) It is an unfair trade practice to represent, in advertising or otherwise, that the price of an industry product has been reduced from a price which, in fact, is a fictitious price; or that the price is a wholesale, introductory, or special price, when it is in fact the regular selling price of the product; or that the regular price of a product is higher than is actually the fact; or otherwise to represent falsely or deceptively the past or current price of an industry product.

(b) It is also an unfair trade practice to make a comparison, in advertising or otherwise, between the price of an industry product offered for sale and the price of a comparable industry product obtainable from competitive sources, unless the comparison is made in the same grade and size of product and in the same general market area, or unless the differences in grade, size, and market area are clearly stated. [Rule 14]

§ 34.15 *Enticing away employees of competitors.* It is an unfair trade practice for any member of the industry wilfully to entice away employees or sales-contact personnel of competitors with the intent and effect of thereby unduly hampering or injuring competitors in their business and destroying or substantially lessening competition: *Provided,* That nothing in this section shall be construed as prohibiting such persons from seeking more favorable employment, or as prohibiting employers from hiring or offering employment to employees of a competitor in good faith and not for the purpose of inflicting injury on such competitor. [Rule 15]

§ 34.16 *Use of the word "free."* In connection with the sale, offering for sale, or distribution of industry products, it is an unfair trade practice to use the word "free," or any other word or words of similar import, in advertisements or in other offers to the public, as descriptive of an article of merchandise, or service, which is not an unconditional gift, under the following circumstances:

(a) When all the conditions, obligations, or other prerequisites to the receipt and retention of the "free" article of merchandise or service offered are not clearly and conspicuously set forth at the outset so as to leave no reasonable probability that the terms of the offer will be misunderstood; and, regardless of such disclosure:

(b) When, with respect to any article of merchandise required to be purchased in order to obtain the "free" article or service, the offerer (1) increases the ordinary and usual price of such article of merchandise, or (2) reduces its quality, or (3) reduces the quantity or size thereof.

NOTE: The disclosure required by paragraph (a) of this section shall appear in close conjunction with the word "free" (or other word or words of similar import) wherever such word first appears in each advertisement or offer. A disclosure in the form of a footnote, to which reference is made by use of an asterisk or other symbol placed next to the word "free," will not be regarded as compliance.

[Rule 16]

§ 34.17 *Use of lottery schemes.* The offering or giving of prizes, premiums, or gifts in connection with the sale or distribution of industry products, or as an inducement thereto, by any method which involves a lottery or scheme of chance, and the sale or distribution of industry products by any method or plan which involves a lottery or scheme of chance, are unfair trade practices. [Rule 17]

§ 34.18 *Defamation of competitors or false disparagement of their products.* It is an unfair trade practice to defame competitors by falsely imputing to them dishonorable conduct, inability to perform contracts, questionable credit standing, or by other false representations, or the false disparagement of competitors' products in any respect, or of their business methods, selling prices, values, credit terms, policies, or services. [Rule 18]

§ 34.19 *Prohibited forms of trade restraints (unlawful price fixing, etc.)*[2] It is an unfair trade practice for any member of the industry, either directly

[1] As used in this section, the word "commerce" means "trade or commerce among the several States and with foreign nations, or between the District of Columbia or any Territory of the United States and any State, Territory, or foreign nation, or between any insular possessions or other places under the jurisdiction of the United States, or between any such possession or place and any State or Territory of the United States or the District of Columbia or any foreign nation, or within the District of Columbia or any Territory or any insular possession or other place under the jurisdiction of the United States."

[2] The inhibitions of this section are subject to Public Law 542, approved July 14, 1952—66 Stat. 632 (the McGuire Act) which provides that with respect to a commodity which bears, or the label or container of which bears, the trade-mark, brand, or name of the producer or distributor of such commodity and which is in free and open competition with commodities of the same general class produced or distributed by others, a seller of such a commodity may enter into a contract or agreement with a buyer thereof which establishes a minimum or stipulated price at which such commodity may be resold by such buyer when such contract or agreement is lawful as applied to intrastate transactions under the laws of the State, Territory, or territorial jurisdiction in which the resale is to be made or to which the commodity is to be transported for such resale, and when such contract or agreement is not between manufacturers, or between wholesalers, or between brokers, or between factors, or between retailers, or between persons, firms, or corporations in competition with each other.

or indirectly, to engage in any planned common course of action, or to enter into or take part in any understanding, agreement, combination, or conspiracy, with one or more members of the industry, or with any other person or persons, to fix or maintain the price of any goods or otherwise unlawfully to restrain trade; or to use any form of threat, intimidation, or coercion to induce any member of the industry or other person or persons to engage in any such planned common course of action, or to become a party to any such understanding, agreement, combination, or conspiracy. [Rule 19]

§ 34.20 *Prohibited discrimination*[1]—(a) *Prohibited discriminatory prices, rebates, refunds, discounts, credits, etc., which effect unlawful price discrimination.* It is an unfair trade practice for any member of the industry engaged in commerce, in the course of such commerce, to grant or allow, secretly or openly, directly or indirectly, any rebate, refund, discount, credit, or other form of price differential, where such rebate, refund, discount, credit, or other form of price differential, effects a discrimination in price between different purchasers of goods of like grade and quality, where either or any of the purchases involved therein are in commerce, and where the effect thereof may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them: *Provided, however:*

(1) That the goods involved in any such transaction are sold for use, consumption, or resale within any place under the jurisdiction of the United States, and are not purchased by schools, colleges, universities, public libraries, churches, hospitals, and charitable institutions not operated for profit, as supplies for their own use;

(2) That nothing contained in this paragraph shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered;

(3) That nothing contained in this section shall prevent persons engaged in selling goods, wares, or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade;

(4) That nothing contained in this paragraph shall prevent price changes from time to time where made in response to changing conditions affecting the market for or the marketability of the goods concerned, such as but not limited to obsolescence of seasonal goods, distress sales under court process, or sales in good faith in discontinuance of business in the goods concerned;

(5) That nothing contained in this section shall prevent the meeting in good faith of an equally low price of a competitor, or the services or facilities furnished by a competitor (see paragraphs (c) and (d) of this section).

(b) *Prohibited brokerage and commissions.* It is an unfair trade practice for any member of the industry engaged in commerce, in the course of such commerce, to pay or grant, or to receive or accept, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, except for services rendered in connection with the sale or purchase of goods, wares, or mechandise, either to the other party to such transaction or to an agent, representative, or other intermediary therein where such intermediary is acting in fact for or in behalf, or is subject to the direct or indirect control, of any party to such transaction other than the person by whom such compensation is so granted or paid.

(c) *Prohibited advertising or promotional allowances, etc.* It is an unfair trade practice for any member of the industry engaged in commerce to pay or contract for the payment of advertising or promotional allowances or any other thing of value to or for the benefit of a customer of such member in the course of such commerce as compensation or in consideration for any services or facilities furnished by or through such customer in connection with the processing, handling, sale, or offering for sale of any products or commodities manufactured, sold, or offered for sale by such member, unless such payment or consideration is available on proportionally equal terms to all other customers competing in the distribution of such products or commodities.

(d) *Prohibited discriminatory services or facilities.* It is an unfair trade practice for any member of the industry engaged in commerce to discriminate in favor of one purchaser against another purchaser or purchasers of a commodity bought for resale, with or without processing, by contracting to furnish or furnishing, or by contributing to the furnishing of, any services or facilities connected with the processing, handling, sale, or offering for sale of such commodity so purchased upon terms not accorded to all competing purchasers on proportionally equal terms.

(e) *Inducing or receiving an illegal discrimination in price.* It is an unfair trade practice for any member of the industry engaged in commerce, in the course of such commerce, knowingly to induce or receive a discrimination in price which is prohibited by the foregoing provisions of this section.

(f) *Purchases by U. S. Government; applicability of Robinson-Patman Anti-discrimination Act to same.* In an opinion submitted to the Secretary of War under date of December 28, 1936, the U. S. Attorney General advised that the Robinson-Patman Antidiscrimination Act "is not applicable to Government contracts for supplies." (38 Opinions, Attorney General 539.) [Rule 20]

§ 34.21 *Aiding or abetting use of unfair trade practices.* It is an unfair trade practice for any person to aid, abet, coerce, or induce another, directly or indirectly, to use or promote the use of any unfair trade practice specified in the rules in this part. [Rule 21]

Promulgated by the Federal Trade Commission June 27, 1956.

Issued: June 22, 1956.

[SEAL] ROBERT M. PARRISH, *Secretary.*

## TITLE 24—HOUSING AND HOUSING CREDIT

### Chapter II — Federal Housing Administration, Housing and Home Finance Agency

MISCELLANEOUS AMENDMENTS TO CHAPTER

Chapter II of Title 24 is amended in the following respects:

#### Subchapter C—Mutual Mortgage Insurance and Servicemen's Mortgage Insurance

PART 222—MUTUAL MORTGAGE INSURANCE; RIGHTS AND OBLIGATIONS OF MORTGAGEE UNDER THE INSURANCE CONTRACT

Section 222.13 (a) (1) (vi) is amended to read as follows:

§ 222.13 *Condition of property when transferred; delivery of debentures and certificate of claim.* (a) • • •

(1) • • •

(vi) Bear interest from the date of issue, payable semiannually on the first day of January and the first day of July of each year at the rate in effect as of the date the commitment was issued, or as of the date the mortgage was endorsed for insurance, whichever rate is the higher. The following interest rates are effective for the dates listed:

| Effective rate (percent) | On or after— | Prior to— |
|---|---|---|
| 2½ | Aug. 9, 1954 | Sept. 1, 1954 |
| 2½ | Sept. 1, 1954 | Jan. 1, 1955 |
| 2⅝ | Jan. 1, 1955 | July 1, 1955 |
| 2⅞ | July 1, 1955 | July 1, 1956 |
| 3 | July 1, 1956 | |

#### Subchapter D—Multifamily and Group Housing Insurance

PART 233—RENTAL HOUSING INSURANCE; RIGHTS AND OBLIGATIONS OF MORTGAGEE

Section 233.9 (a) (1) (vii) is amended to read as follows:

§ 233.9 *Insurance benefits.* (a) • • •

(1) • • •

(vii) Bear interest from the date of issue, payable semiannually on the first day of January and the first day of July of each year at the rate in effect as of the date the commitment was issued, or as of the date the mortgage was endorsed for insurance, whichever rate is the higher. The following interest rates are effective for the dates listed:

| Effective rate (percent) | On or after— | Prior to— |
|---|---|---|
| 2½ | Aug. 13, 1954 | Jan. 1, 1955 |
| 2⅝ | Jan. 1, 1955 | July 1, 1955 |
| 2⅞ | July 1, 1955 | July 1, 1956 |
| 3 | July 1, 1956 | |

#### Subchapter M—Military and Armed Services Housing Mortgage Insurance

PART 293a—ARMED SERVICES HOUSING INSURANCE; RIGHTS AND OBLIGATIONS OF THE MORTGAGEE UNDER THE INSURANCE CONTRACT

Section 293a.9 (a) (1) (vii) is amended to read as follows:

§ 293a.9 *Delivery of debentures and certificate of claim.* (a) • • •

(1) • • •

(vii) Bear interest from the date of issue, payable semiannually on the first day of January and the first day of July of each year at the rate in effect as of the date the commitment was issued, or as of the date the mortgage was endorsed for insurance, whichever rate is the higher. The following interest rates are effective for the dates listed:

| Effective rate (percent) | On or after— | Prior to— |
|---|---|---|
| 2⅝ | July 1, 1955 | July 1, 1956 |
| 3 | July 1, 1956 | |

#### Subchapter N—National Defense Housing Insurance

PART 295—NATIONAL DEFENSE HOUSING INSURANCE; RIGHTS AND OBLIGATIONS OF MORTGAGEE UNDER INSURANCE CONTRACT

Section 295.11 (a) (1) (vi) is amended to read as follows:

§ 295.11 *Condition of property when transferred; delivery of debentures and certificates of claim.* (a) • • •

(1) • • •

(vi) Bear interest from the date of issue, payable semiannually on the first day of January and the first day of July of each year at the rate in effect as of the date the commitment was issued, or as of the date the mortgage was endorsed for insurance, whichever rate is the higher. The following interest rates are effective for the dates listed:

| Effective rate (percent) | On or after— | Prior to— |
|---|---|---|
| 2½ | Sept. 1, 1951 | July 8, 1953 |
| 2¾ | July 8, 1953 | May 29, 1954 |
| 2½ | May 29, 1954 | Jan. 1, 1955 |
| 2⅝ | Jan. 1, 1955 | July 1, 1955 |
| 2⅞ | July 1, 1955 | July 1, 1956 |
| 3 | July 1, 1956 | |

(Sec. 211, 52 Stat. 23 as amended; 12 U. S. C. 1715b. Interpret or apply sec. 207, 52 Stat. 16, as amended, sec. 907, 65 Stat. 301, sec. 401, 69 Stat. 651; 12 U. S. C. 1713, 1750f, 1748f)

Issued at Washington, D. C., June 22, 1956.

NORMAN P. MASON, *Federal Housing Commissioner.*

[F. R. Doc. 56-5063; Filed, June 26, 1956; 8:52 a. m.]

No. 124——4

## TITLE 29—LABOR

### Subtitle A—Office of the Secretary of Labor

[Child Labor Reg. 37]

PART 4—CHILD LABOR REGULATIONS, ORDERS AND STATEMENTS OF INTERPRETATION

SUBPART B—ACCEPTANCE OF STATE CERTIFICATES

DESIGNATION OF STATES

Pursuant to the provisions of 29 CFR Part 4, Subpart A (Child Labor Regulation No. 1), the designation of the States enumerated in § 4.21 of 29 CFR Part 4, as States in which State age, employment or working certificates or permits shall have the same force and effect as Federal certificates of age under the Fair Labor Standards Act of 1938, as amended (52 Stat. 1060 as amended; 29 U. S. C. 201), is hereby extended and shall be effective from July 1, 1956, until June 30, 1957, unless amended or revoked prior to such date.

(Secs. 3, 11, 52 Stat. 1060, as amended, 1066, as amended; 29 U. S. C. 203, 211)

Signed at Washington, D. C., this 18th day of June 1956.

JAMES P. MITCHELL, *Secretary of Labor.*

[F. R. Doc. 56-5044; Filed, June 26, 1956; 8:48 a. m.]

## TITLE 46—SHIPPING

### Chapter I—Coast Guard, Department of the Treasury

#### Subchapter I—Cargo and Miscellaneous Vessels

[CGFR 56-26]

PART 95—FIRE PROTECTION EQUIPMENT

SUBPART 95.05—FIRE DETECTING AND EXTINGUISHING EQUIPMENT, WHERE REQUIRED

FIXED FIRE EXTINGUISHING SYSTEMS

On October 18, 1952, a revision of the inspection regulations to implement and enforce the Convention for the Safety of Life at Sea, 1948, was published in the FEDERAL REGISTER. These revised regulations became effective on November 19, 1952. On vessels of 1,000 gross tons and over contracted for on or after November 19, 1952, or where conversion from coal to oil is contracted for on and after November 19, 1952, the provisions of 46 CFR 95.05-10 (a) (3) require a fixed carbon dioxide, foam or water spray system shall be installed in all spaces containing oil fired boilers, either main or auxiliary, or their fuel units, valves, or manifolds in the line between the settling tanks and the boilers.

In 1953 an interpretation was made of the term "oil fuel units or settling tanks," as used in 46 CFR 95.05-10 (a) (3) and in regulations 50 (i) (iii) and 51 (d) (iii) in Chapter II of the International Convention for Safety of Life at Sea, 1948, as meaning oil fuel boilers, main or auxiliary, fuel oil service pumps, and such fuel oil units as the heaters, strainers, valves, manifolds, or fittings that are subject to the discharge pressures of the fuel oil service pumps. This interpretation is based on correspondence with the British; informal discussions with members of industry, and a study of merchant vessel plans submitted to the Coast Guard. This interpretation is necessary in order to determine the required amount of carbon dioxide to be carried to provide total flooding in the engine room. An appropriate amendment to 46 CFR 95.05-10 (a) (3) was published in the FEDERAL REGISTER dated December 5, 1953.

On August 6, 1954, an amendment to 46 CFR 95.05-10 was published in the FEDERAL REGISTER to remove motorboats from the application of this regulation. When this amendment was published the interpretation of the term "oil fuel units or settling tanks" in the amendment published in the FEDERAL REGISTER on December 5, 1953, was inadvertently omitted. This interpretation has been followed since 1953 and the amendment to 46 CFR 95.05-10 (a) (3) is republished so that it will be continued in effect.

Because the amendment in this document is an interpretation and a restatement of Coast Guard practice, it is hereby found that compliance with the Administrative Procedure Act respecting notice of proposed rule making, public rule making procedures thereon, and effective date requirements thereof, is unnecessary.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), and Treasury Department Order 167-14, dated November 26, 1954 (19 F. R. 8026), to promulgate regulations in accordance with the statutes cited with the regulations below, the following amendment in this document is prescribed and shall become effective on the date of publication of this document in the FEDERAL REGISTER:

Section 95.05-10 (a) (3) is amended to read as follows:

§ 95.05-10 *Fixed fire extinguishing systems.* (a) • • •

(3) On vessels of 1,000 gross tons and over, contracted for on or after November 19, 1952, or where conversion from coal to oil is contracted for on or after November 19, 1952, a fixed carbon dioxide, foam or water spray system shall be installed in all spaces containing oil fired boilers, either main or auxiliary, their fuel oil service, pumps, and/or such fuel oil units as the heaters, strainers, valves, manifolds, etc., that are subject to the discharge pressure of the fuel oil service pump.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4417, 4418, 4426, 4470, 4471, 4477, 4479, and 4483, as amended, secs. 1, 2, 49 Stat. 1544, sec. 17, 54 Stat. 166, sec. 2, 54 Stat. 1028, as amended, sec. 3, 68 Stat. 675; 46 U. S. C. 391, 392, 404, 463, 464, 470, 472, 476, 367, 526p, 463a;

50 U. S. C. 198; E. O. 10402, 17 F. R. 9917; 3 CFR 1952 Supp.)

Dated: June 21, 1956.

[SEAL] J. A. HIRSHFIELD,
*Rear Admiral, U. S. Coast Guard, Acting Commandant.*

[F. R. Doc. 56-5065; Filed, June 26, 1956; 8:52 a. m.]

## TITLE 30—MINERAL RESOURCES

### Chapter II—Geological Survey, Department of the Interior

PART 250—OIL AND GAS AND SULPHUR OPERATIONS IN THE OUTER CONTINENTAL SHELF

ROYALTY AND RENTAL PAYMENTS

Section 250.48 is amended to read as follows:

§ 250.48 *Royalty and rental payments.* The lessee shall pay all rentals when due and shall pay in value or deliver in production all royalties in the amounts determined by the supervisor as due under the terms of the lease. Payments of rentals and royalties in value shall be by check or draft on a solvent bank, or by money order, drawn to the order of the United States Geological Survey.

(Sec. 5, 67 Stat. 464; 43 U. S. C. 1334)

FRED A. SEATON,
*Secretary of the Interior.*

JUNE 21, 1956.

[F. R. Doc. 56-5041; Filed, June 26, 1956; 8:47 a. m.]

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

[FCC 56-581]

[Rules Amdt. 16-8]

PART 16—LAND TRANSPORTATION RADIO SERVICES

MOTOR CARRIERS

In the matter of amendment of §§ 16.251 (a) (4) and 16.252 (e) of the Commission's rules governing the Motor Carrier Radio Service.

1. The Commission has before it its rules governing the Motor Carrier Radio Service. Section 16.251 (a) (4) of the rules governing this Service permits the issuance of authorizations to: Persons solely engaged in providing a common or contract carrier transportation service limited to the local distribution or collection of property destined for or continued in intercity, interstate or international shipment.

2. In connection with an application (File No. LR-K-14281) recently filed by Railway Express Agency, Inc., the Commission has had occasion to consider the above-quoted provision. By virtue of such consideration, the Commission has foreseen a possibility of misinterpretation of the meaning and intent of such provision.

3. In enacting § 16.251 (a) (4), the Commission's purpose was to provide for the radiocommunication needs of persons primarily engaged in providing a common or contract carrier transportation service for the local distribution or collection of property destined for or continued in intercity, interstate or international shipment. The present wording of § 16.251 (a) (4) was designed to permit radiocommunication by the above persons in connection with their local distribution or collection of an intercity—state—national flavor, but not in connection with pickup and delivery activity of a purely local nature. Because of a lack of complete clarity in such wording, however, an interpretation is possible that the Commission intended to totally exclude from eligibility persons who, in even the slightest degree, engage in such local pickup and delivery activity. To preclude this interpretation, the Commission deems it advisable to adopt a clarifying and interpretive amendment to § 16.251 (a) (4) more completely reflecting the considerations above set forth. In connection therewith, and to the same end, the Commission is also amending § 16.252 (e), which describes the frequencies which are available to motor carriers of property who are eligible under the above § 16.251 (a) (4).

4. Authority for the amendments adopted herein is contained in sections 4 (i) and 303 (b), (c), (f) and (r) of the Communications Act of 1934, as amended. Because they are only clarifying and interpretive in nature, publication of notice of proposed rule making is unnecessary and may be dispensed with (section 4 (a), Administrative Procedure Act). For the same reason, they need not be published at least thirty days prior to their effective date (section 4 (c), Administrative Procedure Act), but may be made effective upon their filing with the Division of the Federal Register (section 7, Federal Register Act).

5. In view of the foregoing, *it is ordered*, This 20th day of June 1956:

(a) That §§ 16.251 (a) (4) and 16.252 (e) of the Commission's rules governing the Motor Carrier Radio Service are hereby amended to read as they are set forth below; and

(b) That the amendments adopted herein are hereby made effective on July 2, 1956, by which date they will have been filed with the Division of the Federal Register.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Released: June 22, 1956.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
*Secretary.*

1. Section 16.251 (a) (4) of the Commission's rules governing the Motor Carrier Radio Service is amended to read as follows:

(4) Persons primarily engaged in providing a common or contract carrier transportation service for the local distribution or collection of property which is destined for or continued in intercity, interstate, or international shipment.

2. Section 16.252 (e) of the same rules is amended to read as follows:

(e) Those frequencies listed in paragraph (f) of this section are available to motor carriers of property who are eligible under the provisions of § 16.251 (a) (4), (1) for communications with vehicles when such vehicles are themselves engaged in the local distribution or collection of property which is destined for or continued in intercity, interstate of international shipment; or (2) for communications with vehicles used to supervise, tow, repair or maintain the vehicles referred to in subparagraph (1) of this paragraph.

[F. R. Doc. 56-5078; Filed, June 26, 1956; 8:56 a. m.]

## TITLE 50—WILDLIFE

### Chapter I—Fish and Wildlife Service, Department of the Interior

Subchapter F—Alaska Commercial Fisheries

PART 104—BRISTOL BAY AREA

RED SALMON RUNS; NUSHAGAK AND NAKNEK-KVICHAK DISTRICTS

Basis and purpose: On the basis of advance showing of improvement in the red salmon runs in the Nushagak and Naknek-Kvichak districts of Bristol Bay, it has been determined that some relaxation can be permitted.

Therefore, effective immediately upon publication in the FEDERAL REGISTER:

1. Section 104.5 is amended in paragraph (a) by deleting from the Naknek-Kvichak column the figures 267–381 and 229–266 and substituting in lieu thereof the figures 299–381 and 229–298, respectively, and by deleting from the Nushagak column the figures 267–381 and 229–266 and substituting in lieu thereof the figures 273–381 and 229–272, respectively.

2. In compliance with paragraph (c) of § 104.5, announcement is made that registrations for the week ending June 30, by districts, were as follows: Nushagak, 272; Naknek-Kvichak, 298; Egegik, 113; and Ugashik, 45.

Since immediate action is necessary, notice and public procedure on this amendment are impracticable (60 Stat. 237; 5 U. S. C. 1001 et seq.).

(Sec. 1, 43 Stat. 464, as amended; 48 U. S. C. 221)

JOHN L. FARLEY,
*Director.*

JUNE 26, 1956.

[F. R. Doc. 56-5056; Filed, June 26, 1956; 10:07 a. m.]

### Chapter III—International Regulatory Agencies (Fishing and Whaling)

Subchapter B—International Whaling Commission

PART 351—WHALING

*Basis and purpose.* Section 13 of the Whaling Convention Act of 1949 (64 Stat. 421, 425; 16 U. S. C., 1952 ed., 916k), the legislation implementing the International Convention for the Regulation of Whaling signed at Washington December 2, 1946, by the United States of America and certain other Governments, provides that regulations of the International Whaling Commission shall be submitted for publication in the FEDERAL REGISTER by the Secretary of the Interior. Regulations of the Commission are defined to mean the whaling regulations in the schedule annexed to and constituting a part of the Convention in their original form or as modified, revised, or amended by the Commission. The provisions of the whaling regulations, as originally embodied in the schedule annexed to the Convention, have been amended several times by the International Whaling Commission, the last amendments having been made in July 1955. The whaling regulations, as last amended in July 1955, have been edited to conform the numbering, internal references, and similar items to regulations of the Administrative Committee of the Federal Register but no changes have been made in the substantive provisions. The provisions of these regulations are applicable to nationals and whaling enterprises of the United States.

Amendments to the whaling regulations are adopted by the International Whaling Commission pursuant to Article V of the Convention without regard to the notice and public procedure requirements of the Administrative Procedure Act (5 U. S. C. 1001). Accordingly, in fulfillment of the duty imposed upon the Secretary of the Interior by section 13 of the Whaling Convention Act of 1949, the whaling regulations published as Part 351, Title 50, Code of Federal Regulations, as the same appeared in 20 F. R. 5231, July 21, 1955, are amended and republished to read as follows:

Sec.

351.1 Inspection.
351.2 Killing of gray or right whales prohibited.
351.3 Killing of calves or suckling whales prohibited.
351.4 Operation of factory ships limited.
351.5 Closed area for factory ships in Antarctic.
351.6 Limitations on the taking of humpback whales.
351.7 Closed seasons for pelagic whaling for baleen and sperm whales.
351.8 Catch quota for baleen whales.
351.9 Minimum size limits.
351.10 Closed seasons for land stations.
351.11 Use of factory ships in waters other than south of 40° South Latitude.
351.12 Limitations on processing of whales.
351.13 Prompt processing required.
351.14 Remuneration of employees.
351.15 Submission of laws and regulations.
351.16 Submission of statistical data.
351.17 Factory ship operations within territorial waters.
351.18 Definitions.

AUTHORITY: §§ 351.1 to 351.18 issued under 64 Stat. 421–425; 16 U. S. C. 916–916l.

§ 351.1 *Inspection.* (a) There shall be maintained on each factory ship at least two inspectors of whaling for the purpose of maintaining twenty-four hour inspection. These inspectors shall be appointed and paid by the Government having jurisdiction over the factory ship.

(b) Adequate inspection shall be maintained at each land station. The inspectors serving at each land station shall be appointed and paid by the Government having jurisdiction over the land station.

§ 351.2 *Killing of gray or right whales prohibited.* It is forbidden to take or kill gray whales or right whales, except when the meat and products of such whales are to be used exclusively for local consumption by the aborigines.

§ 351.3 *Killing of calves or suckling whales prohibited.* It is forbidden to take or kill calves or suckling whales or female whales which are accompanied by calves or suckling whales.

§ 351.4 *Operation of factory ships limited.* (a) It is forbidden to kill or attempt to kill blue whales in the North Atlantic Ocean for a period of five years.[1]

(b) It is forbidden to use a whale catcher attached to a factory ship for the purpose of killing or attempting to kill baleen whales in any of the following areas:

(1) In the waters north of 66° North Latitude except that from 150° East Longitude eastwards as far as 140° West Longitude the taking or killing of baleen whales by a factory ship or whale catcher shall be permitted between 66° North Latitude and 72° North Latitude;

(2) In the Atlantic Ocean and its dependent waters north of 40° South Latitude;

(3) In the Pacific Ocean and its dependent waters east of 150° West Longitude between 40° South Latitude and 35° North Latitude;

(4) In the Pacific Ocean and its dependent waters west of 150° West Longitude between 40° South Latitude and 20° North Latitude;

(5) In the Indian Ocean and its dependent waters north of 40° South Latitude.

§ 351.5 *Closed area for factory ships in Antarctic.* It is forbidden to use a whale catcher attached to a factory ship for the purposes of killing or attempting to kill baleen whales in the waters south of 40° South Latitude from 70° West Longitude westward as far as 160° West Longitude. (This article, as the result of the seventh meeting at Moscow, was rendered inoperative for a period of three years from November 8, 1955, after which it will automatically become operative again (November 8, 1958).)

§ 351.6 *Limitations on the taking of humpback whales.* (a) It is forbidden to kill or attempt to kill humpback whales in the North Atlantic Ocean for a period of five years.

(b) It is forbidden to kill or attempt to kill humpback whales in the waters south of 40° South Latitude between 0° Longitude and 70° West Longitude for a period of five years.

(c) It is forbidden to use a whale catcher attached to a factory ship for the purpose of killing or attempting to kill humpback whales in any waters south of 40° South Latitude except on the 1st, 2d, 3d, and 4th February in any year.

§ 351.7 *Closed seasons for pelagic whaling for baleen and sperm whales.* (a) It is forbidden to use a whale catcher attached to a factory ship for the purpose of killing or attempting to kill baleen whales (excluding minke whales) in any waters south of 40° South Latitude, except during the period from January 7 to April 7, following, both days inclusive; and no such whale catcher shall be used for the purpose of killing or attempting to kill blue whales before the 1st February in any year.

(b) It is forbidden to use a whale catcher attached to a factory ship for the purpose of killing or attempting to kill sperm or minke whales, except as permitted by the Contracting Governments in accordance with paragraphs (c), (d) and (e) of this section.

(c) Each Contracting Government shall declare for all factory ships and whale catchers attached thereto under its jurisdiction, one continuous open season not to exceed eight months out of any period of twelve months during which the taking or killing of sperm whales by whale catchers may be permitted; provided that a separate open season may be declared for each factory ship and the whale catchers attached thereto.

(d) Each Contracting Government shall declare for all factory ships and whale catchers attached thereto under its jurisdiction one continuous open season not to exceed six months out of any period of twelve months during which the taking or killing of minke whales by the whale catchers may be permitted; provided that:

(1) A separate open season may be declared for each factory ship and the whale catchers attached thereto;

(2) The open season need not necessarily include the whole or any part of the period declared for other baleen whales pursuant to paragraph (a) of this section.

(e) Each Contracting Government shall declare for all whale catchers under its jurisdiction not operating in conjunction with a factory ship or land station one continuous open season not to exceed six months out of any period of twelve months during which the taking or killing of minke whales by such whale catchers may be permitted.

§ 351.8 *Catch quota for baleen whales.* (a) The number of baleen whales taken during the open season caught in any waters south of 40° South Latitude by whale catchers attached to factory ships under the jurisdiction of the Contracting Governments shall not exceed fifteen thousand blue-whale units in the season 1955–56 and fourteen thousand five hundred blue-whale units thereafter.[2]

[1] This paragraph was objected to within the prescribed period ending November 7, 1954, by the Government of Iceland, and subsequently by that of Denmark. Neither objection was withdrawn and the paragraph came into force on February 24, 1955, but is not binding on Iceland and Denmark. It ceases to operate as from February 24, 1960.

[2] The reduction for the season 1955–56 came into operation as from November 8, 1955, and the further reduction thereafter as from March 7, 1956, but the further reduction is not binding on the Governments of the Netherlands, the United Kingdom, Panama, South Africa, Norway, Japan, U. S. A. and Canada, who lodged objections within the prescribed period.

(b) For the purposes of paragraph (a) of this section, blue-whale units shall be calculated on the basis that one blue whale equals:

(1) Two fin whales or

(2) Two and a half humpback whales or

(3) Six sei whales.

(c) Notification shall be given in accordance with the provision of Article VII of the Convention, within two days after the end of each calendar week, of data on the number of blue-whale units taken in any waters south of 40° South Latitude by all whale catchers attached to factory ships under the jurisdiction of each Contracting Government: *Provided*, That when the number of blue-whale units is deemed by the Bureau of International Whaling Statistics to have reached 13,500 in the season 1955–56 and 13,000 thereafter,[2] notification shall be given as aforesaid at the end of each day of data on the number of blue-whale units taken.

(d) If it appears that the maximum catch of whales permitted by paragraph (a) of this section may be reached before April 7 of any year, the Bureau of International Whaling Statistics shall determine, on the basis of the data provided, the date on which the maximum catch of whales shall be deemed to have been reached and shall notify the master of each factory ship and each Contracting Government of that date not less than four days in advance thereof. The killing or attempting to kill baleen whales by whale catchers attached to factory ships shall be illegal in any waters south of 40° South Latitude after midnight of the date so determined.

(e) Notification shall be given in accordance with the provisions of Article VII of the Convention of each factory ship intending to engage in whaling operations in any waters south of 40° South Latitude.

§ 351.9 *Minimum size limits.* (a) It is forbidden to take or kill any blue, sei or humpback whales below the following lengths:

Blue whales 70 feet (21.3 metres),
Sei whales 40 feet (12.2 metres),
Humpback whales 35 feet (10.7 metres),

except that blue whales of not less than 65 feet (19.8 metres) and sei whales of not less than 35 feet (10.7 metres) in length may be taken for delivery to land stations, provided that the meat of such whales is to be used for local consumption as human or animal food.

(b) It is forbidden to take or kill any fin whales below 57 feet (17.4 metres) in length for delivery to factory ships or land stations in the Southern Hemisphere, and it is forbidden to take or kill fin whales below 55 feet (16.8 metres) for delivery to factory ships or land stations in the Northern Hemisphere; except that fin whales of not less than 55 feet (16.8 metres) may be taken for delivery to land stations in the Southern Hemisphere and fin whales of not less than 50 feet (15.2 metres) may be taken for delivery to land stations in the Northern Hemisphere provided in each case that the meat of such whales is to be used for local consumption as human or animal food.

(c) It is forbidden to take or kill any sperm whales below 38 feet (11.6 metres) in length, except that sperm whales of not less than 35 feet (10.7 metres) in length may be taken for delivery to land stations.

(d) Whales must be measured when at rest on deck or platform, as accurately as possible by means of a steel tape measure fitted at the zero end with a spiked handle which can be stuck into the deck planking abreast of one end of the whale. The tape measure shall be stretched in a straight line parallel with the whale's body and read abreast the other end of the whale. The ends of the whale, for measurement purposes, shall be the point of the upper jaw and the notch between the tail flukes. Measurements, after being accurately read on the tape measure, shall be logged to the nearest foot, that is to say, any whale between 75 feet 6 inches and 76 feet 6 inches shall be logged as 76 feet, and any whale between 76 feet 6 inches and 77 feet 6 inches shall be logged as 77 feet. The measurement of any whale which falls on an exact half foot shall be logged at the next half foot, e. g. 76 feet 6 inches precisely shall be logged as 77 feet.

§ 351.10 *Closed seasons for land stations.* (a) It is forbidden to use a whale catcher attached to a land station for the purpose of killing or attempting to kill baleen and sperm whales except as permitted by the Contracting Government in accordance with paragraphs (b), (c), and (d) of this section.

(b) Each Contracting Government shall declare for all land stations under its jurisdiction, and whale catchers attached to such land stations, one open season during which the taking or killing of baleen (excluding minke) whales by the whale catchers shall be permitted. Such open season shall be for a period of not more than six consecutive months in any period of twelve months and shall apply to all landstations under the jurisdiction of the Contracting Government; provided that a separate open season may be declared for any land station used for the taking or treating of baleen (excluding minke) whales which is more than 1,000 miles from the nearest land station used for the taking or treating of baleen (excluding minke) whales under the jurisdiction of the same Contracting Government.

(c) Each Contracting Government[3] shall declare for all land stations under its jurisdiction and for whale catchers attached to such land stations, one open season not to exceed eight continuous months in any one period of twelve months, during which the taking or killing of sperm whales by the whale catchers shall be permitted, such period of eight months to include the whole of the period of six months declared for baleen whales (excluding minke whales) as provided for in paragraph (b) of this section; provided that a separate open season may be declared for any land station used for the taking or treating of sperm whales which is more than 1,000 miles from the nearest land station used for the taking or treating of sperm whales under the jurisdiction of the same Contracting Government.

(d) (1) Each Contracting Government shall declare for all land stations under its jurisdiction and for whale catchers attached to such land stations one open season not to exceed six continuous months in any period of twelve months during which the taking or killing of minke whales by the whale catchers shall be permitted (such period not being necessarily concurrent with the period declared for other baleen whales, as provided for in paragraph (b) of this section); provided that a separate open season may be declared for any land station used for the taking or treating of minke whales which is more than 1,000 miles from the nearest land station used for the taking or treating of minke whales under the jurisdiction of the same Contracting Government.

(2) Except that a separate open season may be declared for any land station used for the taking or treating of minke whales which is located in an area having oceanographic conditions clearly distinguishable from those of the area in which are located the other land stations used for the taking or treating of minke whales under the jurisdiction of the same Contracting Government; but the declaration of a separate open season by virtue of the provisions of this paragraph shall not cause thereby the period of time covering the open seasons declared by the same Contracting Government to exceed nine continuous months of any twelve months.

(e) The prohibitions contained in this section shall apply to all land stations as defined in Article II of the Whaling Convention of 1946 and to all factory ships which are subject to the regulations governing the operation of land stations under the provisions of § 351.17.

§ 351.11 *Use of factory ships in waters other than south of 40° South Latitude.* It is forbidden to use a factory ship which has been used during a season in any waters south of 40° South Latitude for the purpose of treating baleen whales, in any other area for the same purpose within a period of one year from termination of that season.

§ 351.12 *Limitations of processing of whales.* (a) It is forbidden to use a factory ship or a land station for the purpose of treating any whales (whether or not killed by whale catchers under the jurisdiction of a Contracting Government) the killing of which by whale catchers under the jurisdiction of a Contracting Government is prohibited by the provisions of §§ 351.2, 351.4, 351.5, 351.6, 351.7, 351.8 or 351.10.

(b) All other whales (except minke whales) taken shall be delivered to the factory ship or land station and all parts of such whales shall be processed by boiling or otherwise, except the internal organs, whale bone and flippers of all whales, the meat of sperm whales and of parts of whales intended for human food or feeding animals.

(c) Complete treatment of the carcasses of "Dauhval" and of whales used as fenders will not be required in cases where the meat or bone of such whales is in bad condition.

§ 351.13 *Prompt processing required.* (a) The taking of whales for delivery to a factory ship shall be so regulated or restricted by the master or person in charge of the factory ship that no whale carcass (except of a whale used as a fender, which shall be processed as soon as is reasonably practicable) shall remain in the sea for a longer period than thirty-three hours from the time of killing to the time when it is hauled up for treatment.

(b) Whales taken by all whale catchers, whether for factory ships or land stations, shall be clearly marked so as to identify the catcher and to indicate the order of catching.

(c) All whale catchers operating in conjunction with a factory ship shall report by radio to the factory ship:

(1) The time when each whale is taken,

(2) Its species, and

(3) Its marking effected pursuant to paragraph (b) of this section.

(d) The information reported by radio pursuant to paragraph (c) of this section shall be entered immediately in a permanent record which shall be available at all times for examination by the whaling inspectors; and in addition there shall be entered in such permanent record the following information as soon as it becomes available:

(1) Time of hauling up for treatment,

(2) Length, measured pursuant to paragraph (d) of § 351.9,

(3) Sex,

(4) If female, whether milk-filled or lactating,

(5) Length and sex of foetus, if present and

(6) A full explanation of each infraction.

(e) A record similar to that described in paragraph (d) of this section shall be maintained by land stations, and all of the information mentioned in the said paragraph shall be entered therein as soon as available.

§ 351.14 *Remuneration of employees.* Gunners and crews of factory ships, land stations, and whale catchers, shall be engaged on such terms that their remuneration shall depend to a considerable extent upon such factors as the species, size and yield of whales taken and not merely upon the number of the whales taken. No bonus or other remuneration shall be paid to the gunners or crews of whale catchers in respect to the taking of milk-filled or lactating whales.

§ 351.15 *Submission of laws and regulations.* Copies of all official laws and regulations relating to whales and whaling and changes in such laws and regulations shall be transmitted to the Commission.

§ 351.16 *Submission of statistical data.* Notification shall be given in accordance with the provisions of Article VII of the Convention with regard to all factory ships and land stations of statistical information (a) concerning the number of whales of each species taken, the number thereof lost, and the number treated at each factory ship or land station, and (b) as to the aggregate amounts of oil of each grade and quantities of meal, fertilizer (guano), and other products derived from them, together with (c) particulars with respect to each whale treated in the factory ship or land station as to the date and approximate latitude and longitude of taking, the species and sex of the whale, its length and, if it contains a foetus, the length and sex, if ascertainable, of the foetus. The data referred to in paragraphs (a) and (c) of this section shall be verified at the time of the tally and there shall also be notification to the Commission of any information which may be collected or obtained concerning the calving grounds and migration routes of whales. In communicating this information there shall be specified:

(a) The name and gross tonnage of each factory ship;

(b) The number and aggregate gross tonnage of the whale catchers;

(c) A list of the land stations which were in operation during the period concerned.

§ 351.17 *Factory ship operations within territorial waters.*[4] (a) A factory ship which operates solely within territorial waters in one of the areas specified in paragraph (c) of this section, by permission of the Government having jurisdiction over those waters, and which flies the flag of that Government shall, while so operating, be subject to the regulations governing the operation of land stations and not to the regulations governing the operation of factory ships.

(b) Such factory ship shall not, within a period of one year from the termination of the season in which she so operated, be used for the purpose of treating baleen whales in any of the other areas specified in paragraph (c) of this section or south of 40° South Latitude.

(c) The areas refered to in paragraphs (a) and (b) of this section are:

(1) On the coast of Madagascar and its dependencies;

(2) On the west coasts of French Africa;

(3) On the coasts of Australia, namely on the whole east coast and on the west coast in the area known as Shark Bay and northward to North-west Cape and including Exmouth Gulf and King George's Sound, including the Port of Albany.

§ 351.18 *Definitions.* The following expressions have the meanings respectively assigned to them, that is to say:

"Baleen whale" means any whale which has baleen or whale bone in the mouth, i. e., any whale other than a toothed whale.

"Blue whale" (Balaenoptera or Sibbaldus musculus) means any whale known by the name of blue whale, Sibbald's rorqual, or sulphur bottom.

"Dauhval" means any unclaimed dead whale found floating.

"Fin whale" (Balaenoptera physalus) means any whale known by the name of common finback, common rorqual, finback, finner, fin whale, herring whale, razorback or true fin whale.

"Gray whale" (Rhachianectes glaucus) means any whale known by the name of gray whale, California gray, devil fish, hard head, mussel digger, gray back or rip sack.

"Humpback whale" (Megaptera nodosa or novaeangliae) means any whale known by the name of bunch, humpback, humpback whale, humpbacked whale, hump whale or hunchbacked whale.

"Minke whale" (Balaenoptera acutorostrata, B. Davidsoni, B. huttoni) means any whale known by the name of lesser rorqual, little piked whale, minke whale, pike-headed whale or sharp headed finner.

"Right whale" (Balaena mysticetus; Eubalaena glacialis, E. australis, etc; Neobalaena marginata) means any whale known by the name of Atlantic right whale, Artic right whale, Biscayan right whale, bowhead, great polar whale, Greenland right whale, Greenland whale, Nordkaper, North Atlantic right whale, North Cape whale, Pacific right whale, pigmy right whale, Southern pigmy right whale, or Southern right whale.

"Sei whale" (Balaenoptera borealis) means any whale known by the name of sei whale, Rudolphi's rorqual, pollack whale, or coalfish whale and shall be taken to include Bryde's whale (B. brydei).

"Sperm whale" (Physeter catodon) means any whale known by the name of sperm whale, spermacet whale, cachalot or pot whale.

"Toothed whale" means any whale which has teeth in the jaws.

"Whales taken" means whales that have been killed and either flagged or made fast to catchers.

FRED A. SEATON,
*Secretary of the Interior.*

JUNE 20, 1956.

[F. R. Doc. 56-5042; Filed, June 26, 1956; 8:48 a. m.]

[2] The reduction for the season 1955–56 came into operation as from November 8, 1955, and the further reduction thereafter as from March 7, 1956, but the further reduction is not binding on the Governments of the Netherlands, the United Kingdom, Panama, South Africa, Norway, Japan, U. S. A. and Canada, who lodged objections within the prescribed period.

[3] Section 351.10 (c) came into force as from February 21, 1952, in respect to all Contracting Governments, except the Commonwealth of Australia, who lodged an objection to it within the prescribed period, and this objection was not withdrawn. The provisions of this paragraph are not therefore binding on the Commonwealth of Australia.

[4] Section 351.17 was inserted by the Commission at its first meeting in 1949, and came into force on 11th January, 1950, as regards all Contracting Governments except France, who therefore remain bound by the provisions of the original § 351.17, which reads as follows:

§ 351.17 Notwithstanding the definition of land station contained in Article II of the Convention, a factory ship operating under the jurisdiction of a Contracting Government, and the movements of which are confined solely to the territorial waters of that Government, shall be subject to the regulations governing the operation of land stations within the following areas:

(a) On the coast of Madagascar and its dependencies, and on the west coasts of French Africa;

(b) On the west coast of Australia in the area known as Shark Bay and northward to Northwest Cape and including Exmouth Gulf and King George's Sound, including the port of Albany; and on the east coast of Australia, in Twofold Bay and Jervis Bay.

# PROPOSED RULE MAKING

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

### [ 26 CFR (1954) Part 1 ]

INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

INCOME IN RESPECT OF DECEDENTS

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing, in duplicate, to the Commissioner of Internal Revenue, Attention: T:P, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in sections 691 (d) and 7805 of the Internal Revenue Code of 1954 (68A Stat. 237 and 917; 26 U. S. C. 691 (d) and 7805).

[SEAL] O. GORDON DELK,
*Acting Commissioner of Internal Revenue.*

The following regulations, relating to income in respect of decedents, are hereby prescribed under sections 691 and 692 of the Internal Revenue Code of 1954, and are effective for taxable years beginning after December 31, 1953, and ending after August 16, 1954:

INCOME IN RESPECT OF DECEDENTS.

Sec.
1.691–1 Scope of section 691.
1.691 (a) Statutory provisions; recipients of income in respect of decedents; inclusion in gross income.
1.691 (a)–1 Income in respect of a decedent.
1.691 (a)–2 Inclusion in gross income by recipients.
1:691 (a)–3 Character of gross income.
1:691 (a)–4 Transfer of right to income in respect of a decedent.
1.691 (a)–5 Installment obligations acquired from decedent.
1.691 (b) Statutory provisions; recipients of income in respect of dedecedents; allowance of deductions and credit.
1.691 (b)–1 Allowance of deductions and credit in respect of decedents.
1.691 (c) Statutory provisions; recipients of income in respect of decedents; deduction for estate tax.
1.691 (c)–1 Deduction for estate tax attributable to income in respect of a decedent.
1.691 (c)–2 Estates and trusts.
1.691 (d) Statutory provisions; recipients of income in respect of decedents; amounts received by surviving annuitant under joint and survivor annuity contract.
1.691 (d)–1 Amounts received by surviving annuitant under joint and survivor annuity contract.
1.691 (e) Statutory provisions; recipients of income in respect of decedents; cross reference.
1.691 (e)–1 Cross reference.
1.692 Statutory provisions; income taxes on members of Armed Forces on death.
1.692–1 Abatement of income taxes of certain members of the Armed Forces of the United States upon death.

INCOME IN RESPECT OF DECEDENTS

§ 1.691–1 *Scope of section 691.* In general, the regulations under section 691 cover: (a) The provisions requiring that amounts which are not includible in gross income for the decedent's last taxable year or for a prior taxable year be included in the gross income of the estate or persons receiving such income to the extent that such amounts constitute "income in respect of a decedent"; (b) the taxable effect of a transfer of the right to such income; (c) the treatment of certain deductions and credit in respect of a decedent which are not allowable to the decedent for the taxable period ending with his death or for a prior taxable year; (d) the allowance to a recipient of income in respect of a decedent of a deduction for estate taxes attributable to the inclusion of the value of the right to such income in the decedent's estate; and (e) special provisions with respect to installment obligations acquired from a decedent and with respect to the allowance of a deduction for estates taxes to a surviving annuitant under a joint and survivor annuity contract.

§ 1.691 (a) *Statutory provisions; recipients of income in respect of decedents; inclusion in gross income.*

SEC. 691. *Recipients of income in respect of decedents*—(a) *Inclusion in gross income*—(1) *General rule.* The amount of all items of gross income in respect of a decedent which are not properly includible in respect of the taxable period in which falls the date of his death or a prior period (including the amount of all items of gross income in respect of a prior decedent, if the right to receive such amount was acquired by reason of the death of the prior decedent or by bequest, devise, or inheritance from the prior decedent) shall be included in the gross income, for the taxable year when received, of:

(A) The estate of the decedent, if the right to receive the amount is acquired by the decedent's estate from the decedent;

(B) The person who, by reason of the death of the decedent, acquires the right to receive the amount, if the right to receive the amount is not acquired by the decedent's estate from the decedent; or

(C) The person who acquires from the decedent the right to receive the amount by bequest, devise, or inheritance, if the amount is received after a distribution by the decedent's estate of such right.

(2) *Income in case of sale, etc.* If a right, described in paragraph (1), to receive an amount is transferred by the estate of the decedent or a person who received such right by reason of the death of the decedent or by bequest, devise, or inheritance from the decedent, there shall be included in the gross income of the estate or such person, as the case may be, for the taxable period in which the transfer occurs, the fair market value of such right at the time of such transfer plus the amount by which any consideration for the transfer exceeds such fair market value. For purposes of this paragraph, the term "transfer" includes sale, exchange, or other disposition, or the satisfaction of an installment obligation at other than face value, but does not include transmission at death to the estate of the decedent or a transfer to a person pursuant to the right of such person to receive such amount by reason of the death of the decedent or by bequest, devise, or inheritance from the decedent.

(3) *Character of income determined by reference to decedent.* The right, described in paragraph (1), to receive an amount shall be treated, in the hands of the estate of the decedent or any person who acquired such right by reason of the death of the decedent, or by bequest, devise, or inheritance from the decedent, as if it had been acquired by the estate or such person in the transaction in which the right to receive the income was originally derived and the amount includible in gross income under paragraph (1) or (2) shall be considered in the hands of the estate or such person to have the character which it would have had in the hands of the decedent if the decedent had lived and received such amount.

(4) *Installment obligations acquired from decedent.* In the case of an installment obligation received by a decedent on the sale or other disposition of property, the income from which was properly reportable by the decedent on the installment basis under section 453, if such obligation is acquired by the decedent's estate from the decedent or by any person by reason of the death of the decedent or by bequest, devise, or inheritance from the decedent—

(A) An amount equal to the excess of the face amount of such obligation over the basis of the obligation in the hands of the decedent (determined under section 453 (d)) shall, for the purpose of paragraph (1), be considered as an item of gross income in respect of the decedent; and

(B) Such obligation shall, for purposes of paragraphs (2) and (3), be considered a right to receive an item of gross income in respect of the decedent, but the amount includible in gross income under paragraph (2) shall be reduced by an amount equal to the basis of the obligation in the hands of the decedent (determined under section 453 (d)).

§ 1.691 (a)–1 *Income in respect of a decedent*—(a) *General definition.* In general, the term "income in respect of a decedent" refers to those amounts to which a decedent was entitled as gross income but which were not includible in computing his taxable income for the taxable year ending with the date of his death or for a previous taxable year because of the method of accounting employed by the decedent. See the regulations under section 451. Thus, the term includes:

(1) All accrued income of a decedent who reported his income by use of the cash receipts and disbursements method;

(2) Income accrued solely by reason of the decedent's death in case of a decedent who reports his income by use of the accrual method of accounting; and

(3) Income to which the decedent had a contingent claim at the time of his death.

See sections 736 and 753 and the regulations thereunder for "income in respect of a decedent" in the case of a deceased partner.

(b) *Prior decedent.* The term "income in respect of a decedent" also includes the amount of all items of gross income in respect of a prior decedent, if (1) the right to receive such amount was acquired by the decedent by reason of the death of the prior decedent or by bequest, devise, or inheritance from the prior decedent and if (2) the amount of gross income in respect of the prior decedent was not properly includible in computing the decedent's taxable income for the taxable year ending with the date of his death or for a previous taxable year. See example (2) of § 1.691 (a)–2 (b).

(c) *Items excluded from gross income.* Section 691 only applies to the amount of items of gross income in respect of a decedent, and items which are excluded from gross income under subtitle A are not within the provisions of section 691.

(d) *Cross reference.* For items deemed income in respect of a decedent for purposes of the deduction for estate taxes provided by section 691 (c), see § 1.691 (c)–1 (c).

§ 1.691 (a)–2 *Inclusion in gross income by recipients.* (a) Under section 691 (a) (1), income in respect of a decedent shall be included in the gross income, for the taxable year when received, of:

(1) The estate of the decedent, if the right to receive the amount is acquired by the decedent's estate from the decedent;

(2) The person who, by reason of the death of the decedent, acquires the right to receive the amount, if the right to receive the amount is not acquired by the decedent's estate from the decedent; or

(3) The person who acquires from the decedent the right to receive the amount by bequest, devise, or inheritance, if the amount is received after a distribution by the decedent's estate of such right.

These amounts are included in the income of the estate or of such persons when received by them whether or not they report income by use of the cash receipts and disbursements method.

(b) The application of paragraph (a) of this section may be illustrated by the following examples:

*Example (1).* The decedent, who kept his books by use of the cash receipts and disbursements method, was entitled at the date of his death to a large salary payment to be made in equal annual installments over five years. His estate, after collecting two installments, distributed the right to the remaining installment payments to the residuary legatee of the estate. The estate must include in its gross income the two installments received by it, and the legatee must include in his gross income each of the three installments received by him.

*Example (2).* A widow acquired, by bequest from her husband, the right to receive renewal commissions on life insurance sold by him in his lifetime, which commissions were payable over a period of years. The widow died before having received all of such commissions, and her son inherited the right to receive the rest of the commissions. The commissions received by the widow were includible in her gross income. The commissions received by the son were not includible in the widow's gross income but must be included in the gross income of the son.

*Example (3).* The decedent owned a defense bond, with his wife as co-owner or beneficiary, but died before the payment of such bond. The entire amount of interest accruing on the bond and not includible in income by the decedent, not just the amount accruing after the death of the decedent, would be treated as income to his wife when the bond is paid.

*Example (4).* A, prior to his death, acquired 10,000 shares of the capital stock of the X Corporation at a cost of $100 per share. During his lifetime, A had entered into a contract with X Corporation or with other shareholders whereby X Corporation or other shareholders agreed to purchase and the decedent agreed that his executor would sell the 10,000 shares of X Corporation stock owned by him at the book value of the stock at the date of A's death. Upon A's death, the shares are sold by A's executor for $500 a share pursuant to the agreement. Since the sale of stock is consummated after A's death, there is no income in respect of a decedent with respect to the appreciation in value of A's stock to the date of his death.

§ 1.691 (a)–3 *Character of gross income.* (a) The right to receive an amount of income in respect of a decedent shall be treated in the hands of the estate, or by the person entitled to receive such amount by bequest, devise, or inheritance from the decedent or by reason of his death, as if it had been acquired in the transaction by which the decedent (or a prior decedent) acquired such right, and shall be considered as having the same character it would have had if the decedent (or a prior decedent) had lived and received such amount. The provisions of section 1014 (a), relating to the basis of property acquired from a decedent, do not apply to these amounts in the hands of the estate and such persons. See section 1014 (c).

(b) The application of paragraph (a) of this section may be illustrated by the following:

(1) If the income would have been capital gain to the decedent, if he had lived and had received it, from the sale of property held for more than 6 months, the income, when received, shall be treated in the hands of the estate or of such person as capital gain from the sale of the property, held for more than 6 months, in the same manner as if such person had held the property for the period the decedent held it, and had made the sale.

(2) If the income is interest on United States obligations which were owned by the decedent, such income shall be treated as interest on United States obligations in the hands of the person receiving it, for the purpose of determining the credit provided by section 35, as if such person had owned the obligations with respect to which such interest is paid.

(3) If the amounts received would be subject to special treatment under sections 1301 to 1305, inclusive, relating to income attributable to several taxable years, if the decedent had lived and included such amounts in his gross income, such sections apply with respect to the recipient of the income.

(4) The provisions of sections 632 and 1347, relating to the tax attributable to the sale of certain oil or gas property and to certain claims against the United States, apply to any amount included in gross income, the right to which was obtained by the decedent by a sale or claim within the provisions of those sections.

§ 1.691 (a)–4 *Transfer of right to income in respect of a decedent.* (a) Section 691 (a) (2) provides the rules governing the treatment of income in respect of a decedent (or a prior decedent) in the event a right to receive such income is transferred by the estate or person entitled thereto by bequest, devise, or inheritance, or by reason of the death of the decedent. In general, the transferor must include in his gross income for the taxable period in which the transfer occurs, the amount of the consideration, if any, received for the right or the fair market value of the right at the time of the transfer, whichever is greater. Thus, upon a sale of such right, the fair market value of the right or the amount received upon the sale, whichever is greater, is included in the gross income of the vendor. Similarly, if such right is disposed of by gift, the fair market value of the right at the time of the gift must be included in the gross income of the donor. In the case of a satisfaction of an installment obligation at other than face value, which is likewise considered a transfer under section 691 (a) (2), see § 1.691 (a)–5.

(b) If an estate of a decedent or any person transmits the right to income in respect of a decedent to another who would be required by section 691 (a) (1) to include such income when received in his gross income, only the transferee will include such income when received in his gross income. In this situation, a transfer within the meaning of section 691 (a) (2) has not occurred. This statement may be illustrated by the following:

(1) If a person entitled to income in respect of a decedent dies before receiving such income, only his estate or other person entitled to such income by bequest, devise, or inheritance from the latter decedent, or by reason of the death of the latter decedent, must include such amount in gross income when received.

(2) If a right to income in respect of a decedent is transferred by an estate to a specific or residuary legatee, only the transferee must include such income in gross income when received.

(3) If a trust to which is bequeathed a right of a decedent to certain payments of income terminates and transfers the right to a beneficiary, only the beneficiary must include such income in gross income when received.

If, in any of the above examples, the transferee transfers his right to receive the amounts in the manner described in paragraph (a) of this section, the principles contained in paragraph (a) are applied to the later transfer. On the other hand, if the transferee transmits his right in the manner described in this paragraph, the principles of this paragraph are again applied to the later transfer.

§ 1.691 (a)–5 *Installment obligations acquired from decedent.* (a) Section 691 (a) (4) has reference to an installment obligation which remains uncol-

lected by a decedent (or a prior decedent) and which was originally acquired in a transaction the income from which was properly reportable by the decedent on the installment method under section 453. Under the provisions of section 691 (a) (4), an amount equal to the excess of the face value of the obligation over its basis in the hands of the decedent (determined under section 453 (d) (2)) shall be considered an amount of income in respect of a decedent and shall be treated as such. The decedent's estate (or the person entitled to receive such income by bequest, devise, or inheritance from the decedent or by reason of the decedent's death) shall include in his gross income when received the same proportion of any payment in satisfaction of such obligations as would be returnable as income by the decedent if he had lived and received such payment. No gain on account of the transmission of such obligations by the decedent's death is required to be reported as income in the return of the decedent for the year of his death.

(b) If an installment obligation described in paragraph (a) of this section is transferred within the meaning of section 691 (a) (2) and § 1.691 (a)–4 (a), the entire installment obligation transferred shall be considered a right to income in respect of a decedent but the amount includible in the gross income of the transferor shall be reduced by an amount equal to the basis of the obligation transferred in the hands of the decedent (determined under section 453 (d) (2) and the regulations thereunder). Thus, the amount includible in the gross income of the transferor shall be the fair market value of such obligation at the time of the transfer or the consideration received for the transfer of the installment obligation, whichever is greater, reduced by the basis of the obligation in the hands of the decedent. For purposes of this paragraph, the term "transfer" in section 691 (a) (2) and § 1.691 (a)–4 (a) includes the satisfaction of an installment obligation at other than face value.

(c) The application of this section may be illustrated by the following example:

*Example.* An heir of a decedent is entitled to collect an installment obligation with a face value of $100, a fair market value of $80 and a basis in the hands of the decedent of $60. If the heir collects the obligation at face value, the excess of the amount collected over the basis is considered income in respect of a decedent and includible in the gross income of the heir under section 691 (a) (1). In this case, the amount includible would be $40. If the heir collects the obligation at $90, an amount other than face value, the entire obligation is considered a right to receive income in respect of a decedent but the amount ordinarily required to be included in the heir's gross income under section 691 (a) (2) (viz., the consideration received in satisfaction of the installment obligation or its fair market value, whichever is greater) shall be reduced by the amount of the basis of the obligation in the hands of the decedent. In this case, the amount includible would be $30.

§ 1.691 (b) *Statutory provisions; recipients of income in respect of decedents; allowance of deductions and credit.*

SEC. 691. *Recipients of income in respect of decedents.* • • •

(b) *Allowance of deductions and credit.* The amount of any deduction specified in section 162, 163, 164, 212, or 611 (relating to deductions for expenses, interest, taxes, and depletion) or credit specified in section 33 (relating to foreign tax credit), in respect of a decedent which is not properly allowable to the decedent in respect of the taxable period in which falls the date of his death, or a prior period, shall be allowed:

(1) *Expenses, interest, and taxes.* In the case of a deduction specified in section 162, 163, 164, or 212 and a credit specified in section 33, in the taxable year when paid—

(A) To the estate of the decedent; except that

(B) If the estate of the decedent is not liable to discharge the obligation to which the deduction or credit relates, to the person who, by reason of the death of the decedent or by bequest, devise, or inheritance acquires, subject to such obligation, from the decedent an interest in property of the decedent.

(2) *Depletion.* In the case of the deduction specified in section 611, to the person described in subsection (a) (1) (A), (B), or (C) who, in the manner described therein, receives the income to which the deduction relates, in the taxable year when such income is received.

§ 1.691 (b)–1 *Allowance of deductions and credit in respect of decedents.* (a) Under section 691 (b) the expenses, interest, and taxes described in sections 162, 163, 164, and 212 for which the decedent (or a prior decedent) was liable, which were not properly allowable as a deduction in his last taxable year or any prior taxable year, are allowed when paid (1) as a deduction by the estate, or (2) if the estate was not liable to pay such obligation, as a deduction by the person who by bequest, devise, or inheritance from the decedent or by reason of the death of the decedent acquires, subject to such obligation, an interest in property of the decedent (or the prior decedent). Similar treatment is given to the foreign tax credit provided by section 33. For the purposes of subparagraph (2) of this paragraph, the right to receive an amount of gross income in respect of a decedent is considered property of the decedent; on the other hand, it is not necessary for a person, otherwise within the provisions of subparagraph (2) of this paragraph, to receive the right to any income in respect of a decedent. Thus, an heir who receives a right to income in respect of a decedent (by reason of the death of the decedent) subject to an income tax imposed by a foreign country during the decedent's life, which tax must be satisfied out of such income, is entitled to the credit provided by section 33 when he pays the tax. If the decedent, who reported income by use of the cash receipts and disbursements method, owned real property on which accrued taxes had become a lien, and if such property passed directly to the heir of the decedent in a jurisdiction in which real property does not become a part of a decedent's estate, the heir, upon paying such taxes, may take the same deduction under section 164 that would be allowed to the decedent if, while alive, he had made such payments.

(b) The deduction for percentage depletion is allowable only to the person (described in section 691 (a) (1)) who receives the income in respect of the decedent to which the deduction relates, whether or not such person receives the property from which such income is derived. Thus, an heir who (by reason of the decedent's death) receives income derived from sales of units of mineral by the decedent (who reported income by use of the cash receipts and disbursements method) shall be allowed the deduction for percentage depletion, computed on the gross income from such number of units as if the heir had the same economic interest in the property as the decedent. Such heir need not also receive any interest in the mineral property other than such income. If the decedent did not compute his deduction for depletion on the basis of percentage depletion, any deduction for depletion to which the decedent was entitled at the date of his death would be allowable in computing his taxable income for his last taxable year, and there can be no deduction in respect of the decedent by any other person for such depletion.

§ 1.691 (c) *Statutory provisions; recipients of income in respect of decedents; deduction for estate tax.*

SEC. 691. *Recipients of income in respect of decedents.* • • •

(c) *Deduction for estate tax*—(1) *Allowance of deduction*—(A) *General rule.* A person who includes an amount in gross income under subsection (a) shall be allowed, for the same taxable year, as a deduction an amount which bears the same ratio to the estate tax attributable to the net value for estate tax purposes of all the items described in subsection (a) (1) as the value for estate tax purposes of the items of gross income or portions thereof in respect of which such person included the amount in gross income (or the amount included in gross income, whichever is lower) bears to the value for estate tax purposes of all the items described in subsection (a) (1).

(B) *Estates and trusts.* In the case of an estate or trust, the amount allowed as a deduction under subparagraph (A) shall be computed by excluding from the gross income of the estate or trust the portion (if any) of the items described in subsection (a) (1) which is properly paid, credited, or to be distributed to the beneficiaries during the taxable year. This subparagraph shall apply to the same taxable years, and to the same extent, as is provided in section 683.

(2) *Method of computing deduction.* For purposes of paragraph (1)—

(A) The term "estate tax" means the tax imposed on the estate of the decedent or any prior decedent under section 2001 or 2101, reduced by the credits against such tax.

(B) The net value for estate tax purposes of all the items described in subsection (a) (1) shall be the excess of the value for estate tax purposes of all the items described in subsection (a) (1) over the deductions from the gross estate in respect of claims which represent the deductions and credit described in subsection (b). Such net value shall be determined with regard to the provisions of section 421 (d) (6) (B), relating to the deduction for estate tax with respect to restricted stock options.

(C) The estate tax attributable to such net value shall be an amount equal to the excess of the estate tax over the estate tax computed without including in the gross estate such net value.

§ 1.691 (c)–1 *Deduction for estate tax attributable to income in respect of a decedent*—(a) *In general.* A person who is required to include in gross income for any taxable year an amount of income in respect of a decedent may deduct for the same taxable year that portion of the estate tax imposed upon the decedent's estate which is attributable to the inclusion in the decedent's estate of the right to receive such amount. The deduction is determined as follows:

(1) Ascertain the net value in the decedent's estate of the items which are included under section 691 in computing gross income. This is the excess of the value included in the gross estate on account of the items of gross income in respect of the decedent (see § 1.691 (a)–1 and paragraph (c) of this section) over the deductions from the gross estate for claims which represent the deductions and credit in respect of the decedent (see § 1.691 (b)–1). But see section 691 (d) and § 1.691 (d)–1 (b) for computation of the special value of a survivor's annuity to be used in computing the net value for estate tax purposes in cases involving joint and survivor annuities.

(2) Ascertain the portion of the estate tax attributable to the inclusion in the gross estate of such net value. This is the excess of the estate tax over the estate tax computed without including such net value in the gross estate. In computing the estate tax without including such net value in the gross estate, any estate tax deduction (such as the marital deduction) which may be based upon the gross estate shall be recomputed so as to take into account the exclusion of such net value from the gross estate. See example (2), § 1.691 (d)–1 (e). For purposes of this section, the term "estate tax" means the tax imposed under section 2001 or 2101 (or the corresponding provisions of the Internal Revenue Code of 1939), reduced by the credits against such tax.

Each person including in gross income an amount of income in respect of a decedent may deduct as his share of the portion of the estate tax (computed under subparagraph (2) of this paragraph) an amount which bears the same ratio to such portion as the value in the gross estate of the right to the income included by such person in gross income (or the amount included in gross income if lower) bears to the value in the gross estate of all the items of gross income in respect of the decedent.

(b) *Prior decedent.* If a person is required to include in gross income an amount of income in respect of a prior decedent, such person may deduct for the same taxable year that portion of the estate tax imposed upon the prior decedent's estate which is attributable to the inclusion in the prior decedent's estate of the value of the right to receive such amount. This deduction is computed in the same manner as provided in paragraph (a) of this section and is in addition to the deduction of estate tax imposed upon the decedent's estate which is attributable to the inclusion in the decedent's estate of the right to receive such amount.

(c) *Amounts deemed income in respect of a decedent.* For purposes of allowing the deduction under section 691 (c), the following items are also considered income in respect of a decedent under section 691 (a):

(1) The value for estate tax purposes of restricted stock options in respect of which amounts are includible in gross income under section 421 (b). See section 421 (d) (6).

(2) Amounts received by a surviving annuitant during his life expectancy period as an annuity under a joint survivor contract to the extent included in gross income under section 72. See section 691 (d).

(d) *Examples.* Paragraphs (a) and (b) of this section may be illustrated by the following examples:

*Example (1).* X, an attorney who kept his books by use of the cash receipts and disbursements method, was entitled at the date of his death to a fee for services rendered in a case not completed at the time of his death, which fee was valued in his estate at $1,000, and to accrued bond interest, which was valued in his estate at $500. In all, $1,500 was included in his gross estate in respect of income described in section 691 (a) (1). There were deducted as claims against his estate $150 for business expenses for which his estate was liable and $50 for taxes accrued on certain property which he owned. In all, $200 was deducted for claims which represent amounts described in section 691 (b) which are allowable as deductions to his estate or to the beneficiaries of his estate. His gross estate was $185,000 and considering deductions of $15,000 and a specific exemption of $60,000, his taxable estate amounted to $110,000. The estate tax on this amount is $23,700 from which is subtracted a $75 credit for State death taxes leaving an estate tax liability of $23,625. In the year following the closing of X's estate, the fee in the amount of $1,200 was collected by X's son, who was the sole beneficiary of the estate. This amount was included under section 691 (a) (1) (C) in the son's gross income. The son may deduct, in computing his taxable income for such year, $260 on account of the estate tax attributable to such income, computed as follows:

| | |
|---|---|
| (i) (I) Value of income described in section 691 (a) (1) included in computing gross estate | $1,500 |
| (II) Deductions in computing gross estate for claims representing deductions described in section 691 (b) | 200 |
| (III) Net value of items described in section 691 (a) (1) | 1,300 |
| (2) (I) Estate tax | 23,625 |
| (II) Less: Estate tax computed without including $1,300 (item (1) (III)) in gross estate | 23,235 |
| (III) Portion of estate tax attributable to net value of items described in section 691 (a) (1) | 390 |
| (3) (I) Value in gross estate of items described in section 691 (a) (1) received in taxable year (fee) | 1,000 |
| (II) Value in gross estate of all income items described in section 691 (a) (1) (item (1) (I)) | 1,500 |
| (III) Part of estate tax deductible on account of receipt of $1,200 fee (1,000/1,500 of $390) | 260 |

Although $1,200 was later collected as the fee, only the $1,000 actually included in the gross estate is used in the above computations. However, to avoid distortion, section 691 (c) provides that if the value included in the gross estate is greater than the amount finally collected, only the amount collected shall be used in the above computations. Thus, if the amount collected as the fee were only $500, the estate tax deductible on the receipt of such amount would be 500/1,500 of $390, or $130. See § 1.421–5 (d) (3) for a similar example involving a restricted stock option.

*Example (2).* Assume that in example (1) the fee valued at $1,000 had been earned by prior decedent Y and had been inherited by X who died before collecting it. The fee would be considered income in respect of a prior decedent. Assume further that the fee was valued at $1,000 in Y's estate, that the net value in Y's estate of items described in section 691 (a) (1) was $5,000 and that the estate tax imposed on Y's estate attributable to such net value was $550. In such case, the portion of such estate tax attributable to the fee would be 1,000/5,000 of $550, or $110. When the son collects the $1,200 fee, he will receive for the same taxable year a deduction of $110 with respect to the estate tax imposed on the estate of prior decedent Y as well as the deduction of $260 (as computed in example (1)) with respect to the estate tax imposed on the estate of decedent X. For purposes of this example, the credit for estate tax on prior transfers is disregarded. If such credit were applicable, it would be reflected in example (1) in computing the portion of estate tax attributable to the net value of income items.

§ 1.691 (c)–2 *Estates and trusts.* (a) In the case of an estate or trust, the deduction prescribed in section 691 (c) is determined in the same manner as described in § 1.691 (c)–1, with the following exceptions:

(1) If any amount properly paid, credited, or required to be distributed by an estate or trust to a beneficiary consists of income in respect of a decedent received by the estate or trust during the taxable year—

(i) Such income shall be excluded in determining the income in respect of the decedent with respect to which the estate or trust is entitled to a deduction, and

(ii) Such income shall be considered income in respect of a decedent to such beneficiary for purposes of allowing the deduction under section 691 (c) to such beneficiary.

(2) For determination of the amount of income in respect of a decedent received by the beneficiary, see sections 652 and 662 and the regulations thereunder. However, for this purpose, distributable net income as defined in section 643 (a) and the regulations thereunder shall be computed without taking into account the estate tax deduction provided in section 691 (c) and this section. Distributable net income as modified under the preceding sentence shall be applied for other relevant purposes of subchapter J, such as the deduction provided by section 651 or 661, or subpart D of part I of subchapter J, relating to excess distributions by trusts.

(3) The rule stated in subparagraph (1) of this paragraph does not apply to income in respect of a decedent which is properly allocable to corpus by the fiduciary during the taxable year but which is distributed to a beneficiary in

a subsequent year. The deduction provided by section 691 (c) in such a case is allowable only to the estate or trust. If any amount properly paid, credited, or required to be distributed by a trust qualifies as a distribution under section 666, the fact that a portion thereof constitutes income in respect of a decedent shall be disregarded for the purposes of determining the deduction of the trust and of the beneficiaries under section 691 (c) since the deduction for estate taxes was taken into consideration in computing the undistributed net income of the trust for the preceding taxable year.

(b) This section shall apply only to amounts properly paid, credited, or required to be distributed in taxable years of an estate or trust beginning after December 31, 1953, and ending after August 16, 1954, except as otherwise provided in paragraph (c) of this section.

(c) In the case of an estate or trust heretofore taxable under the provisions of the Internal Revenue Code of 1939, amounts paid, credited, or to be distributed during its first taxable year subject to the Internal Revenue Code of 1954 which would have been treated as paid, credited, or to be distributed on the last day of the preceding taxable year if the Internal Revenue Code of 1939 were still applicable shall not be subject to section 691 (c) (1) (B) or the provisions of this section. See section 683 and the regulations thereunder.

(d) This section may be illustrated by the following example:

*Example.* The fiduciary of an estate receives taxable interest of $5,500 and income in respect of a decedent of $4,500 during the taxable year. The estate tax attributable to the income in respect of a decedent is $1,500. In his discretion, the fiduciary distributes $2,000 (falling within sections 661 (a) and 662 (a)) to a beneficiary during that year. On these facts the fiduciary and beneficiary are respectively entitled to estate tax deductions of $1,200 and $300, computed as follows:

(1) Distributable net income (computed under section 643 (a)) without regard to the estate tax deduction under section 691 (c) is $10,000, computed as follows:

| | |
|---|---|
| Taxable interest | $5,500 |
| Income in respect of a decedent | 4,500 |
| Total | 10,000 |

(2) Inasmuch as the distributable net income of $10,000 exceeds the amount of $2,000 distributed to the beneficiary, the deduction allowable to the trust under section 661 (a), and the amount taxable to the beneficiary under section 662 (a) is $2,000.

(3) The character of the amounts distributed to the beneficiary under section 662 (b) is shown in the following table:

| | Taxable interest | Income in respect of a decedent | Total |
|---|---|---|---|
| Distributable net income | $5,500 | $4,500 | $10,000 |
| Amount deemed distributable under section 662 (b) | 1,100 | 900 | 2,000 |

(4) Accordingly, the beneficiary will be entitled to an estate tax deduction of $300 (900/4,500 x $1,500) and the estate will be entitled to an estate tax deduction of $1,200 (3,600/4,500 x $1,500).

(5) The taxable income of the estate for purposes of computing the income tax of the estate is $6,200, computed as follows:

| | | |
|---|---|---|
| Gross income | | $10,000 |
| Less: | | |
| Distributions to the beneficiary | $2,000 | |
| Estate tax deduction under section 691 (c) | 1,200 | |
| Personal exemption | 600 | |
| | | 3,800 |
| Taxable income | | 6,200 |

§ 1.691 (d) *Statutory provisions; recipients of income in respect of decedents; amounts received by surviving annuitant under joint and survivor annuity contract.*

SEC. 691. *Recipients of income in respect of decedents.* • • •

(d) *Amounts received by surviving annuitant under joint and survivor annuity contract*—(1) *Deduction for estate tax.* For purposes of computing the deduction under subsection (c) (1) (A), amounts received by a surviving annuitant—

(A) As an annuity under a joint and survivor annuity contract where the decedent annuitant died after December 31, 1953, and after the annuity starting date (as defined in section 72 (c) (4)), and

(B) During the surviving annuitant's life expectancy period, shall, to the extent included in gross income under section 72, be considered as amounts included in gross income under subsection (a).

(2) *Net value for estate tax purposes.* In determining the net value for estate tax purposes under subsection (c) (2) (B) for purposes of this subsection, the value for estate tax purposes of the items described in paragraph (1) of this subsection shall be computed—

(A) By determining the excess of the value of the annuity at the date of the death of the deceased annuitant over the total amount excludible from the gross income of the surviving annuitant under section 72 during the surviving annuitant's life expectancy period, and

(B) By multiplying the figure so obtained by the ratio which the value of the annuity for estate tax purposes bears to the value of the annuity at the date of the death of the deceased.

(3) *Definitions.* For purposes of this subsection—

(A) The term "life expectancy period" means the period beginning with the first day of the first period for which an amount is received by the surviving annuitant under the contract and ending with the close of the taxable year with or in which falls the termination of the life expectancy of the surviving annuitant. For purposes of this subparagraph, the life expectancy of the surviving annuitant shall be determined, as of the date of the death of the deceased annuitant, with reference to actuarial tables prescribed by the Secretary or his delegate.

(B) The surviving annuitant's expected return under the contract shall be computed, as of the death of the deceased annuitant, with reference to actuarial tables prescribed by the Secretary or his delegate.

§ 1.691 (d)–1 *Amounts received by surviving annuitant under joint and survivor annuity contract*—(a) *In general.* Under section 691 (d), annuity payments received by a surviving annuitant under a joint and survivor annuity contract (to the extent indicated in paragraph (b) of this section) are treated as income in respect of a decedent under section 691 (a) for the purpose of allowing the deduction for estate tax provided for in section 691 (c) (1) (A). This section applies only if the deceased annuitant died after December 31, 1953, and after the annuity starting date as defined in section 72 (c) (4).

(b) *Special value for surviving annuitant's payments.* Section 691 (d) provides a special value for the surviving annuitant's payments to determine the amount of the estate tax deduction provided for in section 691 (c) (1) (A). This special value is determined by multiplying:

(1) The excess of the value of the annuity at the date of death of the deceased annuitant over the total amount excludable from the gross income of the surviving annuitant under section 72 during his life expectancy period (see § 1.691 (d)–1 (d) (1) (i))

by

(2) A fraction consisting of the value of the annuity for estate tax purposes over the value of the annuity at the date of death of the deceased annuitant.

This special value is used for the purpose of determining the net value for estate tax purposes (see section 691 (c) (2) (B) and § 1.691 (c)–1 (a) (1)) and for the purpose of determining the portion of estate tax attributable to the survivor's annuity (see § 1.691 (c)–1 (a)).

(c) *Amount of deduction.* The portion of estate tax attributable to the survivor's annuity (see § 1.691 (c)–1 (a)) is allowable as a deduction to the surviving annuitant over his life expectancy period. If the surviving annuitant continues to receive annuity payments beyond this period, there is no further deduction under section 691 (d). If the surviving annuitant dies before expiration of such period, there is no compensating adjustment for the unused deduction.

(d) *Definitions.* (1) For purposes of section 691 (d) and this section:

(i) The term "life expectancy period" means the period beginning with the first day of the first period for which an amount is received by the surviving annuitant under the contract and ending with the close of the taxable year with or in which falls the termination of the life expectancy of the surviving annuitant.

(ii) The life expectancy of the surviving annuitant shall be determined as of the date of death of the deceased annuitant, with reference to actuarial Table I set forth in § 1.72–9.

(iii) The value of an annuity at the date of death of a deceased annuitant shall be the entire value of the survivor's annuity determined by reference to the principles set forth in section 2031 and the regulations thereunder, relating to the valuation of annuities for estate tax purposes.

(iv) The value of the annuity for estate tax purposes shall be that portion of the value determined under subdivision (iii) of this subparagraph which was includible in the deceased annuitant's gross estate.

(2) The determination of the "life expectancy period" of the survivor for purposes of section 691 (d) may be illustrated by the following example:

*Example.* H and W file their income tax returns on the calendar year basis. H dies on July 15, 1955, on which date W is 70 years of age. On August 1, 1955, W receives a monthly payment under a joint and survivor annuity contract. W's life expectancy determined as of the date of H's death is 15 years as determined from Table I in § 1.72–9; thus her life expectancy ends on July 15, 1970. Under the provisions of section 691 (d), her life expectancy period begins as of July 1, 1955, and ends as of December 31, 1970, thus giving her a life expectancy period of 15½ years.

(e) *Examples.* The application of section 691 (d) and this section may be illustrated by the following examples:

*Example (1).* (1) H and W, husband and wife, purchased a joint and survivor annuity contract for $203,800 providing for monthly payments of $1,000 starting February 1, 1954, and continuing for their joint lives and for the remaining life of the survivor. H contributed $152,850 and W contributed $50,950 to the cost of the annuity. As of the annuity starting date, January 1, 1954, H's age at his nearest birthday was 70 and W's age at her nearest birthday was 67. H dies on January 1, 1957, and beginning on February 1, 1957, W receives her monthly payments of $1,000. The value of the annuity at the date of H's death is $159,000 (see paragraph (d) (1) (iii) of this section), and the value of the annuity for estate tax purposes (see paragraph (d) (1) (iv) of this section) is $119,250 (152,850/203,800 of $159,000). As of the date of H's death, W's age is 70 and her life expectancy period is 15 years (see paragraph (d) of this section for method of computation). Both H and W reported income by use of the cash receipts and disbursements method and filed income tax returns on the calendar year basis.

(2) The following computations illustrate the application of section 72 in determining the excludable portions of the annuity payments to W during her life expectancy period:

| | |
|---|---|
| Amount of annuity payments per year (12×$1,000) | $12,000 |
| Life expectancy of H and W as of the annuity starting date (see section 72 (c) (3) (A) and Table II of § 1.72–9 (male, age 70; female, age 67)) | 19.7 |
| Expected return as of the annuity starting date, January 1, 1954 ($12,000×19.7 as determined under section 72 (c) (3) (A) and § 1.72–5 (b)) | $236,400 |
| Investment in the contract as of the annuity starting date, Jan. 1, 1954 (see section 72 (c) (1) and § 1.72–6 (a)) | $203,800 |
| Exclusion ratio (203,800/236,400 as determined under section 72 (b) and § 1.72–4) (percent) | 86.2 |
| Exclusion per year under section 72 ($12,000×86.2 percent) | $10,344 |
| Excludable during W's life expectancy period ($10,344×15) | $155,160 |

(3) For the purpose of computing the deduction for estate tax under section 691 (c), the value for estate tax purposes of the amounts includible in W's gross income and considered income in respect of a decedent by virtue of section 691 (d) (1) is $2,880. This amount is arrived at in accordance with the formula contained in section 691 (d) (2), as follows:

| | |
|---|---|
| Value of annuity at date of H's death | $159,000 |
| Total amount excludable from W's gross income under section 72 during W's life expectancy period (see subparagraph (2) of this example) | $155,160 |
| Excess | $3,840 |
| Ratio which value of annuity for estate tax purposes bears to value of annuity at date of H's death (119,250/159,000) | 75% |
| Value for estate tax purposes (75% of $3,840) | $2,880 |

This amount ($2,880) is included in the items of income under section 691 (a) (1) for the purpose of determining the estate tax attributable to each item under section 691 (c) (1) (A). The estate tax determined to be attributable to the item of $2,880 is then allowed as a deduction to W over her 15-year life expectancy period (see example (2) of this paragraph).

*Example (2).* Assume, in addition to the facts contained in example (1) of this paragraph, that H was an attorney and was entitled at the date of his death to a fee for services rendered in a case not completed at the time of his death, which fee was valued at $1,000, and to accrued bond interest, which was valued at $500. Taking into consideration the annuity payments of example (1), valued at $2,880, a total of $4,380 was included in his gross estate in respect of income described in section 691 (a) (1). There was deducted as claims against his estate $280 for business expenses for which his estate was liable and $100 for taxes accrued on certain property which he owned. In all, $380 was deducted for claims which represent amounts described in section 691 (b) which are allowable as deductions to his estate or to the beneficiaries of his estate. His gross estate was $404,250 and considering deductions of $15,000, a marital deduction of $119,250 (assuming the annuity to be the only qualifying gift) and a specific exemption of $60,000, his taxable estate amounted to $210,000. The estate tax on this amount is $53,700 from which is subtracted a $175 credit for State death taxes, leaving an estate tax liability of $53,525. W may deduct, in computing her taxable income during each year of her 15-year life expectancy period, $14.73 on account of the estate tax attributable to the value for estate tax purposes of that portion of the annuity payments considered income in respect of a decedent, computed as follows:

| | | |
|---|---|---|
| (1) (i) Value of income described in section 691 (a) (1) included in computing gross estate | | $4,380.00 |
| (ii) Deductions in computing grossestate for claims representing deductions described in section 691 (b) | | 380.00 |
| (iii) Net value of items described in section 691 (a) (1) | | 4,000.00 |
| (2) (i) Estate tax | | 53,525.00 |
| (ii) Less: Estate tax computed without including $4,000 (item (1) (iii)) in gross estate and by reducing marital deduction by $2,880 (portion of item (1) (iii) allowed as a marital deduction) | | 53,189.00 |
| (iii) Portion of estate tax attributable to net value of income items | | 336.00 |
| (3) (i) Value in gross estate of income attributable to annuity payments | | 2,880.00 |
| (ii) Value in gross estate of all income items described in section 691 (a) (1) (item (1) (i)) | | 4,380.00 |
| (iii) Part of estate tax attributable to annuity income (2,800/4,380 of $336) | | 220.93 |
| (iv) Deduction each year on account of estate tax attributable to annuity income ($220.93+15 life expectancy period) | | 14.73 |

§ 1.691 (e) *Statutory provisions; recipients of income in respect of decedents; cross reference.*

SEC. 691. *Recipients of income in respect of decedents.* • • •

(e) *Cross reference.* For application of this section to income in respect of a deceased partner, see section 753.

§ 1.691 (e)–1 *Cross reference.* See section 753 and the regulations thereunder for application of section 691 to income in respect of a deceased partner.

§ 1.692 *Statutory provisions; income taxes on members of Armed Forces on death.*

SEC. 692. *Income taxes on members of Armed Forces on death.* In the case of any individual who dies during an induction period (as defined in section 112 (c) (5)) while in active service as a member of the Armed Forces of the United States, if such death occurred while serving in a combat zone (as determined under section 112) or as a result of wounds, disease, or injury incurred while so serving—

(1) Any tax imposed by this subtitle shall not apply with respect to the taxable year in which falls the date of his death, or with respect to any prior taxable year ending on or after the first day he so served in a combat zone after June 24, 1950; and

(2) Any tax under this subtitle and under the corresponding provisions of prior revenue laws for taxable years preceding those specified in paragraph (1) which is unpaid at the date of his death (including interest, additions to the tax, and additional amounts) shall not be assessed, and if assessed the assessment shall be abated, and if collected shall be credited or refunded as an overpayment.

§ 1.692–1 *Abatement of income taxes of certain members of the Armed Forces of the United States upon death.* (a) If an individual dies during an induction period (as defined in section 112 (c) (5)) while in active service as a member of the Armed Forces of the United States, and such death occurs while serving in a combat zone (as determined under section 112) or at any place as a result of wounds, disease, or injury incurred while so serving, then:

(1) The tax liability of such individual, under subtitle A of the Internal Revenue Code of 1954 or under chapter 1 of the Internal Revenue Code of 1939, for the taxable year ending on the date of his death, and for any prior taxable year ending on or after the first day he so served in a combat zone after June 24, 1950, is cancelled and if the tax (including interest, additions to the tax, and additional amounts) is assessed, the assessment shall be abated, and if the amount of such tax is collected regardless of the date of collection) the amount so collected shall be credited or refunded as an overpayment; and

(2) That amount of tax of such individual for taxable years preceding those specified in subparagraph (1) of this paragraph, under subtitle A of the Internal Revenue Code of 1954, chapter 1 of the Internal Revenue Code of 1939 or corresponding provisions of prior revenue laws, which remains unpaid as of the date of death shall not be assessed, and if any such unpaid tax (including interest, additions to the tax, and additional amounts) has been assessed, such assess-

ment shall be abated, and if the amount of any such unpaid tax is collected subsequent to the date of death, the amount so collected shall be credited or refunded as an overpayment.

As to what constitutes an induction period, active service as a member of the Armed Forces, service in a combat zone, and wounds, disease, or injury incurred while serving in a combat zone, see section 112 and the regulations thereunder. As to who are members of the Armed Forces, see section 7701 (a) (15) and the regulations thereunder.

(b) If such an individual and his spouse have for any such year filed a joint return, the tax abated, credited, or refunded pursuant to the provisions of section 692 for such year shall be an amount equal to that portion of the joint tax liability which is the same percentage of such joint tax liability as a tax computed upon the separate income of such individual is of the sum of the taxes computed upon the separate income of such individual and his spouse, but with respect to taxable years ending before June 24, 1950, and with respect to taxable years ending before the first day such individual served in a combat zone, as determined under section 112, the amount so abated, credited, or refunded shall not exceed the amount unpaid at the date of death. For such purpose, the separate tax of each spouse—

(1) For taxable years beginning after December 31, 1953, and ending after August 16, 1954, shall be the tax computed under subtitle A of the Internal Revenue Code of 1954 before the application of sections 31, 32, 6401 (b), and 6402, but after the application of section 33, as if such spouse were required to make a separate income tax return; and

(2) For taxable years beginning before January 1, 1954, and for taxable years beginning after December 31, 1953, and ending before August 17, 1954, shall be the tax computed under chapter 1 of the Internal Revenue Code of 1939 before the application of sections 32, 35, and 322 (a), but after the application of section 31, as if such spouse were required to make a separate income tax return.

(c) If such an individual and his spouse filed a joint declaration of estimated tax for the taxable year ending with the date of his death, the estimated tax paid pursuant to such declaration may be treated as the estimated tax of either such individual or his spouse, or may be divided between them, in such manner as his legal representative and such spouse may agree. Should they agree to treat such estimated tax, or any portion thereof, as the estimated tax of such individual, the estimated tax so paid shall be credited or refunded as an overpayment for the taxable year ending with the date of his death.

(d) For the purpose of determining the tax which is unpaid at the date of death, amounts deducted and withheld under chapter 24, subtitle C of the Internal Revenue Code of 1954, or under subchapter D, chapter 9 of the Internal Revenue Code of 1939 (relating to income tax withheld at source on wages), constitute payment of tax imposed under subtitle A of the Internal Revenue Code of 1954 or under chapter 1 of the Internal Revenue Code of 1939, as the case may be.

(e) This section shall have no application whatsoever with respect to the liability of an individual as a transferee of property of a taxpayer where such liability relates to the tax imposed upon the taxpayer by subtitle A of the Internal Revenue Code of 1954 or by chapter 1 of the Internal Revenue Code of 1939.

[F. R. Doc. 56-5066; Filed, June 26, 1956; 8:52 a. m.]

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### [ 7 CFR Part 978 ]

[Docket No. AO-184-A12]

MILK IN NASHVILLE, TENN., MARKETING AREA

DECISION WITH RESPECT TO PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Nashville, Tennessee, on September 22-23, 1955, pursuant to notice thereof which was issued September 15, 1955 (20 F. R. 7007), upon proposed amendments to the tentative marketing agreement and order, as amended, regulating the handling of milk in the Nashville, Tennessee, marketing area.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Agricultural Marketing Service, on April 2, 1956, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision. Such decision containing notice of opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on April 5, 1956 (21 F. R. 2188).

Within the period reserved therefor, interested parties filed exceptions to certain of the findings, conclusions and actions recommended by the Deputy Administrator. In arriving at the findings, conclusions, and regulatory provisions of this decision, each of such exceptions was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that findings, conclusions and actions decided upon herein are at variance with any of the exceptions, such exceptions are overruled.

To the extent that suggested findings and conclusions proposed by interested persons are inconsistent with the findings and conclusions contained herein, the specific or implied requests to make such findings and reach such conclusions are denied on the basis of the facts found and stated in connection with the conclusions herein set forth.

The material issues, findings and conclusions, and general findings of the recommended decision (21 F. R. 2188, Doc. 56-2516) are hereby approved and adopted as the issues, findings and conclusions, and general findings of this decision as if set forth in full herein, subject to the following modifications described with reference to Federal Register Doc. 56-2516, 21 F. R. 2188:

1. At the end of the last full paragraph beginning in column one, page 2190, add the following: "Although the changes recommended for the computation of the uniform price for base and excess milk would, under normal conditions, substantially eliminate the pricing of milk at a higher rate than the price for base milk, the provision concerning such computation should also contain language which will, under all circumstances, preclude a higher rate for excess milk than for base milk."

2. On page 2190, in column 3, after the heading "5. *Revision of the base-forming and operating periods.*", delete the first paragraph and insert instead the following: "Effective August 1957, the base-forming period should include the months of August through January. The present base-forming period, September through February, should be continued until that time. The new base-operating period beginning in 1958 should be February through July."

3. On page 2191, in column 1, in the first full paragraph beginning in the column, delete the last sentence and add the following: "Inasmuch as the new base-forming and base-operating periods will not become effective until after July 1957, this problem is not of immediate concern and no action thereon is being taken at this time."

"For August 1957, payment to producers should be made at the uniform price for all milk rather than at base and excess prices, so that producers will not be earning a base during a base-operating month."

*Determination of representative period.* The month of September 1955 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order amending the order, as amended, regulating the handling of milk in the Nashville, Tennessee, marketing area, in the manner set forth in the attached amending order, is approved or favored by producers who, during such period, were engaged in the production of milk for sale in the marketing area specified in such marketing order.

*General findings.* (a) The proposed marketing agreement and the order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section two of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed order, as amended, and as hereby further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Marketing agreement and order, as amended.* Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement Regulating the Handling of Milk in the Nashville, Tennessee, Marketing Area", and "Order, as Amended, Regulating the Handling of Milk in the Nashville, Tennessee, Marketing Area", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

*It is hereby ordered,* That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the attached order, as amended.

This decision filed at Washington, D. C., this 22d day of June 1956.

[SEAL] TRUE D. MORSE,
*Acting Secretary.*

*Order[1] as Amended, Regulating the Handling of Milk in the Nashville, Tennessee, Marketing Area*

Sec.
978.0 Findings and determinations.

APPLICATION OF PROVISIONS

978.90 Producer-handlers.
978.91 Plants subject to other Federal orders.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

978.100 Effective time.
978.101 Suspension or termination.
978.102 Continuing power and duty of the market administrator.
978.103 Liquidation after suspension or termination.

MISCELLANEOUS PROVISIONS

978.110 Separability of provisions.
978.111 Agents.

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

§ 978.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with findings and determinations set forth in this section.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed tentative marketing agreement and order, as amended, and as hereby further amended, regulating the handling of milk in the Nashville, Tennessee, marketing area. Upon the basis of the evidence introduced at such hearing, and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as, and is applicable only to, persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof, the handling of milk in the Nashville, Tennessee, marketing area shall be in conformity to and in compliance with the following terms and conditions:

The provisions of §§ 978.1 to 978.111, both inclusive, of the order contained in the recommended decision issued by the Deputy Administrator, Agricultural Marketing Service (21 F. R. 2188; Doc. 56-2516) shall be and are the terms and conditions of this order, as amended, and as hereby further amended, as if set forth in full herein, subject to the following revisions described with reference to Federal Register Doc. 56-2516, 21 F. R. 2188:

1. Delete §§ 978.15 and 978.16 and substitute the following:

§ 978.15 *Base milk.* "Base milk" means milk received at fluid milk plants from a producer during any of the months specified in § 978.72 for the computation of base and excess prices, which is not in excess of such producer's daily average base computed pursuant to § 978.60, multiplied by the number of days in such month.

§ 978.16 *Excess milk.* "Excess milk" means milk received at fluid milk plants from a producer during any of the months specified in § 978.72 for computation of base and excess prices, which is in excess of the base milk of such producer for such month, and shall include all milk received during such months from a producer for whom no daily average base can be computed pursuant to § 978.60.

2. Delete § 978.22 (d) and substitute the following:

(d) Pay out of the funds provided by § 978.85, (1) the cost of his bond and of the bonds of his employees, (2) his own compensation, and (3) all other expenses (except those incurred under § 978.86)

necessarily incurred by him in the maintenance and functioning of his office, and in the performance of his duties;

3. Delete § 978.22 (f) (2) and substitute the following: "(2) payments pursuant to §§ 978.80, 978.85 and 978.87;".

4. In § 978.31 delete paragraph (b) (1) (iii) and substitute the following: "(iii) his total pounds of base milk and his total pounds of excess milk for the month and"

5. Delete § 978.60 and substitute the following:

§ 978.60 *Computation of daily average base for each producer.* Subject to the rules set forth in § 978.61, the daily average base for each producer shall be an amount calculated by dividing the total pounds of producer milk received from such producer at all fluid milk plants during the months of August through January immediately preceding, by the number of days from the first day of delivery by such producer during such months to the last day of January, inclusive, or by 120, whichever is more, except that bases computed for payments to producers in base-operating months of 1956 and 1957 shall be computed by dividing the pounds of producer milk received from the producer in the months of September through February immediately preceding, by the number of days from the first day of delivery by such producer during such months to the last day of February, inclusive, or by 120, whichever is more.

6. Delete paragraph (a) of § 978.61 and substitute the following:

(a) Subject to the provisions of paragraph (b) of this section, the market administrator shall assign a base as calculated pursuant to § 978.60 to each person for whose account producer milk was delivered to fluid milk plants during the months specified in § 978.60 for computation of base.

7. Delete § 978.62 and substitute the following:

§ 978.62 *Announcement of established bases.* On or before February 25 of each year, the market administrator shall notify each producer and the handler receiving milk from such producer of the daily average base established by such producer, except that such announcement in 1957 shall be on or before March 25.

8. In § 978.71 delete the language preceding paragraph (a) and substitute the following:

§ 978.71 *Computation of uniform prices for handlers.* For each month, except those months specified in § 978.72 for the computation of base and excess prices, the market administrator shall compute a uniform price for the producer milk received by each handler as follows:

* * * * *

9. In § 978.72 delete the language preceding paragraph (a) and substitute the following:

§ 978.72 *Computation of the uniform price for base milk and for excess milk for handlers.* For each of the months of March 1956 through August 1956, and March 1957 through July 1957, and for each of the months of February through July in subsequent years, the market administrator shall compute for each handler, with respect to his producer milk a uniform price for base milk and for excess milk as follows:

* * * * *

10. At the end of § 978.72 (e) insert the following proviso: "*Provided*, That such excess price shall not exceed the uniform price for base milk computed pursuant to paragraph (g) of this section. Any additional value remaining shall be prorated on a volume basis between excess and base milk."

11. In paragraph (b) of § 978.81 delete the language preceding subparagraph (1) and substitute the following: "On or before the 15th day after the end of each month, the market administrator shall make payment to each producer for milk received from such producer during the month by each handler from whom the appropriate payments have been received pursuant to § 978.80 (b), such payments by the market administrator to be at not less than the uniform price computed pursuant to § 978.71 for such handler for the months for which such uniform prices are computed, and such payments to be for base and excess milk at not less than the uniform base and excess prices, respectively, computed pursuant to § 978.72 for such handler for the months for which such base and excess prices are computed, subject to the following adjustments:".

12. In § 978.83 delete paragraph (b) and substitute the following:

(b) The total pounds and the average butterfat content of milk delivered by the producer, including, for the months in which base and excess prices apply, the pounds of base and excess milk;

13. Delete § 978.86 (a) and substitute the following:

§ 978.86 *Marketing services.* (a) Except as set forth in paragraph (b) of this section, the market administrator, in making payments to producers pursuant to § 978.81, shall deduct an amount not exceeding 6 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to milk received by a handler(s) from producers during the month. Such moneys shall be used by the market administrator to provide market information and to check the accuracy of the testing and weighing of their milk for producers who are not receiving such service from a cooperative association. Such services shall be performed in whole or in part by the market administrator or an agent engaged by and responsible to him.

14. In the sixth line of § 978.86 (b), delete the words "each handler" and substitute the words "the market administrator".

15. At the beginning of the sixth line in § 978.87 delete the words "a producer or".

16. Delete paragraph (a) (1) in § 978.51 and substitute the following:

(1) For each month calculate a ultilization ratio as follows: (i) Calculate a utilization percentage by dividing the total hundredweight of producer milk of all fluid milk plants during the twelve-month period ending with the beginning of the preceding month by the net hundredweight of Class I milk disposed of from all fluid milk plants during the same period, and multiply the result by 100, (ii) add or subtract, respectively, any amount by which the percentage computed pursuant to subdivision (i) of this paragraph is greater or less than a comparable utilization percentage calculated using the twelve-month period ending with the beginning of the fourth preceding month, and (iii) the resulant figure rounded to the nearest whole percentage shall be known as the utilization ratio.

17. In § 978.51 (a) add subparagraph (3) as follows:

(3) The price for Class I milk otherwise computed pursuant to this section shall be increased 46 cents from May 1956 through June 1956 and 26 cents for the month of July 1956.

[F. R. Doc. 56–5071: Filed, June 26, 1956; 8:54 a. m.]

## FEDERAL COMMUNICATIONS COMMISSION

### [ 47 CFR Part 2 ]

[Docket No. 11745; FCC 56–577]

### RADIO ASTRONOMY

### INTERFERENCE PROTECTION

In the matter of amendment of Part 2 of the Commission's rules and regulations to give interference protection to frequencies utilized for Radio Astronomy.

1. Notice is hereby given of proposed rule making in the above entitled matter.

2. On April 21, 1955, the Commission released a public notice entitled "Radio-Astronomy Frequency Requirements" requesting comments from interested persons as to the frequency requirements and operational aspects involved in the science of radio astronomy. Concurrently with the Commission's release, the Executive Branch of the Government requested comments on the same subjects from interested Government agencies.

3. The consolidated requirements which were submitted to the Commission and the Government are shown in tabular form below. This includes a list of frequencies and frequency bands which, radio astronomers indicate, could ideally be reserved for interference-free reception at all locations where observations are now made or may be made in the future. This also includes a list of locations where radio astronomy observations are now being made or are planned to be made and a list of agencies responsible therefor. However, more recent information indicates that radio astronomy interests place more emphasis upon the protection of so called "line frequences" and subharmonics thereof than upon the other frequencies shown below.

4. The Commission considers that in effect any proposal to reserve frequencies for radio astronomy observations constitutes a proposal for an amendment of the Commission's Table of Frequency Allocations. If such a reservation were to be made, not only the Table of Frequency Allocations but also many of the rules governing the various services would require amendment so as to protect from interference to radio astronomy the frequencies or frequency bands so reserved.

5. The Commission has continued to study the subject of radio astronomy frequency requirements in cooperation with the Executive Department of the Federal Government. The results of this study indicate that it is not feasible to provide the complete interference protection desired and shown below. On the other hand, there is some reason to believe that it may be practicable to give a certain amount of protection to the so-called "line frequencies" of 327 Mc, 1420 Mc and 1667 Mc. providing the mechanics of doing so can be set up and administered.

6. Short of an exclusive frequency allocation for radio astronomy it should be pointed out that the extent to which interference protection may be afforded is related very closely to the problems involved in applying special procedures in license processing. If frequencies are reserved in any way whatsoever solely for radio astronomy purposes, the radio services which are now allocated such frequencies will, in effect, lose the utility of such frequencies to the extent such reservation or allocation is made.

7. In the case of radio astronomy observations below 50 Mc, the existence of sky wave interference becomes such that protection of particular frequencies is not only a nation-wide but also a world-wide problem. Thus, without an international agreement, the protection of such frequencies by the United States would not, in itself, insure interference-free radio astronomy observations. With respect to general radio astronomy observations above 50 Mc, it appears that there is every likelihood, in any one area, that many many frequencies will remain unassigned for years to come. With the possible exception of "line frequencies" and subharmonics thereof, radio astronomy observatories should plan on utilizing equipment covering many different frequency bands and make their choice of frequencies to be observed on the basis of known frequency occupancy by radio stations.

8. It is understood that efforts are now being made to choose a national radio astronomy observation site which is relatively free of manmade interference of all kinds. The problem of ensuring interference protection increases in direct proportion to the number of observing sites and may be exceedingly difficult at locations as populous as some of those indicated in the Appendix. Radio astronomy interests should take these factors into consideration when supplying comments in connection with this proceeding.

9. The Commission does not have before it sufficient information upon which to form even a tentative opinion as to the relative public interest aspects of radio astronomy compared with radiocommunications services. Neither has the Commission perceived at this moment any practical method by which the protection of radio astronomy observations could be administered on an engineered basis. In the light of present information available, it would appear that ensuring protection on such a basis would mean that every proposed radio station assignment in every radio service, both Government and non-Government, would require an engineering analysis to determine whether interference to any frequency being observed at any radio astronomy observation site would occur if the station were to be authorized. The Commission emphasizes that such a procedure departs materially from that being now accomplished in connection with non-Government radio station licensing and it is difficult to see how it could be accomplished within the present Commission organization.

10. In view of the foregoing it appears that short of exclusive frequency allocations, the only method of providing interference protection to radio astronomy observations would be to:

A. Determine the maximum interfering signal which can be tolerated on a frequency being observed for radio astronomy purposes.

B. Determine the percentage of time protection is required for radio astronomy purposes. (This should take into account both propagation phenomena and feasibility of establishing limited hours of observation at particular sites.)

C. Determine the actual locations where radio astronomy observations will be made and the actual frequency or frequency bands which will be observed at those locations.

D. From the information obtained as the result of (A), (B), and (C) above, establish the area, surrounding each location, in which the making of radio station assignments on each of the subject frequencies or frequency bands may, as a practical matter, result in interference to radio astronomy observations. It is recognized that the size of the areas may vary depending upon the frequencies being considered.

E. Amend the appropriate Commission rules so as to delete from availability for new station assignments the subject frequencies or frequency bands in the areas concerned.

F. Permit the continued operation of stations already established in these areas on the subject frequencies or frequency bands. In the case of TV bands, locations and frequencies shown in the Commission's geographical assignment plan will be considered as active assignments even though the frequencies may not yet be in use at those locations. If interference occurs to radio astronomy observations from the operation of such stations, handle each problem as a separate matter.

11. Although the minimum requirements for radio astronomy have not been firmly established, the Commission is of the opinion that the protection of the "line frequencies" of 327 Mc, 1420 Mc and 1667 Mc and the four "subharmonics" of these frequencies at the locations currently using these frequencies, as shown below, may be in the public interest. From the best information obtainable it appears that this would involve the protection of the following bands:

| | *Frequency bands* | *Present allocation* |
|---|---|---|
| A. | (1) 327 Mc=325–329 Mc | 325–328.6 G.<br>328.6–329 G/NG—glide path. |
| | (2) ½ Frequency=162.5–164.5 Mc | G. |
| | (3) ⅓ Frequency=108.6–109.6 Mc | G/NG—Localizers and omni-directional ranges. |
| B. | (1) 1420 Mc+7 Mc−20 Mc=1400–1427 Mc | G/NG—Aeronautical Radionavigation. |
| | (2) ½ Frequency=708–712 | NG—TV B/C. |
| | (3) ⅓ Frequency=472–476 | NG—TV B/C. |
| C. | (1) 1667 Mc±5 Mc=1662–1672 Mc | G/NG Meteorological aids (radiosonde). |

12. The Commission desires comments with respect to the procedure outlined in paragraph 10 above including comments as to the overall practicability of providing for interference protection through the application of this procedure.

13. The Commission also desires comments with respect to the application of this procedure to the frequency bands outlined in paragraph 11 above.

14. Comments are also requested on the following matters:

A. What location, if any, can be agreed upon as a national "Observation post" for "line frequencies" and other frequencies?

B. From the point of view of radio frequency communications users, does the reservation of frequencies appear to be a practical solution if applied to the specific locations shown below?

C. From the point of view of radio astronomy interests, what are the factors which would make the establishment of one or more centralized radio astronomy sites, remotely located in nonpopulous areas, impractical or inappropriate?

D. What mechanism or procedure other than that described in paragraph 10 would be appropriate for insuring that protection could be afforded to radio astronomy observatory sites?

E. In the event the procedure described in paragraph 10 were to be followed, what are the maximum signal strengths which can be tolerated on the frequencies to be observed? State the factors in-

volved in the determination thereof. Further, what would be the percentage of time protection would be required. State the factors involved in the determination thereof. (The determination of percentages should take into account both propagation phenomena and the feasibility of establishing limited hours of observation at particular sites.)

F. At what distances should transmitters with the following effective radiated powers be removed from radio astronomy observatory sites in order to produce field strengths not in excess of those specified in paragraph 14 (E) above?

| *Radiated power (watts)* |
|---|
| 1 |
| 10 |
| 100 |
| 1,000 |
| 10,000 |
| 100,000 |
| 1,000,000 |
| 10,000,000 |

G. What are the public need and interest aspects of radio-astronomy which justify the reservation of frequencies for this purpose?

15. In the event the Commission should find that an amendment to its Table of Frequency Allocations, for accommodating radio-astronomy, is in the public interest it will be necessary to also amend these other parts of the Commission's rules and regulations which govern the services allocated the frequencies or frequency bands being protected.

16. This proceeding is instituted pursuant to the authority of sections 4 (i) and 303 (c), (d), (f), (g) (r) of the Communications Act of 1934, as amended.

17. Any interested person who is of the opinion that the proposition of affording interference protection to radio-astronomy observation sites is not in the public interest, may file with the Commission on or before Sept. 28, 1956, written data, views or arguments setting forth his comments. Comments in support of the proposed amendment may also be filed on or before the same date. Comments in reply to the original comments may be filed within 10 days from the last day for filing said original data, views or arguments. No additional comments may be filed unless (1) specifically requested by the Commission or (2) good cause for the filing of such additional comments is established. The Commission will consider all such comments prior to taking final action in this matter, and if comments are submitted warranting oral argument, notice of the time and place of such oral argument will be given.

18. In accordance with the provisions of § 1.764 of the Commission's rules and regulations, an original and 14 copies of all statements, briefs or comments filed shall be furnished the Commission.

Adopted: June 20, 1956.

Released: June 22, 1956.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
*Secretary.*

## [ 47 CFR Part 9 ]

[Docket No. 11746; FCC 56–578]

### AVIATION SERVICES

### WAIVER OF RADIO OPERATOR REQUIREMENT FOR OPERATION OF AIRBORNE RADIONAVIGATION TRANSMITTERS

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. It is proposed to amend Part 9 of the Commission's rules governing Aviation Services to exempt members of flight crews from all operator requirements insofar as they apply to the operation of weather radar, radio altimeter, transponder equipment and related airborne radionavigation aids. In this connection, flight crew members concerned with the operation of radio apparatus aboard aircraft are usually holders of either Restricted Radiotelephone Operator Permits or Aircraft Radiotelephone Operator Authorizations, neither of which authorize the operation of radionavigation transmitting equipment employing non-telephony types of emission.

3. Since airborne radionavigation aids of the type under consideration are fully automatic in operation, and are not designed to permit adjustment or repair in flight, there appears to be no operational justification for retention of the existing requirement that such equipment be operated only by persons holding first or second class radiotelephone or radiotelegraph operator licenses.

4. The proposed amendment is issued under authority contained in section 318 of the Communications Act of 1934, as amended.

5. Any interested person who is of the opinion that the proposed amendment should not be adopted, or should not be adopted in the form set forth herein, may file with the Commission on or before August 15, 1956, written data, views or arguments setting forth his comments. Comments in support of the proposed amendment may also be filed on or before the same date. Rebuttal comments may be filed within 10 days from the last day for the filing of original comments. No additional comments may be filed unless (1) specifically requested by the Commission, or (2) good cause for the filing of such additional comments is established. The Commission will consider all such comments prior to taking final action in this matter, and if comments are submitted warranting oral argument, notice of the time and place of such oral argument will be given.

6. In accordance with § 1.764 of the Commission's rules, an original and 14 copies of all statements, briefs or comments shall be furnished the Commission.

Adopted: June 20, 1956.

Released: June 22, 1956.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
*Secretary.*

Amend Part 9, rules governing Aviation Services, as follows:

Add new § 9.314 to read as follows:

§ 9.314 *Operator requirements.* Radio stations aboard aircraft shall be operated only by persons holding the appropriate grade of commercial radio operator license or permit as prescribed by Part 13 of this chapter (Commercial Radio Operators): *Provided, however,* That no operator license is required for flight personnel concerned with the operation of weather radar, radio altimeter, transponder and related radionavigation aids: *Provided further,* That such persons may not supervise or be responsible for the adjustment, maintenance or testing of such equipment while radiating radio energy.

[F. R. Doc. 56–5080; Filed, June 26, 1956; 8:57 a. m.]

## DEPARTMENT OF COMMERCE

### Federal Maritime Board and Maritime Administration

## [ 46 CFR Part 201 ]

[Gen. Order 41, 2d Rev., Amdt. 4]

### RULES OF PRACTICE AND PROCEDURE

### NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Federal Maritime Board and the Maritime Administration have under consideration various proposed changes in their present rules of practice and procedure. The present rules are fully set forth in General Order 41, 2d Revision (18 F. R. 3716), as amended (18 F. R. 4598, 19 F. R. 2143, and 19 F. R. 5399). The miscellaneous amendments covering the proposed changes are as follows:

1. Subpart L is hereby changed to read "Depositions and Discovery," and a new § 201.211 added at the end thereof to read as follows:

§ 201.211 *Discovery and production of documents.* Upon motion of any party showing good cause therefor and upon notice to all other parties, the Board or presiding officer may direct any party to produce and permit the inspection and copying or photographing, by or on behalf of the moving party, of any designated documents, papers, books, accounts, letters, photographs, objects, or tangible things, not privileged, which constitute or contain evidence relating to any matter, not privileged, which is relevant to the subject matter involved in the pending proceeding, and which are in his possession, custody or control. The order shall specify the time, place, and manner of making the inspection and taking the copies and photographs and may prescribe such terms and conditions as are just.

2. Section 201.221 *Briefs; request for findings* is hereby amended to read as follows:

§ 201.221 *Briefs; request for findings.* The presiding officer shall fix the time for filing briefs and any enlargement thereof. The period of time allowed, subject to the provisions of § 201.102, shall be the same for all parties unless the presiding officer, for good cause shown, directs otherwise. The parties may not file more than one brief except in unusual cases. Briefs shall be served upon all parties pursuant to Subpart H of this part. In investigations instituted on the Board's own motion, the presiding officer may require Public Counsel to file a request for findings of fact and conclusions within a reasonable time prior to the filing of briefs. Service of the request shall be in accordance with the provisions of Subpart H of this part. In addition to the ordinary summary of evidence, with reference to exhibit numbers and pages of the transcript, and statement of law with appropriate citations of the authorities relied upon, the brief shall contain proposed findings of fact and conclusions in serially numbered paragraphs. Briefs, including briefs in support of exceptions and replies thereto (§§ 201.228 and 201.299), shall be limited to a maximum of fifty (50) printed pages.

All persons (including individuals, corporations, associations, firms, partnerships, and public bodies) having an interest in the proposed rules may submit written comments with reference to any or all of said rules to the Federal Maritime Board, Washington 25, D. C., within 15 days after publication of this notice in the FEDERAL REGISTER.

(Sec. 204, 49 Stat. 1987, as amended; 46 U. S. C. 1114)

Dated: June 22, 1956.

By order of the Federal Maritime Board/Maritime Administrator.

[SEAL] GEO. A. VIEHMANN,
*Assistant Secretary.*

## GENERAL SERVICES ADMINISTRATION

[Project 3–DC–01]

### FEDERAL OFFICE BUILDINGS

### PROSPECTUS FOR PROPOSED BUILDINGS IN SOUTHWEST REDEVELOPMENT AREA OF DISTRICT OF COLUMBIA

EDITORIAL NOTE: This prospectus of proposed Project Number 3–DC–01 is published pursuant to section 412 (f) of the Public Buildings Purchase Contract Act of 1954 as amended by Public Law 150, 84th Congress, which requires publication in the FEDERAL REGISTER, for a period of ten consecutive days from date of submission to the Committees on Public Works of the Senate and House of Representatives.

Project Number 3–DC–01 (Revised)

MARCH 14, 1956.

FORMAL PROSPECTUS FOR PROPOSED BUILDING UNDER TITLE I PUBLIC LAW 519, 83D CONGRESS, 2D SESSION

FEDERAL OFFICE BUILDING, WASHINGTON, D. C.

1. *Brief description of proposed building.* The project contemplates the erection of a group of three Federal Office Buildings on a site to be acquired by the Government facing on the proposed Tenth Street Mall in the southwest redevelopment area of Washington, D. C. Each building will be multistoried. An aggregate of approximately 643,000 square feet of net assignable space will be provided.

2. *Estimated maximum cost and financing.* a. Maximum cost of site and buildings, $25,250,000.

b. Proposed contract term, 30 years.

c. Maximum rate of interest on purchase contract, 4 percent.

3. *Certificates of need.* As the project is intended to provide relocation of numerous Federal agencies now in temporary buildings, no specific allocation of space can be made at this time. Upon completion of the facility, assignment and reassignment will be made in accordance with existing law. Therefore, requirement for Certificate of Need otherwise required by section 411 (e) of the Public Buildings Purchase Contract Act of 1954 was waived in Public Law 150, 84th Congress. Certification is hereby made as to the need for service and garage space.

4. *Non-availability of existing space.* Suitable space owned by the Government is not available; and suitable rental space is not available at a price commensurate with that to be afforded through the contract proposed.

5. *Estimated annual managerial, custodial, heat, and utility costs.* (Services to be supplied by Government), $675,000.

6. *Estimated annual tax liability, upkeep and maintenance.* a. Taxes, post construction (contract period), $321,625.

b. Upkeep and maintenance (to be provided by Government), $96,000.

7. *Current annual housing costs.* Rents and other housing costs currently paid by the Government for agencies to be housed in the building to be erected, $509,000 p. a.

*Determination of need.* It has been determined that (1) the needs for space for the permanent activities of the Federal Government in this particular area cannot be satisfied by utilization of any existing suitable property now owned by the Government, and (2) the best interests of the United States will be served by taking action hereunder.

Submitted at Washington, D. C., on June 1, 1956.

Approved:

FRANKLIN G. FLOETE,
*Administrator of General Services.*

8. *Statement of Director, Bureau of the Budget.* Reflected in letter (copy attached).

EXECUTIVE OFFICE OF THE PRESIDENT

BUREAU OF THE BUDGET

WASHINGTON 25, D. C.

JUNE 13, 1956.

Project 3-DC-01 (Revised 3-14-56).
3 Multi-storied Federal Office Buildings.
Southwest Redevelopment Area, Washington, D. C.

MY DEAR MR. FLOETE: Pursuant to section 411 (e) (8) of the Public Buildings Purchase Contract Act of 1954 (Public Law 519), the (Revised March 14, 1956) proposal for a group of three Federal Office Buildings, transmitted with your letter of June 1, 1956, has been examined and in my opinion "is necessary and in conformity with the policy of the President." This approval is given with the following understanding:

1. Revision reflects the application of more definite plans for integration of the facility with the proposed Tenth Street Mall developed subsequent to approval of the project last July. Effective integration requires construction of three building units in lieu of one, as originally proposed. Garage space of 134,250 square feet not contemplated in original project is provided. Number of employees, utilization of space and cost factors are relatively the same.

2. That the stated project cost of $25,250,000 (including $2,500,000 for a site to be acquired) is a maximum figure.

3. That the reported annual operating cost of existing Tempos 4, 5, and T; i. e., $1.00 per square foot, represents minimum maintenance in anticipation of demolition, and that temporary Government buildings actually cost more to maintain than the proposed new buildings.

4. That the proposed buildings will house approximately 10% of Federal employees presently housed in temporary buildings, and that the specific allocation of agencies in the proposed buildings is to be determined later by General Services Administration.

5. That every effort will be made to design and construct space conducive to maximum efficient utilization of both site and buildings and to take advantage of any revision of cost downward which may be found possible as the plans develop and negotiations are advanced.

6. That this approval supersedes Mr. Hughes' letter of July 22, 1955.

You appreciate, of course, that this project will receive a more detailed review as to cost and space utilization prior to the approval of the lease-purchase agreement.

Sincerely yours,

(Signed) PERCIVAL BRUNDAGE,
*Director.*

Hon. FRANKLIN G. FLOETE,
*Administrator,*
*General Services Administration,*
*Washington 25, D. C.*

## DEPARTMENT OF COMMERCE

### Civil Aeronautics Administration

[Amdt. 10]

### AVIATION SAFETY DISTRICT OFFICES AND INTERNATIONAL DISTRICT AND FIELD OFFICES

#### ORGANIZATION AND FUNCTIONS

In accordance with the public information requirements of the Administrative Procedure Act, the description of Organization and Functions of the Civil Aeronautics Administration is hereby amended. The purpose of this amendment is to publish revised addresses for certain Aviation Safety District Offices, to publish the areas served by the various international district and field offices, and to publish the areas of responsibility assigned to certain domestic regions for the investigation of accidents outside the continental limits of the United States.

1. Section 22 (b) as published on September 14, 1954 in 19 F. R. 5957 is revised by deleting the tables of addresses contained therein and inserting a new address list as follows:

SEC. 22. *Aviation Safety District Offices.* • • •

## Office of the Secretary

ERNST COHN ET AL.

ORDER TEMPORARILY SUSPENDING PREVIOUS ORDER DENYING EXPORT PRIVILEGES

In the matter of Ernst Cohn, Herbert James Philippi, N. V. Amsterdamsche Maatschappij voor Industrie en Handel—"Hydrocarbon," 384 Herengracht, Amsterdam, C, Netherlands, Respondents; Appeals Board Docket FC-21, B. F. C. Case No. 168.

Ernst Cohn, Herbert James Philippi, and N. V. Amsterdamsche Maatschappij voor Industrie en Handel—"Hydrocarbon", heretofore having been denied export privileges for a period of five years commencing December 28, 1953 (19 F. R. 37, January 1, 1954); and said order denying export privileges having been affirmed by the Appeals Board of the Department of Commerce (19 F. R. 4694, July 30, 1954); and the respondents, pursuant to the leave granted them by the Appeals Board in its order of affirmance, having applied to the Bureau of Foreign Commerce for relief from the denial order, giving assurances that they would not again violate United States export control regulations; and respondents' application having been referred to the Compliance Commissioner of the Bureau of Foreign Commerce, who has reviewed all previous proceedings heretofore had herein and numerous communications received from the respondents; and the Compliance Commissioner having recommended that these respondents be given another opportunity to demonstrate by actual performance the truth of their numerous assertions of intention to comply with all United States export control regulations; and the Director of the Office of Export Supply, having concurred in said recommendation and referred this matter to the Appeals Board, in accordance with the order of the Appeals Board, dated July 26, 1954; and the Appeals Board having reopened this appeal for the purpose of determining to what extent, if any, the period of denial of license privileges should be reduced and having concluded that respondents should be given another opportunity to participate in exports from the United States, solely as a matter of grace and in the exercise of discretion: *It is hereby ordered:*

That until a further order is entered herein all export privileges heretofore denied to the respondents by the order dated December 28, 1953 (19 F. R. 37), shall be restored to the respondents on June 28, 1956, but such restoration of export priveleges, otherwise denied to them under the said order dated December 28, 1953, may be revoked at any time and without notice of any kind if the Director of the Office of Export Supply or such other officer as may at that time be exercising the duties now performed by him, deems such action to be advisable or necessary to achieve effective enforcement of the Export Control Act of 1949, as amended, such revocation to be effective upon the entry of such an order by said officer.

Dated: June 11, 1956.

FREDERIC W. OLMSTEAD,
*Chairman, Appeals Board.*

# DEPARTMENT OF AGRICULTURE

## Office of the Secretary

IDAHO

DESIGNATION OF AREA FOR PRODUCTION EMERGENCY LOANS

For the purpose of making production emergency loans pursuant to section 2 (a) of Public Law 38, 81st Congress (12 U. S. C. 1148a-2 (a)), as amended, it has been determined that in Boundary County, Idaho, a production disaster has caused a need for agricultural credit not readily available from commercial banks, cooperative lending agencies, or other responsible sources.

Pursuant to the authority set forth above, production emergency loans will not be made in the above-named county after June 30, 1957, except to applicants who previously received such assistance and who can qualify under established policies and procedures.

Done at Washington, D. C., this 22d day of June 1956.

[SEAL] TRUE D. MORSE,
*Acting Secretary.*

[F. R. Doc. 56-5073; Filed, June 26, 1956; 8:54 a. m.]

UTAH

DISASTER ASSISTANCE; DELINEATION OF DROUGHT AREA

Pursuant to Public Law 875, 81st Congress, the President determined on June 15, 1956, that a major disaster occasioned by drought existed in the State of Utah.

Pursuant to the authority delegated to me by the Administrator, Federal Civil Defense Administration (18 F. R. 4609; 19 F. R. 2148, 5364; 20 F. R. 4664), and for the purposes of section 2 (d) of Public Law 38, 81st Congress, as amended by Public Law 115, 83d Congress, and section 301 of Public Law 480, 83d Congress, Washington County, Utah, was determined on June 15, 1956, to be affected by the above-mentioned major disaster.

Done at Washington, D. C., this 22d day of June 1956.

[SEAL] EZRA TAFT BENSON,
*Secretary.*

[F. R. Doc. 56-5050; Filed, June 26, 1956; 8:49 a. m.]

# ATOMIC ENERGY COMMISSION

[Docket No. F-23]

NUCLEAR DEVELOPMENT CORP. OF AMERICA

NOTICE OF ISSUANCE OF CONSTRUCTION PERMIT

Please take notice that the Atomic Energy Commission has issued the construction permit set forth below to the Nuclear Development Corporation of America, White Plains, New York. In accordance with the procedures set forth in the Commission's rules of practice (10 CFR Part 2), the Commission will direct the holding of a formal hearing upon timely receipt of a request therefor from the applicant or an intervenor.

*Construction permit, No. CPCX-3.* The Nuclear Development Corporation of America, White Plains, New York (hereinafter "NDA") on March 5, 1956 filed its application for license under section 104 c. of the Atomic Energy Act of 1954 (hereinafter "the act") to construct and operate a critical experiment facility (hereinafter "the facility"). Amendments to the application were filed on April 13 and May 10, 1956. The original application together with said amendments are hereinafter referred to as "the application".

The Atomic Energy Commission (hereinafter the "Commission") has found that:

(A) The facility will be a utilization facility as defined in the Commission's regulations contained in 10 CFR, Chapter I, Part 50, "Licensing of Production and Utilization Facilities".

(B) NDA proposes to utilize the facility in the conduct of research and development activities of the types specified in section 31 of the Atomic Energy Act of 1954.

(C) NDA is technically qualified to design and construct the facility.

(D) NDA has submitted sufficient information to provide reasonable assurance that the facility can be constructed and operated at the proposed location without undue risk to the health and safety of the public.

Pursuant to the Atomic Energy Act of 1954 and 10 CFR, Chapter I, Part 50, "Licensing of Production and Utilization Facilities," the Commission hereby issues a construction permit to NDA to construct the facility as a utilization facility. This permit shall be deemed to contain and be subject to the conditions specified in §§ 50.54 and 50.55 of said regulations; is subject to all applicable provisions of the Atomic Energy Act of 1954 and rules, regulations and orders of the Atomic Energy Commission now or hereafter in effect; and is subject to any additional conditions specified or incorporated below.

(1) The earliest date for the completion of the facility is July 1, 1956. The latest date for completion of the facility is September 1, 1956.

(2) The site proposed for the location of the facility is the location in Pawling, New York, specified in report NDA-3130-1, "Compilation of Data on Environmental Factors Affecting Nuclear Experimental Station Operations".

(3) The general type of facility authorized for construction is a critical experiment facility designed primarily for testing reactor cores at near zero power levels using uranium enriched in the isotope uranium 235 in the fuel elements.

(4) At such time as this Construction Permit is converted into a license to operate the facility, such license will incorporate—as one of its conditions—a requirement that no critical experiment may be conducted in the facility until a description of the experiment and a hazards evaluation report shall have been submitted to the Commission and the Commission shall have specifically authorized the experimental activity.

(5) Upon completion of the construction of the facility in accordance with the terms and conditions of this permit, upon the filing of any additional information needed to bring the original application up to date, and upon finding that the facility authorized has been constructed in conformity with the application as amended and in conformity with the provisions of the act and of the rules and regulations of the Commission, and in the absence of any good cause being shown to the Commission why the granting of a license would not be in accordance with the provisions of the act, the Commission will issue a Class 104 license to NDA pursuant to section 104 c. of the act, which license shall expire ten (10) years after the date of this construction permit.

Dated at Washington, D. C., this 19th day of June 1956.

Date of issuance: June 11, 1956.

For the Atomic Energy Commission.

H. L. PRICE,
*Director,*
*Division of Civilian Application.*

[F. R. Doc. 56-5037; Filed, June 26, 1956; 8:47 a. m.]

[Docket No. F-17 etc.]

AMF ATOMICS, INC., ET AL.

NOTICE OF APPLICATIONS FOR UTILIZATION FACILITY LICENSES

Take notice that the following companies have filed applications for licenses to construct, possess and operate utilization facilities under the indicated sections of the Atomic Energy Act of 1954:

Docket No. F-17, AMF Atomics, Inc., 261 Madison Avenue, New York, New York, on January 12, 1956, filed an application for a license under section 104c of the Atomic Energy Act of 1954 to construct, possess and operate a nuclear reactor to be located at Plainsboro, New Jersey.

Docket No. F-15, Applied Nucleonics Corporation, 1210 Springbrook Road, Walnut Creek, California, on December 20, 1955, filed an application for a license under section 104c of the Atomic Energy Act of 1954 to construct, possess and operate a nuclear reactor to be located at Walnut Creek, California. On May 28, 1956 the application was resubmitted by Aerojet-General Nucleonics, 1529 Cypress Avenue, Walnut Creek, successors to Applied Nucleonics Corporation.

Docket No. F-13, The Babcock & Wilcox Co., 161 E. 42d Street, New York, New York, on October 27, 1955, filed an application for a license under section 104c of the Atomic Energy Act of 1954 to construct, possess and operate a critical experiment facility to be located near Lynchburg, Virginia. A permit authorizing construction of the facility was issued on December 9, 1955.

Docket No. F-14, Battelle Memorial Institute, 505 King Avenue, Columbus 1, Ohio, on October 28, 1955, filed an application for a license under section 104c of the Atomic Energy Act of 1954 to construct, possess and operate a critical experiment facility to be located at West Jefferson, Ohio. A permit authorizing construction of the facility was issued on December 28, 1955.

Docket No. F-25, The Dow Chemical Company, Midland, Michigan, on January 31, 1956, filed an application for a license under section 104b of the Atomic Energy Act of 1954 to construct, possess

and operate a nuclear reactor to be located at Midland, Michigan.

Docket No. F–19, Ford Motor Company, 3000 Shaefer Road, Dearborn, Michigan, on January 17, 1956, filed an application for a license under section 104c of the Atomic Energy Act of 1954 to construct, possess and operate a nuclear reactor to be located at Dearborn, Michigan.

Docket No. F–24, General Electric Company, 1 River Road, Schenectady 5, New York, on March 27, 1956, filed an application for a license under section 104c of the Atomic Energy Act of 1954 to construct, possess and operate a critical experiment facility to be located at Vallecitos Laboratory Site, Alameda County, California.

Docket No. F–23, Nuclear Development Corporation, 5 New Street, White Plains, New York, on March 14, 1956, filed an application for a license under section 104c of the Atomic Energy Act of 1954 to construct, possess and operate a critical experiment facility to be located near Pawling, New York.

Docket No. F–16, Power Reactor Development Co., 1100 Dime Building, Detroit 26, Michigan, on January 7, 1956, filed an application for a license under section 104b of the Atomic Energy Act of 1954 to construct, possess and operate a nuclear reactor to be located in Frenchtown Township, Monroe County, Michigan.

Docket No. F–21, The Prosperity Co., Inc., Syracuse 1, New York, on March 6, 1956, filed an application for a license under Section 104c of the Atomic Energy Act of 1954 to construct, possess and operate a nuclear reactor to be located at University of Miami Campus, Coral Gables, Florida.

Docket No. F–22, Westinghouse Electric Corporation, P. O. Box 355, Pittsburgh 30, Pennsylvania, on March 12, 1956, filed an application for a license under section 104c of the Atomic Energy Act of 1954 to construct, possess and operate a nuclear reactor to be located in Westmoreland County, Pennsylvania.

Docket No. F–22, Westinghouse Electric Corporation, P. O. Box 355, Pittsburgh 30, Pennsylvania, on March 12, 1956, filed an application for a license under section 104c of the Atomic Energy Act of 1954 to construct, possess and operate a critical experiment facility to be located in Westmoreland County, Pennsylvania.

Dated at Washington, D. C., this 5th day of June 1956.

For the Atomic Energy Commission.

H. L. PRICE,
*Director, Division of Civilian Application.*

[Docket No. F–1]

ARMOUR RESEARCH FOUNDATION

NOTICE OF ISSUANCE OF FACILITY LICENSE

Please take notice that the Atomic Energy Commission has issued the facility license set forth below to Armour Research Foundation of Illinois Institute of Technology, Chicago, Illinois. In accordance with the procedures set forth in the Commission's rules of practice (10 CFR Part 2), the Commission will direct the holding of a formal hearing upon timely receipt of a request therefor from the applicant or an intervenor.

*License, No. R–3.* 1. Subject to the conditions and requirements incorporated herein, the Atomic Energy Commission hereby licenses the Armour Research Foundation of the Illinois Institute of Technology, Chicago, Illinois (hereinafter referred to as "the Foundation"),

(a) Pursuant to section 104 c. of the Atomic Energy Act of 1954 (hereinafter referred to as "the act"), and 10 CFR, Chapter I, Part 50, "Licensing of Production and Utilization Facilities," to possess and operate as a utilization facility the nuclear reactor (hereinafter referred to as "the facility") designated below;

(b) Pursuant to the act and 10 CFR, Chapter I, Part 70, "Special Nuclear Materials Regulations," to receive, possess and use:

(1) 1,300 grams of contained uranium 235 in uranyl sulfate solution as fuel for operation of the facility;

(2) 3.5 grams of contained uranium 235 in neutron measuring instruments incorporated in the facility.

(c) Pursuant to the act and 10 CFR, Chapter 1, Part 30, "Licensing of By-Product Material," to possess but not to separate from the fuel (except such separation as may be incident to sampling tests required from time to time in the operation of the reactor), such special nuclear and by-product material as may be produced from operation of the reactor.

2. This license applies to the nuclear reactor which is owned by the Foundation and located at Chicago, Illinois, and described in the Foundation's application dated January 7, 1955.

3. This license shall be deemed to contain and be subject to the conditions specified in § 50.54 of Part 50 and § 70.32 of Part 70; is subject to all applicable provisions of the Atomic Energy Act of 1954 and rules, regulations and orders of the Atomic Energy Commission now or hereafter in effect, including the proposed "Standards For Protection Against Radiation" regulation (10 CFR Part 20) published in the FEDERAL REGISTER July 15, 1955; and is subject to any additional conditions specified or incorporated below.

4. The conditions and requirements contained in Appendix A, set forth below, are a part of this license.

5. This license is effective as of the date of issuance and shall expire at midnight, March 28, 1965, unless sooner terminated.

Dated at Washington, D. C., this 19th day of June, 1956.

Date of issuance: June 12, 1956.

For the Atomic Energy Commission.

H. L. PRICE,
*Director,*
*Division of Civilian Application.*

APPENDIX A

I. *Operating restrictions.* a. The Foundation shall operate the reactor in accordance with the procedures described in its application dated January 7, 1955, and supporting documents transmitted by the Foundation on April 5 and June 7, 1956.

b. The Foundation shall not by-pass any control mechanism during the operation of the facility.

c. The Foundation shall not operate the reactor at power levels in excess of 10 kilowatts without previous authorization from the Commission.

d. The fuel loading in the reactor will be such that the excess reactivity above cold, clean critical will not exceed 1.66%.

II. *Records.* In addition to those otherwise required under this license, the Foundation shall keep the following records:

a. Reactor operating records, including power levels.

b. Record of in-pile irradiations.

c. Records showing radioactivity released or discharged into the air or water beyond the effective control of the Foundation as measured at the point of such release or discharge.

d. Records of emergency reactor scrams, including reasons for emergency shutdowns.

III. *Reports.* The Foundation shall make a prompt report to the Commission of any unusual operating incident of the reactor.

## CIVIL AERONAUTICS BOARD

[Docket No. 7454 et al.]

SEVEN STATES AREA INVESTIGATION

NOTICE OF HEARING

Notice is hereby given, pursuant to the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a), 401, 1001 and 1002 (b) of the act, that a hearing in the above-entitled proceeding is assigned to be held on July 17, 1956, at 10:00 a. m., c. s. t., in the Paxton Hotel, 14th and Farnam Streets, Omaha, Nebraska, before Examiner Curtis C. Henderson.

For further details relative to this proceeding, interested parties are referred to the Hearing Examiner's report of prehearing conference served March 13, 1956, supplemental report of prehearing conference served April 13, 1956, and the applications heretofore consolidated into this proceeding by the Board's consolidation order, No. E–10100, adopted March 20, 1956, order granting motions for consolidation, No. E–10197, adopted April 13, 1956, order broadening investigation, No. E–10317, adopted May 24, 1956, and the docket in this proceeding on file in the Docket Section of the Civil Aeronautics Board.

Without limiting the scope of the issues presented in this proceeding, particular attention will be directed to the following matters:

I. With respect to the disposition of applications for certificates of public convenience and necessity and amendments thereto which have been consolidated into this proceeding, the issues may be stated as follows:

A. Do the public convenience and necessity require the whole or any part of the air service proposed by the application? If required, should the authority

be permanent or temporary, and if the latter, for what period?

B. Is the applicant a citizen of the United States as defined in section 1 (13) of the act?

C. Is the applicant fit, willing and able to perform properly the transportation requested in its application, and to conform to the provisions of the act and the requirements of the Board thereunder?

II. With respect to the disposition of applications for air service filed by or on behalf of cities, the issues may be stated as follows:

Do the public convenience and necessity require the whole or any part of the air service proposed by the application? If required, by what carrier or carriers should the service be provided?

III. With respect to the disposition of applications for suspension, transfer or elimination of existing authority held by a carrier, the issues may be stated as follows:

Do the public convenience and necessity require the alteration, amendment or modification of the certificate of the carrier now providing the service so as to suspend, transfer or eliminate said carrier's authority to serve the point in question?

For further details of issues involved in this proceeding, interested persons are referred to the applications and amendments thereto, petitions, motions, and orders entered in the docket of this proceeding, all of which are on file with the Civil Aeronautics Board.

Notice is further given that any person not a party of record desiring to be heard in support of or in opposition to questions involved in this proceeding must file with the Board on or before July 17, 1956, a statement setting forth the matters of fact or law which he desires to controvert. Any person filing such a statement may appear and participate in the hearing in accordance with the provisions of Rule 14 of the Board's rules of practice.

Dated at Washington, D. C., June 20, 1956.

[SEAL] FRANCIS W. BROWN.
*Chief Examiner.*

[F. R. Doc. 56–5069; Filed, June 26, 1956; 8:53 a. m.]

---

[Docket No. 2396 et al.]

EASTERN AIR LINES, INC., ET AL.; GREAT LAKES-SOUTHEAST SERVICE CASE

NOTICE OF HEARING

In the matter of Eastern Air Lines, Inc., and other applicants for certificates or amendments to certificates of public convenience and necessity in the consolidated proceeding known as the Great Lakes-Southeast Service Case.

Notice is hereby given, pursuant to the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a) and 401 of the said act and the applicable regulations thereunder, that a hearing involving all civic parties in the above-entitled proceeding is assigned to be held on July 23, 1956, at 10:00 a. m., e. d. s. t., in Conference Room B, Departmental Auditorium, Constitution Avenue, between Twelfth and Fourteenth Streets NW., Washington, D. C., before Examiner William F. Cusick. Upon completion of the presentations by the civic parties, the hearing will recess and will reconvene at a time and place to be announced for the presentations by all of the applicants.

For further details regarding this proceeding, interested parties are referred to the Board's Orders Nos. E–9734 and E–10043, the report of the prehearing conferences in this matter served June 30, 1955, and the docket in this proceeding on file in the Docket Section of the Civil Aeronautics Board.

Without limiting the precise scope of the issues, particular attention will be directed to the following matters and questions:

(1) Whether the public convenience and necessity require the amendment of existing certificates of public convenience and necessity or the issuance of new certificates to any of the applicants that are parties to this proceeding?

(2) Are the applicants fit, willing and able to conduct the proposed air transportation and to conform to the provisions of the act and the regulations of the Board thereunder?

Notice is further given that any person not a party of record desiring to be heard in support of or in opposition to questions involved in this consolidated proceeding must file with the Board on or before July 23, 1956, a statement setting forth the matters of fact or law which he desires to advance. Any person filing such a statement may appear at the hearing in accordance with Rule 14 of the Board's rules of practice in economic proceedings.

Dated at Washington, D. C., June 20, 1956.

[SEAL] FRANCIS W. BROWN,
*Chief Examiner.*

## FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 11683; FCC 56M–609]

WCHS–TV, INC.

ORDER RESCHEDULING HEARING

In re application of WCHS–TV, Inc., Charleston, West Virginia, Docket No. 11683, File No. BMPCT–3392; for modification of construction permit (Channel 8).

The Hearing Examiner having under consideration a petition filed June 13, 1956, by WCHS–TV, Inc., requesting that the hearing now scheduled for July 16, 1956, be rescheduled to July 11, 1956; and

It appearing that there is no opposition to the requested change and that the proposed July 11, 1956, hearing date is satisfactory to all parties;

*It is ordered*, This the 20th day of June 1956 that the hearing in the above-entitled proceeding now scheduled to commence on July 16, 1956, is rescheduled and will begin July 11, 1956.

FEDERAL COMMUNICATIONS COMMISSION,

SAN JOAQUIN BROADCASTING CO. (KSTN)

ORDER CONTINUING HEARING

In re application of San Joaquin Broadcasting Company (KSTN), Stockton, California, Docket No. 11700, File No. BP–10208; for construction permit.

The Hearing Examiners having under consideration a petition of the applicant herein, filed June 19, 1956, requesting that the hearing upon its application be continued from June 29, 1956 to July 16, 1956;

It appearing that all parties are engaged in engineering studies with a view to resolving the questions raised in the issues governing the proceeding and the expectation is that such questions will be resolved within the next several weeks;

It appearing further that, in view of the studies presently in progress, it would be inadvisable to proceed with the hearing as presently scheduled;

It appearing further that all parties to the proceeding consent to the granting of the instant pleading and to a waiver of the provisions of § 1.745 of the rules to permit immediate consideration thereof;

*It is ordered*, This 20th day of June 1956, that the petition is granted to the extent that it requests a continuance of the hearing in the above-entitled proceeding; *And it is further ordered*, On the Hearing Examiners' own motion, that the said hearing is continued to a date which will be specified by subsequent order.

SAFETY AND SPECIAL RADIO SERVICES BUREAU

CHANGE IN ORGANIZATION

In the matter of amendment of Part 0 of the Commission's rules to reflect certain changes in the organization of the Safety and Special Radio Services Bureau.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 20th day of June 1956;

The Commission having under consideration the abolition of the Authorization Analysis Division and the Industry and Commerce Division of the Safety and Special Radio Services Bureau and the establishment of a new Industrial Division and a new Land Transportation Division in that Bureau; and

It appearing that the amendments adopted herein would promote greater efficiency in Commission operations;

*It is ordered,* That, pursuant to sections 4 and 5 of the Communications Act of 1934, as amended, effective July 2, 1956, the Authorization Analysis Division and the Industry and Commerce Division of the Safety and Special Radio Services Bureau are abolished and an Industrial Division and a Land Transportation Division are hereby established. The functions and personnel of the Authorization Analysis Division are transferred to the offices of the Bureau Chief and the several service divisions.

*It is further ordered,* That the Chief of the Safety and Special Radio Services Bureau may transfer such personnel, equipment and records as he may deem necessary in his discretion, from the Authorization Analysis Division and the Industry and Commerce Division, in order to effectively carry out the changes herein ordered.

*It is further ordered,* That effective July 2, 1956, Part 0 of the Commission's rules and regulations is amended as set forth below.

Released: June 22, 1956.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
*Secretary.*

1. Section 0.63 is amended as follows:

Change paragraph (e) to read "The Industrial Division".

Change paragraph (f) to read "The Land Transportation Division".

2. Section 0.64 is amended to read as follows:

SEC. 0.64 *The Office of the Bureau Chief.* The Office of the Chief of the Bureau is composed of the immediate offices of the Chief and Assistant Chief of the Bureau and the Law, Enforcement, and Procedures Office, which performs legal work affecting the Bureau as a whole, advises the Chiefs of Divisions on legal matters of unusual complexity, executes special assignments for the Chief of the Bureau in respect to matters of a legal, policy or legislative character, reviews and coordinates the procedures of the Bureau and is responsible for planning and executing the enforcement program of the Bureau.

3. Section 0.65 is amended to read as follows:

SEC. 0.65 *Aviation Division.* The Aviation Division is responsible for all functions indicated in the statement contained in 0.61, in so far as such functions pertain to aviation radio and safety matters, except for enforcement matters (0.64).

4. Section 0.66 is amended to read as follows:

SEC. 0.66 *Marine Division.* The Marine Division is responsible for all functions indicated in the statement contained in 0.61 in so far as such functions pertain to marine radio and safety services, to scheduled weather transmission, and to the Alaskan services, except for enforcement matters (0.64).

5. Section 0.67 is amended to read as follows:

SEC. 0.67 *Industrial Division.* The Industrial Division is responsible for all functions indicated in the statement contained in section 0.61 in so far as such functions pertain to industrial radio services, except for enforcement matters (0.64).

6. Section 0.68 is amended to read as follows:

SEC. 0.68 *Public Safety and Amateur Division.* The Public Safety and Amateur Division is responsible for all functions indicated in the statement contained in 0.61 in so far as such functions pertain to the public safety and amateur services, except for enforcement matters (0.64).

7. Section 0.69 is amended to read as follows:

SEC. 0.69 *Land Transportation Division.* The Land Transportation Division is responsible for all functions indicated in the statement contained in section 0.61 in so far as such functions pertain to the land transportation and citizens radio services, except for enforcement matters (0.64).

[F. R. Doc. 56-5088; Filed, June 26, 1956; 8:58 a. m.]

## FEDERAL POWER COMMISSION

[Docket Nos. G-9262, G-9960]

HOUSTON TEXAS GAS AND OIL CORP. AND COASTAL TRANSMISSION CORP.

ORDER CONSOLIDATING PROCEEDINGS, GRANTING INTERVENTIONS, DENYING INTERVENTIONS, PROVIDING MODE OF PROCEDURE AND FIXING DATE OF HEARING

Houston Texas Gas and Oil Corporation (Houston), a Delaware corporation with its principal place of business at 4604 South Main Street, Houston, Texas, filed on August 26, 1955, its application, as amended and supplemented on October 27, 1955, February 10, 16 and 24, 1955, in Docket No. G-9262, for a certificate of public convenience and necessity pursuant to Section 7 of the Natural Gas Act, authorizing it to construct and operate natural-gas pipe-line facilities for the transportation and sale of natural gas from a point near Baton Rouge, Louisiana in interstate commerce to public communities, public utilities and other markets in the State of Florida.

Coastal Transmission Corporation (Coastal), a Delaware corporation with its principal place of business located at 1921 Commerce Building, Houston, Texas, filed on February 8, 1956, an application in Docket No. G-9960 for a certificate of public convenience and necessity pursuant to the Natural Gas Act, authorizing it to construct and operate certain natural-gas pipe-line facilities for the transportation and sale of natural gas in interstate commerce, from a point near Hidalgo, Texas, to a point at or near the east bank of the Mississippi River in East Baton Rouge, Louisiana, which gas will be sold by Houston in accordance with its application for a certificate of public convenience and necessity above referred to.

The applications, amendments and supplements filed in Docket Nos. G-9262 and G-9960 appear to present issues of fact and law which are in part common to both, and therefore, in the public interest to consolidate the proceedings for the purpose of hearing. Notice of the filing of the applications was published in the FEDERAL REGISTER on March 6, 1956 (21 F. R. 1456-7). The time for filing protests and petitions for leave to intervene in accordance with the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) expired on March 28, 1956, the date fixed in the above-published notice.

Notice of interventions by State Commissions, and petitions seeking leave to intervene in the above-entitled matters were filed as hereinafter indicated:

[Docket No. G-9262]

*Date and Petitioner*

October 3, 1955—Jacksonville Chamber of Commerce.
November 9—Atlantic Coast Line Railroad Company and Louisville and Nashville Railroad Co.
March 14, 1956—Superior Oil Company.
March 21—Southern Natural Gas Company.
March 21—Orlando Utilities Commission.
March 21—Florida Public Utilities Company.
March 22—Colonial Natural Gas Corporation.
March 26—Florida Development Commission.
March 26—West Florida Gas and Fuel Company.
March 26—Sanford Gas Company.
March 26—Florida Home Gas Company.
March 26—Ocala Gas Company.
March 26—Southern Gas & Electric Corporation.
March 26—City of Leesburg, Florida.
March 26—City of St. Petersburg.
March 26—South Atlantic Gas Company.
March 26—Putnam Gas and Fuel Company.
March 26—Triangle Gas Company.
March 26—Minute Maid Corporation.
March 26—South Georgia Natural Gas Company.
March 27—City of Starke, Florida.
March 27—Gainesville Gas Company.
March 27—City of Lake City, Florida.
March 27—W. R. Grace & Company, Davidson Chemical Company Division.
March 27—City of Madison, Florida.
March 27—Peoples Water and Gas Company; The Tampa Gas Company.
March 27—City of Lakeland, Florida.
March 27—Central Florida Gas Corporation.
March 27—City of Plant City, Florida.
March 27—City of Lake Alfred, Florida.
March 27—Notice of Intervention of the Public Service Commission of the State of New York.
March 27—Florida Economic Advisory Council.
March 27—Trans-Gulf Transmission Corporation.
March 28—City of Avon Park, Florida.
March 28—City of Clearwater, Florida.
March 28—City of Fort Pierce, Florida.
March 28—City of Tallahassee, Florida.
March 28—Buckeye Cellulose Corporation.
March 28—Rayonier Incorporated.
March 28—International Paper Company.
March 28—International Minerals & Chemical Corp.
March 28—City of Blountstown, Florida.
March 28—Florida Power Corporation.
March 28—City of Green Cove Springs, Florida.
March 28—City of New Smyrna Beach, Florida.
March 28—City of Auburndale, Florida.
March 28—Hudson Pulp & Paper Corp.
March 28—City of Okeechobee, Florida.
March 28—City of Jasper, Florida.
March 28—Florida Power & Light Company.
March 28—Public Service Electric and Gas Company.
March 29—Jackson-Holmes-Gadsden-Washington Counties Gas District; The Geneva County Gas District, Alabama; The City of Perry, Florida.
March 28—Philadelphia Electric Company.
March 28—Joint Petitions of: The East Ohio Gas Company, Hope Natural Gas Company, New York State Natural Gas Corporation, and The Peoples Natural Gas Company.
March 28—Trunkline Gas Company.
March 28—Container Corporation of America.
March 29—City of Live Oak, Florida.
March 29—Town of Frostproof, Florida.
March 27—United Gas Improvement Company.
March 28—Florida' State Chamber of Commerce.
March 28—Natural Gas Company of Florida.
March 28—Florida Liquefied Petroleum Gas Association.
March 28—Green's Fuel, Inc.
March 28—Jacksonville Gas Corporation.
March 30—Notice of intervention of The Florida Railroad and Public Utilities Commission.
April 2—St. Marys Kraft Corporation.
March 28—Georgia Coastal Natural Gas Corporation.
April 9—Sebring Utilities Commission.
April 10—Brooklyn Union Gas Company.

[Docket No. G-9960]

March 14, 1956—Superior Oil Company.
March 21—Southern Natural Gas Company.
March 21—Florida Public Utilities Company.
March 22—Colonial Natural Gas Corporation.
March 22—Atlantic Coast Line Railroad Company.
March 26—South Georgia Natural Gas Company.
March 27—Gainesville Gas Company.
March 27—Peoples Water and Gas Company; Tampa Gas Company.
March 27—Notice of Intervention of The Public Service Commission of the State of New York.
March 27—Florida Economic Advisory Council.
March 27—Trans-Gulf Transmission Corporation.
March 28—City of Jasper, Florida.
March 28—Florida Power & Light Company.
March 28—The Public Service Electric and Gas Company.
March 28—Jackson-Holmes-Gadsden-Washington Counties Gas District; Geneva County Gas District, Alabama; City of Perry, Florida.
March 28—Philadelphia Electric Company.
March 28—The East Ohio Gas Company, Hope Natural Gas Company, New York State Natural Gas Corporation, and The Peoples Natural Gas Company.
March 28—Trunkline Gas Company.
March 29—City of Live Oak, Florida.
March 27—United Gas Improvement Company.
March 28—Florida State Chamber of Commerce.
March 28—Natural Gas Company of Florida.
March 28—Florida Liquefied Petroleum Gas Association.
March 28—Green's Fuel, Inc.
March 28—Georgia Coastal Natural Gas Corporation.
March 28—Jacksonville Gas Corporation.
April 10—Brooklyn Union Gas Company.

The Public Service Commission of the State of New York filed notice of intervention in Docket Nos. G-9262 and G-9660 on March 27, 1956. The Florida Railroad and Public Utilities Commission filed notice of intervention in Docket No. G-9262 on March 30, 1956. It appears to be in the public interest to allow the late filing of notice of intervention by the Florida Railroad and Public Utilities Commission, and late petitions for leave to intervene by St. Marys Kraft Corporation, The Town of Frostproof, Florida, and The City of Live Oak, Florida.

The petitions for leave to intervene filed by Colonial Natural Gas Corporation (Colonial), Trans-Gulf Transmission Corporation (Trans-Gulf), and Georgia Coastal Natural Gas Corporation (Georgia Coastal) in Docket Nos. G-9262 and G-9960, reflect that the Petitioners propose to file at some future date applications for certificates of public convenience and necessity, which will,

if, and when filed, present issues of law and fact substantially similar to the issues presently presented by the application filed in Docket No. G–9262 by Houston Texas Gas and Oil Corporation, and by the application filed in Docket No. G–9960 by Coastal Transmission Corporation. A statement of a proposal to file a competing application does not warrant the granting of a petition for leave to intervene. Such petition should be denied. There will be opportunity for such petitioner to file another petition for leave to intervene, if and when, a competing application is in fact filed, and a showing is made therein of a proper and existing interest of such nature as to justify the Commission to weigh factual situations and determine whether the named Applicant is in fact making application for a certificate of public convenience and necessity authorizing the construction and operation of facilities, and the rendering of service to substantially the same market areas. At this time it does not appear to be appropriate, nor in the public interest to grant leave to intervene to Colonial Natural Gas Corporation, Trans-Gulf, Transmission Corporation, and Georgia Coastal Natural Gas Corporation in Docket Nos. G–9262 and G–9960.

Analysis of the petitions for leave to intervene filed herein by the following parties reveals that the interest of the said parties are limited to certain particular issues of law and fact presented by the applications of Houston and Coastal. In the interest of time and orderly procedure it appears appropriate to limit the participation of said parties in the said consolidated proceedings to the points of law and fact pertinent and material to the matters of fact alleged to be of interest and of importance to the respective petitioners. The Commission pursuant to § 1.8 (b) (2) will therefore grant limited participation to each of the following named petitioners and permit participation only as to the issues identified therewith, and set forth as follows:

(1) Southern Natural Gas Company, to issues involving alleged invasion of market areas by Houston.

(2) South Georgia Natural Gas Company, to issues involving alleged necessity for additional supplies of natural gas proposed to be obtained from Houston, if available.

(3) Trunkline Gas Company, to issues involving its natural gas reserves and gas supplies alleged to be affected by the proposals of Coastal.

(4) Atlantic Coast Line Railroad Company, and Louisville and Nashville Railroad Company to issues involving proposed markets to be served by Houston, and the effect and impact, if any, of the introduction of natural gas into such areas upon the fuel oil and coal tonnage transported by said petitioners, and revenues realized by petitioners from the transportation of such tonnage into such market areas.

Public Service Electric and Gas Company, Philadelphia Electric Company, United Gas Improvement Company, The Brooklyn Union Gas Company, The East Ohio Gas Company, Hope Natural Gas Company, New York State Natural Gas Corporation and The Peoples Natural Gas Company assert that the pricing provisions in contracts of applicants with producers may adversely affect the price which their respective supplier natural-gas companies may have to pay for natural gas which may therefore ultimately be reflected in the rate to be charged by such natural-gas companies to each petitioner.

We recognize the desire of distribution companies throughout the United States to assure to themselves adequate supplies of natural gas at the lowest reasonable rate. Petitioners assertions here as warranting granting intervention in these proceedings, however, presuppose, inter alia, complete abnegation by us of our duties to regulate rates at which independent producers sell natural gas to transmission companies and failure by us to be alive to the protection of the public interest.

Clearly, the interest asserted, based as it is upon assumption and conjecture regarding events which may never occur, is not immediate or substantive and does not require allowance of intervention. We conclude, therefore, that, in the premises, such petitions do not reflect an interest which moves us in our discretion to allow interventions. Accordingly, these petitions to intervene will be denied.

The applications of Houston and Coastal, and the amendments and supplements thereto and the revision of the project of Houston as indicated by its letter of May 2, 1956, and the numerous interventions granted hereby, present complex issues of law and fact. In view of the complexity of issues so presented it appears to be in the public interest, and appropriate, to provide in this order the manner in which the various basic phases of the Applicants proposals should be presented. Subject to change by the Commission the Applicants direct presentation of evidence shall be made in the following enumerated order:

1. Gas reserves and availability thereof to Coastal.
2. Gas reserves and availability thereof to Houston, if any.
3. Market studies and surveys of Houston including those of supporting interveners, with evidence of economic and engineering feasibility of interveners.
4. Engineering phase of Coastal's proposals.
5. Cost, economics and rate phases of Coastal's proposals.
6. Financing phase of Coastal's proposals.
7. Engineering phase of Houston's proposals.
8. Cost, economics and rates of Houston's proposals.
9. Financing phase of Houston's proposals.

At the conclusion of the direct presentation of matters relating to the proposals of Coastal and Houston the hearings shall be recessed to such future date as deemed expedient for the purpose of granting the Staff and Interveners sufficient time in which to prepare for cross-examination of Applicants' witnesses, preferably in the order in which presented or directed.

The Commission finds:

(1) The public interest does not require granting the petitions to intervene of Colonial, Trans-Gulf, Georgia Coastal, Public Service Electric and Gas Company, Philadelphia Electric Company, United Gas Improvement Company, The Brooklyn Union Gas Company, The East Ohio Gas Company, Hope Natural Gas Company, New York State Natural Gas Corporation and The Peoples Natural Gas Company.

(2) It is appropriate and in the public interest to consolidate the above-captioned proceedings for purpose of hearing.

(3) It is appropriate and in the public interest, in carrying out the provisions of the Natural Gas Act, that these proceedings be set for hearing and be heard in accordance with the procedure hereinbefore outlined and as ordered herein.

The Commission orders:

(A) The petitions of Colonial, Trans-Gulf, Georgia Coastal, Public Service Electric and Gas Company, Philadelphia Electric Company, United Gas Improvement Company, The Brooklyn Union Gas Company, The East Ohio Gas Company, Hope Natural Gas Company, New York State Natural Gas Corporation and The Peoples Natural Gas Company to intervene in these proceedings be and the same are hereby denied.

(B) Except as provided in paragraph (A) of this order, the persons above named be and the same are hereby permitted to become intervenors in these proceedings subject to the rules and regulations of the Commission: *Provided, however,* That participation of such intervenors shall be limited to matters affecting asserted rights and interests specifically set forth in the petitions for leave to intervene: *Provided, further,* That participation of Southern Natural Gas Company shall be limited to matters involving alleged invasion of market areas of Houston; that participation by Southern Georgia Natural Gas Company shall be limited to issues involving alleged necessity for additional supplies of natural gas proposed to be obtained from Houston if available and that participation by Trunkline Gas Company shall be limited to issues involving the alleged impact upon its natural gas reserves and gas supplies by the proposals of Coastal: *And provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they or any of them might be aggrieved because of any order or orders of the Commission entered in these proceedings.

(C) The proceedings in the caption hereof are hereby consolidated for the purpose of hearing.

(D) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Natural Gas Act, particularly by sections 7, 14, 15, and 16 thereof, and the Commission's general rules and regulations (18 CFR Chapter I), a public hearing be held commencing on July 9, 1956, at 10:00 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented in these proceedings.

Issued: June 21, 1956.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 56–5058; Filed, June 26, 1956; 8:51 a. m.]

[Docket No. G–10122]

CONTINENTAL OIL CO.

NOTICE OF APPLICATION AND DATE OF HEARING

JUNE 21, 1956.

Take notice that Continental Oil Company (Applicant), a Delaware corporation with principal place of business at 1300 Main Street, Houston, Texas, filed, on March 19, 1956, an application for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, authorizing Applicant to render service as hereinafter described, subject to the jurisdiction of the Commission, all as more fully represented in the application which is on file with the Commission and open for public inspection.

Applicant proposes to sell natural gas in interstate commerce from production of certain leases in the West Delta Area (offshore), Plaquemines Parish, Louisiana, to Tennessee Gas Transmission Company for resale.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held on Monday, July 23, 1956, at 9:30 a. m., e. d. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street, NW., Washington, D. C., concerning the matters involved in and the issues presented by such application: *Provided, however,* That the Commission may, after a noncontested hearing, dispose of the proceedings pursuant to the provisions of § 1.30 (c) (1) or (2) of the Commission's rules of practice and procedure. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before July 10, 1956. Failure of any party to appear at and participate in the hearing shall be construed as waiver of and concurrence in omission herein of the intermediate decision procedure in cases where a request therefor is made.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 56–5057; Filed, June 26, 1956; 8:50 a. m.]

[Project No. 2203]

ALABAMA POWER CO.

NOTICE OF APPLICATION FOR PRELIMINARY PERMIT

JUNE 20, 1956.

Public notice is hereby given that application has been filed under the Federal Power Act (16 U. S. C. 791a–825r) by Alabama Power Company of Birmingham, Alabama, for preliminary permit for proposed water power Project No. 2203 to be located on the Black Warrior River approximately 5 miles upstream from the City of Tuscaloosa in the County of Tuscaloosa, State of Alabama, affecting navigable waters of the United States and lands of the United States at proposed redeveloped United States Lock and Dam No. 13. The proposed project would consist of an intake structure, tunnel, powerhouse and tailrace at the proposed redeveloped United States Lock and Dam No. 13. The power generated would be fed into the applicant's transmission and distribution system to help in supplying the increasing demand for power throughout the area which the applicant serves in the State of Alabama. The preliminary permit, if issued, shall be for the sole purpose of maintaining priority of application for a license under the terms of the Federal Power Act for the proposed project.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure of the Commission (18 CFR 1.8 or 1.10). The last day upon which protests or petitions may be filed is July 26, 1956. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 56–5047; Filed, June 26, 1956; 8:49 a. m.]

[Project No. 2042]

PUBLIC UTILITY DISTRICT NO. 1 OF PEND OREILLE COUNTY

NOTICE OF LAND WITHDRAWAL; WASHINGTON

JUNE 21, 1956.

By letter dated March 21, 1950, this Commission gave notice to the Bureau of Land Management of the reservation of approximately 1,205.09 acres of land of the United States pursuant to the filing of an application for preliminary permit by the Public Utility District No. 1 of Pend Oreille County on February 6, 1950.

On February 7, 1952 this Commisison issued license (Major) to the Public Utility District No. 1 for the Box Canyon, Project No. 2042. The license as amended and supplemented by revised Exhibits "K" maps filed August 11, 1953, includes within the project area, as delimited on the revised maps, 168.78 acres of land of the United States which includes 147.30 acres are National Forest land, of which 7.76 acres (parts of Lots 6 and 7 Section 3, T. 35 N., R. 43 E.) were acquired by Soil Conservation Service and subsequently transferred to the Forest Service for administration.

In accordance with the provisions of section 24 of the Act of June 10, 1920, notice is hereby given that the lands hereinafter described are included in the aforesaid power project as licensed. Under said section 24, these lands are reserved from entry, location or other disposal under the laws of the United States until otherwise directed by the Commission or by Congress, the previous withdrawal notice being hereby modified and superseded.

WILLAMETTE MERIDIAN, WASHINGTON

Those portions of the following subdivisions lying within the project boundary as shown upon amendatory maps designated Exhibits K 1 to 9 inclusive (FPC. 2042–12 to 20 inclusive) entitled "Box Canyon Power Project, Public Utility District No. 1 of Pend Oreille County, Newport, Washington" filed August 11, 1953.

T. 35 N., R. 43 E.,
Sec. 3, Lots 6 and 7;
Sec. 12, Lot 1;
T. 36 N., R. 43 E.,
Sec. 15, Lots 5 and 8;
Sec. 22, Lot 1;
T. 37 N., R. 43 E.,
Sec. 33, Lots 1, 4, 5, and 8;
T. 38 N., R. 43 E.,
Sec. 19, Lot 6;
Sec. 20, Lots 1, 2, 3, and 7;
Sec. 29, Lots 2, 4, 5 and 8;
Sec. 32, Lots 1, 2, 3, and 4;
T. 35 N., R. 44 E.,
Sec. 7, Lot 4;
Sec. 19, Lots 1, 2, 6 and 7;
Sec. 20, Lot 3;
Sec. 29, Lots 1, 4 and 5.

All of the above land have been heretofore reserved in connection with either earlier application for this Project (No. 2042) or Project No. 44, Power Site Classification No. 109, or Power Site Reserve Nos. 72, 639, and 408.

Copies of each of map sheets F. P. C. Nos. 2042–12 to 2042–20, inclusive (K maps 1 to 9 inclusive), have been transmitted to the Bureau of Land Management, Forest Service and Geological Survey.

## OFFICE OF DEFENSE MOBILIZATION

THOMAS R. REID

APPOINTEE'S STATEMENT OF CHANGES IN BUSINESS INTERESTS

The following statement lists the names of concerns required by subsection 710 (b) (6) of the Defense Production Act of 1950, as ammended.

As of February 1, 1956 I own relatively small holdings of shares of stock in the following corporations:

1. Ford Motor Company.
2. Reynolds Metals Company.

This amends statement previously published in the FEDERAL REGISTER December 31, 1955 (20 F. R. 10177).

Dated: February 1, 1956.

THOMAS R. REID.

[F. R. Doc. 56–5051; Filed, June 26, 1956; 8:49 a. m.]

RALPH S. TRIGG

APPOINTEE'S STATEMENT OF CHANGES IN BUSINESS INTERESTS

The following statement lists the names of concerns required by subsection 710 (b) (6) of the Defense Production Act of 1950, as amended.

I am not a director, officer, owner or partner in any corporations, partnerships or other businesses.

I own a few shares of stock in the following corporations:

1. Graham Paige Motors.
2. National City Lines.
3. Studebaker-Packard.
4. Delhi-Taylor Oil Company.
5. Col-U-Mex Uranium Company.
6. Tasha Oil and Uranium Company.

The above indicates no changes in the original submission of Form ODM-163 dated December 15, 1955.

This amends statement previously published in the FEDERAL REGISTER December 31, 1955 (20 F. R. 10184).

Dated: May 22, 1956.

RALPH S. TRIGG.

GEORGE LILYGREN

APPOINTEE'S STATEMENT OF CHANGES IN BUSINESS INTERESTS

The following statement lists the names of concerns required by subsection 710 (b) (6) of the Defense Production Act of 1950, as amended.

Financial interests as of February 1, 1956:
Aerofin Corporation, Director.
Air Reduction Co., Stockholder.
Ame. Tel. and Tel., Bondholder.
Ame. Viscose, Stockholder.
British Petroleum, Stockholder.
Canadian Pacific, Bondholder.
Carrier Corporation, Stockholder and Officer.
Cluett Peabody, Stockholder.
Continental Can, Stockholder.
El Paso Nat. Gas, Stockholder.
General Telephone, Stockholder.
Hooker Electrochemical, Stockholder.
Int. Business Machines, Stockholder.
May Dept. Stores, Stockholder.
Merck & Co., Stockholder.
Missouri Pacific, Bondholder.
NY Power Auth., Bondholder.
Pioneer Nat. Gas, Stockholder.
Pure Oil, Stockholder.
Socony Vacuum, Stockholder.
Southwest. Pub. Serv., Stockholder.
Std. Oil of N. J., Stockholder.
Sunray Mid-Cont. Oil, Stockholder.
Union Oil of Cal., Bondholder.
Syracuse Land Develop. Co., Director.

The following are the changes since June 1, 1955, the date of original submission of ODM-163.

Additions:
Ame. Tel. & Tel.
British Petroleum
General Telephone
Sunray Mid-Cont. Oil
Syracuse Land Develop. Co.

Deletions:
Carrier-Centrax, Inc.
Gen. Motors Accept. Corp.
Northern Natural Gas
Public Service El. & Gas
Standard Accident Insurance

This amends statement previously published in the FEDERAL REGISTER December 31, 1955 (20 F. R. 10187).

Dated: February 1, 1956.

GEORGE LILYGREN.

## SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3481]

OHIO POWER CO.

ORDER GRANTING APPLICATION REGARDING ISSUANCE OF SHORT-TERM NOTES

JUNE 21, 1956.

Ohio Power Company ("Ohio Power"), a public-utility subsidiary of American Gas and Electric Company, a registered holding company, having filed an application, pursuant to the first and second sentences of section 6 (b) of the Public Utility Holding Company Act of 1935 ("act"), regarding the following proposed transactions:

Pursuant to a credit agreement with the seven banks named below, Ohio Power proposes to borrow, from time to time prior to December 31, 1956, an aggregate amount not to exceed $31,000,000 as follows:

| | |
|---|---|
| Irving Trust Co., New York, N. Y. | $5,450,000 |
| Mellon National Bank & Trust Co., Pittsburgh, Pa. | 5,450,000 |
| First National City Bank of New York, N. Y. | 5,450,000 |
| Manufacturers Trust Co., New York, N. Y. | 5,450,000 |
| Guaranty Trust Co., New York, N. Y. | 3,100,000 |
| The Hanover Bank, New York, N. Y. | 3,100,000 |
| Bankers Trust Co., New York, N. Y. | 3,000,000 |
| Total | 31,000,000 |

Of the $31,000,000 proposed to be borrowed, $2,500,000, which was borrowed as of May 15, 1956, plus additional proposed borrowings aggregating $14,500,000, are exempt by the provisions of the first and second sentences of section 6 (b) of the act. Accordingly, approval is being requested for further proposed additional borrowings in amounts not to exceed an aggregate of $14,000,000.

Each proposed borrowing is to be evidenced by a note maturing 270 days after the date of the borrowing, and is to bear interest at the current prime credit rate effective on the date of such borrowing. The notes are to be prepayable in whole or in part without premium. All bank loan notes outstanding at the time of the next permanent financing, presently expected to be effected prior to December 31, 1956, are to be paid from the proceeds of such financing.

The proceeds from the proposed borrowings are to be used to pay part of the costs of Ohio Power's 1956 construction program, estimated at $67,170,000.

No finders' fees or commissions are to be paid; and no legal or other fees, commissions or expenses are to be paid, except the routine charges for the services of American Gas and Electric Service Corporation, the system's mutual service company, and incidental expenses estimated at not to exceed $100.

No State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Due notice of the filing of the application having been given in the manner prescribed by Rule U-23 promulgated under the act, and no hearing having been requested of, or ordered by, the Commission; and the Commission observing no basis for adverse findings, or for the imposition of any terms and conditions; and the Commission finding that the applicable provisions of the Act and of the Rules and Regulations thereunder are satisfied, and deeming it appropriate in the public interest and in the interest of investors and consumers that the application be granted forthwith:

*It is ordered*, Pursuant to section 6 (b) of the act and Rule U-23 thereunder, that the application be, and it hereby is, granted forthwith, so that the borrowing permitted by the first and second sentences of section 6 (b) is hereby increased to $31,000,000 principal amount, the authorization for such increase to terminate on December 31, 1956.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

## UNITED STATES TARIFF COMMISSION

[Investigation 50]

WOMEN'S AND GIRLS' COTTON BLOUSES

APPLICATION FOR INVESTIGATION WITHDRAWN, DISCONTINUED AND DISMISSED, AND PUBLIC HEARING CANCELED

The National Association of Blouse Manufacturers, Inc., New York, N. Y., has withdrawn its application for an investigation under section 7 of the Trade Agreements Extension Act of 1951, as amended, with respect to women's and girls' cotton blouses. For this and other reasons, the Commission, on the 22d day of June, discontinued and dismissed the investigation instituted on February 21, 1956, and canceled the public hearing ordered in connection with the investigation for August 21, 1956. Announcement of the said investigation and hearing was made in 21 F. R. 1281.

Issued: June 22, 1956.

By order of the Commission.

[SEAL] DONN N. BENT, *Secretary.*

[F. R. Doc. 56-5074; Filed, June 26, 1956; 8:55 a. m.]

[Investigation 55]

VIOLINS AND VIOLAS

INVESTIGATION INSTITUTED AND PUBLIC HEARING ORDERED

*Investigation instituted.* Upon application of Jackson-Guldan, Inc., 165 West Main St., Columbus, Ohio, received June 19, 1956, the United States Tariff Commission, on the 22d day of June 1956, under the authority of section 7 of the Trade Agreements Extension Act of 1951, as amended, and section 332 of the Tariff Act of 1930, instituted an investigation to determine whether violins and violas, of all sizes, wholly or partly manufactured or assembled, made after the year 1800, provided for in paragraph 1541 (b) of the Tariff Act of 1930 are, as a result in whole or in part of the duty or other customs treatment reflecting concessions granted thereon under the General Agreement on Tariffs and Trade, being imported into the United States in such increased quantities, either actual or relative, as to cause or threaten serious injury to the domestic industry producing like or directly competitive products.

*Hearing ordered.* A public hearing in this investigation was ordered by the Tariff Commission to begin at 10 a. m. e. d. s. t., on September 6, 1956, in the Hearing Room of the Tariff Commission, 8th and E Streets NW., Washington, D. C., at which hearing all interested parties will be given opportunity to be present, to produce evidence, and to be heard.

*Requests to appear at hearing.* Interested parties desiring to appear and give testimony at the hearing should notify the Secretary of the Commission, in writing, at least three days in advance of the date of the hearing.

*Inspection of application.* The application filed in this case is available for public inspection at the office of the Secretary, United States Tariff Commission, 8th and E Streets NW., Washington, D. C., and in the New York office of the Tariff Commission, located in Room 437 of the Custom House, where it may be read and copied by persons interested.

Issued: June 22, 1956.

By order of the Commission:

[SEAL] DONN N. BENT, *Secretary.*

[List 17-7]

BADMINTON RACKETS

COMPLAINT RECEIVED

JUNE 22, 1956.

Complaint listed below has been filed with the Tariff Commission for investigation under the provisions of section 337 of the Tariff Act of 1930.

| Name of article | Purpose of request | Date received | Name and address of complainant |
|---|---|---|---|
| Badminton rackets | Exclusion from entry | June 11, 1956 | George A. Allward d. b. a. H & A Manufacturing Co., Lacombe, La. |

The above complaint is available for public inspection at the office of the Secretary, Tariff Commission Building, Eighth and E Streets, N. W., Washington, D. C., and also in the New York Office of the Tariff Commission, located in Room 437 of the Custom House, where it may be read and copied by persons interested.

In accordance with § 203.3 of the Tariff Commission's rules of practice and procedure, the Commission is conducting a preliminary inquiry with respect to the above complaint, for the purpose of determining whether a formal investigation under the provisions of section 337, Tariff Act of 1930, is warranted, and whether the issuance of a temporary order of exclusion from entry under section 337 (f) is warranted. All interested persons having pertinent information to furnish either in favor of or in opposition to the institution of a formal investigation or the issuance of a temporary order of exclusion may submit such information, in writing, to the Secretary of the Commission, furnishing 15 copies.

[SEAL] DONN N. BENT, *Secretary.*

## INTERSTATE COMMERCE COMMISSION

[Notice 118]

MOTOR CARRIER APPLICATIONS

JUNE 22, 1956.

Protests consisting of an original and two copies to the granting of an application must be filed with the Commission within 30 days from the date of publication of this notice in the FEDERAL REGISTER and a copy of such protest served on the applicant. Each protest must clearly state the name and street number, city and street address of each protestant on behalf of whom the protest is filed (49 CFR 1.240 and 1.241). Failure to seasonably file a protest will be construed as a waiver of opposition and participation in the proceeding unless an oral hearing is held. In addition to other requirements of Rule 40 of the general rules of practice of the Commission (49 CFR 1.40), protests shall include a request for a public hearing, if one is desired, and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests containing general allegations may be rejected. Requests for an oral hearing must be supported by an explanation as to why the evidence cannot be submitted in forms of affidavits. Any interested person, not a protestant, desiring to receive notice of the time and place of any hearing, prehearing conference, taking of depositions, or other proceeding shall notify the Commission by letter or telegram within 30 days of publication of this notice in the FEDERAL REGISTER. Except when circumstances require immediate action, an application for approval, under section 210a (b) of the act, of the temporary operations of Motor Carrier properties sought to be acquired in an application under section 5 (2) will not be disposed of sooner than 10 days from the date of publication of this notice in the FEDERAL REGISTER. If a protest is received prior to action being taken, it will be considered.

APPLICATIONS OF MOTOR CARRIERS OF PROPERTY

No. MC 504 Sub 23 (amended), filed June 6, 1956, published on Page 4331 issue of June 20, 1956, LOUIS PATZ, doing business as HARPER MOTOR LINES, 220 North McIntosh Street, Elberton, Ga. Applicant's attorney: Reuben G. Crimm, 805 Peachtree Street Building, Atlanta 5, Ga. For authority to operate as a *common carrier*, over irregular routes, transporting: *Granite*, from Elberton, Ga., and points within 15 miles of Elberton, to points in Iowa and Wisconsin. *Marble* and *granite*, from Canton, Ga., and points within 35 miles of Canton, to points in Iowa and Wisconsin. Applicant is authorized to conduct operations in Delaware, Indiana, Kentucky, Maryland, Michigan, New Jersey, New York, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia, District of Columbia, Georgia, Illinois, North Carolina, South Carolina, and Missouri.

No. MC 635 Sub 51, filed June 8, 1956, MISSOURI-ARKANSAS TRANSPORTATION COMPANY, a corporation, 1505 Maiden Lane, Joplin, Mo. For authority to operate as a *common carrier*, over a regular route, transporting: *General commodities*, except those of unusual value, Class A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between Siloam Springs, Ark., and Jay, Okla., from Siloam Springs, at junction Arkansas Highways 68 and 59, over Arkansas Highway 68 to the Arkansas-Oklahoma State line, thence over U. S. Highway 59 to Jay, and return over the same route, serving no intermediate points, as an alternate route for operating convenience only, in connection with applicant's regular route operations (1) between Gravette, Ark., and Summers, Ark., (2) between Kansas City, Kans., and Fort Smith, Ark., (3) between Joplin, Mo., and Wyandotte, Okla., and (4) between Jay, Okla., and Wyandotte, Okla. Applicant is authorized to conduct operations in Arkansas, Kansas, Missouri, and Oklahoma.

NOTE: Applicant requests that duplicating authority be eliminated.

No. MC 1924 Sub 4, filed May 24, 1956, WALLACE-COLVILLE AUTO FREIGHT, INC., North 14 Grant Street, Spokane, Wash. For authority to operate as a *common carrier*, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, serving (1) points within ten (10) miles of Mullan, Idaho, and (2) points within fifteen (15) miles of Kellogg, Idaho, as intermediate and off-route points in connection with applicant's regular route operations between Spokane, Wash., and Mullan and Burke, Idaho. Applicant is authorized to conduct operations in Idaho and Washington.

NOTE: Applicant has regular route authority to serve points within three (3) miles of Mullan and Kellogg, Idaho, as intermediate and off-route points, in the transportation of *General commodities*, with the above exceptions, and states that the purpose of this application is to extend its authority as described above. All duplicating authority is to be eliminated.

No. MC 4405 Sub 276, filed June 13, 1956, DEALERS TRANSIT, INC., 12601 South Torrence Avenue, Chicago 33, Ill. Applicant's attorney: James W. Wrape, Sterick Building, Memphis, Tenn. For authority to operate as a *common carrier*, over irregular routes, transporting: (a) *Trailers*, except those designed to be drawn by passenger automobiles, in initial movements, by truckaway and driveaway method, from San Francisco, Calif., to all points in California, Washington, Oregon, Wyoming, Idaho, Montana, Utah, Colorado, Nevada, Arizona, and New Mexico, and (b) *Tractors*, other than farm tractors, in secondary movements, by driveaway method, only when drawing trailers moving in initial driveaway movements, from San Francisco, Calif., to points in Arizona, Nevada, and Oregon. Applicant is authorized to conduct operations throughout the United States.

No. MC 6934 Sub 1, filed June 13, 1956, WM. HARGENS, JR., Stickney, S. Dak. Applicant's attorney: R. G. May, 316 Security Bank Building, Sioux Falls, S. Dak. For authority to operate as a *common carrier*, over irregular routes, transporting: *Farm machinery and parts therefor*, when moving with such farm machinery as an integral part thereof; *animal feed, poultry feed*, and *livestock feed; dry fertilizer; livestock* and *grain;* and *damaged shipments* of the above-described commodities, between points in Minnesota, Nebraska, Illinois, and Iowa, on the one hand, and, on the other, points in Aurora and Douglas Counties, S. Dak.

No. MC 8102 Sub 16, filed June 4, 1956, U. L. BROOKS AND JAMES C. PITTS, doing business as CANADIAN TRUCK LINE, 200 North Lincoln, Amarillo, Tex. Applicant's attorney: Francis W. Prosser, 137 North Fountain, Wichita, Kans. For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, (1) Between Liberal, Kans., and Woodward, Okla., from Liberal over U. S. Highway 270 to Forgan, Okla., thence over U. S. Highway 64 to junction of U. S. Highways 64 and 283, thence over U. S. Highway 283 to junction of U. S. Highways 283 and 270, thence over U. S. Highway 270 to Woodward, and return over the same route, serving the intermediate points of Forgan, Mocane, Knowles, Gate, Rosston, May, and Fort Supply; (2) Over a circuitous route beginning and ending at Liberal, Kans., from Liberal over U. S. Highway 270 to junction of U. S. Highway 270 and Oklahoma Highway 15, thence over Oklahoma Highway 15 to the Texas-Oklahoma State line, thence over county road 1265 to junction county road 1265 and Texas Highway 15, thence over Texas Highway 15 to Perryton, and, return from Perryton over U. S. Highway 83 to Liberal, serving the intermediate points of Forgan, Beaver, Elmwood, Booker, Boyd, Gray, and Perryton; (3) Between Liberal, Kans., and Woodward, Okla., from Liberal over U. S. Highway 270 to Woodward, and return over the same route, serving the intermediate points of Forgan, Beaver, Elmwood, Slapout, May, and Fort Supply; (4) Between Liberal, Kans., and Sunray, Tex., from Liberal over U. S. Highway 83 to junction of U. S. Highway 83 and Oklahoma Highway 3, thence over Oklahoma Highway 3 to Hardesty, thence over Oklahoma Highway 3 to junction Oklahoma Highway 3 and unnumbered county road, thence over unnumbered county road to the Oklahoma-Texas State line, thence over Texas Highway 282 to junction of Texas Highway 282 and County Road 1262, thence over County Road 1262 to junction County Road 1262 and Texas Highway 289, thence over Texas Highway 289 to junction Texas Highway 289 and unnumbered county road, thence over unnumbered county road to junction with County Road 1573, thence over County Road 1573 to junction with Texas Highway 119, thence over Texas Highway 119 to Sunray, and return over the same route, serving no intermediate points. Applicant is authorized to conduct operations in Kansas, Oklahoma, and Texas.

No. MC 8681 Sub 42, filed June 8, 1956, WESTERN AUTO TRANSPORTS, INC., 430 South Navajo Street, Denver, Colo. Applicant's attorney: Louis E. Smith, 1800 North Meridian Street, Suite 503, Indianapolis 2, Ind. For authority to operate as a *common carrier*, over irregular routes, transporting: *Trailers, trailer chassis, semitrailers* and *semitrailer chassis*, in initial and secondary movements, in truckaway and driveaway service, from Denver, Colo., to points in the United States, and *damaged shipments* of the above-described commodities on return.

No. MC 8681 Sub 43, filed June 8, 1956, WESTERN AUTO TRANSPORTS, INC., 430 South Navajo Street, Denver, Colo. Applicant's attorney: Louis E. Smith, 1800 North Meridian Street, Suite 503, Indianapolis 2, Ind. For authority to operate as a *common carrier*, over irregular routes, transporting: *Mobile hydraulic hammers, hydraulic drills*, and *ditch diggers*, set up and uncrated, and *parts thereof* when such parts belong to and move with the unit being transported, from Denver, Colo., to points in the United States, and *damaged shipments* of the above-described units on return.

No. MC 8681 Sub 44, filed June 8, 1956, WESTERN AUTO TRANSPORTS, INC., 430 South Navajo Street, Denver, Colo. Applicant's attorney: Louis E. Smith, 1800 North Meridian Street, Suite 503, Indianapolis 2, Ind. For authority to operate as a *common carrier*, over irregular routes, transporting: *Self-propelled street sweepers*, in initial and secondary movements, in truckaway service, from Gardena and Los Angeles, Calif., to points in the United States, and *damaged shipments* of the above-described commodity on return.

No. MC 8681 Sub 45, filed June 8, 1956, WESTERN AUTO TRANSPORTS, INC., 430 South Navajo Street, Denver, Colo. Applicant's attorney: Louis E. Smith, 1800 North Meridian Street, Suite 503, Indianapolis 2, Ind. For authority to operate as a *common carrier*, over irregular routes, transporting: *Truck concrete mixers*, set up, weighing in excess of 3,000 pounds each, from Los Angeles, Calif., to points in the United States, and *damaged shipments* of the above-described commodity on return.

No. MC 8681 Sub 46, filed June 8, 1956, WESTERN AUTO TRANSPORTS, INC., 430 South Navajo Street, Denver, Colo. Applicant's attorney: Louis E. Smith, 1800 North Meridian Street, Suite 503, Indianapolis 2, Ind. For authority to operate as a *common carrier*, over irregular routes, transporting: *Trailers*, in initial movements, in truckaway service, from Selma, Calif., to points in the United States, and *damaged shipments* of the above-described commodity on return movements.

No. MC 8681 Sub 47, filed June 8, 1956, WESTERN AUTO TRANSPORTS, INC., 430 South Navajo Street, Denver, Colo. Applicant's attorney: Louis E. Smith, 1800 North Meridian Street, Suite 503, Indianapolis 2, Ind. For authority to operate as a *common carrier*, over irregular routes, transporting: *Self-propelled construction, earth moving and road building equipment*, set up and uncrated, and *parts thereof* when such parts belong to and move with the unit being transported, from Portland, Oreg., to points in the United States, and *damaged shipments* of the above-described units on return.

No. MC 8681 Sub 48, filed June 8, 1956, WESTERN AUTO TRANSPORTS, INC., 430 South Navajo Street, Denver, Colo. Applicant's attorney: Louis E. Smith, 1800 North Meridian Street, Suite 503, Indianapolis 2, Ind. For authority to operate as a *common carrier*, over irregular routes, transporting: *Lumber*, from points in California, Washington, Oregon, Idaho, and Montana, to points in Colorado, Wyoming, Nebraska, Kansas, North Dakota, South Dakota, Minnesota, Iowa, Missouri, Illinois, and Wisconsin.

No. MC 9325 Sub 7, filed June 11, 1956, K LINES, INC., P. O. Box 577, Coos Bay, Oreg. Applicant's attorney: William B. Adams, Pacific Building, Portland 4, Oreg. For authority to operate as a *common carrier*, over irregular routes, transporting: *Cement*, in bulk, and in packages, from Gold Hill, Oreg., to points in Humboldt County, Calif., and Curry County, Oreg., and *empty containers or other such incidental facilities* (not specified), used in transporting the above-specified commodity on return. Applicant is authorized to conduct operations in California and Oregon.

No. MC 13026 Sub 6, filed May 24, 1956, ARTHUR A. FREDA, doing business as FREDA'S TRUCKING COMPANY, 525 Washington Street, Braddock, Pa. Applicant's attorney: Arthur J. Diskin, 924 Frick Building, Pittsburgh 19, Pa. For authority to operate as a *common carrier*, over irregular routes, transporting: *Brick*, from Baltimore, Md., to points in Allegheny, Beaver, Washington, Westmoreland, and Butler Counties, Pa. Applicant is authorized to conduct operations in Ohio, Pennsylvania, and West Virginia.

No. MC 28573 Sub 11, filed June 13, 1956, GREAT NORTHERN RAILWAY COMPANY, 175 East Fourth Street, St. Paul 1, Minn. Applicant's attorney: R. W. Cronon, 175 East Fouth Street, St. Paul 1, Minn. For authority to operate as a *common carrier*, over regular and irregular routes, transporting: *General commodities*, (1) between East Grand Forks, Minn. and Grand Forks, N. Dak., on the one hand, and, on the other, the United States Air Force Base located approximately twelve and one-half (12½) miles west of Grand Forks, N. Dak., over U. S. Highway No. 2, and points within ten (10) miles of the Air Force Base, serving the off-route point of Emerado, N. Dak.; (2) between Minot, N. Dak., on the one hand, and, on the other, the United States Air Force Base located approximately eleven and one-fourth (11¼) miles north of Minot, over U. S. Highway No. 83, and points within ten (10) miles of the Air Force Base, serving the off-route point of Glenburn, N. Dak. Applicant is authorized to conduct operations in Minnesota, North Dakota, Montana, and Oregon.

No. MC 29886 Sub 86, filed June 14, 1956, DALLAS & MAVIS FORWARDING CO., INC., 4000 West Sample Street, South Bend, Ind. Applicant's attorney: Charles M. Pieroni, 523 Johnson Building, Muncie, Ind. For authority to operate as a *common carrier*, over irregular routes, transporting: *Parts for cranes, shovels, straddle trucks, fork trucks and self-propelled building, construction, and moving machinery*, when such parts are shipped with completed machines, from the sites of the plants of Clark Equipment Company at Benton Harbor, Mich., to points in the United States, and *returned parts* of the above-described commodities, from points in the United States to the sites of the plants of Clark Equipment Company at Benton Harbor, Mich. Applicant is authorized to conduct operations in Arizona, California, Colorado, Connecticut, Delaware, Idaho, Illinois, Indiana, Iowa, Kentucky, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Jersey, New Mexico, New York, North Carolina, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, Texas, Utah, Virginia, West Virginia, and the District of Columbia.

NOTE: Applicant states the transportation is to be performed as part of the authority now held by it in MC 29886 Sub 55, which authorizes the transportation of cranes, shovels, straddle trucks, fork trucks, and self-propelled building, construction and moving machinery from Benton Harbor, Mich., to all points in the United States.

No. MC 34232 Sub 1, filed June 4, 1956, NYGARD EXPRESS COMPANY, INC., Meadow Street, Branford, Conn. Applicant's attorney: Louis B. Warren, 410 Asylum Street, Hartford 3, Conn. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Wire*, such as, iron and steel, coated, brass, aluminum and alloys; in coils, in cut lengths, and in barrels; on skids, or other containers, from Branford, Conn., to East Greenwich, R. I., and *skids* and *empty containers or other such incidental facilities* (not specified) used in transporting the above-specified commodities on return.

No. MC 35395 Sub 16 (CORRECTION), ARNOLD LIGON doing business as ARNOLD LIGON TRUCK LINE, Madisonville, Ky., published on page 3886, issue of June 6, 1956. The route designated therein as U. S. Highway 51E was in error. The correct route designation is U. S. Highway 31E (thirty-one E).

No. MC 37578 Sub 16, filed May 31, 1956, JOSEPH W. TREHAN, INCOPORATED, 715 Mahoning Avenue, Youngstown, Ohio. Applicant's representative: G. H. Dilla, 3350 Superior Avenue, Cleveland 14, Ohio. For authority to operate as a *common carrier*, over irregular routes, transporting: *Magnesite brick*, loose or in pallets, and *high temperature bonding mortar*, in bags, from Columbiana, Ohio to Ashland, Ky., and points in Wayne and Monroe Counties, Mich., those in Pennsylvania on and west of U. S. Highway 11, those in New York on and west of U. S. Highway 15, those in West Virginia on and north of U. S. Highway 50, and those in Kentucky in the Cincinnati, Ohio, Commercial Zone, as defined by the Commission; *empty containers or other such incidental facilities* on return. Applicant is authorized to conduct operations in Pennsylvania, and Ohio.

No. MC 40007 Sub 46, filed June 9, 1956, RELIABLE TRANSPORTATION COMPANY, a corporation, 4817 Sheila Street, Los Angeles 22, Calif. For authority to operate as a *common carrier*, over irregular routes, transporting: *Nitric acid*, in bulk, in tank vehicles, from Brea, Calif., to points in Nevada.

No. MC 40007 Sub 47, filed June 11, 1956, RELIABLE TRANSPORTATION COMPANY, a corporation, 4817 Sheila Street, Los Angeles, Calif. For authority to operate as a *common carrier*, over irregular routes, transporting: *Muriatic (hydrochloric) acid*, in bulk, in tank vehicles, from El Segundo, Calif., to points in Maricopa County, Ariz.

No. MC 43045 Sub 3, filed June 11, 1956, EDWARD H. WEBER, doing business as RICHLAND TRANSFER AND STORAGE, 11 East Kennewick Avenue, Kennewick, Wash. Applicant's attorney: George H. Hart, Central Building, Seattle 4, Wash. For authority to operate as a *common carrier*, over regular routes, transporting: *Household goods*, as defined by the Commission, (1) between Kennewick, Wash., and Richland, Wash., from Kennewick west over U. S. Highway 410 to junction unnumbered Washington Highway, thence over unnumbered highway to Richland, and return over the same route, serving the off-route point of Pasco, Wash., and (2) between Richland, Wash., and Hanford, Wash., from Richland over an unnumbered Washington Highway via the site of the Hanford Works Plant to Hanford, and return over the same route, serving all intermediate points. Applicant is authorized to conduct operations in Washington and Idaho.

No. MC 43045 Sub 4, filed June 11, 1956, EDWARD H. WEBER, doing business as RICHLAND TRANSFER AND STORAGE, 11 East Kennewick Avenue, Kennewick, Wash. Applicant's attorney: George H. Hart, Central Building, Seattle 4, Wash. For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities, including household goods* as defined by the Commission, but excluding those of unusual value, Class A and B explosives, commodities in bulk, and commodities requiring special equipment, serving Pasco, Wash., and points within fifteen miles of said dam site, as off-route points in connection with carrier's regular-route operations between Kennewick and Richland, Wash., and between Richland and Hanford, Wash. Applicant is authorized to conduct operations in Washington, Idaho, and Oregon.

No. MC 46737 Sub 29, filed June 8, 1956, GEO. F. ALGER COMPANY, 3050 Lonyo Road, Detroit 9, Mich. Applicant's attorney: Walter N. Bieneman, Guardian Building, Detroit 26, Mich. For authority to operate as a *common carrier*, over irregular routes, transporting: *Fly ash*, in bulk, in tank-type vehicles, or in bags, between points in Michigan, Wisconsin, Illinois, Indiana, Ohio, Pennsylvania, Missouri, Kentucky, Tennessee, Alabama, and Mississippi.

No. MC 46737 Sub 30, filed June 8, 1956, GEO. F. ALGER COMPANY, 3050 Lonyo Road, Detroit 9, Mich. Applicant's attorney: Walter N. Bieneman, Guardian Building, Detroit 26, Mich. For authority to operate as a *common carrier*, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment, serving the site of the Chevrolet Division of General Motors Corporation located approximately six (6) miles southwest of Warren, Ohio, as an off-route point in connection with applicant's authorized regular route operations. Applicant is authorized to conduct operations in Michigan, Ohio, Illinois, and Indiana.

No. MC 52405 Sub 2, filed May 28, 1956, SCOTT BROS, INCORPORATED, 1000 South Broad Street, Philadelphia 46, Pa. Applicant's attorney: Robert H. Griswold, Commerce Building, P. O. Box 432,

Harrisburg, Pa. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Iron and steel articles*, from Wallingford, Conn., to New York, N. Y., and points in Putnam, Rockland, and Westchester Counties, N. Y., and Bergen and Hudson Counties, N. J. Applicant is authorized to conduct operations in Connecticut, New Jersey, and New York.

No. MC 59609 Sub 4, filed June 11, 1956, HARRY CROW & SON, INC., 1808 52d Street, Kenosha, Wis. Applicant's attorney: John T. Porter, 707–708 First National Bank Building, Madison 3, Wis. For authority to operate as a *common carrier*, over irregular routes, transporting: *Coal, coke, stone, gravel, sand, brick, rough and semifinished lumber, dirt, cinders, ashes, cement, concrete* and *lime*, in dump vehicles, between points in Milwaukee, Racine, and Kenosha Counties, Wis., on the one hand, and, on the other, points in Boone, Cook, De Kalb, Kane, Lake, McHenry, Ogle, and Winnebago Counties, Ill. Applicant is authorized to conduct operations in Illinois and Wisconsin.

NOTE: Applicant states if application is granted as applied for, it will request the Commission to dismiss a duplicating authority contained in its present Certificate MC–59609 which authorizes the transportation of the above commodities between points in Racine and Kenosha Counties, Wis., on the one hand, and, on the other, Lake County, Ill.

No. MC 64932 Sub 212, filed June 7, 1956 (Amended), published June 20, 1956, on Page 4333, ROGERS CARTAGE CO., a corporation, 1934 South Wentworth Avenue, Chicago, Ill. Applicant's attorney: Carl L. Steiner, 39 South La Salle Street, Chicago 3, Ill. For authority to operate as a *common carrier*, over irregular routes, transporting: *Liquid chemicals*, in bulk, in tank vehicles, from North Aurora, Ill., to points in Illinois, Indiana, Michigan, and Ohio. Applicant is authorized to conduct operations in Alabama, Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, New Jersey, New York, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, West Virginia, and Wisconsin.

No. MC 65781 Sub 1, filed May 16, 1956, R. E. EIDSVOLD AND R. H. EIDSVOLD, doing business at DAWN MOVING AND STORAGE COMPANY, 6009 Wayzata Boulevard, Minneapolis, Minn. Applicant's attorney: Nathan E. Zelby, 135 Broadway, New York 6, N. Y. For authority to operate as a *common carrier*, over irregular routes, transporting: *Household goods*, as defined by the Commission, between Chicago, Ill., and points in Minnesota, on the one hand, and, on the other, points in Montana, Georgia, and Virginia. Applicant is authorized to conduct operations in Connecticut, Florida, Illinois, Indiana, Iowa, Kansas, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Jersey, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Dakota, Tennessee, West Virginia, Wisconsin, and the District of Columbia.

No. MC 67388 Sub 12, filed June 12, 1956, MEDDOCK TRUCK LINE, a corporation, 1819 South Soto Street, Los Angeles 23, Calif. Applicant's attorney: R. Y. Schureman, 639 South Spring Street, Los Angeles 14, Calif. For authority to operate as a *common carrier*, over a regular route, transporting: *General commodities*, except those of unusual value, livestock, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, between Flagstaff, Ariz., and the Glen Canyon Dam Site, located on the Colorado River approximately fifteen (15) miles upstream from Marble Canyon, Ariz., near the Arizona-Utah State line, from Flagstaff over U. S. Highway 89 to junction access roads to Glen Canyon Dam Site, near Marble Canyon, Ariz., thence over access roads to Glen Canyon Dam Site, and return over the same route, serving all intermediate points on the access roads between junction Glen Canyon Dam Site and U. S. Highway 89, and all off-route points in Arizona and Utah within 25 miles of Glen Canyon Dam Site. Applicant is authorized to conduct regular route operations in Arizona and California, and irregular route operations in Arizona.

No. MG 68183 Sub 4, filed June 14, 1956, YANKEE LINES, INC., 1400 East Archwood Avenue, Akron, Ohio. Applicant's attorney: Edwin C. Reminger, Standard Building, Cleveland 13, Ohio. For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, serving the Chrysler Corporation Plant located on Ohio Highway 82, in Twinsburg Township, Summit County, Ohio, as an off-route point in connection with carrier's regular route operations between (a) Cleveland, Ohio and New Castle, Pa., over U. S. Highway 21, (b) Cleveland and Warren, Ohio, over U. S. Highway 422, and (c) Cincinnati and Akron, Ohio, which is a portion of regular routes between Cincinnati, Ohio, and Philadelphia, Pa., over Ohio Highway 5, and Akron, Ohio, and Philadelphia, Pa., over Ohio Highway 5. Applicant is authorized to conduct operations in Delaware, Maryland, New Jersey, Ohio, Pennsylvania, West Virginia, and the District of Columbia.

No. MC 70151 Sub 25, filed March 21, 1956, UNITED TRUCKING SERVICE, INCORPORATED, 3047 Lonyo Road, Detroit, Mich. (Mailing address: P. O. Box 474 Roosevelt Park Station, Detroit, Mich.). Applicant's attorney: Archie C. Fraser, 1400 Michigan National Tower, Lansing 8, Mich. For authority to operate as a common carrier, transporting: *General commodities*, except those of unusual value, Class A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, serving points in Warren Township, and Sterling Township, Macomb County, Mich., and points in Troy Township, Oakland County, Mich., as intermediate and off-route points in connection with carrier's regular route operations between (1) junction U. S. Highway 25 and Michigan Highway 59 and junction Michigan Highways 29 and 59 over Michigan Highway 59, (2) junction Michigan Highways 29 and 59 and St. Clair Shores, Mich., over Michigan Highway 29, (3) Port Huron, Mich., and Columbus, Ohio, over Michigan Highways 29 and 59 and U. S. Highway 25, (4) Port Huron, Mich., and Cincinnati, Ohio, over U. S. Highway 25, (5) Port Huron, Mich., and Indianapolis, Ind., over U. S. Highway 25, (6) Pontiac, Mich., and Columbus, Ohio, over U. S. Highway 24, (7) Detroit, Mich., and Marion, Ind., over U. S. Highway 25, and (8) Bay City, Mich., and Detroit, Mich., over U. S. Highway 10. Applicant is authorized to conduct operations in Indiana, Michigan, and Ohio.

No. MC 73992 Sub 35, filed June 11, 1956, JOHN J. KLEIMER, doing business as KLEIMER'S VAN LINES, 4762 Sunset Boulevard, Los Angeles, Calif. Applicant's representative: Cromwell Warner, 404 Yarmouth Rd., Palos Verdes Est., Los Angeles 58, Calif. For authority to operate as a *common carrier*, over irregular routes, transporting: *Appliances, furnishings, houseware, and accessories*, for delivery to apartments, hotels, houses, motels, furniture dealers, offices and commercial and institutional establishments, when such appliances, furnishings, houseware and accessories are transported as an incident to and a part of shipments of uncrated new furniture; (1) from points in California to points in California, (2) *replaced* and *trade-ins* of the above named commodities from points in Wyoming, Washington, Utah, Texas, Oregon, Oklahoma, New Mexico, Nevada, Montana, Missouri, Kansas, Idaho, Colorado, Arizona, and California to points in California, (3) shipments of the above named commodities, including *furniture*, uncrated, when for renovation or repair, from points in Wyoming, Washington, Utah, Texas, Oregon, Oklahoma, New Mexico, Nevada, Montana, Missouri, Kansas, Idaho, Colorado, California, and Arizona to points in California, (4) *New furniture*, uncrated, between points in California. Applicant is authorized to conduct operations in California, Arizona, Oregon, Idaho, Utah, Nevada, Missouri, Oklahoma, Texas, New Mexico, Colorado, Wyoming, and Washington.

NOTE: The above application is filed in conjunction with MC 73992 Sub 34, published on page 1216, issue of February 22, 1956.

No. MC 89557 Sub 2, filed April 27, 1956, LAWRENCE A. McCARTHY, doing business as GROTE CARTAGE CO., 1455 North Magnolia Avenue, Chicago 22, Ill. Applicant's representative: George S. Mullins, 4704 West Irving Park Road, Chicago 41, Ill. For authority to operate as a *contract carrier*, over irregular routes, transporting: in bulk, in tank vehicles: *Acid esters of animal oils*, from St. Bernard, Ohio to East St. Louis, Ill.; *animal fatty acid*, from St. Bernard, Ohio, to Decatur, Ind.; butyl stearate, from St. Bernard, Ohio, to Midland, Mich.; *cotton seed oil*, from Louisville, Ky., to Cincinnati, Ohio; *fatty acids from fish or sea animal oil*, from Wyandotte, Mich., to St. Bernard, Ohio; *fatty acids of vegetable oil*, from St. Bernard, Ohio, to Chicago, Ill.; *glycerine*, from Ivorydale, Ohio, to Indianapolis, Ind.; *liquid paints and varnishes*, from Cincinnati, Ohio, to Zelienople, Pa.; *liquid silicate of soda*, from the plant of the Diamond Alkali Co. at Cincinnati, Ohio, to Producers Well Plugging Service Co., Pine Ridge, Ky.; *red oil, from animal fats*, from St. Bernard, Ohio, to Midland, Mich.; *resin plasticizer*, from St. Bernard, Ohio, to Chicago, Ill.; *silicate of soda* from Cincinanti, Ohio, to Olive Hill, Ky., and Wyandotte, Mich.; *soybean oil* from Danville, Ill., to St. Bernard, Ohio; and *vegetable fatty acid* and *resin plasticizers*, from St. Bernard, Ohio, to Mishawaka, Ind. Applicant is authorized to conduct operations in Illinos, Kentucky, Indiana, Ohio, Wisconsin, Arkansas, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, Tennessee, and New York.

No. MC 102806 Sub 8, filed June 1, 1956, PETROLEUM TRANSPORTATION, INCORPORATED, East Davis Street, P. O. Box 232, Gastonia, N. C. Applicant's attorney: J. Ruffin Bailey, 706–7 Raleigh Building, Raleigh, N. C. For authority to operate as a *common carrier*, over irregular routes, transporting: *Petroleum* and *petroleum products*, in bulk, in tank vehicles, from points in Hamilton County, Tenn., to points in Cherokee and Graham Counties, N. C. Applicant is authorized to conduct operations in North Carolina and South Carolina.

No. MC 103378 Sub 68, filed June 1, 1956, PETROLEUM CARRIER CORPORATION, 369 Margaret Street, Jacksonville, Fla. Applicant's attorney: Martin Sack, Atlantic National Bank Building, Jacksonville 2, Fla. For authority to operate as a *common carrier*, over irregular routes, transporting: *Liquified petroleum gas*, in bulk, in tank trucks, from St. Marks, Fla., to points in Alabama and to those in Georgia beyond 175 miles from St. Marks, Fla. Applicant is authorized to conduct operations in Georgia, Florida, Alabama, South Carolina, and North Carolina.

No. MC 107002 Sub 99, filed June 11, 1956, WALTER M. CHAMBERS, doing business as W. M. CHAMBERS TRUCK LINE, 105 Giuffrias Avenue, P. O. Box 687, New Orleans 20, La. For authority to operate as a *common carrier*, over irregular routes, transporting: *Liquefied petroleum gases*, in bulk, in tank vehicles; (1) from Krotz Springs, La., to points in Alabama, South Carolina, Georgia, and Florida, (2) from Hazlewood, La., to points in Alabama, Mississippi, Tennessee, South Carolina, Georgia and Florida, (3) from Norco and Destrehan, La., to points in Alabama, Florida, Georgia, and Mississippi. Applicant is authorized to conduct operations in Louisiana, Mississippi, Tennessee, Arkansas, Alabama, and Georgia.

No. MC 107515 Sub 230, filed June 1, 1956, REFRIGERATED TRANSPORT CO., INC., 290 University Avenue SW., Atlanta, Ga. Applicant's attorney: Allan Watkins, Grant Building, Atlanta 3, Ga. For authority to operate as a *common carrier*, over irregular routes, transporting: *Meats, meat products, and meat byproducts*, as defined by the Commission, from points in Florida to points in South Carolina, North Carolina, Alabama, Georgia, Mississippi, Tennessee, Kentucky, Ohio, Indiana, Michigan, Wisconsin, Illinois, Louisiana, Arkansas, Texas, Oklahoma, Kansas, Missouri, Nebraska, Iowa, and Minnesota. Applicant is authorized to conduct operations in Georgia, North Carolina, South Carolina, Tennessee, Florida, Alabama, Mississippi, Louisiana, Wisconsin, Texas, Oklahoma, and Ohio.

No. MC 108518 Sub 4, filed June 14, 1956, IRON AND STEEL TRANSPORT, INC., 2001 Shepler Church Road SW., Canton, Ohio. Applicant's attorney: Noel F. George, 44 East Broad Street, Columbus 15, Ohio. For authority to operate as a *common carrier*, over irregular routes, transporting: *Iron, steel, manufactured iron and steel articles, motors, machinery* and *machinery parts*, between points in Cuyahoga, Summit, Stark, Tuscarawas, Portage, Mahoning and Trumbull Counties, Ohio, on the one hand, and, on the other, the site of the Ford Motor Car Company Plant located at the intersection of Cottage Grove Avenue and U. S. Highway 30 approximately two miles east of Chicago Heights, Ill. Applicant is authorized to conduct operations in Illinois, Indiana, Michigan, New York, Ohio, and West Virginia.

No. MC 108586 Sub 39, filed June 11, 1956, STEFFKE FREIGHT CO., a corporation, 204 South Bellis Street, Wausau, Wis. Applicant's attorney: Jack Goodman, 39 South LaSalle Street, Chicago 3, Ill. For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, livestock, household goods, as defined by the Commission, commodities in bulk, and commodities requiring special equipment, serving Brownsville, LeRoy, Knowles, and Oak Center, Wis., as off-route points in connection with applicant's authorized regular-route operations between Milwaukee and Fond du Lac, Wis., over U. S. Highway 41. Applicant is authorized to conduct operations in Illinois, Wisconsin, Michigan, and Iowa.

No. MC 108671 Sub 13, filed June 8, 1956, TARBET TRUCKING, INC., 311 East 18th Street, Muncie, Ind. Applicant's attorney: Howell Ellis, 520 Illinois Building, Indianapolis, Ind. For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, serving the site of the new Chrysler Automotive Body Division, Stamping Plant, in Twinsburg Township, Summit County, Ohio, on Ohio Highway 82, approximately one mile west of junction Ohio Highways 82 and 91, as an off-route point in connection with carrier's regular route operations between Muncie, Ind., and Buffalo, N. Y., over U. S. Highway 20 and Ohio Highway 84. Applicant is authorized to conduct operations in Illinois, Indiana, Kentucky, Michigan, Missouri, New York, Ohio, and Pennsylvania.

No. MC 109490 Sub 4, filed June 15, 1956, H. W. HEDING, doing business as HEDING TRUCK SERVICE, Union Center, Wis. Applicant's attorney: Edward Solie, 1 South Pinckney Street, Madison 3, Wis. For authority to operate as a *common carrier*, over regular routes, transporting: *General commodities*, except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment; (1) serving Ironton, Cazenovia, Yuba, Hillsboro, Mt. Tabor, Rockton, Rockbridge, Hub City, and St. Marys as off-route points in connection with carrier's regular route operations between Madison, Wis., and Norwalk, Wis., and (2) between Madison, Wis., and Junction Wisconsin Highway 19 and U. S. Highway 12, from Madison over Wisconsin Highway 113 to junction Wisconsin Highway 19, thence over Wisconsin Highway 19 to junction U. S. Highway 12, and return over the same route, serving no intermediate points, as an alternate route in connection with carrier's regular route operations between Madison and Norwalk, Wis. Applicant is authorized to conduct operations in Wisconsin.

No. MC 111159 Sub 29, filed June 13, 1956, MILLER PETROLEUM TRANSPORTERS, LTD., P. O. Box 1123, Jackson, Miss. Applicant's attorney: Phineas Stevens, Suite 900 Milner Building, P. O. Box 141, Jackson, Miss. For authority to operate as a *common carrier*, over irregular routes, transporting: *Petroleum* and *petroleum products*, in bulk, in tank vehicles, from the site of Pontiac Eastern Corporation Refinery, approximately three miles from Purvis, Miss., to points in Alabama and Louisiana. Applicant is authorized to conduct operations in Alabama, Arkansas, Georgia, Louisiana, Mississippi, and Tennessee.

No. MC 111435 Sub 10, filed June 1, 1956, C. & E. TRUCKING CORP., 80 Montgomery Street, Rhinebeck, N. Y. Applicant's representative: Bert Collins, 140 Cedar Street, New York 6, N. Y. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Flavoring syrup*, in bulk, in tank vehicles, from New York, N. Y., to points in Pennsylvania, except Philadelphia, and points within 25 miles of Philadelphia, and except Williamsport, Milton, Berwick, Hazleton, Kingston, Scranton, Wilkes-Barre, Allentown, Harrisburg, and Pittsburgh, Pa. Applicant is authorized to conduct operations in Maryland, New York, Pennsylvania, and Virginia.

No. MC 111545 Sub 18, filed May 28, 1956, HOME TRANSPORTATION COMPANY, INC., 334 South Four Lane Highway, Route 3, Marietta, Ga. Applicant's attorney: Allan Watkins, Grant Building, Atlanta 3, Ga. For authority to operate as a *common carrier*, over irregular routes, transporting: *Road construction machinery and equipment*, as defined by the Commission, *road construction machinery and equipment attachments, textile machines and machinery*, except knitting machines, *machine tools, agricultural machinery, implements and parts*, as defined by the Commission, *tractors, including farm tractors, lift trucks, tooling, shaping, forging, metal, woodworking, ice manufacturing, bakery and manufacturing machinery and machines, street-sweeping machines, internal combustion engines, bottling, mixing, bagging, pressing, cleaning, and washing machines*, and *mechanically-operated vehicle bodies*, the transportation of which by reason of size or weight requires the use of special equipment, between Atlanta, Cartersville, and Marietta, Ga., and Columbia, S. C., and points within 50 miles of each, on the one hand, and, on the other, points in Illinois, Indiana, Iowa, Kansas, Michigan, New Jersey, New York, Ohio, Oklahoma, Pennsylvania, and Wisconsin. The application is accompanied by motion to *dismiss on the grounds* that applicant holds the authority sought therein in its present certificate, or in the alternative, that the Commission assign the application and motion to dismiss for public hearing on the issues involved.

No. MC 112750 Sub 20, filed June 13, 1956, ARMORED CARRIER CORPORATION, 222–17 Northern Boulevard, Bayside, N. Y. Applicant's attorney: James K. Knudson, 1116 Ring Building, 18th at M Street NW., Washington, D. C. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Such commercial papers, documents, and written instruments*, except coin, currency, bullion, and negotiable instruments, as are used in the operation of banks and banking institutions, and *empty containers or other such incidental facilities* (not specified) used in transporting the items listed above, between Cleveland, Ohio, and Pittsburgh, Pa. Applicant is authorized to conduct operations in Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Ohio, Pennsylvania, Virginia, West Virginia, and the District of Columbia.

No. MC 112750 Sub 21, filed June 13, 1956, ARMORED CARRIER CORPORATION, 222–17 Northern Boulevard, Bayside, N. Y. Applicant's attorney: James K. Knudson, 1116 Ring Building, 18th at M Street NW., Washington, D. C. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Such commercial papers, documents, and written instruments*, except coin, currency, bullion, and negotiable instruments, as are used in the operation of banks and banking institutions, from Worcester, Mass., to New York, N. Y., and *empty containers or other such incidental facilities* (not specified) used in transporting the items listed above on return movements. Applicant is authorized to conduct operations in Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Ohio, Pennsylvania, Virginia, West Virginia, and the District of Columbia.

No. MC 114220 Sub 1 (amended June 19, 1956), filed March 26, 1956, published May 16, 1956, page 3243, INTERSTATE TRAILER TRANSPORT, INC., 506 East Euclid, Des Moines, Iowa. Applicant's attorney: Stephen Robinson, 1020 Savings & Loan Building, Des Moines 9, Iowa. For authority to operate as a *common carrier*, over irregular routes, transporting: *Trailers*, designed to be drawn by passenger automobiles or light trucks, in initial movements, in truckaway service, from Momence, Ill., to points in the United States, and *damaged, defective or returned shipments* of the commodity specified on return. Applicant is authorized to conduct operations in all States in the United States except California, Connecticut, Delaware, Georgia, Louisiana, Maine, Maryland, Massachusetts, Mississippi, Montana, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Vermont, West Virginia, and the District of Columbia.

No. MC 114569 Sub 10, filed June 8, 1956, SHAFFER TRUCKING, INC., Elizabethville, Pa. Applicant's attorney: James W. Hagar, Commerce Building, (P. O. Box 432), Harrisburg, Pa. For authority to operate as a *common carrier* over irregular routes, transporting: *Products, by-products, and parts, of dead or slaughtered animals unfit for human consumption*, between points in Washington Township, Dauphin County, Pa., and Franconia Township, Montgomery County, Pa., and Elizabethville, Pa., on the one hand, and, on the other, points in Connecticut, Delaware, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Pennsylvania, Ohio, Rhode Island, and Vermont; and *lumber*, from points in Androscoggin and Cumberland Counties, Maine, to points in Washington Township, Dauphin County, Pa., and Elizabethville, Pa.

NOTE: Applicant has contract carrier irregular route authority in MC 55813, dated May 18, 1954, section 210 (dual operations) may be involved.

No MC 115906 (Amended), filed April 3, 1956, published on page 2552, issue of April 18, 1956, H. F. YOUNG, Spencer, W. Va. Applicant's attorney: Charles E. Anderson, P. O. Box 1386, Charleston, W. Va. For authority to operate as a *contract carrier*, over irregular routes, transporting (1) *Rough lumber*, between points in West Virginia and Cincinnati, Ohio, and (2) *Fertilizer*, in bags, from Cincinnati, Ohio, to points in West Virginia.

No. MC 115922 Sub 1, filed June 13, 1956, A. W. MEEVES, General Delivery, Tucumcari, N. Mex. Applicant's attorney: Maurice Sanchez, 904 Simms Building, P. O. Box 1031, Albuquerque, N. Mex. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Carbon dioxide* in bulk, in solid and liquid forms, in shipper-owned tank trailers, moving for the account of National Cylinder Gas Company, from Mosquero, N. Mex., to points in Texas, (including but not limited to the following points in Texas: El Paso, Amarillo, Lubbock, Odessa, Midland, Sweetwater, Big Spring, Abilene, Fort Worth and Dallas), Denver, Pueblo and Colorado Springs, Colo., and Oklahoma and Tulsa, Okla. *Empty shipper-owned tank trailers* and *empty containers or other such incidental facilities* (not specified) used in transporting the above-specified commodity from the above-described points to Mosquero, N. Mex.

No. MC 116019, filed May 28, 1956, A. W. HAMILTON, doing business as HAMILTON TRANSFER & STORAGE, West Highway & Railway Avenue, Torrington, Wyo. For authority to operate as a *contract carrier*, over a regular route, transporting: *Cement*, in sacks, and in bulk, in seasonal operations between March 1 and November 1, inclusive, of each year, from La Porte, Colo., to Torrington, Wyo., as follows: From La Porte over U. S. Highway 287 to junction unnumbered highway, approximately one (1) mile north of Fort Collins, Colo., thence over unnumbered highway to junction U. S. Highway 87, near Wellington, Colo., thence over U. S. Highway 87 to junction U. S. Highway 85, near Cheyenne, Wyo., thence over U. S. Highway 85 to Torrington, serving no intermediate points.

No. MC 116034, filed June 7, 1956, CHAS. MOYER AND CAROL MOYER, doing business as MOYER TRUCK LINE, 205 East Illinois Street, Kirksville, Mo. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Livestock feed* and *poultry feed*, in paper or cloth sacks, and *fertilizer*, from Kansas City, Kans., to Kirksville, Mo., and points within 25 miles of Kirksville, as more fully described in the application, and *shelled corn* on return movements.

No. MC 116047, filed June 13, 1956, JOHN M. KARLE, doing business as KARLE CARRIAGE WORKS, 806 South Ninth Street, St. Joseph, Mo. Applicant's attorney: Louis Kranitz, 714 Francis Street, St. Joseph 7, Mo. For authority to operate as a *common carrier*, over irregular routes, transporting: *Wrecked and disabled motor vehicles*, between points in Missouri (except points in the St. Louis, Mo., Commercial Zone as defined by the Commission), Kansas, Iowa, Nebraska, Colorado, Oklahoma, Arkansas, North Dakota, South Dakota, and Illinois.

NOTE: Applicant states this is intended to be an emergency service to various and sundry over the road transporters or to farmers, private haulers, or others who require a specialized service in removing wrecked or disabled motor vehicles, as conditions may require from time to time.

No. MC 116048, filed June 13, 1956, MANGUM TRUCKING COMPANY, INC., Route No. 3, Box 455, Charlotte, N. C. For authority to operate as a *common carrier*, over irregular routes, transporting: *Lumber*, from points in North Carolina and South Carolina, on the one hand, and, on the other, points in, North Carolina, South Carolina, Florida, West Virginia, Ohio, Maryland, New Jersey, New York, Pennsylvania, and Georgia.

APPLICATIONS OF MOTOR CARRIERS OF PASSENGERS

No. MC 1511 Sub 109, filed June 5, 1956, PACIFIC GREYHOUND LINES, a California corporation, 371 Market Street, San Francisco 5, Calif. Applicant's attorney: Earl A. Bagby, Greyhound Building, Market and Fremont Streets, San Francisco 5, Calif. For authority to operate as a *common carrier* transporting: *Passengers and their baggage and express* in the same vehicle with passengers; (1) over that segment of relocated U. S. Highway 80 between Buckeye, Ariz., and Gila Bend, Ariz., in connection with applicant's authorized regular route operations between Portland, Oreg., and Lordsburg, N. Mex., in Certificate MC 1511 dated November 22, 1950, and (2) between Avondale Junction, Ariz., and Phoenix, Ariz.: from Avondale Junction over unnumbered highway via Avondale and Tolleson, to Phoenix, and return over the same route, serving all intermediate points, in lieu of applicant's authorized regular route operations between Tolleson Junction, Ariz., and Phoenix, Ariz., in Certificate MC 1511 Sub No. 89, dated September 7, 1951.

NOTE: The proposed rerouting under (1) will result in abandonment of bus service to the following tariff points, Palo Verde, Hassayampa, Arlington and Gillispie Dam, all located on former (old) U. S. Highway 80. Applicant is authorized to conduct operations in Arizona, California, Nevada, New Mexico, Oregon, Texas, and Utah.

APPLICATIONS UNDER SECTION 5 (2) AND 210 (a) (b)

No. MC–F 6294 (correction), published in the June 13, 1956, issue of the FEDERAL REGISTER on page 4066. The name of E. J. ROSWICK, of Bismarck, N. Dak., was inadvertently omitted from the list of persons in control of vendee, and the name of A. B. WANKE was erroneously shown as A. B. ROSWICK.

No. MC–F 6300 (corrected), published in the June 30, 1956, issue of the FEDERAL REGISTER on page 4336. The notice of filing should be corrected by deleting therefrom the portion beginning with "authority" and ending with "merged" and inserting in lieu thereof the following: "Authority sought by COLUMBIA TERMINALS COMPANY, 1209 Washington Avenue, St. Louis, Mo., to merge the property of SOUTHERN EXPRESS, INC., 1209 Washington Avenue, St. Louis, Mo., and to control the operating rights and property of SOUTHERN PLAZA EXPRESS, 1209 Washington Avenue, St. Louis, Mo., and CENTRAL EXPRESS, INC., 1901 Iriving Boulevard, Dallas, Tex., and for acquisition by FIELDING CHILDRESS, also of St. Louis, of control of such operating rights and property through the transaction. Applicants' attorney: Clarence D. Todd, 944 Washington Building, Washington 5, D. C. Operating rights sought to be controlled:"

No. MC–F 6305. Authority sought for control and merger by CLARK TRANSPORT COMPANY, U. S. Highways 30 and 83, Chicago Heights, Ill., of the operating rights and property of TRACY BAKER AUTO FORWARDING COMPANY, 13701 Eldon Avenue, Detroit, Mich., and for acquisition by JAMES P. CLARK and CECELIA A. CLARK, both of Olympia Fields, Ill., and EUGENE C. CLARK, of Steger, Ill., of control of such rights and property through the transaction. Applicant's attorney: Eugene T. Liipfert, 2001 Massachusetts Avenue NW., Washington 6, D. C. Operating rights sought to be controlled and merged: *New automobiles, new trucks, new cabs*, and *new chassis*, restricted to initial move-in truckaway and driveaway service, as a *common carrier* over irregular routes from places of manufacture and assembly in Detroit, Mich., and Warren Township, Macomb County, Mich., to points in Illinois, Indiana, Iowa, Maryland, Ohio, Pennsylvania and the District of Columbia; *the commodities specified above*, restricted to secondary movements, during the season of open navigation on the Great Lakes, in truckaway and driveaway service, from Cleveland, Ohio, to points in Maryland, Ohio, Pennsylvania, and the District of Columbia; *automobiles, trucks, cabs*, and *chassis*, restricted to secondary movements, in truckaway and driveaway service, between all points as described above; *automobiles, trucks, cabs*, and *chassis* restricted to initial movements, in truckaway service, from Detroit, Mich., to certain points in Virginia; *new automobiles, automobile bodies, automobile chassis*, and *automobile parts and accessories* moving in connection therewith, *automobile show equipment and paraphernalia*, and *farm and garden tractors, and parts and accessories* thereof moving in connection therewith, from Willow Run, Washtenaw County, Mich., to points in Illinois, Indiana, Iowa, Maryland, Ohio, Pennsylvania, and the District of Columbia. CLARK TRANSPORT COMPANY is authorized to operate as a *common carrier* in all states in the United States and the District of Columbia. Application has been filed for temporary authority under section 210a (b).

No. MC–F 6306. Authority sought for purchase by J. H. MARKS TRUCKING CO., INC., P. O. Box 2192, Odessa, Texas, of the operating rights of WILTON B. DELAFIELD, 2018 East Broad Street, Lake Charles, La., and for acquisition by J. H. MARKS, also of Odessa of control of such rights through the purchase. Applicants' attorney: Herbert L. Smith, 401 Perry-Brooks Building, Austin, Texas. Operating rights sought to be transferred: *Oilfield commodities*, as a *common carrier* over irregular routes between points in Texas and Louisiana. Vendee is authorized to operate as a *common carrier*, in New Mexico, Oklahoma, Texas, Colorado, Utah, Wyoming, and Montana. Application has not been filed for temporary authority under section 210a (b).

No. MC–F 6307. Authority sought for merger by TRANSCON LINES, 1206 South Maple Boulevard, Los Angeles 15, Calif., of the operating rights and property of KEYSTONE FREIGHT LINES, 1522 East Fifth Court, Tulsa, Okla., and for acquisition by SCRIBNER BIRLENBACH, also of Los Angeles, of control of such rights and property through the transaction. Applicants' attorneys: Lee Reeder and Wentworth E. Griffin, both of 1012 Baltimore Avenue, Kansas City 5, Mo. Operating rights sought to be merged: *General commodities*, with no exceptions, as a *common carrier* over regular routes, between Tulsa, Okla., and Fort Smith, Ark., and Boynton, Okla., and between Coweta, Okla., and Muskogee, Okla., serving certain intermediate points; *general commodities*, with certain exceptions including household goods, between Wichita, Kans., and Tulsa, Okla., between Tulsa, Okla., and Keystone, Okla., between Little Rock, Ark., and Fort Smith, Ark., between Boynton, Okla., and Checotah, Okla., between Oklahoma City, Okla., and Boynton, Okla., between Fort Smith, Ark., and junction U. S. Highways 62 and 266 (approximately one mile west of Dewar, Okla.), between Memphis, Tenn., and Pine Bluff, Ark., and between North Little Rock, Ark., and Camp Joseph T. Robinson, Ark., serving certain intermediate and off-route points; alternate route for operating convenience only between Russellville, Ark., and Fort Smith, Ark. TRANSCON LINES is authorized to operate in Missouri, Illinois, Kansas, Indiana, Arizona, New Mexico, Oklahoma, Texas, and California. Application has not been filed for temporary authority under section 210a (b).

No. MC–F 6308. Authority sought for purchase by LAWRENCE TRANSFER & STORAGE CORPORATION, Whiteside Avenue NE., Roanoke, Va., of the operating rights and property of W. T. LAWRENCE, doing business as LAWRENCE TRANSFER COMPANY, Whiteside Avenue NE., Roanoke, Va., and for acquisition by W. T. LAWRENCE, also of Roanoke, of control of such operating rights and property through the purchase. Applicant's attorney: B. E. Estes, 516 Colonial Bank Building, Roanoke, Va. Operating rights sought to be transferred: *Household goods*, as defined by the Commission, as a *common carrier* over irregular routes, between points in Roanoke County, Va., on the one hand, and, on the other, points in Tennessee, North Carolina, Maryland and Pennsylvania, and between Roanoke, Va., and points in Virginia within 35 miles of Roanoke, on the one hand, and, on the other, points in West Virginia, Ohio, New York, Delaware and the District of Columbia; *whole fluid milk*, graded and ungraded, *condensed milk*, plain and sweetened, *sweet cream*, liquid and frozen in cans, and *butter*, in boxes, from Radford, Va., to points in North Carolina, South Carolina, Georgia, Alabama, Tennessee, Kentucky, and West Virginia. Vendee holds no authority from the Interstate Commerce Commission but is affiliated with UNITED VAN LINES, INC., which is authorized to transport household goods throughout the United States. Application has not been filed for temporary authority under section 210a (b).

No. MC–F 6309. Authority sought for purchase by CLARK TANK LINES COMPANY, 1450 North Beck Street, Salt Lake City, Utah, of the operating rights and property of GORDON RAY, 1450 North Beck Street, Salt Lake City, Utah, and for acquisition by BOYCE R. CLARK and

BEULAH R. CLARK, both of Salt Lake City, of control of such rights and property through the purchase. Persons to whom correspondence should be addressed: Boyce R. Clark, Pres., Clark Tank Lines Company, P. O. Box 1595, Salt Lake City, Utah, and Gordon Ray, P. O. Box 2487, Salt Lake City, Utah. Operating rights sought to be transferred: *Gasoline*, in bulk, in tank vehicles, as a *common carrier* over regular routes, from Portland, Oreg. (including Linnton), to Boise, Idaho, serving certain intermediate points for delivery only, and from New Plymouth, Idaho, to Emmett, Idaho, serving no intermediate points; *petroleum products*, in bulk, in tank vehicles, *gasoline* and *fuel oil*, in bulk, in tank vehicles, and *road oil and asphalt*, in bulk, in tank vehicles, over irregular routes, from, to and between points and areas, varying with the commodity transported, in Oregon, Washington, Idaho, and Utah. Vendee is authorized to operate as a *contract carrier* in Colorado and Utah. Application has not been filed for temporary authority under section 210a (b).

No. MC–F 6310. Authority sought for purchase by WESTERN AUTO TRANSPORTS, INC., 430 South Navajo Street, Denver, Colo., of the operating rights and certain property of HARRY A. LORD, 940 Darby Road, San Marino, Calif., and for acquisition by ROBERT R. HALL, JR., also of Denver, of such operating rights and property through the purchase. Applicants' attorney: Louis E. Smith, 1800 North Meridian Street, Indianapolis, Ind. Operating rights sought to be transferred: *New automobiles* and *new trucks*, restricted to initial movements, in driveaway service as a *common carrier* over irregular routes, from places of manufacture and assembly in South Bend, Ind., and Detroit, Mich., to Los Angeles, Calif. Vendee is authorized to operate as a *common carrier* in Michigan, Nevada, Colorado, Wyoming, Idaho, Washington, California, Utah, Indiana, Missouri, Iowa, Arizona, New Mexico, Oregon and Illinois. Application has not been filed for temporary authority under section 210a (b).

No. MC–F 6311. Authority sought for purchase by VANCE TRUCKING COMPANY, INCORPORATED, Dabney Drive, Henderson, N. C., of a portion of the operating rights of DIAMOND STATE MOTOR FREIGHT, INC., P. O. Box 317, Bala-Cynwyd, Pa., and for acquisition by JOHN C. CHURCH and N. P. STRAUSE, both of Henderson, of control of such rights through the purchase. Applicant's attorney: James E. Wilson, 1812–14th Street NW., Washington, D. C. Operating rights sought to be transferred: *Roofing materials and supplies, asbestos products, paper, hardware, sheet metal products* and *hot air and hot water heaters and supplies*, as a *common carrier* over irregular routes between Philadelphia, Ambler, Pen Argyl, Swedeland, and Downingtown, Pa., on the one hand, and, on the other, points in that part of New Jersey on and south of U. S. Highway 46 and north of U. S. Highway 1. Vendee is authorized to operate as a *common carrier* in South Carolina, Florida, North Carolina, Virginia, Maryland, Pennsylvania, New Jersey, New York, Delaware, Georgia, West Virginia, Kentucky, and the District of Columbia. Application has not been filed for temporary authority under section 210a (b).

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary.*

## DEPARTMENT OF LABOR

### Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938 (52 Stat. 1060, as amended; 29 U. S. C. 201 et seq.), and Parts 522 and 527 of the regulations issued thereunder (29 CFR Parts 522 and 527), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and in subject to the provisions of Parts 522 and 527. The effective and expiration dates, occupations, wage rates, number or proportion of learners and learning periods for certificates issued under general learner regulations (§§ 522.1 to 522.12) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Apparel Industry Learner Regulations (29 CFR 522.20 to 522.24, as amended March 1, 1956, 21 F. R. 1349).

The following learner certificates were issued for normal labor turnover purposes. Except as otherwise indicated, the number of learners authorized is indicated:

Angelica Uniform Co., Summersville, Mo.; effective 6–12–56 to 6–11–57; ten percent of factory production workers (washable service uniforms).

Angelica Uniform Co., Marquand, Mo.; effective 6–18–56 to 6–17–57; ten percent of factory production workers (washable service apparel).

Brookfield Manufacturing Co., 145–47 West Pine Street, Warrensburg, Mo.; effective 6–6–56 to 6–5–57; ten percent of factory production workers (coveralls and shop coats).

S. Buchsbaum Manufacturing Co., Inc., 90 Mount Vernon Avenue, Fredericktown, Ohio; effective 6–5–56 to 6–4–57; 10 learners (plastic rainwear).

Centre Manufacturing Co., Inc., Centre, Ala.; effective 6–7–56 to 12–6–56; 75 learners for plant expansion purposes (men's and boys' apparel).

Colonial Togs, 544 Leggett Street, Scranton, Pa.; effective 6–22–56 to 6–21–57; 10 learners (snowsuits, winter pants).

Hartwell Manufacturing Co., Inc., Hartwell, Ga.; effective 6–17–56 to 6–16–57; 10 learners (work pants).

Heavy Duty Manufacturing Co., Gainesboro, Tenn.; effective 6–6–56 to 12–5–56; 40 learners for plant expansion purposes (sport shirts).

Helena Garment Co., West Helena, Ark.; effective 6–23–56 to 6–22–57; ten percent of factory production workers (junior dresses).

Kennebec Manufacturing Co., Inc., Northern Avenue, Gardiner, Maine; effective 6–6–56 to 6–5–57; ten percent of factory production workers (boys' pants).

Malouf Co. No. 2, Whitesboro, Tex.; effective 6–6–56 to 6–5–57; 5 learners (maternity and sportswear).

Malouf Co. No. 3, Wills Point, Tex.; effective 6–6–56 to 6–5–57; 10 learners (women's sportswear).

Rhea Manufacturing Co., Colquitt Division, Colquitt, Ga.; effective 6–6–56 to 6–5–57; 5 learners (misses' sportswear).

Sylvania Garment Co., Inc., Sylvania, Ga.; effective 6–11–56 to 12–10–56; 35 learners for plant expansion purposes (sport shirts).

I. Taitel & Son, 111 West Cherry Street, Scottsburg, Ind.; effective 6–20–56 to 6–19–57; 10 learners (men's and boys' outerwear).

Wedowee Manufacturing Co., Wedowee, Ala.; effective 6–6–56 to 12–5–56; 40 learners for plant expansion purposes (sport shirts).

Wood Garment Manufacturing Co., Inc., Crane, Mo.; effective 6–7–56 to 6–6–57; ten percent of factory production workers (dress trousers, dungarees, etc.).

Wood Garment Manufacturing Co., Inc., Republic, Mo.; effective 6–6–56 to 6–5–57; ten percent of factory production workers (dress trousers).

Glove Industry Learner Regulations (29 CFR 522.60 to 522.65, as amended March 1, 1956, 21 F. R. 581).

Hansen Glove Corp., Ironwood, Mich.; effective 6–8–56 to 6–7–57; 10 learners for normal labor turnover purposes (leather dress gloves).

Hansen Glove Corp., Clintonville, Wis.; effective 6–8–56 to 6–7–57; ten percent of factory production workers engaged in the authorized learner occupations (knit dress gloves).

Ideal Glove Co., Inc., Maben, Miss.; effective 6–15–56 to 6–14–57; 5 learners for normal labor turnover purposes (work gloves).

Knitted Wear Industry Learner Regulations (29 CFR 522.30 to 522.35, as amended March 1, 1956, 21 F. R. 581).

Short Manufacturing Co., 735 O Street, Lincoln, Nebr.; effective 6–6–56 to 6–5–57; 3 learners for normal labor turnover purposes (shorts).

Shoe Industry Learner Regulations (29 CFR 522.50 to 522.55, as amended March 1, 1956, 21 F. R. 1195).

Vincent Horwitz Co., Inc., 2121 Beale Avenue, Altoona, Pa.; effective 6–6–56 to 6–5–57; 10 percent of factory production workers for normal labor turnover purposes.

Albert H. Weinbrenner Co., Merrill, Wis.; effective 6–12–56 to 12–11–56; 30 learners for plant expansion purposes.

Albert H. Weinbrenner Co., Merrill, Wis.; effective 6–12–56 to 6–11–57; 10 percent of factory production workers for normal labor turnover purposes.

Regulations applicable to the Employment of Learners (29 CFR 522.1 to 522.12, as amended February 28, 1955, 20 F. R. 645).

The following learner certificate was issued to the company listed below manufacturing miscellaneous products. The effective and expiration dates, learner rates, occupations, learning periods, and the number or proportion of learners authorized to be employed are as indicated:

Amboy Handkerchief Works, 235 New Brunswick Avenue, Perth Amboy, N. J.; effective 6–6–56 to 12–5–56; not less than 85 cents per hour for the first 160 hours and 90 cents per hour for the remaining 80 hours of the 240-hour learning period, for the occupations of sewing machine operating and pressing; authorizing the employment of 5 learners for normal labor turnover purposes (handkerchiefs).

The following special learner certificate was issued in Hawaii to the company hereinafter named. The effective and expiration dates, learner rates, occupations, learning periods, and the number or proportion of learners authorized to be employed, are as indicated:

Kahala Sportswear, Ltd., 1329 Kamalle Street, Honolulu, Hawaii; effective 6–4–56 to 6–3–57; not less than 80 cents per hour for the first 320 hours and 85 cents per hour for the remaining 160 hours of the 480-hour learning period for the occupation of sewing machine operator; authorizing the employ-

ment of 4 learners for normal labor turnover purposes (men's and ladies' apparel).

Regulations Applicable to the Employment of Student-Workers (29 CFR 527.1 to 527.9, October 14, 1955, 20 F. R. 7737).

Clear Creek Mountain Preachers Bible School, Pineville, Ky.; effective 6-6-56 to 8-31-56; not less than 80 cents per hour for the first 375 hours and 85 cents per hour for the remaining 375 hours of the 750-hour learning period, for the occupations of woodworking machine operator, assembler, furniture finisher and related skilled and semi-skilled occupations, including incidental clerical work in furniture shop; authorizing the employment of 45 learners (furniture).

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be cancelled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 18th day of June 1956.

MILTON BROOKE,

## TITLE 3—THE PRESIDENT

### EXECUTIVE ORDER 10671

FLEET ADMIRAL ERNEST J. KING

As a mark of respect to the memory of Fleet Admiral Ernest J. King, it is hereby ordered, pursuant to the provisions of Section 4 of Proclamation 3044 of March 1, 1954, that until interment the flag of the United States shall be flown at half-staff on all buildings, grounds, and naval vessels of the Federal Government in the District of Columbia and throughout the United States and its Territories and possessions.

DWIGHT D. EISENHOWER

THE WHITE HOUSE,
*June 26, 1956.*

[F. R. Doc. 56-5203; Filed, June 27, 1956; 12:15 p. m.]

## TITLE 7—AGRICULTURE

### Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

PART 905—HANDLING OF MILK IN THE OKLAHOMA CITY, OKLA., MARKETING AREA

ORDER AMENDING THE ORDER, AS AMENDED

§ 905.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Oklahoma City, Oklahoma, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order, as amended and as hereby further amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order, as amended, effective not later than July 1, 1956. Any delay beyond July 1, 1956 in the effective date of this order amending the order, as amended, would defeat the purpose of this amendment because it applies only through July 1956. The changes effected by this order amending the order, as amended, do not require of persons affected substantial or extensive preparation prior to the effective date. In view of the foregoing, it is found that good cause exists for making this order effective July 1, 1956 (see sec. 4 (c) Administrative Procedure Act, 5 U. S. C. 1003 (c)).

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order amending the order, as amended, which is marketed within the Oklahoma City, Oklahoma, marketing area) of more than 50 percent of the milk which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating

Chapter I:
Part 33 (proposed) — 4758

the handling of milk in the said marketing area, and it is hereby further determined that;

(1) The refusal or failure of such handlers to sign said proposed marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers who, during the determined representative period (May 1956) were engaged in the production of milk for sale in the said marketing area.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof the handling of milk in the Oklahoma City, Oklahoma, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Delete the period (.) at the end of § 905.65 (a), substitute therefor a colon (:) and add the following: *"Provided,* That deliveries during the months of September 1955 through December 1955 to a plant whose operations have since been transferred to an approved plant shall be used in the computation of daily average bases effective through July 1956 for producers who became producers through such transfer of operations."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608 c)

Issued at Washington, D. C., this 22d day of June 1956, to be effective on and after the 1st day of July 1956.

[SEAL] TRUE D. MORSE, *Acting Secretary.*

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

ORDER AMENDING ORDER, AS AMENDED, REGULATING HANDLING

§ 914.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations made in connection with the issuance of this order; and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and the applicable rules of practice and procedure effective thereunder (7 CFR Part 900), a public hearing was held on January 27, 1956, at Los Angeles, California, upon proposed amendments to Marketing Agreement No. 117, as amended, and Order No. 14, as amended (7 CFR Part 914) regulating the handling of navel oranges grown in Arizona and designated part of California. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act, including the establishment and maintenance of such orderly marketing conditions for navel oranges grown in Arizona and designated part of California as will provide, in the interests of producers and consumers, an orderly flow thereof to market throughout its normal marketing season to avoid unreasonable fluctuations in supplies and prices;

(2) The said order, as amended, and as hereby further amended, regulates the handling of navel oranges grown in the designated production area in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity, specified in the marketing agreement upon which hearings have been held;

(3) The said order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area that is practicable, consistently with carrying out the declared policy of the act; and the issuance of several orders applicable to subdivisions of such production area would not effectively carry out the declared policy of the act;

(4) The said order, as amended, and as hereby further amended, prescribes, so far as practicable, such different terms, applicable to different parts of the production area, as are necessary to give due recognition to differences in the production and marketing of such oranges; and

(5) All handling of navel oranges, as defined herein, is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

(b) *Determinations.* It is hereby determined that:

(1) The agreement amending the marketing agreement, as amended, regulating the handling of Navel oranges grown in Arizona and designated part of California, upon which the aforesaid public hearing was held, has been signed by handlers (excluding cooperative associations of producers who were not engaged in processing, distributing, or shipping the oranges covered by this order) who, during the period beginning November 1, 1954, and ending October 31, 1955, both dates inclusive, handled not less than 80 percent of the volume of oranges covered by said order, as amend-

ed, and as hereby further amended; and

(2) The issuance of this order, amending the aforesaid order, is favored or approved by producers who, during the determined representative period (November 1, 1954, through October 31, 1955), produced for market, within Arizona and the designated part of California, at least two-thirds of the volume of Navel oranges produced for market within the said production area.

*It is, therefore, ordered,* That, on and after the effective date hereof, the handling of navel oranges grown in Arizona and designated part of California shall be in conformity to, and in compliance with, the terms and conditions of the aforesaid order, as amended, and as hereby further amended as follows:

1. Delete the provisions of § 914.15 and substitute in lieu thereof the following:

§ 914.15 *Carton.* "Carton" means the standard container number 58 as defined in section 828.83 of the Agricultural Code of California, as amended, of a capacity of approximately 38½ pounds of oranges, or such other container and capacity as may be established by the committee with the approval of the Secretary, or the equivalent thereof.

2. Delete the provisions of § 914.17 and substitute in lieu thereof the following:

§ 914.17 *Carload.* "Carload" means a quantity of oranges equivalent to 924 cartons of oranges, or such other quantity of oranges as may be established by the committee with the approval of the Secretary.

3. Amend the provisions of § 914.21 by deleting therefrom the date "November 1" and substituting in lieu thereof the date "October 1."

4. Amend the provisions of § 914.31 by adding at the end of the section the following: "Whenever specifically authorized or approved by the committee, an alternate member shall be reimbursed for reasonable expenses necessarily incurred by him in attending committee meetings and shall receive compensation at the rate provided in this section, notwithstanding that the committee member for whom he serves as alternate also attends such meetings."

5. Amend the provisions of § 914.32 as follows:

a. Delete the first sentence thereof and substitute in lieu thereof the following: "The committee shall, as soon as practicable after the marketing of the crop is completed, prepare and mail an annual report to the Secretary and to each handler and grower of record."

b. Delete therefrom the words following (d) and substitute in lieu thereof the following: "notice of the time and place of an open meeting, to be held as soon as practicable after the mailing of the annual report, to review the whole record of the operations of this part."

6. Amend the provisions of paragraph (e) of § 914.53 *Prorate bases* by inserting the following as a part of the last sentence in such paragraph: "; and, in the event the change in control of oranges is occasioned by a bona fide transfer of the ownership of the real property on which such oranges were produced, the person gaining the control of such oranges shall have his quantity of oranges available for current shipment adjusted by adding thereto a quantity of oranges equal to that which is so deducted."

7. Amend the provisions of § 914.55 by deleting therefrom the first sentence and substituting in lieu thereof the following: "During any week for which the Secretary has fixed the total quantity of oranges which may be handled, any person who has received an allotment for such week, and whose total allotment is not loaned, or is not required for the repayment of an allotment loan or as a deduction for a prior overshipment, may handle in addition to his allotment an amount of such oranges equivalent to 10 percent of his allotment, or one carload, whichever is the greater."

8. Amend the provisions of § 914.57 by adding a new paragraph (e) as follows:

(e) No allotment may be loaned from one handler to another when such loan is brought about by the payment of a consideration.

9. Amend the provisions of § 914.64 by inserting the following immediately after the first sentence of such section: "When any such size regulation restricts the handling of a portion of a specified size, the quantity of such size that may be handled by a handler during a particular week shall be established as a percentage of (a) the weekly allotment issued to such handler when volume regulation is in effect, and (b) the total weekly volume handled by such handler when volume regulation is not in effect."

10. Insert the following new sentence immediately preceding the last sentence of § 914.52 *Issuance of volume regulations:* "Such regulation may be made effective, as authorized by the act, irrespective of whether the season average price for navel oranges is in excess of the parity price specified therefor in the act."

11. Amend the provisions of § 914.71 by deleting therefrom the word "box" and substituting in lieu thereof the word "carton."

12. Immediately preceding the closing of the parenthesis at the end of § 914.2 *Act* insert the following: "; 68 Stat. 906, 1047."

13. Amend the provisions of § 914.83 (c) (3) by deleting from the last sentence thereof the date "September 15" and substituting in lieu thereof the date "March 15."

(48 Stat. 31, as amended; 7 U. S. C. 601 et seq.)

Issued at Washington, D. C., this 22d day of June 1956, to become effective 30 days after publication in the FEDERAL REGISTER.

[SEAL] TRUE D. MORSE,
*Acting Secretary.*

[F. R. Doc. 56-5120; Filed, June 27, 1956; 8:53 a. m.]

[Valencia Orange Reg. 61, Amdt. 2]

PART 922—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

*Findings.* 1. Pursuant to the marketing agreement and Order No. 22, as amended (7 CFR Part 922; 21 F. R. 4392), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and upon the basis of other available information, it is hereby found that the limitation of handling of such valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.), in that (i) the requirements of the said marketing agreement and the amendments (21 F. R. 4392) to the said order make this amendment necessary; (ii) such amendment should be made effective as soon as practicable since shipments of Valencia oranges are now being made from Districts 1 and 3 subject to size restrictions, and handlers should be permitted to utilize, as quickly as possible, the revised method of computing the portion of their shipments of oranges which may be smaller than 2.31 inches in diameter; (iii) the provisions of this amendment are well known to handlers of Valencia oranges as the result of the public hearing, decisions, and other procedures (20 F. R. 9972; 21 F. R. 2384, 3022, 4392) in connection with the marketing agreement and the issuance of the amendments to the order; and (iv) compliance with this amendment will not require any preparation on the part of persons subject thereto which cannot be completed prior to the effective time hereof.

*Order, as amended.* The provisions in paragraph (b) of § 922.361 (Valencia Orange Regulation 61, as amended; 21 F. R. 2038, 3964) are hereby amended to read as follows:

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., June 29, 1956, and ending at 12:01 a. m., P. s. t., February 3, 1957, no handler shall handle any Valencia oranges grown in District 1 or in District 3 which are smaller than 2.31 inches in diameter, which shall be the largest measurement at a right angle to a straight line running from the stem to the blossom end of the fruit, except that a tolerance of 5 percent, by count, of oranges smaller than such minimum diameter shall be permitted in any type of container: *Provided,* That, in addition to such tolerance, each handler may, during each calendar week of the aforesaid period, handle a quantity of such oranges which are smaller than 2.31 inches in diameter but not smaller than 2.20 inches in diameter, except that a tolerance of 5 percent, by count, of oranges smaller than 2.20 inches in diameter shall be permitted in any container of oranges which are smaller than 2.31 inches in diameter, if such quantity does not exceed (i) 5 percent of the weekly allotment issued to such handler for such week, or (ii) when volume regulation is not in effect, 5 percent of the total weekly volume of Valencia oranges handled by such handler during such week.

(2) As used in this section, "handle," "handler," "District 1," and "District 3" shall have the same meaning as when used in said order.

*Effective time.* The provisions of this amendment shall become effective at 12:01 a. m., P. s. t., June 29, 1956.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: June 26, 1956.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

[Valencia Orange Regulation 65, Amdt. 2]

PART 922—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

*Findings.* 1. Pursuant to the marketing agreement and Order No. 22, as amended (7 CFR Part 922; 21 F. R. 4392), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.; 68 Stat. 906, 1047), and upon the basis of other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

2. It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.), in that (i) the requirements of the said marketing agreement and the amendments (21 F. R. 4392) to the said order make this amendment necessary; (ii) such amendment should be made effective as soon as practicable since shipments of Valencia oranges are now being made from District 2 subject to size restrictions, and handlers should be permitted to utilize, as quickly as possible, the revised method of computing the portion of their shipments of oranges which may be smaller than 2.31 inches in diameter; (iii) the provisions of this amendment are well known to handlers of Valencia oranges as the result of the public hearing, decisions, and other procedures (20 F. R. 9972; 21 F. R. 2384, 3022, 4392) in connection with the marketing agreement and the issuance of the amendments to the order; and (iv) compliance with this amendment will not require any preparation on the part of persons subject thereto which cannot be completed prior to the effective time hereof.

*Order, as amended.* The provisions in paragraph (b) of § 922.365 (Valencia Orange Regulation 65, as amended; 21 F. R. 2717, 3965) are hereby amended to read as follows:

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., June 29, 1956, and ending at 12:01 a. m., P. s. t., February 3, 1957, no handler shall handle any Valencia oranges grown in District 2 which are smaller than 2.31 inches in diameter, which shall be the largest measurement at a right angle to a straight line running from the stem to the blossom end of the fruit, except that a tolerance of 5 percent, by count, of oranges smaller than such minimum diameter shall be permitted in any type of container: *Provided,* That, in addition to such tolerance, each handler may, during each calendar week of the aforesaid period, handle a quantity of such oranges which are smaller than 2.31 inches in diameter but not smaller than 2.20 inches in diameter, except that a tolerance of 5 percent, by count, of oranges smaller than 2.20 inches in diameter shall be permitted in any container of oranges which are smaller than 2.31 inches in diameter, if such quantity does not exceed (i) 5 percent of the weekly allotment issued to such handler for such week, or (ii) when volume regulation is not in effect 5 percent of the total weekly volume of Valencia oranges handled by such handler during such week.

(2) As used in this section, "handle," "handler," and "District 2" shall have the same meaning as when used in said order.

*Effective time.* The provisions of this amendment shall become effective at 12:01 a. m., P. s. t., June 29, 1956.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Dated: June 26, 1956.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

## TITLE 6—AGRICULTURAL CREDIT

### Chapter I—Farm Credit Administration

Subchapter B—Federal Farm Loan System

PART 10—FEDERAL LAND BANKS GENERALLY

INTEREST RATES ON LOANS MADE THROUGH ASSOCIATIONS

Inasmuch as approval has been given to an interest rate of 5 percent per annum on loans by the Federal Land Bank of Springfield applied for through associations on and after July 1, 1956, § 10.54 of Title 6 of the Code of Federal Regulations (21 F. R. 3737) is hereby amended, effective July 1, 1956, by substituting "5" for "4½" as the interest rate for the Federal Land Bank of Springfield.

(Secs. 12 "Second," 17, 39 Stat. 370, 375, as amended; 12 U. S. C. 771 "Second", 831)

[SEAL] A. T. ESGATE,
*Acting Governor.*

## TITLE 19—CUSTOMS DUTIES

### Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 54117]

PART 8—LIABILITY FOR DUTIES; ENTRY OF IMPORTED MERCHANDISE

DESIGNATION OF MERCHANDISE TO BE EXAMINED

When portions of a lot of foreign merchandise in a nonprivileged status in a foreign-trade zone have been entered for consumption, collectors of customs have been designating packages or quantities of each portion separately entered to be opened and examined for the purpose of appraisement or otherwise and ordering such packages or quantities to be sent to the public stores or other places for such purposes.

It is found that the designation for examination of packages from each portion from one zone lot of uniform merchandise covered by one invoice is not necessary under certain conditions for the purpose of amply protecting the revenue.

To incorporate this change, § 8.22 of the Customs Regulations is amended by designating the material now following the caption as paragraph "(a)", and by adding a new paragraph (b), as follows:

(b) When a portion of a zone lot of nonprivileged foreign merchandise, which merchandise is covered by one invoice and the contents and value of packages of such merchandise are uniform or the merchandise is identical as to character and value although differing as to quantity and aggregate value per package, has been entered and packages or quantities thereof have been designated for examination for customs purposes designation of packages or quantities for examination from subsequent portions of such zone lot of merchandise under entries for consumption by the same importer at the same port of entry, and which entries identify the first consumption entry of a portion of such lot entered by that importer, need not be made except that the collector may designate for examination any packages or quantities of any such subsequent portions if in his discretion he deems such examination necessary or advisable.

(Sec. 499, 46 Stat. 728, as amended; 19 U. S. C. 1499)

(Secs. 499, 624, 46 Stat. 728, as amended, 759; 19 U. S. C. 1499, 1624)

[SEAL] RALPH KELLY,
*Commissioner of Customs.*

Approved: June 21, 1956.

DAVID KENDALL,
*Acting Secretary of the Treasury.*

[F. R. Doc. 56-5121; Filed, June 27, 1956; 8:53 a. m.]

# TITLE 14—CIVIL AVIATION

## Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 201]

## PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

### PROCEDURE ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

NOTE: Where the general classification (LFR, VAR, ADF, ILS, GCA, or VOR), location, and procedure number (if any) of any procedure in the amendments which follow, are identical with an existing procedure, that procedure is to be substituted for the existing one, as of the effective date given, to the extent that it differs from the existing procedure; where a procedure is canceled, the existing procedure is revoked; new procedures are to be placed in appropriate alphabetical sequence within the section amended.

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles. Elevations and latitudes are in feet, MSL. Ceilings are in feet above airport elevation.

If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport, authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

| City and State; airport name, elevation; facility: class and identification; procedure No.; effective date | Initial approach to facility from— | Course and distance | Minimum altitude (ft.) | Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances | Minimum altitude over facility on final approach course (ft.) | Course and distance, facility to airport | Ceiling and visibility minimums | | | | If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | Condition | 2 engines or less | | More than 2 engines (more than 65 knots) | |
| | | | | | | | | 65 knots or less | More than 65 knots | | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| PENSACOLA, FLA. Municipal, 121'. SBRAZ-PNS. Procedure No. 1. Amendment No. 9. Effective date: July 21, 1956. Supersedes Amendment 8, dated July 8, 1954. Major changes: Revise transitions. Revise courses due variation. Convert to nautical miles. Change airport name form Hagler to Municipal. | Pensacola VOR | 100—6.0 | 1,700 | E side of S course: 161° outbound. 341° inbound. 1,200' within 10 miles. Beyond 10 miles not authorized. | 700 | 341—1.8 | T-dn<br>C-dn<br>S-dn 35<br>A-dn | 300-1<br>400-1<br>400-1<br>800-2 | 300-1<br>500-1<br>400-1<br>800-2 | 200-½<br>500-1½<br>400-1<br>800-2 | Within 1.8 miles turn right, climb to 1,200' on S course (161) within 10 miles.<br>CAUTION: Danger area beyond 10 miles. |

| | Milliview LF intersection | 078—11.0 | 1,700 | | | | | | | | |

2. The terminal very high frequency omnirange (TVOR) procedures prescribed in § 609.9 are amended to read in part:

TVOR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, courses, and radials are magnetic. NOTE: Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.

If a TVOR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for an en route operation in the particular area or as set forth below.

| City and State; airport name, elevation; facility: class and identification; procedure No. (TVOR); effective date | Initial approach to facility from— | Course and distance | Minimum altitude (ft.) | Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances | Minimum altitude over facility on final approach course (ft.) | Course and distance from int. runway center line extended and final course to approach end of runway | Ceiling and visibility minimums | | | | If visual contact not established at TVOR, or if landing not accomplished |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | Condition | 2 engines or less | | More than 2 engines; more than 65 knots | |
| | | | | | | | | 65 knots or less | More than 65 knots | | |

4. The ground controlled approach procedures prescribed in § 609.13 are amended to read in part:

GCA STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, and courses are magnetic. NOTE: Distances are in nautical miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.

If a GCA instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted with a different procedure for such airport authorized by the Administrator of Civil Aeronautics. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for the particular area or as set forth below. Positive identification must be established with the radar controller prior to the beginning of the GCA to final approach. Minimums are based on the use of a radar controller and a pilot who is competent in the use of GCA. Unless otherwise directed by the radar controller, (A) no aircraft shall make an approach to land when the reported ceiling is less than the minimum, or (B) at pilot's discretion if it appears desirable to discontinue the approach, except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when the aircraft is not in contact with the radar controller at the end of the final approach, or (C) visual contact is not established upon descent to authorized landing minimums, or (D) if landing is not accomplished.

# TITLE 16—COMMERCIAL PRACTICES

## Chapter I—Federal Trade Commission

### Subchapter B—Trade Practice Conference Rules

[File No. 21-335]

### PART 36—POULTRY HATCHING AND BREEDING INDUSTRY

Due proceedings having been held under the trade practice conference procedure in pursuance of the Act of Congress approved September 26, 1914, as amended (Federal Trade Commission Act), and other provisions of law administered by the Commission:

*It is now ordered*, That the trade practice rules of Group I and Group II, as hereinafter set forth, which have been approved and received, respectively, by the Commission in this proceeding, be promulgated as of June 30, 1956.

*Statement by the Commissioner.* Trade Practice rules for the poultry hatching and breeding industry, as hereinafter set forth, are promulgated by the Federal Trade Commission under the trade practice conference procedure. Such rules constitute a revision and extension of the trade practice rules for the baby chick industry promulgated by the Commission on September 15, 1948, and supersede the 1948 rules.

The industry for which these rules are established is composed of persons, firms, corporations, and organizations engaged in the marketing of any kind or kinds of live poultry for growing, breeding, or egg or meat production, and of poultry eggs for hatching use. The live poultry mentioned includes, but is not limited to, chicks, poults, goslings, and ducklings.

The rules are directed to the prevention and elimination of various practices deemed to be violative of laws administered by the Commission. They are to be applied to such end and to the exclusion of any acts or practices which suppress competition or otherwise restrain trade.

Proceedings for the establishment of these rules were instituted upon application of the American Poultry and Hatchery Federation. After due consideration of proposals received, proposed rules for the poultry hatching and breeding industry were published by the Commission and made available to all industry members and other interested or affected parties upon public notice whereby they were afforded opportunity to present their views, including such pertinent information, suggestions, or amendments as they desired to offer and to be heard in the premises. Pursuant to such notice, public hearings were held at Kansas City, Missouri, and at Washington, D. C., on February 13 and 29, 1956, respectively, and all matters there presented, or otherwise received in the proceedings, were duly considered by the Commission.

Thereafter, and upon full consideration of the entire matter, final action was taken by the Commission whereby it approved and received, respectively, the Group I and Group II rules as hereinafter set forth. The Group II rules are not of the type presently the subject of a general study by the Commission.

Such rules become operative thirty (30) days from the date of promulgation.

*The rules.* These rules promulgated by the Commission are designed to foster and promote the maintenance of fair competitive conditions in the interest of protecting industry, trade, and the public. It is to this end, and to the exclusion of any act or practice which fixes or controls prices through combination or agreement, or which unreasonably restrains trade or suppresses competition, or otherwise unlawfully injures, destroys, or prevents competition, that the rules are to be applied.

GROUP I

*General statement.* The unfair trade practices embraced in the rules herein are considered to be unfair methods of competition, unfair or deceptive acts or practices, or other illegal practices, prohibited under laws administered by the Federal Trade Commission; and appropriate proceedings in the public interest will be taken by the Commission to prevent the use, by any person, partnership, corporation, or other organization subject to its jurisdiction, of such unlawful practices in commerce.

Sec.

36.0 The industry and its products.

GROUP I

36.1 Misrepresentation of products.
36.2 Deceptive concealment of material facts.
36.3 Deceptive claims relating to National Poultry Improvement Plan or National Turkey Improvement Plan.
36.4 Guarantees, warranties, etc.
36.5 Deceptive testimonials.
36.6 Deceptive claims respecting freedom or immunity from disease.
36.7 Substitution of chicks different from those ordered.
36.8 Fictitious prices.
36.9 Misrepresenting offer as "special," etc.
36.10 Misrepresenting chicks as from high-performance stock.
36.11 Misrepresentation as to yields of eggs, as to chicks from hens with purported high egg-laying records, as to chicks from high egg-producing stock, etc.
36.12 Misuse of words "hatchery," "chickery," "chick nursery," "farm," "poultry farm," "breeding farm," and related representations.
36.13 Deception as to transportation or c. o. d. charges.
36.14 Deceptive representations as to earnings, etc.
36.15 Use of the word "free."
36.16 Deception by means of "bogus independents," "chick outlets," etc.
36.17 Misrepresentation respecting new breed of poultry.
36.18 Misuse of the term "strain."
36.19 Misuse of term "dominant white," etc.
36.20 Misrepresentation as to breeding, etc.
36.21 False or misleading price quotations, etc.
36.22 Defamation of competitors or false disparagement of their products.
36.23 Prohibited sales below cost.
36.24 Prohibited discrimination.
36.25 Aiding or abetting use of unfair trade practices.

GROUP II

36.101 Shipping chicks to fictitious consignees, etc.
36.102 Failure to give notice of change in shipping schedule.

AUTHORITY: §§ 36.0 to 36.102 issued under sec. 6, 38 Stat. 721; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45.

§ 36.0 *The industry and its products.* Members of the industry to which the rules have application are persons, firms, corporations, and organizations engaged in the marketing of any kind or kinds of live poultry for growing, breeding, or egg or meat production, and of poultry eggs for hatching use. The live poultry mentioned includes, but is not limited to, chicks, poults, goslings, and ducklings.

NOTE: As used in these rules, the word "chicks" shall be construed to include all kinds of live young poultry.

§ 36.1 *Misrepresentation of products.* In the sale, offering for sale, or distribution of industry products, it is an unfair trade practice for any member of the industry to make or publish, or cause to be made or published, any statement or representation (whether in the form of advertisement, trade promotional literature, mark, stamp, brand, label, depiction, photograph, illustration, radio or television broadcast, or otherwise) concerning:

(a) The grade, quantity, breed, strain, cross, pedigree, type, sex, sexing, culling, quick maturity, uniform development, livability, vigor, strength, character, nature, origin, weight, color, size, egg-producng, meat-producing, or other qualities of such products; or

(b) The production, sale, distribution, or delivery thereof; or

(c) The supervision, endorsement, or approval of any poultry breeding, hatching, or other operation by Federal, State, or other authority, or any official connection with such Federal, State, or other authority; or

(d) Any other matter relating to the poultry hatching or breeding business or to any of its products which, directly or by implication, is false, misleading, or deceptive in any respect.

NOTE: The inhibitions of this section are to be understood as applicable to representations or implications, such as "A," "AA," "AAA," etc., that any industry product conforms to the requirements of any grade or quality standard when (1) no such grade or quality standard exists, or (2) no disclosure of the identity of such standard, whether private, official, or otherwise, is made, or (3) when the member's product does not conform to such grade or quality standard.

[Rule 1]

§ 36.2 *Deceptive concealment of material facts.* (a) In advertising, offering for sale, or selling industry products, it is an unfair trade practice for any member of the industry to fail to disclose any material facts relating to such products when such failure has the capacity and tendency or effect of misleading or deceiving purchasers or prospective purchasers of such products.

(b) Among the practices inhibited by this section are the following:

(1) Filling chick orders with chicks which are wholly or predominantly cockerels without having disclosed this fact to the purchaser prior to sale.

(2) Offering chicks for sale without disclosing, prior to shipment, the fact that such chicks are cockerels of one sort

or another when such is the case, or are of a different breed or breeds than indicated in the offer, or that such chicks will be shipped upon dates later or different from those specified or implied.

(3) Representing that the parent flocks of chicks contain certain desirable types of males or females without disclosure of the approximate percentage or proportion of the flocks accounted for by such types. [Rule 2]

§ 36.3 *Deceptive claims relating to National Poultry Improvement Plan or National Turkey Improvement Plan.* (a) In connection with the sale, offering for sale, or distribution of industry products, it is an unfair trade practice for any industry member to represent or imply that he is a participant in the National Poultry Improvement Plan [1] or the National Turkey Improvement Plan, when such is not the fact.

NOTE: In order to avoid deception of purchasers or prospective purchasers of industry products, all industry members discontinuing participation in the National Poultry Improvement Plan, or the National Turkey Improvement Plan, shall immediately remove and discontinue the use of all signs, promotional literature, labels, and other representations or indications that they are still participating in any such Plan or Plans.

(b) In connection with the sale, offering for sale, or distribution of industry products, it is an unfair trade practice to use any of the terminology of the National Poultry Improvement Plan or the National Turkey Improvement Plan (such as "U. S. Approved," "U. S. Pullorum-Typhoid Clean," etc.), or any abbreviation or simulation of such terminology, as descriptive of industry products to which such terms are not fully applicable in accordance with the requirements therefor specified in such Plans. [Rule 3]

§ 36.4 *Guarantees, warranties, etc.* (a) In the sale, offering for sale, or distribution of industry products, it is an unfair trade practice for any industry member:

(1) To represent that any industry product is guaranteed unless, in close conjunction with such representation, the identity of the guarantor, the extent and nature of the guarantee, and any material conditions or limitations relating to the liability of the guarantor under the guarantee, are adequately and nondeceptively disclosed; or

(2) To offer or use any guarantee respecting an industry product under which the guarantor fails to observe his obligations thereunder; or

(3) To offer or use any guarantee which is otherwise deceptive or unfair.

(b) This section shall be applicable not only to guarantees but also to warranties, to purported guarantees and warranties, and to any promise or representation in the nature of a guarantee or warranty. [Rule 4]

§ 36.5 *Deceptive testimonials.* In the sale, offering for sale, or distribution of industry products, it is an unfair trade practice for any industry member to use or cause to be used, any testimonial which is false or misleading in any material respect. Among the kinds of testimonials inhibited by this section are the following:

(a) Testimonials containing inaccurate statements as to results obtained from industry products of any certain kind or type; or

(b) Testimonials regarding results obtained from industry products purchased from a certain seller or sellers which, by reason of inaccurate statements therein contained, or absence of disclosure of relevant facts, have the capacity and tendency or effect of deceiving purchasers or prospective purchasers of industry products. [Rule 5]

§ 36.6 *Deceptive claims respecting freedom or immunity from disease.* (a) In the sale, offering for sale, or distribution of industry products, it is an unfair trade practice for any industry member to advertise, describe, or otherwise represent or imply, that chicks or hatching eggs are free from any or all diseases when such is not the fact.

NOTE: At present there exist no tests, inoculations, vaccinations, etc., which poultry disease experts consider adequate to assure that chicks or hatching eggs are completely and absolutely free from any or all poultry diseases. Accordingly, such claims as "disease free," "pullorum free," or "100 percent pullorum free," must not be made by industry members.

Requirements applicable to claims and representations respecting tests, inoculations, vaccinations, and treatments for poultry diseases are set forth in paragraphs (b) and (c) of this section.)

(b) In the sale, offering for sale, or distribution of industry products, it is an unfair trade practice for any industry member to advertise, describe, or otherwise represent or imply, that chicks or hatching eggs come from birds or flocks which have been tested for pullorum, typhoid, and/or other disease or diseases, when:

(1) Such birds or flocks have not been tested for the particular disease or diseases during the current season; or

(2) The tests applied are not recognized by poultry disease experts as effective; or

(3) The methods used in making the tests, the number, timing, or manner of applying them, the qualifications of the person or persons making them, or other attendant circumstances, are not such as to assure of effectiveness of the tests.

(c) In the sale, offering for sale, or distribution of industry products, it is an unfair trade practice for any industry member to advertise, describe, or otherwise represent or imply, that chicks have been vaccinated, inoculated, or treated for any disease or diseases, when such is not the fact, or when the vaccination, inoculation, or treatment applied is of a kind not recognized by poultry disease experts as effective, or when the method used in the vaccination, inoculation, or treatment, or the timing or extent of the vaccination, inoculation, or treatment, the qualifications of the person or persons making the vaccination, inoculation, or treatment, or other attendant circumstances, are not such as to assure of their effectiveness. (See also the first paragraph of the note which follows paragraph (a) of this section.) [Rule 6]

§ 36.7 *Substitution of chicks different from those ordered.* (a) It is an unfair trade practice to advertise, describe, or otherwise represent, chicks as being of a certain strain, grade, trade name, or quality, and, upon receipt of orders for such chicks, filling same with chicks of a different strain, grade, trade name, or quality, without first obtaining the consent of the purchasers to such substitutions.

(b) It is also an unfair trade practice, upon receiving orders for industry products of a certain kind, strain, grade, trade name, or quality, to fill such orders with a different kind, strain, grade, trade name, or quality, without first obtaining consent of the purchaser to such substitution. [Rule 7]

§ 36.8 *Fictitious prices.* It is an unfair trade practice to sell or offer for sale industry products at prices purported to be reduced from what are in fact fictitious prices, or to sell or offer for sale such products at a purported reduction in price when such purported reduction is in fact fictitious or is otherwise misleading or deceptive. [Rule 8]

§ 36.9 *Misrepresenting offer as "special," etc.* It is an unfair trade practice to represent an offer as "special" with reference to price, terms, or otherwise, when it is in fact a regular offer; or otherwise to use the term "special" or any term or word of similar import, as descriptive of any offer, in a manner, or under conditions, having the capacity and tendency or effect of misleading or deceiving purchasers or prospective purchasers as to the true nature of the offer. [Rule 9]

§ 36.10 *Misrepresenting chicks as from high-performance stock.* It is an unfair trade practice to advertise, describe, or otherwise represent that chicks sold or offered for sale are the progeny of, are descended from, are closely related to, or are of the strain of, high-performance stock or poultry, when such is not the fact. [Rule 10]

§ 36.11 *Misrepresentation as to yields of eggs, as to chicks from hens with purported high egg-laying records, as to chicks from high egg-producing stock, etc.*—(a) *Misrepresentation as to yields of eggs.* It is an unfair trade practice to represent, directly or by implication, through advertising or otherwise, that high yields of eggs are received from all or any flocks of a particular seller or producer when such is not the fact, or when such is untrue in whole or in part.

(b) *Misrepresentation as to chicks from hens with purported high egg-laying records.* It is an unfair trade practice to represent, directly or by implication, through advertising or otherwise, that chicks are produced by hens having certain purported high egg-laying records when the records of such hens have not been adequately established and the period of time and the method used are not clearly disclosed in the advertising.

(c) *Misrepresenting chicks as from high egg-producing stock, etc.* It is an unfair trade practice to represent, directly or by implication, through advertising or otherwise, that chicks offered for sale are of high egg-producing stock when such qualities have not been established, or when such representation is otherwise false, misleading, or deceptive. [Rule 11]

§ 36.12 *Misuse of words "hatchery," "chickery," "chick nursery," "farm," "poultry farm," "breeding farm," and related representations.* In the sale, offering for sale, or distribution of chicks, it is an unfair trade practice for any member of the industry, by trade or corporate name, through advertising or otherwise:

(a) To hold himself out as owning or operating a hatchery, chickery, chick nursery, poultry farm, poultry breeding business, or as being the producer of chicks, or as operating incubators or producing chicks under claimed or specified conditions, when such is not the fact; or

(b) To use the terms "hatchery," "farm," "poultry farm," "breeding farm," or similar representations, in such manner as to have the capacity and tendency or effect of misleading or deceiving purchasers or prospective purchasers into the belief that the chicks have been produced in a hatchery or on a farm, poultry farm, or breeding farm, of said industry member, when such is not the fact.

(c) Nothing in this section, however, shall be construed as prohibiting an industry member, who actually owns and operates a farm primarily devoted to the production of chicks, from selling, offering for sale, or distributing, under a trade, corporate, or other name containing the word "farm," chicks produced from flocks of cooperating farms along with chicks produced on such member's own farm, if and when the industry member has and exercises direct supervision and control over all operations and conditions material to the quality, health, and vigor of all said chicks, including selection of the breeding stock of which such chicks are the progeny, and all breeding and disease-control practices. [Rule 12]

§ 36.13 *Deception as to transportation or C. O. D. charges.* (a) It is an unfair trade practice to sell or offer to sell chicks, through advertising or otherwise, in such manner as to have the capacity and tendency or effect of misleading or deceiving purchasers or prospective purchasers into the belief that the prices quoted for such chicks are the prepaid or delivered prices when such is not the fact.

(b) It is an unfair trade practice, by failing correctly to inform customers, or by other deception, to cause purchasers to believe that transportation costs will not be charged against them in C. O. D. charges or otherwise, when such is not true in fact. [Rule 13]

§ 36.14 *Deceptive representations as to earnings, etc.* It is an unfair trade practice to make false, misleading, or deceptive statements or representations regarding opportunities for making money or of actual or probable earnings of agents or dealers handling hatching eggs, chicks, or other poultry, or of purchasers raising chicks or other poultry. [Rule 14]

§ 36.15 *Use of the word "free."* In connection with the sale, offering for sale, or distribution of industry products, it is an unfair trade practice to use the word "free," or any other word or words of similar import, in advertisements or in other offers to purchasers or prospective purchasers, as descriptive of any product or service, which is not an unconditional gift, under the following circumstances:

(a) When all the conditions, obligations, or other prerequisites to the receipt and retention of the "free" product or service offered are not clearly and conspicuously set forth at the outset so as to leave no reasonable probability that the terms of the offer will be misunderstood; and, regardless of such disclosure:

(b) When, with respect to any product required to be purchased in order to obtain the "free" product or service, the offerer (1) increases the ordinary and usual price of such industry product, or (2) reduces its quality, or (3) reduces the quantity or size thereof.

NOTE: The disclosure required by paragraph (a) of this section shall appear in close conjunction with the word "free" (or other word or words of similar import) wherever such word first appears in each advertisement or offer. A disclosure in the form of a footnote, to which reference is made by use of an asterisk or other symbol placed next to the word "free," will not be regarded as compliance.

[Rule 15]

§ 36.16 *Deception by means of "bogus independents," "chick outlets," etc.* It is an unfair trade practice for any member of the industry:

(a) To represent, directly or by implication, that a certain chick outlet is independent of, or in competition with, said member, when such is not the fact; or

(b) To fail to disclose that any such outlet is not independent of, or not in competition with, said member, under circumstances where the failure to make such disclosure has the capacity and tendency or effect of misleading or deceiving purchasers or prospective purchasers. [Rule 16]

§ 36.17 *Misrepresentation respecting new breed of poultry.* (a) It is an unfair trade practice to offer for sale, sell, advertise, describe, or otherwise represent, directly or by implication, any chicks or other poultry as being a new breed or as being the progeny of a new breed, when such is not the fact.

(b) This section shall not be construed as preventing chicks or other poultry from being described as a new breed if and when they meet the following definition or specification for a new breed as proposed by the industry and no deception is practiced in relation to such designation or description:

*New Breed.* A group of birds which are of similar size, shape, and skin color and differ from existing breeds in these characters or in the combination of these characters, and the varieties within the breed have similar plumage color and pattern, comb type, and other distinguishing physical characteristics, all of the characteristics of the breed and variety being demonstrated as having been reproduced with a high degree of uniformity.

[Rule 17]

§ 36.18 *Misuse of the term "strain."* It is an unfair trade practice to represent, through advertising or otherwise, directly or by implication, chicks as being of a breeder's strain, unless such chicks are first or second generation progeny of stock originating from eggs produced by the breeder, or are from stock purchased from the breeder of the strain and mated each subsequent generation only to males secured from such breeder, or the vendor of such chicks is designated by the breeder as a multiplier of such stocks.

NOTE: The term "strain" as used in this section means poultry bearing a given name produced through at least five generations of closed flock breeding.

[Rule 18]

§ 36.19 *Misuse of term "dominant white," etc.* It is an unfair trade practice to represent, through advertising or otherwise, directly or by implication, chickens as "dominant white," or by similar expressions, unless such chickens, when used as either male or female parents in combination with any chickens, produce only progeny that is generally predominantly white in color: *Provided, however,* That when the surface color of such progeny is other than white, the under color must be white. [Rule 19]

§ 36.20 *Misrepresentation as to breeding, etc.* (a) In the sale or offering for sale of poultry, chicks, or hatching eggs, it is an unfair trade practice to make any statement or representation relating to the breeding incident to the production of any such products, or to use any term or designation as descriptive thereof which denotes or implies a certain kind or extent of breeding employed in the production of such products, which has the capacity and tendency or effect of deceiving purchasers or prospective purchasers of such poultry, chicks, or eggs.

(b) For the purpose of this section and in its application, the following terms are acceptable when used in accordance with their respective definitions:

*Crossbred.* The first generation poultry, chicks, or eggs produced by crossing two different breeds or varieties, or first-generation combinations of breeds or varieties.

*Inbred line.* A group of inbred chicks resulting from breeding closely related poultry and in which the individuals in question have an average coefficient of inbreeding of 37.5% (equivalent to two generations of brother-sister matings).

*In-crossbred.* The first generation poultry, chicks, or eggs produced by crossing two inbred lines, first-generation combinations of inbred lines, or the crossing of an inbred line with a first-generation combination of inbred lines.

NOTE: To some purchasers and prospective purchasers of chicks and hatching eggs, the term "hybrid" implies application of genetic principles similar to those employed in the production of hybrid seed corn, and to others the application of a selective system of breeding dissimilar to that employed in the production of hybrid seed corn.

[1] These Plans have been promulgated by the United States Department of Agriculture and are contained in the Code of Federal Regulations, 9 CFR Parts 145, 146, and 147.

The term is generally regarded as denoting a superior quality and vigor resulting from systematic breeding and shall only be used to describe chicks and hatching eggs having such superior quality and vigor.

In the interest of avoiding deception of purchasers and prospective purchasers, industry members desiring to use the term "hybrid" as descriptive of such chicks and hatching eggs shall, in addition, confine the use thereof to established industry products obtained by crossing different inbred lines, or by crossing different breeds, varieties, strains, or lines, and shall qualify the word "hybrid" by stating in immediate conjunction therewith the type of cross used in the production of the industry product, such as "inbred line-cross hybrid" or "inbred hybrid," "crossbred hybrid," "strain-cross hybrid," "line-cross hybrid," etc.

Industry members will be expected to maintain adequate breeding records showing the establishment of the advertised product.

[Rule 20]

§ 36.21 *False or misleading price quotations, etc.* It is an unfair trade practice for any member of the industry to publish or circulate price quotations, price lists, or terms or conditions of sale or purchase, which directly, or by reason of concealment of any material limitations, have the capacity and tendency or effect of deceiving purchasers or prospective purchasers. [Rule 21]

§ 36.22 *Defamation of competitors or false disparagement of their products.* The defamation of competitors by falsely imputing to them dishonorable conduct, inability to perform contracts, questionable credit standing, or by other false representations, or the false disparagement of the products of competitors in any respect, or of their business methods, selling prices, values, credit terms, policies, or services, is an unfair trade practice.

NOTE: Among the practices inhibited by this section is that of an industry member promoting or attempting to promote the sale of his chicks by reference to egg-laying tests or contests in which chickens of the same kind, breed, or type as the chicks being offered for sale by the industry member, and chickens of the same or another kind, breed, or type, have participated and are being compared, when, by reason of the circumstances under which such tests or contests have been conducted or absence of disclosure of material facts relating thereto (such as comparative size and weight of eggs), the results of such tests or contests do not accurately and fairly reflect the comparative egg-laying abilities of the different kinds, breeds, or types.

[Rule 22]

§ 36.23 *Prohibited sales below cost.* (a) The practice of selling industry products at a price less than the cost thereof to the seller, with the purpose or intent, and where the effect is, or where there is a reasonable probability that the effect will be, to substantially injure, suppress, or stifle competition or tend to create a monopoly, is an unfair trade practice.

(b) This section is not to be construed as prohibiting all sales below cost, but only such selling below the seller's cost as is resorted to and pursued with the wrongful intent or purpose referred to and where the effect is, or where there is reasonable probability that the effect will be, to substantially injure, suppress, or stifle competition or to create a monopoly. Among the situations in which the requisite purpose or intent would ordinarily be lacking are cases in which such sales were: (1) Of seasonal goods near the conclusion of the season; (2) of perishable goods in respect to which deterioration is imminent; (3) of obsolescent goods; (4) made under judicial process; or (5) made in bona fide discontinuance of business in the goods concerned.

(c) As used in the foregoing paragraphs of this section, the term "cost" means the respective seller's cost and not an average cost in the industry whether such average cost be determined by an industry cost survey or some other method. It consists of the total outlay or expenditure by the seller in the acquisition, production, and distribution of the products involved, and comprises all elements of cost such as labor, material, depreciation, taxes (except taxes on net income and such other taxes as are not properly applicable to cost), and general overhead expenses, incurred by the seller in the acquisition, manufacture, processing, preparation for marketing, sale, and delivery of the products. Not to be included are dividends or interest on borrowed or invested capital, or nonoperating losses, such as fire losses and losses from the sale or exchange of capital assets. Operating cost should not be reduced by items of nonoperating income, such as income from investments, and gain on the sale of capital assets.

(d) Nothing in this section shall be construed as relieving an industry member from compliance with any of the requirements of the Robinson-Patman Act. [Rule 23]

§ 36.24 *Prohibited discrimination*[2]—(a) *Prohibited discriminatory prices, or rebates, refunds, discounts, credits, etc., which effect unlawful price discrimination.* It is an unfair trade practice for any member of the industry engaged in commerce, in the course of such commerce, to grant or allow, secretly or openly, directly or indirectly, any rebate, refund, discount, credit, or other form of price differential, where such rebate, refund, discount, credit, or other form of price differential, effects a discrimination in price between different purchasers of goods of like grade and quality, where either or any of the purchasers involved therein are in commerce, and where the effect thereof may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them: *Provided, however:*

(1) That the goods involved in any such transaction are sold for use, consumption, or resale within any place under the jurisdiction of the United States;

(2) That nothing contained in paragraph (a) of this section shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered;

(3) That nothing contained in this section shall prevent persons engaged in selling goods, wares, or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade;

(4) That nothing contained in paragraph (a) of this section shall prevent price changes from time to time where made in response to changing conditions affecting the market for or the marketability of the goods concerned, such as but not limited to actual or imminent deterioration of perishable goods, distress sales under court process, or sales in good faith in discontinuance of business in the goods concerned.

(b) *Prohibited brokerage and commissions.* It is an unfair trade practice for any member of the industry engaged in commerce, in the course of such commerce, to pay or grant, or to receive or accept, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, except for services rendered in connection with the sale or purchase of goods, wares, or merchandise, either to the other party to such transaction or to an agent, representative, or other intermediary therein where such intermediary is acting in fact for or in behalf, or is subject to the direct or indirect control, of any party to such transaction other than the person by whom such compensation is so granted or paid.

(c) *Prohibited advertising or promotional allowances, etc.* It is an unfair trade practice for any member of the industry engaged in commerce to pay or contract for the payment of advertising or promotional allowances or any other thing of value to or for the benefit of a customer of such member in the course of such commerce as compensation or in consideration for any services or facilities furnished by or through such customer in connection with the processing, handling, sale, or offering for sale of any products or commodities manufactured, sold, or offered for sale by such member, unless such payment or consideration is available on proportionally equal terms to all other customers competing in the distribution of such products or commodities.

(d) *Prohibited discriminatory services or facilities.* It is an unfair trade practice for any member of the industry engaged in commerce to discriminate in favor of one purchaser against another purchaser or purchasers of a commodity bought for resale, with or without processing, by contracting to furnish or furnishing, or by contributing to the furnishing of, any services or facilities connected with the processing, handling, sale, or offering for sale of such commodity so purchased upon terms not accorded to all competing purchasers on proportionally equal terms.

(e) *Inducing or receiving an illegal discrimination in price.* It is an unfair trade practice for any member of the industry engaged in commerce, in the course of such commerce, knowingly to induce or receive a discrimination in price which is prohibited by the foregoing provisions of this section.

(f) *Exemptions.* The inhibitions of this section shall not apply to purchases of their supplies for their own use by schools, colleges, universities, public libraries, churches, hospitals, and charitable institutions not operated for profit.

NOTE: In complaint proceedings charging discrimination in price or services or facilities furnished, and upon proof having been made of such discrimination, the burden of rebutting the prima facie case thus made by showing justification shall be upon the person charged; and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination: *Provided, however,* That nothing contained in this section shall prevent a seller rebutting the prima facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor. See section 2 (b), Clayton Act.

[Rule 24]

§ 36.25 *Aiding or abetting use of unfair trade practices.* It is an unfair trade practice for any person, firm, or corporation to aid, abet, coerce, or induce another, directly or indirectly, to use or promote the use of any unfair trade practice specified in the rules in this part.

GROUP II

Compliance with trade practice provisions embraced in Group II rules is considered to be conducive to sound business methods and it to be encouraged and promoted individually or through voluntary cooperation exercised in accordance with existing law. Nonobservance of Group II rules does not per se constitute violation of law. Where, however, the practice of not complying with such rules is followed in a manner as to result in unfair methods of competition or unfair or deceptive acts or practices in commerce, corrective proceedings in respect thereto may be instituted by the Commission as in the case of violation of Group I rules.

§ 36.101 *Shipping chicks to fictitious consignees, etc.* The industry condemns the practice of disposing of chicks by shipping them to fictitious consignees or without an order from, or consent of, the consignee, necessitating the sale of such undeliverable shipments at public auction by agents of the common carrier in order to secure payment for transportation costs. Such practice is deemed by the industry to be harmful to the chicks and to facilitate the spread of disease. [Rule A]

§ 36.102 *Failure to give notice of change in shipping schedule.* The industry condemns the practice of failing to give proper notice to customers of any change in shipping schedule thereby causing inconvenience and loss to purchasers. [Rule B]

Promulgated by the Federal Trade Commission June 30, 1956.

Issued: June 25, 1956.

[SEAL] ROBERT M. PARRISH, *Secretary.*

[F. R. Doc. 56-5112; Filed, June 27, 1956; 8:51 a. m.]

[2] As used in this section, the word "commerce" means "trade or commerce among the several States and with foreign nations, or between the District of Columbia or any Territory of the United States and any State, Territory, or foreign nation, or between any insular possessions or other places under the jurisdiction of the United States, or between any such possession or place and any State or Territory of the United States or the District of Columbia or any foreign nation, or within the District of Columbia or any Territory or any insular possession or other place under the jurisdiction of the United States."

CROSS REFERENCE: For supersedure of the trade practice rules for the baby chick industry contained in Part 178, see Part 36 of this subchapter, *supra.*

# TITLE 21—FOOD AND DRUGS

## Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

### Subchapter B—Food and Food Products

PART 120—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

TOLERANCES FOR RESIDUES OF CALCIUM CYANIDE

A petition was filed with the Food and Drug Administration requesting the establishment of tolerances for residues of calcium cyanide in or on buckwheat grain, oat grain, and grain sorghum.

The Secretary of Agriculture has certified that this pesticide chemical is useful for the purposes for which tolerances are being established.

After consideration of the data submitted in the petition and other relevant material which show that the tolerances established in this order will protect the public health, and by virtue of the authority vested in the Secretary of Health, Education, and Welfare by the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (2), 68 Stat. 512; 21 U. S. C. 346a (d) (2)) and delegated to the Commissioner of Food and Drugs by the Secretary (21 CFR 120.7 (g)), the regulations for tolerances for pesticide chemicals in or on raw agricultural commodities (21 CFR Part 120; 21 F. R. 581) are amended by changing § 120.125 to read as follows:

§ 120.125 *Tolerances for residues of calcium cyanide.* A tolerance of 25 parts per million is established for residues of calcium cyanide, calculated as hydrogen cyanide, in or on each of the following grains: Barley, buckwheat, corn, oat, rice, rye, sorghum, wheat.

Any person who will be adversely affected by the foregoing order may, at any time prior to the thirtieth day from the effective date thereof, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington 25, D. C., written objections thereto. Objections shall show wherein the person filing will be adversely affected by this order, specify with particularity the provisions of the order deemed objectionable and reasonable grounds for the objections, and request a public hearing upon the objections. Objections may be accompanied by a memorandum or brief in support thereof. All documents shall be filed in quintuplicate.

*Effective date.* This order shall be effective upon publication in the FEDERAL REGISTER.

(Sec. 701, 52 Stat. 1055, as amended; 21 U. S. C. 371. Interprets or applies sec. 408, 68 Stat. 511; 21 U. S. C. 346a)

Dated: June 22, 1956.

[SEAL] GEO. P. LARRICK, *Commissioner of Food and Drugs.*

[F. R. Doc. 56-5093; Filed, June 27, 1956; 8:46 a. m.]

PART 141a—PENICILLIN AND PENICILLIN-CONTAINING DRUGS; TESTS AND METHODS OF ASSAY

PART 141c — CHLORTETRACYCLINE (OR TETRACYCLINE) AND CHLORTETRACYCLINE- (OR TETRACYCLINE-) CONTAINING DRUGS; TESTS AND METHODS OF ASSAY

PART 146a—CERTIFICATION OF PENICILLIN AND PENICILLIN-CONTAINING DRUGS

PART 146c—CERTIFICATION OF CHLORTETRACYCLINE (OR TETRACYCLINE) AND CHLORTETRACYCLINE- (OR TETRACYCLINE-) CONTAINING DRUGS

MISCELLANEOUS AMENDMENTS

By virtue of the authority vested in the Secretary of Health, Education, and Welfare by the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, 61 Stat. 11, 63 Stat. 409, 67 Stat. 389; sec. 701, 52 Stat. 1055; 21 U. S. C. 357, 371) and delegated to the Commissioner of Food and Drugs by the Secretary (20 F. R. 1996), the regulations for tests and methods of assay for antibiotic and antibiotic-containing drugs (21 CFR 141a, 141c) and certification of antibiotic and antibiotic-containing drugs (21 CFR 146a, 146c; 21 F. R. 131) are amended as indicated below:

1. In § 141a.32 *Procaine penicillin and buffered crystalline penicillin for aqueous injection, paragraph* (b) (3) (iii) is amended by changing the words "5.0 milliliters" in the first sentence to read "0.5 milliliter".

2. Part 141a is amended by adding the following new sections:

§ 141a.91 *Hydrabamine penicillin V (penicillin V hydrabamine salt)*—(a) *Potency.* Using the penicillin V working standard as the standard of comparison, proceed as directed in § 141a.75.

(b) *Toxicity.* Proceed as directed in § 141a.4, except use physiological salt solution as the diluent and inject 0.25 milliliter of a suspension containing 4,000 units per milliliter.

(c) *Moisture.* Proceed as directed in § 141a.26 (e).

(d) *pH.* Proceed as directed in § 141a.5 (b), using a saturated aqueous solution prepared by adding approximately 5 milligrams per milliliter.

(e) *Microscopical test for crystallinity.* Proceed as directed in § 141a.5 (c).

(f) *Hydrabamine extinction coefficient.* Place in a 125-milliliter separatory funnel an accurately weighed sample of approximately 100 milligrams. Add 20.0 milliliters of spectrophotometric grade chloroform and 20.0 milliliters of 0.5 *N* NaOH. Shake well for 1 minute. Allow the layers to separate, filter the lower chloroform layer through a cotton pledget, and collect the clear chloroform solution. Save the upper alkaline layer. Dilute 5.0 milliliters of the clear chloroform filtrate to 25.0 milliliters with spectrophotometric grade chloroform. Determine the absorbance of this chloroform solution at the absorption peak at 276 mμ, using a suitable ultraviolet spectrophotometer and quartz cells. Set the instrument to 100-percent transmission with chloroform. If a recording spectrophotometer is used, record the ultraviolet absorption spectrum from 250–290 mμ. If a nonrecording spectrophotometer is used, 5.0 milliliters of the chloroform filtrate should be diluted to 50.0 milliliters with chloroform. Determine the absorbance of the solution at the 276 mμ absorption peak, using a slit width of 0.5 millimeter or less. (The exact position of the peak should be determined for the particular instrument used.) Calculate the hydrabamine extinction coefficient as follows:

$$E^{1\%}_{1\text{ cm.}} = \frac{\text{Absorbance at 276 m}\mu}{\text{Grams of sample per 100 ml.}}$$

(g) *Penicillin V content.* Dilute 5.0 milliliters of the alkaline layer described in paragraph (f) of this section to 25.0 milliliters with distilled water. Determine the absorbance of the sample at the absorption peak at 276 mμ, using 0.1 *N* NaOH to set the instrument to 100-percent transmission. If a recording spectrophotometer is used, record the ultraviolet absorption spectrum from 250–290 mμ. If a nonrecording spectrophotometer is used, dilute 5.0 milliliters of the alkaline layer to 50 milliliters with distilled water and determine the absorbance at the 276 mμ absorption peak.

$$\text{Percent penicillin V} = \frac{\text{Absorbance at 276 m}\mu \times 10{,}000}{\text{Grams of sample (per 100 ml.)} \times 31.5 \times 54.1}$$

where:

31.5 is the $E^{1\%}_{1\text{ cm.}}$ (specific absorbance) of pure penicillin V similarly treated, and

54.1 is the percentage of penicillin V in pure hydrabamine penicillin V.

§ 141a.92 *Hydrabamine penicillin V oral suspension*—(a) *Potency.* Using the penicillin V working standard as the standard of comparison, proceed as directed in § 141a.76 (a). Its potency is satisfactory if it contains not less than 85 percent of the number of units per milliliter that it is represented to contain.

(b) *pH.* Proceed as directed in § 141a.5 (b), using the undiluted aqueous suspension.

3. Section 141c.222 *Tetracycline hydrochloride oral suspension* • • • is amended as follows:

a. The section headnote is amended by inserting the words "; *tetracycline oral suspension*" immediately after the words "*tetracycline calcium oral suspension.*"

b. Paragraph (b) *Moisture* is amended by inserting the words ", tetracycline oral suspension," immediately after the words "tetracycline hydrochloride oral suspension".

4. Part 141c is amended by adding the following new section:

§ 141c.229 *Tetracycline-nystatin oral suspension*—(a) *Potency*—(1) *Tetracycline content.* Proceed as directed in § 141c.222 (a). Its content of tetracycline is satisfactory if it contains not less than 85 percent of the number of milligrams that it is represented to contain.

(2) *Nystatin content.* Use 5 milliliters of the sample and proceed as directed in § 141c.224 (a) (1) (ii). Its content of nystatin is satisfactory if it contains not less than 85 percent of the number of units that it is represented to contain.

(b) *Moisture.* Proceed as directed in § 141a.7 (c) of this chapter.

5. Part 146a is amended by adding the following new sections:

§ 146a.72 *Hydrabamine penicillin V (penicillin V hydrabamine salt)*—(a) *Standards of identity, strength, quality, and purity.* Hydrabamine penicillin V is the crystalline hydrabamine salt of penicillin V. It contains not less than 90 percent of the hydrabamine salt of penicillin V. It is so purified and dried that:

(1) Its potency is not less than 825 units per milligram.

(2) It is nontoxic.

(3) Its moisture content is not more than 2 percent.

(4) Its pH in a saturated aqueous solution is not less than 3.0 and not more than 6.5.

(5) Its extinction coefficient $E^{1\%}_{1\text{ cm.}}$ is not less than 8.0 at 276 mμ.

(b) *Packaging.* In all cases the immediate container shall be a tight container as defined by the U. S. P. and shall be of such composition as will not cause any change in the strength, quality, or purity of the contents beyond any limit therefor in applicable standards, except that minor changes so caused that are normal and unavoidable in good packaging, storage, and distribution practice shall be disregarded.

(c) *Labeling.* Each package shall bear on its outside wrapper or container and the immediate container, as hereinafter indicated, the following:

(1) The batch mark.

(2) The number of units per milligram and the number of grams in the immediate container.

(3) The statement "Expiration date ---------," the blank being filled in with the date that is 12 months after the month during which the batch was certified.

(4) The statement "For use in the manufacture of nonparenteral drugs only."

(5) The statement "Caution: Federal law prohibits dispensing without prescription."

(d) *Request for certification; samples.* (1) In addition to complying with the requirements of § 146.2 of this chapter, a person who requests certification of a batch shall submit with his request a statement showing the batch mark, the number of packages of each size in the batch, and the date on which the latest assay of the drug comprising such batch was completed. Such request shall be accompanied or followed by the results of tests and assays made by him on the batch for potency, toxicity, moisture, pH, crystallinity, the penicillin V content, and extinction coefficient.

(2) Such person shall submit with his request an acurately representative sample of the batch, consisting of 10 packages, each containing approximately 300 milligrams taken from a different part of such batch, packaged in accordance with the requirements of paragraph (b) of this section.

(e) *Fees.* The fee for the services rendered with respect to each batch under the regulations in this part shall be:

(1) $4.00 for each immediate container in the sample submitted in accordance with paragraph (d) (2) of this section.

(2) If the Commissioner considers that investigations other than examination of such immediate containers are necessary to determine whether or not such batch complies with the requirements of § 146.3 of this chapter for the issuance of a certificate, the cost of such investigations.

The fee prescribed by subparagraph (1) of this paragraph shall accompany the request for certification unless such fee is covered by an advance deposit maintained in accordance with § 146.8 (d) of this chapter.

§ 146a.73 *Hydrabamine penicillin V oral suspension.* Hydrabamine penicillin V oral suspension conforms to all requirements and is subject to all procedures prescribed by § 146a.98 for hydrabamine penicillin G oral suspension, except that:

(a) Hydrabamine penicillin V is used in lieu of hydrabamine penicillin G. The hydrabamine penicillin V used conforms to the requirements of § 146a.72 (a).

(b) Its pH is not less than 4.5 and not more than 6.5.

(c) In lieu of the directions prescribed by § 146a.98 (d) (2) (ii), a person who requests certification of a batch shall submit in connection with his request results of the tests and assays made by him on an accurately representative sample of the hydrabamine penicillin V used in making the batch for potency, toxicity, moisture, pH, crystallinity, the penicillin V content, and the extinction coefficient.

6. Section 146c.221 *Tetracycline hydrochloride for intramuscular use* is amended in the following respects:

a. Paragraph (a) *Standards of identity* • • • is amended by adding at the end of the first sentence the following new words: "and with or without one or more suitable and harmless vitamin substances."

b. Paragraph (c) *Labeling* is amended in subparagraph (1) (iv) by changing the colon after the word "certified" to a comma and adding the following new clause: "except that if it contains one or more vitamin substances the blank is filled in with the date that is 12 months after the month during which the batch was certified:".

c. Paragraph (c) is amended by renumbering subparagraph (3) as (4) and inserting a new subparagraph (3), reading as follows, between subparagraph (2) and renumbered subparagraph (4):

(3) On the label and labeling, if it contains one or more vitamin substances, after the name "Tetracycline hydrochloride for intramuscular use", the words "with vitamin ----" (the blank being filled in with the name of the vitamin ingredient used), or "with vitamins" (if it contains more than one vitamin ingredient), in juxtaposition with such name.

d. In paragraph (c), renumbered subparagraph (4) is amended in subdivision (iii) by changing the period at the end thereof to a comma and adding the following new clause: "except that if it contains one or more vitamin substances it shall bear the statement 'Inject immediately after the solution is prepared from the drug.'"

7. In § 146c.222 the section headnote and paragraph (a) are changed to read as follows:

§ 146c.222 *Tetracycline hydrochloride oral suspension (tetracycline hydrochloride homogenized mixture); tetracycline hydrochloride oral solution; tetracycline calcium oral suspension; tetracycline oral suspension*—(a) *Standards of identity, strength, quality, and purity.* Tetracycline hydrochloride oral suspension, tetracycline hydrochloride oral solution, and tetracycline calcium oral suspension are tetracycline hydrochloride or tetracycline calcium prepared from tetracycline hydrochloride. Tetracycline oral suspension is prepared from tetracycline. Each drug contains one or more suitable and harmless suspending and dispersing agents (unless it is tetracycline hydrochloride oral solution), with or without one or more suitable sulfonamides, and with or without one or more suitable and harmless colorings, flavorings, buffer substances, and preservatives, suspended or dissolved in a suitable and harmless vehicle. If it is tetracycline hydrochloride oral suspension or tetracycline oral suspension, it may contain one or more suitable and harmless vitamin substances. Each milliliter shall contain not less than the equivalent of 25 milligrams of tetracycline hydrochloride. Its moisture content is not more than 2 percent if it is tetracycline hydrochloride oral suspension or tetracycline oral suspension and not more than 7 percent if it is tetracycline hydrochloride oral solution. Its pH is not less than 2.0 and not more than 3.5 if it is tetracycline hydrochloride oral solution and not less than 7.0 and not more than 8.0 if it is tetracycline calcium oral suspension. The tetracycline hydrochloride used conforms to the standards prescribed by § 146c.218 (a), except § 146c.218 (a) (2), (4), and (5). The tetracycline used conforms to the standards prescribed by § 146c.220 (a). Each other substance used, if its name is recognized in the U. S. P. or N. F., conforms to the standards prescribed therefor by such official compendium.

b. Paragraph (c) *Labeling* is amended by inserting in subparagraph (3) (i) the words "or tetracycline oral suspension" immediately after the words "tetracycline hydrochloride oral suspension" at both places at which they appear.

c. Paragraph (d) *Request for certification* • • • is amended by inserting the words "or tetracycline" immediately after the words "tetracycline hydrochloride" in subparagraphs (1), (2) (ii), and (3) (ii).

d. Paragraph (d) is further amended by inserting the words ", tetracycline oral suspension," immediately after the words "tetracycline hydrochloride oral suspension" in subparagraph (2) (i).

8. Part 146c is amended by adding the following new section:

§ 146c.229 *Tetracycline-nystatin oral suspension.* Tetracycline-nystatin oral suspension is a suspension that conforms to all the requirements and procedures prescribed by § 146c.222 for tetracycline oral suspension, except that:

(a) Each milliliter contains not less than 25,000 units of nystatin. The nystatin used conforms to the standards prescribed by § 146c.224 (a).

(b) In addition to the labeling prescribed for tetracycline oral suspension, each package shall bear on its label or labeling the number of units of nystatin in each milliliter of the batch.

(c) In addition to complying with the requirements of § 146c.222 (d), a person who requests certification of a batch shall submit with his request a statement showing the batch mark and (unless they were previously submitted) the results and the date of the latest tests and assays of the nystatin used in making the batch for potency, toxicity, pH, moisture, and specific rotation. He shall also submit in connection with his request a sample consisting of not less than six immediate containers of the batch and (unless it was previously submitted) a sample consisting of 10 packages, each containing approximately equal portions of not less than 300 milligrams of the nystatin used in making the batch.

(d) The fee for the services rendered with respect to each container in the sample of nystatin submitted in accordance with the requirements prescribed therefor by paragraph (c) of this section shall be $4.00.

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the amendments set forth above.

*Effective date.* This order shall become effective upon publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371. Interpret or apply sec. 507, 59 Stat. 463, as amended; 21 U. S. C. 357)

Dated: June 22, 1956.

[SEAL] GEO. P. LARRICK,
*Commissioner of Food and Drugs.*

# TITLE 32—NATIONAL DEFENSE

## Chapter I—Office of the Secretary of Defense

### Subchapter C—Military Personnel

### PART 54—RESERVE FORCES ACTIVE DUTY FOR TRAINING FOR BASIC TRAINING

Sec.
54.1 Purpose.
54.2 Applicability.
54.3 Policy.
54.4 Implementation.

AUTHORITY: §§ 54.1 to 54.4 issued under R. S. 161; 5 U. S. C. 22. Interpret or apply 62 Stat. 604, 66 Stat. 481; 50 U. S. C. App. 45, 10 U. S. C. 1a.

§ 54.1 *Purpose.* The purpose of this part is to prescribe uniform policy:

(a) Governing active-duty-for-training programs established to provide basic training for persons enlisting directly into the Reserve Forces in draft-deferred status.

(b) Pertaining to certain aspects of programs for direct enlistment into the Reserve Forces.

§ 54.2 *Applicability.* This part is applicable to all military departments offering active duty for training for basic training to individuals who enlist directly into the Reserve Forces under provisions of subsection 6 (c), paragraph (2), 62 Stat. 604, 50 App. U. S. C. 451, or section 262, 66 Stat. 481, 10 U. S. C. 1a. Active duty for training for basic training may include, in addition to recruit or basic individual training, basic unit training and various types of specialist training.

§ 54.3 *Policy.* (a) The primary objective of the active-duty-for-training programs dealt with herein is to provide the Reserve Forces with trained young men.

(b) Except as provided in paragraph (c) of this section, the period of active duty for training for basic training shall be of six consecutive months duration.

(c) As approved by the Secretary of Defense, special programs of active duty for training for basic training of less than six months may be established to provide recruit training alone for individuals entering the Reserve Forces under provisions of subsection 6 (c), paragraph (2), clause (A), 62 Stat. 604, 50 App. U. S. C. 451. The period of active duty for training for basic training under such special programs, however, in addition to being less than six months shall also be of less than three consecutive months duration, including travel time.

(d) In the case of a military service accepting enlistments under authority of section 262, 66 Stat. 481, 10 U. S. C. 1a, or subsection 6 (c), paragraph (2), clause

(C), 62 Stat. 604, 50 App. U. S. C. 451, the Department concerned shall submit its proposed annual enlistment quotas therefor with its annual manpower programs to the Secretary of Defense for approval.

(1) Approval by the Secretary of Defense will be on the advice of the Joint Chiefs of Staff, taking into consideration the need to maintain a military manpower pool of such size as to provide an adequate source of long-term volunteers for the Active Forces.

(2) Approved quotas for enlistments under section 262, 66 Stat. 481, 10 U. S. C. 1a, and for entry into active duty for training for basic training of persons enlisted under subsection 6 (c), paragraph (2), clause (C), 62 Stat. 604, 50 App. U. S. C. 451, shall be within the 250,000 annual maximum imposed by law.

(e) Irrespective of quotas allocated in accordance with paragraph (d) of this section, no enlistment shall be accepted under section 262, 66 Stat. 481, 10 U. S. C. 1a, if such enlistment would cause the strength of the Ready Reserve authorized for the component concerned to be exceeded. Subject to this limitation and to related Department of Defense policies and programs, such as Qualitative Distribution, enlistment of qualified individuals within quotas allocated shall be on a first-come-first-accepted basis.

(f) Members of the Reserve enlisted under provisions of section 262, 66 Stat. 481, 10 U. S. C. 1a, and those enlisted under provisions of subsection 6 (c), paragraph (2), clause (C), 62 Stat. 604, 50 App. U. S. C. 451, who volunteer therefor, shall be ordered to active duty for training for basic training under authority contained in subsection 262 (c), 66 Stat. 481, U. S. C. 1a.

(g) Members of the Army National Guard of the United States or Air National Guard of the United States who volunteer to undergo active duty for training for basic training shall be ordered thereto under authority of subsection 233 (d), 66 Stat. 481, 10 U. S. C. 1a.

§ 54.4 *Implementation*—(a) *National Guard.* Except in the case of special programs under § 54.3 (c), members of the Army National Guard of the United States or Air National Guard of the United States may not be ordered to active duty for training for basic training after they have passed the 20th anniversary of their birth.

(b) *Reserve (17 to 18½ years of age).* Within quotas allocated, Services employing the enlistment programs provided by section 262, 66 Stat. 481, 10 U. S. C. 1a, or subsection 6 (c), paragraph (2), clause (C), 62 Stat. 604, 50 App. U. S. C. 451, are permitted to have on hand at any time a total number awaiting commencement of six months active duty for training, excluding those deferred because of high school enrollment, not to exceed planned input into the active-duty-for-training program for the three subsequent months. This provision is made to afford a means of obtaining reasonably level training loads.

(c) *Reserve (critically skilled over 18½ years of age).* Under Executive Order 10650, Regulations Governing the Selection of Certain Persons who have Critical Skills for Enlistment in Units of the Ready Reserve of the Armed Forces, dated 6 January 1956, published at 21 F. R. 167, the Selective Service System will select individuals over 18½ years of age who have critical skills and are engaged in civilian occupations in critical defense supporting industry or in a research activity affecting national defense, for enlistment under the provisions of section 262, 66 Stat. 481, 10 U. S. C. 1a.

(1) Such individuals will count against the annual maximum of 250,000 imposed by law, but will not be included within quotas allocated under provisions of § 54.3 (d).

(2) When such individuals are selected for this program, the Selective Service System will notify the individual and the appropriate Service.

C. E. WILSON,
*Secretary of Defense.*

JUNE 21, 1956.

## Chapter XIV—The Renegotiation Board

### Subchapter B—Renegotiation Board Regulations Under the 1951 Act

### PART 1453—MANDATORY EXEMPTIONS FROM RENEGOTIATION

#### RAW MATERIALS

Section 1453.2 (b) *Raw materials* is amended by making the following changes in the list following subparagraph (3):

1. Delete "metallic titanium" and substitute "titanium sponge, as originally produced directly from the ore."

2. Delete "metallic zirconium" and substitute "zirconium sponge, as originally produced directly from the ore."

(Sec. 109, 65 Stat. 22; U. S. C. App. Sup. 1219)

Dated: June 22, 1956.

THOMAS COGGESHALL,
*Chairman.*

[F. R. Doc. 56–5113; Filed, June 27, 1956; 8:51 a. m.]

### PART 1471—ASSIGNMENT OF CONTRACTORS FOR RENEGOTIATION

#### HOW ASSIGNMENT IS MADE

Section 1471.2 *How assignment is made* is amended by deleting the last sentence of paragraph (e) thereof.

(Sec. 109, 65 Stat. 22; 50 U. S. C. App. Sup. 1219)

Dated: June 22, 1956.

THOMAS COGGESHALL,
*Chairman.*

[F. R. Doc. 56–5114; Filed, June 27, 1956; 8:52 a. m.]

### PART 1473—CLEARANCE PROCEDURE

#### NOTIFICATION OF DETERMINATION BY REGIONAL BOARD

Section 1473.2 *Determination by Regional Board* is amended by inserting, after the first sentence thereof, the following: "The Regional Board will notify the contractor of the action taken by the Regional Board."

(Sec. 109, 65 Stat. 22; 50 U. S. C. App. Sup. 1219)

Dated: June 22, 1956.

THOMAS COGGESHALL,
*Chairman.*

# TITLE 43—PUBLIC LANDS: INTERIOR

## Chapter I—Bureau of Land Management, Department of the Interior

[Circular 1955]

### PART 101—GENERAL REGULATIONS INVOLVING APPLICATIONS AND ENTRIES

#### OFFICE HOURS OF LAND OFFICES; WHEN DOCUMENT IS FILED

Effective 30 days from publication hereof in the FEDERAL REGISTER a new center head and section are added to Part 101 as follows:

#### FILING OF DOCUMENTS

§ 101.20 *Office hours of land offices; when document is filed.* (a) Land offices and the Washington office of the Bureau of Land Management are open to the public for the filing of documents and inspection of records during the hours specified below on Monday through Friday of each week, with the exception of national holidays, the Monday following each national holiday which falls on a Sunday, and days upon which the office may be closed by Presidential or other administrative order. The hours during which the land offices and the Washington office are open to the public for the filing of documents and inspection of records are from 10:00 a. m. to 3:00 p. m., standard time or daylight saving time, whichever is in effect at the city in which each office is located.

(b) Any document required or permitted to be filed under the regulations of this chapter, which is received in the Land office or the Washington office, either in the mail or by personal delivery when the office is not open to the public shall be deemed to be filed as of the day and hour the office next opens to the public.

(c) Any document required by law, regulation or decision to be filed within a stated period, the last day of which falls on a day the land office or the Washington Office is officially closed, shall be deemed to be timely filed if it is received in the appropriate office on the next day the office is open to the public.

FRED A. SEATON,
*Secretary of the Interior.*

JUNE 21, 1956.

[F. R. Doc. 56–5099; Filed, June 27, 1956; 8:48 a. m.]

### Appendix—Public Land Orders

[Public Land Order 1307]

#### NEW MEXICO

#### PARTIALLY REVOKING EXECUTIVE ORDERS NO. 6276 OF SEPTEMBER 8, 1933 AND NO. 6583 OF FEBRUARY 3, 1934, WHICH WITHDREW LANDS TO AID THE STATE OF NEW MEXICO IN MAKING EXCHANGE SELECTIONS

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910, c. 421 (36 Stat. 847; 43 U. S. C. 141), and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Executive Orders No. 6276 of September 8, 1933, and No. 6583 of February 3, 1934, withdrawing public lands to aid the State of New Mexico in making exchange selections, which were partially revoked by Public Land Order No. 1247 of November 4, 1955, are hereby revoked so far as they affect the following-described lands:

In Executive Order No. 6276

[1500537]

NEW MEXICO PRINCIPAL MERIDIAN

T. 9 S., R. 7 W.,
Sec. 14, SW¼NW¼, N½SW¼, and SE¼SW¼;
Sec. 15, E½NE¼ and SW¼SE¼;
Sec. 22, SE¼ and N½SW¼.
T. 22 S., R. 7 W.,
Sec. 34, lots 1 and 2.

In Executive Order No. 6583

[1506978]

T. 31 S., R. 18 W.,
Sec. 5, NW¼;
Sec. 6, SE¼SE¼, W½SE¼, and SE¼SW¼.

The areas described aggregate 901.28 acres.

The restored lands are too rough and mountainous for cultivation, but they have limited value for grazing.

No application for the restored lands may be allowed under the homestead, desert-land, small tract, or any other non-mineral public-land law unless the lands have already been classified as valuable or suitable for such type of application, or shall be so classified upon the consideration of an application. Any application that is filed will be considered on its merits. The lands will not be subject to occupancy or disposition until they have been classified.

Subject to any valid existing rights and the requirements of applicable law, the restored lands are hereby opened to filing of applications, selections, and locations in accordance with the following:

a. Applications and selections under the non-mineral public-land laws may be presented to the Manager mentioned below, beginning on the date of this order. Such applications and selections will be considered as filed on the hour and respective dates shown for the various classes enumerated in the following paragraphs:

(1) Applications by persons having prior existing valid settlement rights, preference rights conferred by existing laws, or equitable claims subject to allowance and confirmation will be adjudicated on the facts presented in support of each claim or right. All applications presented by persons other than those referred to in this paragraph will be subject to the applications and claims mentioned in this paragraph.

(2) All valid applications under the homestead, desert land, and small tract laws by qualified veterans of World War II or of the Korean Conflict, and by others entitled to preference rights under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284 as amended), presented prior to 10:00 a. m. on July 28, 1956, will be considered as simultaneously filed at that hour. Rights under such preference right applications filed after that hour and before 10:00 a. m. on October 27, 1956, will be governed by the time of filing.

(3) All valid applications and selections under the non-mineral public-land laws, other than those coming under paragraphs (1) and (2) above, presented prior to 10:00 a. m. on October 27, 1956, will be considered as simultaneously filed at that hour. Rights under such applications and selections filed after that hour will be governed by the time of filing.

b. The lands have been open to applications and offers under the mineral-leasing laws, and to location for metalliferous minerals. They will be open to location for non-metalliferous minerals under the United States mining laws beginning at 10:00 a. m. on October 27, 1956.

Persons claiming veterans preference rights must enclose with their applications proper evidence of military or naval service, preferably a complete photostatic copy of the certificate of honorable discharge. Persons claiming preference rights based upon valid settlement, statutory preference, or equitable claims must enclose properly corroborated statements in support of their claims. Detailed rules and regulations governing applications which may be filed pursuant to this notice can be found in Title 43 of the Code of Federal Regulations.

Inquiries concerning the lands shall be addressed to the Manager, Land Office, Bureau of Land Management, Sante Fe, New Mexico.

WESLEY A. D'EWART,
*Assistant Secretary of the Interior.*

JUNE 22, 1956.

[1338665]

#### NEVADA

#### PARTIALLY REVOKING EXECUTIVE ORDER NO. 5105 OF MAY 3, 1929, WHICH WITHDREW CERTAIN LANDS PENDING DETERMINATION AS TO ADVISABILITY OF INCLUDING THEM IN NATIONAL MONUMENT

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910 (36 Stat. 847; 43 U. S. C. 141), and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Executive Order No. 5105 of May 3, 1929, which temporarily withdrew certain lands in Nevada pending determination as to the advisability of including them in a national monument, is hereby revoked so far as it affects the following-described lands:

That area of unsurveyed land east of Timber Mountain bounded on the north by latitude 37°10'20", on the south by latitude 37°77'46", and lying between meridians of longitude 116°20'16", and 116°23'28", comprising an area nine square miles and including what is known as Fortymile Canyon Pueblo.

The released lands are withdrawn, with other lands, by Executive Order No. 8578 of October 29, 1940 and No. 9019 of January 12, 1942, for use of the Department of the Army as an aerial gunnery and bombing range.

WESLEY A. D'EWART,
*Assistant Secretary of the Interior.*

# TITLE 36—PARKS, FORESTS, AND MEMORIALS

## Chapter I—National Park Service, Department of the Interior

### PART 1—GENERAL RULES AND REGULATIONS

#### LIMITATIONS ON SPEED

Paragraph (a) of §1.42, entitled *Limitations on speed,* is amended to read as follows:

§ 1.42 *Limitations on speed.* (a) Limitations on speed of vehicles except in emergencies as provided in paragraph (b) of this section are as follows:

(1) Basic speed rule:

(i) No person shall drive a vehicle upon a highway at a speed greater than is reasonable and prudent, having due regard to the traffic, surface and width of the highway, the hazard at intersections, and any other condition then existing.

(ii) No person shall drive at a speed which is greater than will permit the driver to exercise full control of the vehicle and to decrease speed or to stop as may be necessary to avoid colliding with any person, vehicle, or other conveyance on or entering the highway in compliance with legal requirements and with the duty of drivers and other persons using the highways to exercise due care.

(2) 15 miles per hour:

(i) In all campgrounds, parking areas, and places of public assemblage.

(ii) Upon that portion of the highway which passes through or borders upon a scene of emergency such as forest fires, highway repairs or construction, automobile accidents, or similar emergency.

(iii) In any business or residence area.

(iv) Upon approaching within 50 feet and in traversing an intersection of highways where the driver's view in either direction along any intersecting highway within a distance of 200 feet is obstructed, except that when travelling upon a through highway or at a traffic controlled intersection, the district speed applies.

(3) 45 miles per hour upon all other paved, public roads in the parks, unless a different limit is prescribed for a particular road or roads by special regulation.

(4) Any speed in violation of the speeds designated in subparagraphs (2) and (3) of this paragraph shall be prima facie evidence of violation of subparagraph (1) of this paragraph.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

FRED A. SEATON,
*Secretary of the Interior.*

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

[Rules, Amdt. 2-22]

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

MISCELLANEOUS AMENDMENTS

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 13th day of June 1956;

The Commission having under consideration promulgation of a new Part 21, Rules Governing Domestic Public Radio Services (other than Maritime Mobile), and the need for effecting, simultaneously, certain editorial changes in Part 2 of its rules so as to conform the latter part to the former; and

It appearing that such revisions in Part 2 of the rules are interpretative and editorial in nature and that Notice of Proposed Rule Making therefor is not required, as provided in section 4 (a) of the Administrative Procedure Act; under authority of sections 4 (i) and 303 of the Communications Act of 1934, as amended;

*It is ordered*, That, the changes in Part 2 of the rules as set forth below are adopted effective September 4, 1956.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Released: June 20, 1956.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
*Secretary.*

Amendments To Part 2, Frequency Allocation And Radio Treaty Matters; General Rules and Regulations:

1. In § 2.1 *Definitions*, amend the definition "Domestic fixed public service" to read as follows:

*Domestic fixed public service.* A fixed service, the stations of which are open to public correspondence, for radiocommunication between points all of which lie within: (a) the 48 states and the District of Columbia, or (b) within a single territory or possession of the United States. In cases where service is afforded on frequences above 30 Mc, facilities within the United States for communication with facilities in Canada or Mexico and facilities for communication between United States territories and possessions in the Carribbean area are also deemed to be in the domestic Fixed Public Service.

2. In § 2.104 (a) (5), amend footnote "NG5" to read as follows:

(NG5) Fixed stations in the Domestic Fixed Public Service and control stations in the Domestic Public Radio Services may be authorized to use any of the frequencies in the band 72–76 Mc indicated in column 10, on the conditions that (a) harmful interference will not be caused to the reception of television stations on channels 4 or 5 and (b) that harmful interference will not be caused to operational fixed stations.

[F. R. Doc. 56-4969; Filed, June 27, 1956; 8:45 a. m.]

[Docket No. 10821; FCC 56-553]

[New Part 21; Rules Amdt. 6-8]

PART 6—PUBLIC RADIOCOMMUNICATION SERVICES (OTHER THAN MARITIME MOBILE)

PART 21—DOMESTIC PUBLIC RADIO SERVICES (OTHER THAN MARITIME MOBILE)

In the matter of promulgation of Part 21, rules governing domestic public radio services.

1. On December 29, 1953, the Commission released a Notice of Proposed Rule Making in the above-entitled matter. The Notice of Proposed Rule Making was published in the FEDERAL REGISTER on January 7, 1954, and the time allowed for filing comments, which was extended to April 26, 1954, upon notice in the FEDERAL REGISTER on March 2, 1954, has expired. The purpose of the proposed rules is to delete from Part 6 of the rules those provisions which relate to domestic radio services (§ 6.101, et seq., to end of Part 6) and to transfer such provisions, with certain amendments and additions, to a new part designated as Part 21. This new part sets forth the rules and regulations applicable to all domestic common carrier radio services other than Aeronautical, Maritime, and certain Alaskan and Special Emergency Services. Thus, the new part contains rules for the regular operation of such communications common carrier services as Land Mobile, and those operations heretofore described as Experimental, which included Microwave Relay, Short Haul Toll, Rural Radiotelephone, TV Pickup, TV–STL, Domestic Control, Repeater, etc., which were authorized under the provisions of Part 5 of the Commission's rules.

2. Comments directed to the matters involved in this rule-making proceeding were received from, or in behalf of, the following parties: Aircall, Inc.; Aircall-Chicago, Inc.; Alexander's Answering Service; All America Cables and Radio, Inc.; American Telephone and Telegraph Company; Anderson, W. L.; Central Committee On Radio Facilities of the American Petroleum Institute; Citizens Utilities Company; Cook, Donald R.; Crane Lake Telephone Company; Duluth, Missabe and Iron Range Railway Company; Federal Telephone and Radio Company; General Electric Company; Hav-A-Call, Inc.; Hawaiian Telephone Company; Lenkurt Electric Company, Inc.; McKean, Farrell A.; Minnesota Telephone Association, Inc.; Mitchell, Oliver C.; Motorola, Inc.; National Mobile Radio System; Peninsular Telephone Company; Porto Rico Telephone Company; Radio Corporation of America; Radio Corporation of Porto Rico; Radio Dispatch Service of Rochester, Inc.; Radio-Electronics-Television Manufacturers Association; Riggs, Kenneth A.; Rural Electrification Administration; Schiller, Solomon; Special Industrial Radio Service Association; Stromberg-Carlson Company; Telanserphone, Inc.; Telesecretarial Service, Inc.; Tidewater Telephone Company; The Western Union Telegraph Company; WKY Radiophone Company.

3. None of the above-named persons requested that a hearing be held to resolve the points of contention set forth in their comments. However, the Central Committee on Radio Facilities of the American Petroleum Institute and the Special Industrial Radio Service Association requested that finalization of the proceeding in Docket No. 10821 concerning use of frequencies above 890 Mc be delayed until after finalization of the proceedings in related Docket Nos. 10315, 10345 and 10797. The comments relative to Docket Nos. 10315 and 10345 are now moot inasmuch as the proceedings therein were finalized on June 30, 1954 and August 4, 1954, respectively, by Reports and Orders of the Commission. In accordance therewith, appropriate provisions have been incorporated into Part 21. In our opinion, the pendency of certain proposals in Docket No. 10797, which proposes to amend Part 2 frequency allocations above 890 Mc, and in Docket No. 11442 which proposed ISM use of 915 MC in accordance with the provisions of Part 18 of our rules, which are the subjects of substantial contention, does not justify delay in acting in the instant proceeding which will establish the Domestic Public Radio Services in Part 21 on a regular service basis upon the frequencies presently available to such common carrier operations under the existing table of frequency allocations. If, and when, any change is effected in those allocations, appropriate changes will be made in Part 21. The magnitude of domestic common carrier fixed radio operations has achieved such proportions that the "experimental" aspects have long since disappeared and the licensing of such facilities under Part 5 of the Commission's rules governing the experimental radio services should be terminated as soon as practicable.

4. Part 21 will, for the first time, set forth in a consolidated publication the various provisions relating to the domestic use of radio by communications common carriers. It is also anticipated that the removal of the fixed station operations from an "experimental" category will further stimulate the expansion of the communications common carrier industry in areas requiring the use of radio.

5. On February 3, 1954, the Commission wrote to the Radio-Electronics-Television Manufacturers Association and to the Central Committee on Radio Facilities of the American Petroleum Institute requesting compilation, on a comparative basis, of data on operational requirements and necessary technical standards for private microwave systems and equipments. In commenting in this proceeding, the above-mentioned organizations, as well as the Special Industrial Radio Service Association and Motorola, Inc., have recommended that we delay finalization of the proceedings on Part 21 above 890 Mc, pending receipt and study of the information requested in the Commission's letters of February 3, 1954. The material submitted in this connection was compiled by the Commission's staff for use in a government-industry conference on private use of microwave frequencies, looking toward the promulgation of rules and regulations governing a new "Operational Microwave Radio Service" to be designated as Part 22, in lieu of the proposals which were embodied in Docket No. 10500 (withdrawn on October 28, 1953) for regulation of microwave operations in the Public Safety, Industrial and Land Transportation Services. Conferences relative thereto were held in Washington, D. C. on March 14 and 15, 1955, and again on April 5, 6 and 7, 1955. While a considerable amount of progress was made in these conferences toward drafting a new Part 22 of the rules, observation of the proceedings disclosed considerable divergence of opinion among industry representatives relative to the technical standards which should be established for microwave equipment and the subdivision of the various microwave bands available for private system operation under the existing table of frequency allocations. It appears that substantial time will be required to iron out these differences before firm recommendations on standards can be made to the Commission with a view to their promulgation in a rule-making proceeding. In view of the fact that the experimental rules in Part 5 contain the barest minimum of standards applicable to the common carrier microwave operations, which already represent investment in the order of nine figures, we are of the opinion that further delay in establishing standards for the common carrier radio services cannot be justified. Accordingly, in finalizing the proceedings in Part 21, we have prescribed standards which are in accord with present techniques in the art and which are in successful use by the common carrier industry. However, these standards should be viewed as of an interim nature until such time as experience indicates that further changes are necessary. Except for the frequency bands 890–940 Mc and 7050–7125 Mc, no channeling has been prescribed for the microwave radio bands. If, and when, such channeling appears necessary and desirable, it will also be proposed in further rule-making proceedings, and any required uniformity between this Part (21) and Part 22, as finally evolved, will be achieved in like manner.

6. The various comments relating to definitions contained in Subpart A will be discussed in connection with the separate Subparts of Part 21 to which they pertain.

7. In connection with Subpart B—Applications and Licenses, the various comments are disposed of as follows:

Section 21.15 (a): It was suggested that "and directivity" be deleted from this rule. In lieu thereof, the words "and orientation" have been substituted to make the intent more clear.

Section 21.15 (b): This section has been revised to avoid the necessity for making repetitive showings with each application of the applicant's legal, financial, technical and other qualifications to be a licensee.

Section 21.15 (d) and (e): These sections have been revised to eliminate the repetitive aspects of § 21.15 (b).

Section 21.15 (f): It was suggested that the filing of FCC Form 401–A be limited to those cases where it is essential in connection with determination of antenna obstruction marking requirements. This suggestion has been adopted and this section has been revised accordingly. However, a new rule requiring the filing of antenna data essential to the Commission in respects not relating to determination of antenna obstruction marking requirements has been designated as § 21.15 (g).

Section 21.15 (g) (3): United States Independent Telephone Association, hereafter referred to as USITA, objects to this rule as burdensome and on the basis that the applicant must already meet such requirements in other parts of the rules. A reading of this section discloses it is applicable only to persons who are not rendering public communication service for hire, but are subscribers to service rendered by communications common carriers. In view of the section being inapplicable to carriers, the USITA objection appears to be without foundation. Accordingly, the rule is retained and is redesignated as § 21.15 (i).

Section 21.15 (h): American Telephone and Telegraph Company, hereafter referred to as A T & T, commenting in behalf of the telephone companies of the Bell System, requests deletion of this rule as superfluous. We are of the opinion that it is necessary that we have knowledge of the information required therein, among other things, for the effective administration of the Domestic Public Radio Services. Accordingly, this rule is being retained and is redesignated as § 21.15 (j).

Section 21.15 (j): USITA and A T & T contend that data required by this section is an unnecessary and costly burden on the applicant and should not be required by the Commission. Lenkurt Electric Co., Inc., requested that the stations used for point-to-point communications be exempt from filing such data. In addition, USITA expressed the belief that the procedures and information required by Section 21.15 (j) do not fall in the classification of regulatory matters within the jurisdiction of the Commission. In response thereto, we wish to point out that, in Docket No. 9046, the Commission's Report and Order of April 27, 1949, establishing the Domestic Public Land Mobile Radio Services stated, "In granting authorizations for the establishment of common carrier mobile telephone systems in any service area, the Commission proposes to permit the rendition of service on an interference-free basis only, i. e., not more than one licensee will normally be authorized to operate on a given frequency or frequencies in any service area". Broadly speaking, communications common carriers are in the business of selling communications time to their subscribers. It is our position that the public, who are paying for such communications time, are entitled to expect reliable service and to be able to communicate without being subjected to harmful interference. In reaffirmation of this principle, we wish to emphasize that it is equally applicable to all common carrier radio services operating under the provisions of this Part. Section 303 of the Communications Act of 1934, as amended, gives the Commission power to "Make such regulations not inconsistent with law as it may deem necessary to prevent interference between stations and to carry out the provisions of this Act * * *" Under these provisions, we are empowered to require the filing of the type of data set forth in § 21.15 (j) of this part and we are of the opinion that such information is necessary in our regulation of radio to ensure the establishment of radio facilities in a manner which will not cause interference to other radio stations. Accordingly, § 21.15 (j) has been retained and has been redesignated as § 21.15 (l). However, it will be noted that the section has been revised to make it applicable specifically to base stations to be operated in the Domestic Public Land Mobile Radio Service by applicants who are not engaged in providing public wire line communication service. In affording the relief requested by Lenkurt and other wire line carriers under this section, the Commission reserves the right to require the filing of such information by applicants, permittees and licensees in any case where the Commission, in its own discretion, believes such information is necessary.

Section 21.15 (n): This section sets forth the criteria which must be met in obtaining station assignments in the 72–76 Mc band, pursuant to the policy established in Docket No. 10315.

Section 21.17: In accordance with the suggestion of A T & T, this section has been reworded to clarify that amendments to applications may be submitted in letter form.

Section 21.29 (b): A T & T suggested amendment of this section to provide for use of blanket applications in cases where auxiliary test stations and base stations are to be located together. This

suggestion has been rejected because the application form does not readily lend itself to such combination without considerable risk of confusion in attempting separation of the base and auxiliary test station information throughout the blanket application.

Section 21.29 (f): In accordance with the suggestion of A T & T, this section has been amended to permit the use of a blanket application when requesting renewal of a group of station licenses in the same service where the renewal requested is in exact accordance with the terms of the previous authorizations.

Section 21.30: In accordance with the suggestion of A T & T, this section has been amended to allow 18 months after the date of grant of a construction permit to complete the station construction of point-to-point microwave facilities.

Section 21.32: This section has been amended to specify specific license renewal dates, upon the recommendation of Hawaiian Telephone Company and USITA. The A T & T recommendation that all common carrier licenses be issued for a 5 year period is rejected because certain services governed by this Part are comparatively new and we believe that effective regulation requires that such licenses be issued for shorter periods so that they may be reviewed at more frequent intervals.

8. In connection with Subpart C—Technical Standards, the various comments filed are disposed of as follows:

Section 21.101: On the basis of comments submitted by Citizens Utilities Company, Peninsular Telephone Company, Porto Rico Telephone Company, Tidewater Telephone Company and A T & T, this section has been revised to impose a frequency tolerance requirement of 0.005 percent below 1,000 Mc, with provision being made to permit equipment heretofore authorized below 50 Mc to continue to operate until January 1, 1959, with a frequency tolerance within 0.01 percent. In addition, provision has been made to permit equipment heretofore authorized in the 890–940 Mc band to continue to operate with a frequency tolerance within 0.03 percent, subject to the condition that no harmful interference is caused to any other radio station. The section has also been revised around the concept of a reference frequency, which is defined in § 21.1.

Section 21.102: On the basis of comments submitted by various interested parties, this section has been revised to prescribe only the accuracy of the frequency checking equipment and to require that its operation shall be independent of the frequency control elements of the transmitter being measured.

Section 21.103: This section has been added setting forth the standards and limitations governing authorization and use of frequencies in the 72–76 Mc band, in accordance with the policy established in Docket No. 10315.

Section 21.104: Paragraph (d) of this section has been renumbered as § 21.105. As proposed, paragraphs (a), (b) and (c) of this section set forth definitions, as pointed out in the A T & T comments, and have, therefore, been transferred to § 21.1. With regard to paragraph (b), General Electric suggested the possibility of defining "occupied bandwidth" in terms of extra band radiation density. However, in the absence of a concrete proposal by General Electric, their suggestion has not been adopted. The definition of occupied bandwidth, as heretofore set forth, conforms to the universally recognized definition contained in Chapter I of the International Radio Regulations (Atlantic City, 1947). The comments of National Mobile Radio System regarding this section are disposed of in connection with § 21.105 (a).

Section 21.105 (a): This section has been redesignated as § 21.106 (a). In commenting thereon, National Mobile Radio System's plea that it is impractical for miscellaneous common carriers to measure bandwidth of emission, because laboratory instruments are required, is without merit. The need for such measurements to insure that the radio system at all times conforms to the technical performance requirements of the applicable rules is evident. There are a number of organizations equipped with the necessary instruments who, for a fee, will perform the measuring service. Thus, if a licensee does not wish himself to purchase the necessary equipment, etc., he may have the service performed by others.

Section 21.105: Paragraph (a) of this section has been redesignated as § 21.106 (a). Following the A T & T recommendation that the requirements for suppression of spurious and harmonic emission be related to the center frequency of the authorized band, and be specified in relation to the output power of the transmitter, a new § 21.106 (b) has been substituted for § 21.105 (a) and (b). We believe that application of this section also to pulse modulated transmitters is preferable to the Federal Telephone and Radio Company's suggestion that spurious and harmonic emission of pulse transmitters be attenuated to a fixed level of 0.0001 watt, as measured at the transmitter output. Paragraph (d) of § 21.105 (d) has been redesignated as paragraph (c).

Section 21.106 (b): This section has been redesignated as § 21.107 (b). In accordance with the comments filed by various miscellaneous common carriers, this table has been revised to provide for use of transmitters having maximum rated power output of 350 watts in the 30–50 Mc frequency range, in order to accommodate use of transmitters presently authorized for one-way signaling service in the Domestic Public Land Mobile Radio Service. The Western Union Telegraph Company stated that the power limitation of 100 watts in the 500–10,000 Mc frequency range is unduly restrictive and should be raised to not less than 1,000 watts to provide for transmission beyond the horizon. A T & T also commented along similar lines. We are of the opinion that a great deal of development work is still necessary to determine the suitability of such microwave radio transmission for common carrier service, as well as the interference aspects of such transmissions upon other radio installations. In view thereof, Western Union's and A T & T's suggestions appear to be premature and have not been incorporated into these rules. In appropriate cases, upon applications submitted pursuant to the provisions of Part 5 of the Commission's rules governing the experimental radio services, persons wishing to develop engineering data relative to microwave radio transmission beyond the horizon may be authorized to do so.

Section 21.106 (c): General Electric Company and The Western Union Telegraph Company expressed the opinion that the input parameters of current and voltages applied to vacuum tubes in the final radio frequency stage of a transmitter are a matter to be determined by the design requirements of the equipment and should not be the subject of regulation. In view of these comments, this section has been deleted from the rules.

Section 21.106 (d): Various interested parties commented on this section, indicating impracticability of requiring base stations to maintain their power rigidly within limits 10 percent above and 15 percent below the authorized power. In a number of instances, the opposition appears to be based upon a misunderstanding that such limits apply to fixed stations in point-to-point fixed radio services, whereas the power limits specified in this rule are applicable only to base stations in the Domestic Public Land Mobile Radio Service. In view of the foregoing, the power limits within which base stations must operate have been broadened to 20 percent above and 25 percent below the authorized power. This rule has been redesignated as § 21.107 (c). Comment was also filed objecting to the provision requiring notification to the Commission in cases where base stations are unable to operate within prescribed power limits for periods in excess of 10 days. We are of the opinion that the majority of service interruptions due to such cause can be readily corrected within such time and that such reporting will not be unduly burdensome. Accordingly, no change in that respect has been made in this rule.

Section 21.106 (e): This section, requiring manufacturers of radio transmitters to specify an efficiency factor for the final radio frequency stage, has been deleted.

Section 21.107 (a): This rule has been redesignated as § 21.108 (a) and has been revised to permit multi or omni-directional antennas to be used in other than the domestic Public Land Mobile Radio Service, upon specific authorization. We believe this change will satisfy the objections filed by Minnesota Telephone Association, Inc., Duluth; Missabe & Iron Range Railway Company; A T & T; USITA and Motorola, Inc.

Section 21.107 (b): This section has been redesignated as § 21.108 (b). Although it was suggested by Porto Rico Telephone Company that the maximum permissible beam width of the main lobe of radiation from directional antennas should be narrowed considerably, and we recognize that this may be feasible in many instances, we have not prescribed narrower limits in order to allow latitude for the use of easily transportable equipment which is frequently used in establishment of service on short notice and is sometimes required to be installed at relatively inaccessible locations. However, the Commission desires that, to the extent practicable, the beam widths of directional antennas be held to a minimum. While General Electric Company mentioned that the prescribed beam widths would preclude the employment of corner reflectors now in wide use at 960 Mc, which frequency band is not assignable to stations authorized under this Part, they have failed to show the beam widths necessary to accommodate use of such antennas or to show that use of such antennas is a necessity. Similarly, in pointing out the necessity for measurement and testing of certain combinations of parabola-reflectors (periscope) antennas to determine whether they meet the subject rule requirements, A T & T failed to show that these requirements could not be readily satisfied by use of other types of antennas.

Section 21.107 (c): This section has been redesignated as § 21.108 (c) and, in view of The Western Union Telegraph Company comments, has been revised to reduce the required secondary lobe suppression from 20 db to 13 db on frequencies above 500 Mc, in order to permit use of cross-polarization and horizontal polarization.

Section 21.107 (d): This section, with slight modification, has been redesignated as § 21.109 (a).

Section 21.107 (e): A T & T suggested modification of this section to permit substitution of antennas without prior authorization, provided no substantial change in pattern results and that the new antennas do not cause obstruction to air navigation. Accordingly, this section has been revised and redesignated as § 21.109 (b).

Section 21.108 (d): A new section bearing this designation has been added to clarify the applicability of certain rules to the use of passive reflectors.

Section 21.108: This section has been redesignated as § 21.110 and, in accordance with suggestions filed by A T & T, Motorola, Inc., and Duluth, Missabe & Iron Range Railway Company, has been revised to permit use of other types of polarization by various stations upon a satisfactory showing that improved transmission would result and that potentially harmful interference to other radio installations would be reduced. In addition, provision has also been made for Rural Subscriber stations in the Rural Radio Service to employ vertical polarization when authorized to communicate with base stations in the Domestic Public Land Mobile Radio Service.

Section 21.109: This section has been redesignated as § 21.111. A T & T suggested that this section be revised to place complete responsibility for maintaining, painting and illuminating of an antenna structure upon the party to whom a construction permit under which the supporting structure was installed was issued, unless there is filed with the Commission a signed and verified copy of an agreement to the effect that another party has assumed the responsibility. We believe that a written agreement, in all cases, is desirable as it leaves no doubt in the minds of any of the parties as to which party is responsible therefor.

Section 21.111: This section has been redesignated as § 21.113. A T & T raised the question whether specification of geographical coordinates of antenna structures to the nearest one-tenth minute was not adequate. In our opinion, accuracy to the nearest second of latitude and longitude is necessary.

Section 21.112: This section has been redesignated as § 21.114 and, in view of comments filed by Motorola, Inc., and A T & T, has been revised to clarify its applicability only to mobile stations in the Local Television Transmission Service and to fixed stations authorized to operate at temporary fixed locations.

Section 21.113: This section has been redesignated as § 21.115 without material revision. Andrew G. Haley, commenting on behalf of 8 miscellaneous common carriers in the land mobile service, suggested that the eight radials be required to be drawn along the eight cardinal directions in order to obtain uniformity among applicants. This suggestion has been accepted and the section has been revised along the line of § 3.684 (d) of Part 3 of the rules. General Electric Company expressed the opinion that the determination of elevation of average terrain was applicable to the broadcasting services and not to the common carrier radio services. In our opinion, such terrain information is definitely of concern to the radio services regulated by this part, particularly in engineering base station assignments into the available frequencies in the land mobile radio service on an interference-free basis. In that respect, the engineering problems are very similar to those in the radio broadcast services. Inasmuch as average terrain information of the nature indicated in this section is primarily of concern where miscellaneous common carrier stations are involved in the domestic public land mobile radio service, the filing of such information in a routine manner is being required only for such stations. In view thereof, the objections of various other parties to the application of this section to point-to-point radio facilities are moot. However, the Commission reserves the right to require the filing of such information in any case where it is deemed necessary.

Section 21.114: This section has been redesignated as § 21.116. Comments filed by A T & T and USITA suggested deletion of this section. However, the retention thereof is considered desirable in view of the information contained therein and in consequence of the action taken with regard to the preceding section of these rules.

Section 21.115: This section has been redesignated as § 21.117. General Electric Company stated that, since the type of material contained in this section is usually found in handbooks and textbooks, it should be deleted from this Part. However, despite the publication of such information elsewhere, experience has shown that a great many applicants apparently do not refer to such material and consequently file applications for stations at sites which subsequently turn out to be unsatisfactory for the purpose intended. As a consequence, the inauguration of satisfactory public service is delayed pending filing and action upon new applications and move of the station to a new site. In view of the foregoing, we believe the public interest will be served by retention of this section. In accordance with the suggestion of A T & T, the last sentence of the footnote to paragraph (a) has been deleted. As requested by Lenkurt Electric Company, Inc., paragraph (c) has been revised to show the manner in which propagation tests should be conducted when such tests are required by the Commission.

Section 21.116: This section has been redesignated as § 21.118. Paragraph (a) has been revised to clarify that the manner of installation of transmitters and their operating positions shall be such as not to be accessible to, or capable of being operated by, persons other than those duly authorized by the licensee. A new § 21.118 (b) has been added prescribing use and location of a modulation filter in those cases where a modulation limiter is employed. Section 21.116 (b) has been rewritten as § 21.118 (d) making provision therein for licensees to make certain changes in transmitter control point location without prior approval from the Commission, in accordance with suggestion filed by A T & T. In addition, the requirement that each station be equipped with at least one control point has been limited to those installations which are required to have a licensed radio operator or permit holder on duty and in charge of the station's operations during the normal rendition of service. We believe that this change will satisfy the objections registered in connection with § 21.116 (c) by General Electric Company, A T & T, and The Western Union Telegraph Company which appear to have been submitted in relation to operation of stations which normally are authorized to operate without licensed operators on duty and in charge of the transmitter during the normal rendition of service. Relative thereto, and in accordance with the suggestion filed by Federal Telephone and Radio Company, a new § 21.118 (g) has been added pertaining to automatic alarm facilities.

Section 21.118: This section has been redesignated § 21.120. A T & T objected to the provisions of the section on the basis that the tests necessary to obtain type acceptance or approval of radio equipment will cause unwarranted delay in issuance of station authorizations, that such procedures have no real significance in determining the interfering effect that may actually result from the use of the equipment, that the proposed regulations will be so expensive and difficult to fulfill, that they discourage and stifle the use of radio, and that more stress should be placed on cooperative efforts in eliminating interference as it arises and less on endeavoring to avoid the possibility of all interference by regulation. As pointed out by General Electric Company, this section relates to the program for certification of equipment acceptable for licensing set forth in Docket No. 10798, which proceedings were the subject of a decision on May

11, 1955 by Memorandum Opinion and Order of the Commission.

Section 21.121: This section has been added, in accordance with comments filed by A T & T, to permit licensees in these services greater latitude in replacement of transmitters without prior Commission authorization.

9. In connection with Subpart D—Technical Operation, the various comments are disposed of as follows:

Section 21.202: A T & T objected to the requirement that all transmitters be required to have an executed transmitter identification card or metal tag affixed thereto. A T & T points out that FCC personnel inspecting radio installations will generally be accompanied by persons capable of giving the requisite information. We believe such affixed identification to be desirable, particularly where a number of transmitters are installed at a site shared by several licensees. The attachment of such identification does not constitute an unreasonable burden upon any licensee. In view of the foregoing, the A T & T comments are deemed to be of insufficient merit to warrant deletion of this section.

Section 21.205 (c): A T & T suggested deletion from this section of the requirement that, where installation, servicing or maintenance of transmitters is performed by unlicensed personnel, the facilities thereafter shall initially be placed in operation and be determined to be operating properly by a first or second class licensed radio operator. We believe that, in order to have reasonable assurance that transmitting equipment is operating properly in all cases, such provision is necessary. Accordingly, the A T & T suggestion is rejected.

Section 21.205 (h) (2): A T & T suggested deletion of this section on the grounds that persons at dispatch points do not actually operate the base station. If this be the case, the A T & T concept of a dispatch point is erroneous. In Part 6 of the rules, § 6.407 (d) defines a dispatch point as "an operating position" and § 6.407 (g) (3) clearly shows that dispatch point circuits are intended to be arranged so that persons at a dispatch point can operate the transmitter of a base station. This provision is carried forward in Part 21 and the suggestion of A T & T is rejected.

Section 21.205 (i): A T & T requested that this section be revised to permit central office stations, inter-office stations, and auxiliary test stations to be operated without licensed radio personnel and without effective operational control of licensed radio personnel. We are of the opinion that the responsible operating personnel should be in a position to know when their transmitters are radiating, to know the manner of performance of such facilities at all times, and to exercise effective operational control over those facilities. Accordingly, this section is retained without alteration.

Section 21.205 (j): Following the reasoning of A T & T with respect to § 21.205 (i), they requested like revision of this section. For similar reasons, this section is retained.

Second 21.205 (l): This section has been revised to relax the requirement that the quality of transmission over unattended stations be under the constant scrutiny of licensed operators, as suggested by A T & T. However, a provision has been made relative thereto in Section 21.118 (g) which requires use of automatic alarm facilities in such cases.

Section 21.205 (o): This section has been revised in accordance with comments filed by A T & T.

Section 21.207 (a): Subparagraphs (3) and (4) of this section have been revised in accordance with comments filed by A T & T.

Section 21.207 (b): Subparagraph (2) of this section has been revised to conform to the provisions of revised § 21.107 (c) of the rules adopted herein. The comments filed by Lenkurt, A T & T and Motorola on subparagraph (2) of this section relate to their comments on § 21.106 (d) which were taken into consideration when the latter section was revised. Section 21.207 (b) (3) has been revised as suggested by A T & T.

Section 21.208 (e): The requirement that the technical log of a station be kept in a permanently bound book has been deleted, in view of the comments filed by A T & T, National Mobile Radio System, Oliver C. Mitchell, and Radio Dispatch Service of Rochester, Inc. This section has been expanded by addition of subparagraph (3) which requires that details of functioning of automatic alarm facilities and failure or erratic operation of transmitters be recorded in the technical log of the station. The provisions of former subparagraph (3) of this section are now contained in § 21.208 (h).

Sections 21.208 (f) and (h): These sections have been combined and are redesignated as § 21.208 (g).

Section 21.208 (i): The requirement that logs be kept in ink or indelible pencil has been deleted from this section in accordance with the suggestion of A T & T.

Section 21.212 (a): This section has been broadened to permit equipment tests to be conducted on point-to-point microwave stations at any time during the term of the construction permit, as was suggested by A T & T.

Section 21.208 (b) (1): A T & T suggested the deletion of this section on the premise that the Commission is automatically placed on notice that service tests have begun when application for license has been filed with the Commission. A T & T has apparently overlooked the fact that such applications are filed in Washington, D. C. and not with the Commission's field offices. In view thereof, the rule requirement does not involve duplication of effort and the suggestion of A T & T is denied.

Section 21.207 (c): A T & T suggested deletion of this section on the grounds that it is difficult to make transmitter measurements in the field. This suggestion is rejected. The Commission believes that it is essential to know the modulation and radiation characteristics of transmitters which are in service. Subparagraph (3) of this section has been revised to require such determination to be made at intervals not to exceed one year, in lieu of the six-month interval heretofore proposed.

Section 21.207 (d): A T & T suggested that permission be included for the measurements required on mobile units to be made at other times than at six-month intervals. The rules allow the prescribed measurements to be made at any time within the prescribed time limits, which have been revised as indicated above. In addition, A T & T requested that this section be revised to allow the power measurements of § 21.207 (b) to be made at a test or service bench. Section 21.107 (b) is not applicable to mobile units.

Section 21.207 (e): In some instances, persons who are not licensed radio operators may be qualified to make accurate radio frequency measurements. However, this is not necessarily the case. Accordingly, we believe that the provisions of this section are necessary to ensure compliance with the technical provisions of Part 21. The requirements of this section do not appear to be unduly burdensome or unreasonable. In view of the foregoing, the suggestion of A T & T that the licensed radio operator aspects of this section be deleted is rejected.

Section 21.213: In response to the comments filed by A T & T, a subparagraph (4) in paragraph (b) of this section has been added to permit a TV-Pickup or TV–STL station to identify itself by the call sign of the broadcast station for which it is rendering service. The suggestion of USITA that stations also be permitted to identify themselves by various other means, such as by the name of the city in which the control point is located, or the name of the city or principal area served, is rejected. No showing has been made that other permissible methods of identification are unsatisfactory and the necessity for the suggested changes is not evident. The prompt identification of the emissions of a station is necessary if freedom from harmful interference to the operation of other stations is to be preserved.

10. In connection with Subpart E—Miscellaneous, the various comments are disposed of as follows:

Section 21.303 (a): A T & T and Lenkurt suggested the deletion of this section. However, their comments fail to show that the provisions thereof would restrict or impair their radio operations or that the requirements of this rule would not be in the public interest, convenience or necessity. The rule is retained.

Section 21.303 (b): The language of this section has been revised as suggested by A T & T.

11. In connection with Subpart G—Domestic Public Land Mobile Radio Service, the various comments are disposed of as follows:

Section 21.501 (a): Duluth, Missabe and Iron Range Railway Company and A T & T advocate splitting of the radio channels allocated to this service and, in addition, the former recommends that the additional channels derived through channel-splitting be specifically allocated for assignment to stations in the Rural Radio Service. The Commission believes implementation of split channel operation in the various radio services

prior to finalization of the split-channel proceeding now pending in Docket No. 11253 would be premature. The reallocation of frequencies was not contemplated in the rule-making proceeding in this Docket. Accordingly, the suggestion that the Rural Radio Service be allocated the extra channels derived from channel-splitting is inappropriate in this proceeding. Such a reallocation is properly a matter for a separate frequency reallocation wherein all parties in interest would be afforded equal opportunity to participate. Duluth, Missabe and Iron Range Railway Company also suggested that the frequencies in the 35–44 Mc band, listed in this section, be made available for assignment to fixed stations in the Rural Radio Service. Because of the severe long range interference to land mobile system operations from fixed station operations in the past, it has been the Commission's policy to refrain from permitting other than land mobile system operations on these frequencies. In view of the foregoing, the aforementioned suggestions of A T & T and Duluth, Missabe and Iron Range Railway Company are not adopted.

Section 21.501 (b) and (c): In response to the suggestions by A T & T, Oliver C. Mitchell, Donald R. Cook, Kenneth A. Riggs and W. L. Anderson, the footnote to this section has been revised to allow an extra 5 years, to April 1, 1961, for amortization of equipment being used for control and repeater functions. Such operations should be performed via wireline circuits or, where this is not feasible, on frequencies specifically allocated to the fixed service.

Section 21.501 (f): In response to comments by A T & T, the footnote to this section has been revised to avoid the impression that continuous aural monitoring is required. The A T & T recommendation that additional frequencies be listed in this section has been dealt with in relation to the footnote to paragraphs (b) and (c) of § 21.501.

Sections 21.502 and 21.503: The comments of A T & T, USITA and National Mobile Radio System take issue with the provisions of these sections because variations in topography and radio wave propagation in different areas do not lend themselves universally to use of a fixed table of minimum mileage separations between co-channel stations. We do not dispute the accuracy of these observations and, accordingly, provision has been made in § 21.503 for station assignments to be made at greater or lesser mileage separations wherever it appears necessary or feasible in any particular case. We feel that these sections will serve as a guide to persons filing applications in the Domestic Public Land Mobile Radio Service and will eliminate the filing of many applications which have little chance of being granted because of potential co-channel interference aspects. The suggestion that these sections be deleted from the proposed rules is rejected.

Section 21.504: A T & T suggested that definition of reliable service area of a base station is unnecessary. The section is retained inasmuch as it will serve as a useful guide in the establishment of stations in this service.

Section 21.505: Comments objecting to the retention of this section were filed by USITA, A T & T, Oliver C. Mitchell and Motorola. The provisions of this section do not contemplate that base stations now having antennas over 500 feet in height above average terrain will be required to reduce antenna heights or to make a showing of need for their existing antenna heights. The rule, as proposed, makes adequate provision for authorizing higher antenna heights where such installations are, in the opinion of the Commission, warranted. The suggestions of the parties commenting on this rule are rejected.

Section 21.506: A T & T recommended deletion of the ceiling placed on effective radiated power, whereas National Mobile Radio System believes this limitation on effective radiated power is a definite improvement. The recommendation of A T & T is rejected. We believe the limitation to be necessary to the effective regulation of this service.

Sections 21.507 and 21.508: These sections were revised and combined as § 21.507. The suggestion by A T & T that type FO emission be authorized without specific showing of need is without merit. The indiscriminate use of unmodulated emission may lead to serious interference problems affecting the services of other stations and should not be authorized in the land mobile service except upon careful consideration on a case by case basis. The A T & T comment with relation to authorized bandwidth and split-channel operation is premature and is rejected in view of the pending split-channel proceeding in Docket No. 11253.

Section 21.509: General Electric commented that this section was inadequate in definition and subject to interpretation. In view of their failure to elaborate, we are unable to evaluate such comment. The A T & T suggestion that the maximum permissible modulating frequency be raised from 3,000 to 4,200 cycles per second is rejected. Such a change appears to be in the wrong direction, particularly in view of the prospects of channel-splitting, contemplated in Docket No. 11253, which may require modulating frequencies to be limited to less than 3,000 cycles per second. As elsewhere indicated, the split-channel aspects of A T & T's suggestion are premature and their recommendation relative to paragraph (c) of this section is not adopted. Paragraph (d) of this section has been redesignated as paragraph (e) of § 21.508 and has been revised to limit its applicability to single channel transmitters only. In addition, in recognition of comments filed by The Western Union Telegraph Company, a new § 21.508 (f) has been written to provide for operation of stations using facsimile transmission.

Section 21.510: The suggestion by Duluth, Missabe and Iron Range Railway Company that installations which are not intended to operate while in motion be permitted to operate in the Domestic Public Land Mobile Radio Service is provided for under paragraph (f) of this section which has been redesignated at paragraph (e) of § 21.509.

Section 21.510 (a): This section has been redesignated as § 21.509 (a). Mobile-to-mobile communications through the base station are permissible under this section and Motorola's suggestion that rule changes be made to provide therefor is unnecessary.

Section 21.510 (b): At the suggestion of A T & T this section has been appropriately revised and has been redesignated at § 21.509 (b).

Section 21.510 (b) (5): At A T & T's request this section has been revised for clarity and has been redesignated as § 21.509 (b) (5).

Section 21.510 (j): In accordance with the comments of A T & T and National Mobile Radio System, this section has been deleted.

Section 21.510 (k): A T & T, General Electric and Motorola suggested changes which have been made in this rule, now redesignated as § 21.509 (j).

Section 21.512: This rule has been redesignated as § 21.511 (a) and has been revised to make the provision applicable only to miscellaneous common carriers. A new § 21.511 (b) has been added to cover communication service of wire-line communications common carrier's to their own mobile units.

Section 21.515: This section has been redesignated as § 21.514 (a). A new paragraph (b) has been added thereto to cover responsibility for operational control and maintenance of transient mobile units.

12. In connection with Subpart H—Rural Radio Service, the various comments are disposed of as follows:

Section 21.601: Andrew G. Haley, commenting on behalf of a group of 8 miscellaneous common carriers, recommends that common carrier operations upon frequencies formerly allocated to television and FM broadcast stations (i. e., 76–88 Mc and 98–108 Mc in the Territory of Hawaii only) be subject to no interference being caused to these broadcast services. This matter was given due consideration in the frequency reallocation proceeding in Docket No. 10094 and it is inappropriate to argue that question here since Docket No. 10094 has been finalized.

Section 21.601 (a): All America Cables and Radio, Inc., and Radio Corporation of Porto Rico have requested reallocation, from the Domestic Public Land Mobile Radio Service in Puerto Rico and Virgin Islands to the Rural Radio Service, of certain frequencies which are listed herein between 152 and 162 Mc. As we have mentioned elsewhere, this is not a frequency reallocation proceeding and consideration of this proposal herein is inappropriate. In this connection, attention is invited to the rule-making proceeding finalized in Docket No. 11498 which provided other frequencies exclusively for communications common carrier requirements for public point-to-point service in the Carribean area. Accordingly, these comments are moot.

Section 21.601 (b): Frequencies in the 890–940 Mc band have been listed for assignment in the Rural Radio Service as suggested by the comments filed by A T & T, REA and Hawaiian Telephone Company. Several other parties commenting on the proposed rules also urged

that as many frequencies as possible be furnished for the Rural Radio Service. The rule previously designated as § 21.601 (b) has been redesignated as § 21.601 (c).

Section 21.603 (a): As suggested by A T & T's comment, this rule has been changed to include types A1, A2, F1 and F2 emission to provide for telegraphy.

Section 21.603 (b): As suggested by Hawaiian Telephone Company's comments, this rule has been revised to provide for use of types A1, A2, A3, A4, F1, F2, F3 and F4 emission outside the continental limits of the United States, without necessity for making a special showing as previously indicated.

Section 21.605 (b): Lenkurt Electric Co., Inc., A T & T, The Western Union Telegraph Company and Hawaiian Telephone Company recommended deletion of modulation limiter requirements for multi-channel transmitters, in order to avoid excessive distortion of the transmitted intelligence and because of unavailability of suitable modulation limiters for such purposes. Accordingly this rule has been revised and redesignated as § 21.605 (d).

Section 21.608: A T & T and Motorola suggested simplifying the requirements of this section. It is to be noted that one aspect of Rural Subscriber Service contemplates the construction of a multiplicity of circuits between central offices, while another aspect contemplates the construction of a single channel between a central office and a rural subscriber. It is felt that the data required by this section, insofar as multiple channel construction projects are involved, are necessary for the effective regulation of this service. A new § 21.609 has been added which requires different and substantially less data in support of applications contemplating the construction of radio facilities to provide service between central offices and rural subscribers.

Section 21.609: This section has been redesignated § 21.610. Motorola commented on this by suggesting that the condition that "provision of wire line facilities is not practicable" would preclude relief in a case where such facilities are practicable but not available. We have modified this section to take care of this point.

13. In connection with Subpart I—Intercity Radio Service, the various comments are disposed of as follows:

At the suggestion of various parties, this service has been redesignated as the Point-to-Point Microwave Radio Service. WKY Radiophone Company recommended that these rules prescribe transmission standards of quality which common carriers must meet in rendering service for hire. We are of the opinion that the quality of service which will be provided to a subscriber should be adequately described in the carrier's tariff applicable thereto. If the standards of quality as described therein are inadequate to meet the subscriber's requirements, the subscriber should make such fact known to the carrier and any appropriate regulatory agencies with a view to having the applicable tariff amended to provide the desired service.

Section 21.701 (b): Stromberg-Carlson Company urged reallocation of 2450–2500 Mc band for the exclusive use of common carrier fixed station operations, with emphasis on the need for removal of radar type speed meter operation from this band because the operation of these devices at random sites is a constant threat of causing harmful interference to communications circuits operating in the same band and geographical area. Since this proceeding is not an allocation proceeding, this comment may not properly be considered.

Section 21.701 (c): The suggestion of A T & T that all of the frequencies allocated to the Domestic Public Land Mobile Radio Service in the 152–162 Mc band and 450–460 Mc band be made available for use by control stations in the Point-to-Point Microwave Radio Service is rejected. We believe this function should be performed either by wire lines or upon frequencies allocated exclusively for fixed station operations, thus protecting the basic needs of the mobile service against conflicting fixed usage.

Section 21.701 (e): Hawaiian Telephone Company's request that a new paragraph (e) be added listing the frequency bands 76–88 Mc and 98–100 Mc has not been adopted since Subpart I of these rules is primarily a microwave radio service and the frequencies mentioned are in the VHF part of the radio spectrum. We believe, however, that changes made in Subpart H of the rules will provide for the various types of service which Hawaiian Telephone Company is presently providing.

Section 21.703: Upon request of A T & T, Citizens Utilities Company, Peninsular Telephone Company, Porto Rico Telephone Company, Tidewater Telephone Company, and Federal Telephone and Radio Company, this section has been revised to permit pulse type of emission to be used in the 890–940 Mc band. In addition, at the request of Lenkurt Electric Company, Inc., the provisions of paragraph (e) of this section have been revised for clarity.

Section 21.704 (b): This section has been revised to limit its application to single channel transmitters since comments filed by Lenkurt Electric Company, Inc., and Hawaiian Telephone Company brought out the difficulty of equipping multi-channel transmitters with modulation limiters without introduction of excessive distortion of transmitted intelligence.

Section 21.706: To avoid duplicate filings where the same information is involved in applications filed pursuant to this part and Part 63, Lenkurt suggests that the requirements of this part be waived where the required information has been submitted to the Commission in connection with Part 63 applications. This suggestion is being adopted in paragraph (b) of this section. A T & T suggests that, where a series of related applications are involved, the data be supplied for the entire series and not for each individual station and that the data required be substantially reduced. The first suggestion is incorporated in the footnote to this section. The latter suggestion has been adopted in part, to provide only for the submission of data in given cross-sections and for the principal circuit groups on existing facilities and on the proposed facilities.

Section 21.707. A new section has been added to provide for authorization of fixed stations to operate at temporary fixed locations in connection with the rendition of service of a temporary nature. Persons operating communication facilities under the provisions of this section will be expected to undertake such coordination as may be necessary, prior to commencement of operations, to avoid harmful interference being caused to any other radio system operating under the provisions of this part.

14. In connection with Subpart J—Local Television Program Transmission Service, the various comments are disposed of as follows:

This subpart has been redesignated as the Local Television Transmission Service.

Section 21.801: A T & T's recommendation that the bands of microwave frequencies allocated exclusively to the common carrier fixed service be listed as available under this subpart appears unnecessary. The provisions of Subpart I of these rules appears to be of sufficiently broad scope to permit the "closed circuit" and other operations mentioned in A T & T's comment. We believe the addition of § 21.707 will enable common carriers to meet diversified operational requirements of temporary nature. A T & T's recommendation that the frequency band 6425–6575 Mc be designated for the exclusive use of common carriers is not a matter to be decided in this proceeding. This matter is presently under consideration in Docket No. 10797.

Section 21.804: The A T & T recommendation that provision be made for authorizing bandwidths up to 30 Mc wide in the frequency band 5925–7125 Mc has been adopted in part. The Commission did not adopt the recommendation with respect to frequencies in the 6575–7125 Mc band because common carriers, except those operating international control stations which are not authorized under this Part, are ineligible to operate in the 6575–6875 Mc band and because the 30 Mc bandwidths are incompatible with the channel widths established in the 6875–7125 Mc band in Part 4 of the Commission's rules. Operation with such greater channel widths would undoubtedly lead to cases of harmful interference to adjacent channels used by other stations.

Section 21.806: In accordance with the suggestion by A T & T, this section has been revised to provide for operation of TV Pickup stations, via remote control, for periods not in excess of 6 months.

15. In order to effect a convenient transition to this new rule part by existing stations (now designated experimental) which are eligible for authorization under these new rules, the following procedure will be followed. Since all such existing experimental authorizations expire November 1, 1956, the licensee of each such facility shall, 60 days prior to November 1, 1956, file an appropriate application on FCC Form 405 requesting both modification and renewal of the applicable license in the appropriate new service. A separate application shall be filed for each licensed facility. If, however, on and after the effective date of these rules, a licensee or permit holder files an application requiring the issuance of a new instrument of authorization, and such instrument of authorization is issued prior to November 1, 1956, such new instrument of authorization will be issued with such new service designation as may be appropriate under these rules. All pending applications for affected experimental authorizations as of this date shall be deemed automatically modified to request appropriate authorization pursuant to these rules. Finally, existing affected experimental construction permits and licenses, whether or not specifically converted by the issuance of new instruments to appropriate services under these rules shall, from and after the effective date hereof, be governed by the appropriate provisions of these rules and the grantees of such instruments shall be required to comply in all respects therewith.

16. In view of the considerations and determinations related above, and pursuant to the authority contained in sections 4 (i) and 303 of the Communications Act of 1934, as amended, it is ordered, effective September 4, 1956, that:

(1) Part 21, Domestic Public Radio Services (other than Maritime Mobile), as set forth below is adopted, and the proceedings in Docket No. 10821 are terminated.

(2) Part 6, Public Radiocommunication Services (other than Maritime Mobile) is amended by the deletion of §§ 6.101 thru 6.603, which are superseded by new Part 21, herein adopted.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Adopted: June 13, 1956.

Released: June 20, 1956.

FEDERAL COMMUNICATIONS COMMISSION,
MARY JANE MORRIS,
*Secretary.*

PART 21—DOMESTIC PUBLIC RADIO SERVICES (OTHER THAN MARITIME MOBILE)

Sec.
21.0 Basis and purpose.

Subpart A—Definitions

21.1 Definitions.

Subpart B—Applications and Licenses

21.10 Station authorization required.
21.11 General citizenship restrictions.
21.12 Place of filing applications and number of copies.
21.13 Subscription and verification of applications.
21.14 Informal applications.
21.15 Content of applications.
21.16 Additional statements.
21.17 Form of amendments to applications.
21.18 Amendments of applications ordered.
21.19 Application for special temporary authorization.
21.20 Defective applications.
21.21 Inconsistent or conflicting applications.
21.22 Repetitious applications.
21.23 Amendments of applications.
21.24 Dismissal of applications.
21.25 Partial grants.
21.26 Grants without a hearing.
21.27 Designation for hearing.
21.28 Transfer and assignment of station authorization.
21.29 Forms to be used.
21.30 Period of construction.
21.31 Forfeiture of station authorizations.
21.32 License period.

Subpart C—Technical Standards

21.100 Frequencies.
21.101 Frequency stability.
21.102 Frequency measuring or calibrating apparatus.
21.103 Standards and limitations governing authorization and use of frequencies in the 72–76 Mc band.
21.104 Types of emission.
21.105 Bandwidth.
21.106 Emission limitations.
21.107 Transmitter power.
21.108 Directional antennas.
21.109 Antenna changes.
21.110 Antenna polarization.
21.111 Simultaneous use of common antenna structure.
21.112 Marking of antenna structures.
21.113 Description of station location.
21.114 Temporary fixed antenna height restrictions.
21.115 Method for determining average terrain elevation.
21.116 Topographical data.
21.117 Transmitter location.
21.118 Transmitter construction and installation.
21.119 Limitation on use of transmittors for other services.
21.120 Type acceptance of transmitters.
21.121 Replacement of equipment.

Subpart D—Technical Operation

21.200 Station inspection.
21.201 Posting of station authorizations.
21.202 Transmitter identification card.
21.203 Posting of operator licenses.
21.204 FCC publications required for reference.
21.205 Operator requirements.
21.206 Inspection and maintenance of antenna structure obstruction marking and associated control equipment.
21.207 Transmitter measurements.
21.208 Station records.
21.209 Communications concerning safety of life and property.
21.210 Operation during emergency.
21.211 Suspension of transmission.
21.212 Equipment, service and maintenance tests.
21.213 Station identification.

Subpart E—Miscellaneous

21.300 Business records.
21.301 National defense; free service.
21.302 Answers to notices of violation.
21.303 Discontinuance, reduction or impairment of service.
21.304 Tariffs, reports, and other material required to be submitted to the commission.
21.305 Reports required concerning amendments to charters, by-laws, and partnership agreements.
21.306 Requirement that permittees and licensees respond to official communications.

Subpart F—Developmental Authorizations

21.400 Eligibility.
21.401 Scope of service.
21.402 Adherence to program of research and development.
21.403 Special procedure for the development of a new service or for the use of frequencies not in accordance with the provisions of the rules in this part.
21.404 Terms of grant; general limitations.
21.405 Supplementary showing required.
21.406 Development reports required.

Subpart G—Domestic Public Land Mobile Radio Service

Sec.
21.500 Eligibility.
21.501 Frequencies.
21.502 Classification of base stations.
21.503 Geographical separation of co-channel stations.
21.504 Service area of base station.
21.505 Antenna height limit for base stations.
21.506 Power limitations.
21.507 Bandwidth and emission limitations.
21.508 Modulation requirements.
21.509 Permissible communications.
21.510 Base stations may be authorized only as part of integrated radio system.
21.511 Communication service to own mobile units.
21.512 Priorities for service to subscribers.
21.513 Location of message center.
21.514 Responsibility for operational control and maintenance of mobile units.
21.515 Control points and dispatch points.

Subpart H—Rural Radio Service

21.600 Eligibility.
21.601 Frequencies.
21.602 Transmitter power.
21.603 Types of emission.
21.604 Emission limitations.
21.605 Modulation requirements.
21.606 Permissible communications.
21.607 Priority of service.
21.608 Supplementary showing required with applications for inter-office stations.
21.609 Supplementary showing required with applications for central office stations and rural subscriber stations.
21.610 Rural subscriber and central office stations at temporary fixed locations.
21.611 Notification of station operation at temporary locations.

Subpart I—Point-to-Point Microwave Radio Service

21.700 Eligibility.
21.701 Frequencies.
21.702 Transmitter power.
21.703 Bandwith and emission limitations.
21.704 Modulation requirements.
21.705 Permissible communications.
21.706 Supplementary showing required with applications.
21.707 Stations at temporary fixed locations.

Subpart J—Local Television Transmission Service

21.800 Eligibility.
21.801 Frequencies.
21.802 Assignment of frequencies to mobile stations.
21.803 Transmitter power.
21.804 Bandwith and emission limitations.
21.805 Modulation requirements.
21.806 Remote control operation of mobile television pickup stations.

AUTHORITY: §§ 21.0 to 21.806 issued, under sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interpret or apply sec. 303, 49 Stat. 1082, as amended; 47 U. S. C. 303.

§ 21.0 *Basis and purpose.* (a) The basis for the rules in this part is the Communications Act of 1934, as amended, and applicable treaties and agreements to which the United States is a party. The rules in this part are issued pursuant to the authority contained in Titles II and III of the Communications Act of 1934, as amended, which vests authority in the Federal Communications Commission to regulate common carriers of interstate and foreign communications and to regulate radio transmissions and issue licenses for radio stations.

(b) The purpose of the rules and regulations in this part is to prescribe the manner in which portions of the radio spectrum may be made available for the use of radio for domestic communication common carrier operations which require transmitting facilities on land.

### SUBPART A—DEFINITIONS

§ 21.1 *Definitions.* As used in this part:

*Antenna power gain.* The square of the ratio of the root-mean-square free space field intensity produced at one mile in the horizontal plane, in millivolts per meter for one kilowatt antenna input power to 137.6 mv/m. This ratio should be expressed in decibels (db). (If specified for a particular direction, antenna power gain is based on the field strength in that direction only.)

*Antenna power input.* The radio frequency peak or RMS power, as the case may be, supplied to the antenna from the antenna transmission line and its associated impedance matching network.

*Antenna structure.* The term "antenna structure" includes the radiating system and its supporting structures.

*Assigned frequency.* The frequency coinciding with the center of the radio frequency channel in which the station is authorized to work. This frequency does not necessarily correspond to any frequency in an emission.

*Authorized frequency.* The frequency assigned to a station by the Commission and specified in the instrument of authorization.

*Authorized power.* The power assigned to a radio station by the Commission and specified in the instrument of authorization. The authorized power does not necessarily correspond to the power used by the Commission for purposes of its Master Frequency Record (MFR) and notification to the Bureau of the International Telecommunications Union.

*Auxiliary test station.* A fixed station used for test transmissions only, operating on mobile station frequencies from a specified fixed location, for the purpose of determining the performance of fixed receiving equipment which is remotely located from the base station with which it is associated, or where the receiving equipment is located with the base station and both are remotely located from the control point of the station.

*Bandwidth occupied by an emission.* The band of frequencies comprising 99 percent of the total radiated power extended to include any discrete frequency on which the power is at least 0.25 percent of the total radiated power.

*Base station.* A land station in the land mobile service carrying on a service with land mobile stations.[1]

*Carrier.* In a frequency stabilized system, the sinusoidal component of a modulated wave whose frequency is independent of the modulating wave; or the output of a transmitter when the modulating wave is made zero; or a wave generated at a point in the transmitting system and subsequently modulated by the signal; or a wave generated locally at the receiving terminal which when combined with the side bands in a suitable detector, produces the modulating wave.

*Carrier frequency.* The frequency of the carrier.

*Central office.* A landline termination center used for switching and interconnection of public message communication circuits.

*Central office station.* A fixed station used for transmitting communications to rural subscriber stations associated therewith.

*Communication common carrier.* Any person engaged in rendering communication service for hire to the public.

*Control point.* A control point is an operating position at which an operator responsible for the operation of the transmitter is stationed and which is under the control and supervision of the licensee.

*Control station.* A fixed station the transmissions of which are used to control automatically the emissions or operations of another radio station at a specified location, or automatically to transmit to an alarm center telemetering information relative to the operation of such stations.

*Dispatch communication.* Two-way voice communication, normally of not more than one minute's duration, between common carrier base and land mobile stations, or between a common carrier land mobile station and a landline telephone station not connected to a public message telephone system.

*Dispatch point.* A dispatch point is a base station operating position, operated by a subscriber, which is under the control and supervision of the base station licensee.

*Domestic fixed public service.* A fixed service, the stations of which are open to public correspondence, for radiocommunication between points all of which lie within: (a) the 48 states and the District of Columbia, or (b) within a single territory or possession of the United States.[2]

*Domestic public land mobile radio service.* A public communication service for hire between land mobile stations wherever located and their associated base stations which are located within the continental limits of the United States or its territories and possessions, or between land mobile stations in the United States and base stations in Canada.

*Domestic public radio service.* The land mobile and domestic fixed public services the stations of which are open to public correspondence.[2]

*Effective radiated power.* The product of the antenna power input and the antenna power gain. This product should be expressed in watts. (If specified for a particular direction, effective radiated power is based on the antenna power gain in that direction only.)

*Exchange.* A unit of a communication company or companies for the administration of communication service in a specified area, which usually embraces a city, town, or village and its environs, and consisting of one or more central offices, together with the associated plant, used in furnishing communication service in that area.

*Exchange area.* The geographic area included within the boundaries of an exchange.

*Facsimile.* A system of telecommunication for the transmission of fixed images with a view to their reception in a permanent form.

*Fixed service.* A service of radiocommunication between specified fixed points.

*Fixed station.* A station in the fixed service.

*Frequency tolerance.* The frequency tolerance, expressed as a percentage or in cycles per second, is the maximum permissible deviation, with respect to the reference frequency of the corresponding characteristic frequency of an emission.

*General communication.* Two-way voice communication, through a base station, between a common carrier land mobile station and a landline telephone station connected to a public message landline telephone system, or between two common carrier land mobile stations via a base station.

*Harmful interference.* Any radiation or any induction which endangers the functioning of a radionavigation service or of a safety service or obstructs or repeatedly interrupts a radio service.

*Inter-office station.* A fixed station in the domestic fixed public service which is used exclusively for interconnection of telephone central offices.

*Landing area.* A landing area means any locality, either of land or water, including airports and intermediate landing fields, which is used, or approved for use for the landing and take-off of aircraft, whether or not facilities are provided for the shelter, servicing, or repair of aircraft, or for receiving or discharging passengers or cargo.

*Land mobile service.* A mobile service between base stations and land mobile stations, or between land mobile stations.

*Land mobile station.* A mobile station in the land mobile service capable of surface movement within the geographical limits of a country or continent.

*Land station.* A station in the mobile service not intended for operation while in motion.

*Local television transmission service.* A domestic public radio communication service for the transmission of television material and related communications.

*Message center.* The point at which messages from members of the public are accepted by the carrier for transmission to the addressee.

*Microwave auxiliary station.* A mobile station used in connection with (1) the alignment of microwave transmitting and receiving antenna systems and equipment, (2) coordination of microwave radio survey operations, and (3) cue and contact control of television pickup station operations.

*Microwave frequencies.* As used in this part, this term refers to frequencies of 890 Mc. and above.

*Miscellaneous common carriers.* Communications common carriers which are not engaged in the business of providing either a public landline message telephone service or public message telegraph service.

*Mobile service.* A service of radiocommunication between mobile and land stations or between mobile stations.

*Mobile station.* A station in a mobile service intended to be used while in motion or during halts at unspecified points.

*Necessary bandwidth of emission.* The necessary bandwidth is the width of the frequency band which is necessary in the over-all system, including both transmitter and receiver, for the proper reproduction at the receiver of the desired information, and does not necessarily indicate the interfering characteristics of an emission.[4]

*Point-to-point microwave radio service.* A domestic public radio service rendered on microwave frequencies [5] by fixed station between points which lie within the continental limits of the United States or between points in its territories and possessions or to points in Canada or Mexico.

*Private line service.* A service whereby facilities for communication between two or more designated points are set aside for the exclusive use or availability for use of a particular customer and authorized users during stated periods of time.

*Public correspondence.* Any telecommunication which the offices and stations, by reason of their being at the disposal of the public, must accept for transmission.

*Public message service.* A service whereby facilities are offered to the public for communication between all points served by a carrier or by interconnected carriers on a non-exclusive message by message basis, contemplating a separate connection for each occasion of use.

*Radiocommunication.* Any telecommunication by means of Hertzian waves.

*Radio station.* A separate transmitter or a group of transmitters under simultaneous common control, including the accessory equipment required for carrying on a radiocommunication service.

*Rated power output.* The term "rated power output" of a transmitter means the normal radio frequency power output capability (Peak or Average Power) of a transmitter, under optimum conditions of adjustment and operation, specified by its manufacturer.

*Record communication.* Any transmission of intelligence which is reduced to visual record form at the point of reception.

*Reference frequency.* A frequency coinciding with or having a fixed and specified relation to the assigned frequency. This frequency does not necessarily correspond to any frequency in an emission.

*Relay station.* A fixed station used for the reception and retransmission of the signals of another station or stations.

*Repeater station.* A fixed station established for the automatic retransmission of radiocommunications received from one or more mobile stations and directed to a specified location.

*Rural radio service.* A domestic public radio service rendered by fixed stations on frequencies below 1000 Mc. used to provide (1) public message communication service between a central office and subscribers located in rural areas to which it is impracticable to extend service via landlines, or (2) public message communication service between landline central offices and different exchange areas which it is impracticable to interconnect by other means, or (3) private line telephone, telegraph, or facsimile service between 2 or more points to which it is impracticable to extend service via landline.

*Rural subscriber station.* A fixed station in the Rural Radio Service used by a subscriber for communication with a central office station.

*Service area of base station.* The limits of reliable service area of a base station are considered to be described by the field strength contour within which the reliability of communication service is 90 percent, i. e., within the area circumscribed by such contour, nine out of every ten calls initiated by the base station can be satisfactorily received by the mobile unit.

*Signaling communication.* One-way communication from a base station to a mobile receiver for the purpose of actuating a signaling device in the mobile unit or for communicating information to the desired mobile unit.

*Standby transmitter.* A transmitter installed and maintained for use in lieu of the main transmitter only during periods when the main transmitter is out of service for maintenance or repair.

*Telegraphy.* A system of telecommunication for the transmission of written matter by the use of signal code.

*Telemetering.* Automatic radiocommunication in a fixed or mobile service intended to indicate or record a measurable variable quantity at a distance.

*Telephony.* A system of telecommunication set up for the transmission of speech, or in some cases, other sounds.

*Television.* A system of telecommunication for transmission of transient images of fixed or moving objects.

*Television non-broadcast pickup station.* A mobile, except television pickup, station used for the transmission of television program material and related communications for non-broadcast purposes.

*Television pickup station.* A land mobile station used for the transmission of television program material and related communications from the scenes of events occurring at points removed from television broadcast station studios to television broadcast stations.

*Television STL station (studio transmitter link).* A fixed station used for the transmission of television program material and related communications from a studio to the transmitter of a television broadcast station.

### SUBPART B—APPLICATIONS AND LICENSES

§ 21.10 *Station authorization required.* No radio transmitter shall be operated in the Domestic Public Radio Services except under and in accordance with a station authorization granted by the Federal Communications Commission.

§ 21.11 *General citizenship restrictions.* A station license may not be granted to or held by:

(a) Any alien or the representative of any alien.

(b) Any foreign government or the representative thereof.

(c) Any corporation organized under the laws of any foreign government.

(d) Any corporation of which any officer or director is an alien.

(e) Any corporation of which more than one-fifth of the capital stock is owned of record or voted by: aliens or their representatives; a foreign government or representatives thereof; or any corporation organized under the laws of a foreign country.

(f) Any corporation directly or indirectly controlled by any other corporation of which any officer or more than one-fourth of the directors are aliens, if the Commission finds that the public interest will be served by the refusal or revocation of such license.

(g) Any corporation directly or indirectly controlled by any other corporation of which more than one-fourth of the capital stock is owned of record or voted by aliens or their representatives, or by a foreign government or representative thereof, or by any corporation organized under the laws of a foreign government, if the Commission finds that the public interest will be served by the refusal or revocation of such license.

§ 21.12 *Place of filing applications and number of copies.* (a) To assure that necessary information is supplied in a consistent manner by all persons, standard forms are prescribed for use in connection with the majority of applications and reports submitted for Commission consideration. Standard numbered forms applicable to the Domestic Public Radio Services (other than Maritime Mobile) are discussed within this subpart and may be obtained from the Secretary, Federal Communications Commission, Washington 25, D. C. or from any of the Commission's engineering field offices, the addresses of which are listed in Section 0.40 of Part 0, Statement of Organization, Delegations of Authority, and other Information.

(b) Every application for a radio station authorization, except applications for stations located in the Territory of Alaska, and all correspondence relating thereto shall be submitted to the Commission's office at Washington 25, D. C., attention of the Secretary.

(c) Applications for station authorizations under this part in the Territory of Alaska shall be submitted to the Federal Communications Commission, Radio

[1] In certain cases, also communicates with fixed stations and vessels.

[2] In cases where service is afforded on frequencies above 30 Mc, facilities within the United States for communication with facilities in Canada or Mexico and facilities for communication between United States territories and possessions in the Carribean area are also deemed to be in the domestic fixed public service.

[3] Parts 7 and 8 of this chapter are applicable to Maritime services. Part 9 is applicable to Aeronautical services; and Part 14 is applicable to certain Alaskan services.

[4] The necessary bandwidth for an emission may be calculated using the formulas in § 2.202 of this chapter.

[5] In certain cases, frequencies below the microwave spectrum, e. g., 27.255 Mc and 72–76 Mc may be used for control and auxiliary stations in this service.

District No. 14, Room 802, Federal Office Building, Seattle 4, Washington, attention of the Engineer-in-Charge. Applications for other stations governed by this part should be submitted to the Commission's office in Washington, D. C.

(d) Unless otherwise specified in a particular case, or for a particular form, each application, including exhibits and attachments thereto, shall be filed in duplicate.

(e) Each application, including exhibits and attachments thereto, for station authorization in the Territory of Alaska shall be filed with one copy more than the number of copies indicated in this part for stations located elsewhere.

§ 21.13 *Subscription and verification of applications.* One copy of each application for an authorization shall be signed under oath or affirmation by the applicant, if the applicant be an individual; by any one of the partners, if an applicant be a partnership; by an officer or duly authorized employee, if the applicant be a corporation; or by a member who is an officer, if the applicant be an unincorporated association: *Provided, however,* That applications may be signed by the attorney-in-fact for an applicant (a) in case of physical disability of the applicant, or (b) his absence from the continental United States. If it be signed by a person other than the applicant, such person must set forth in the verification the grounds of his belief as to all matters not stated upon his knowledge and the reason why it is not made by the applicant. Applications filed on behalf of eligible governmental entities such as states and territories of the United States and political subdivisions thereof, the District of Columbia, and units of local government including incorporated municipalities, shall be signed by such duly elected or appointed officials as may be competent to do so under the law of the jurisdiction. Where more than one copy of an application is required to be filed with the Commission, only the original need be signed and verified; the copies may be conformed.

§ 21.14 *Informal applications.* An application not submitted on a standard form prescribed by the Commission is an informal application. Each informal application shall be submitted in duplicate, normally in letter form in the manner prescribed in §§ 21.12 (b), (c), (d), (e) and 21.13. Each application shall be clear and complete within itself as to the facts presented and the action desired. Informal applications will be accepted only in those cases where standard forms are not applicable.

§ 21.15 *Content of applications.* (a) Each application, unless otherwise authorized, shall be specific with regard to frequency or frequencies, power, hours of operation, equipment, antenna height, antenna gain and orientation, points or areas of communication, location of the station (an application for authority to operate at temporary locations shall specify the general geographic area within which the operation will be confined), full and complete disclosures with regard to the real party or parties in interest, and shall set forth all matters and things required to be disclosed or answered by the application forms and the Commission's rules.

(b) Each application for construction permit for new or additional radio facilities shall be accompanied by a showing of the applicant's legal, financial, technical and other qualifications to be a licensee in the Domestic Public Radio Services except that:

(1) When simultaneous request is made for a multiplicity of radio stations by a single applicant, a single showing of legal, financial, technical and other qualifications may be made and incorporated by reference in the related applications.

(2) When any qualifications have once been established for an applicant, reference may be made thereto by specific identification and a statement indicating, if appropriate, that there has been no change in the reference facts or circumstances. If any material change has occurred, full disclosure thereof shall be made.

(c) Except in cases where such information is already on file with the Commission, applications in these services shall include a single copy of:

(1) The partnership agreement properly certified by each of the partners, if the applicant is a partnership.

(2) The by-laws and the acts or articles of incorporation (or charter) including any amendments thereto, if the applicant is a corporation, certified by an officer of the corporation. If it does not clearly appear on the charter that the corporation is authorized to operate as a communications common carrier, a statement of qualified legal counsel shall be furnished.

(3) The by-laws and articles of association, including any amendments thereto, certified by an appropriate officer of the organization, if the applicant is an unincorporated association.

(4) Where required by applicable local law, a certified copy of the franchise or other authorization issued by appropriate regulatory authorities. If no such local requirement exists, a statement to that effect should be included in the application.

(d) In establishing financial qualifications, a copy of the applicant's current balance sheet (within 90 days of the date of the application) should be furnished. If a loan or other credit arrangement is to be consummated to finance the establishment and operation of the proposed facilities, full particulars relative thereto should be disclosed, including the identity of the creditor.

(e) In establishing technical qualifications, a showing should be made of the arrangements to ensure the rendition of good public communication service, including maintenance and repair facilities, number and description of technical personnel.

(f) Each application for construction permit for a radio station situated at a specified fixed location which involves new antenna construction or modification of existing antenna construction shall be accompanied[6] by a properly executed FCC Form 401–A[7] in triplicate in all cases when:

(1) The antenna structures proposed to be erected will exceed an over-all height of 170 feet above ground level, except that where the antenna is mounted on top of an existing man-made structure other than an antenna structure and does not increase the over-all height of such man-made structure by more than 20 feet; no Form 401–A need be filed; or

(2) The antenna structures proposed to be erected will exceed an over-all height of 1 foot above the established airport (landing area) elevation for each 200 feet of distance, or fraction thereof, from the nearest boundary of such landing area, except that where the antenna does not exceed 20 feet above the ground or if the antenna is mounted on top of an existing man-made structure, other than an antenna structure, or natural formation and does not increase the over-all height of such man-made structure or natural formation by more than 20 feet, no Form 401–A need be filed; or

(3) The antenna structure proposed to be modified is already required to be marked or lighted as a navigation hazard to aircraft.

(g) Each application for construction permit for a radio station situated at a specified fixed location which involves new antenna construction or modification of existing antenna construction shall be accompanied by a sketch showing the details of the proposed antenna installation, including its relationship to any existing antenna on the same supporting structure; its height above ground; the ground elevation in feet above mean sea level at the site of such structure; the height or length of the antenna installed upon such structure; and the over-all height of the aggregate installation. The sketch shall be furnished in the same number of copies as required for the application form to which it pertains and, in addition, one extra copy shall be furnished in cases where FCC Form 401–A is required (see § 21.111).

(h) In cases where an applicant, permittee, or licensee desires to establish a receiving antenna or a passive reflector antenna to be associated with the facilities for which authorization is required by this part of the rules, FCC Form 401–A shall be submitted to the Commission for such antenna, in accordance with the criteria set forth in subsection (f), and approval therefor shall be obtained from the Commission prior to its construction.

(i) An application for mobile units to be licensed in the name of a person who is not the licensee of the base station with which the mobile units will be associated in the Domestic Public Land Mobile Radio Service shall be accompanied by the information indicated in paragraph (b) of this section together with an affirmative showing that:

(1) The mobile units for which authorization is sought are for the applicant's own use; and

(2) Definite arrangements have been made for the requested number of mobile units to obtain communication service, upon the frequencies requested, through the base stations specifically identified in the application; and

(3) Specific arrangements, the details of which should be set forth, have been made for installation, technical service and maintenance of the mobile units by licensed first or second class radio operators.

(j) Each application for construction permit for radio facilities which are to be used in rendering communication service for hire, if filed by an applicant not engaged in providing public wire line communication service, shall be accompanied by a statement showing the extent to which the applicant intends actively to participate in the day-to-day operation of the proposed facilities. In the event the applicant does not intend actively to participate in the day-to-day management and operation, he should state his reasons therefor and fully disclose the details of the proposed operations, including a showing of how control thereof will be retained by the applicant.

(k) Each application for construction permit for a developmental authorization shall be accompanied by pertinent supplemental information as required by § 21.405 in addition to such information as may be specifically required by this section.

(l) Each application for construction permit for a base station intended to be operated in the Domestic Public Land Mobile Radio Service by an applicant who is not engaged in providing public wire line communication service, which proposes to establish a new communication facility or make changes in the area of coverage of a station already authorized, shall be accompanied by technical engineering information with respect to:

(1) Type of antenna polarization used.

(2) Type of antenna used, including type number and manufacturer thereof.

(3) Antenna power gain expressed in decibels.

(4) Antenna radiation pattern (on letter size polar coordinate paper) showing the antenna power gain distribution in the horizontal plane expressed in decibels.

(5) Orientation of directional antenna array, expressed in degrees of azimuth, with respect to true north.

(6) Antenna height above average terrain (see also § 21.115).

(7) Antenna transmission line type, length, and radio frequency power transmission losses between the output of the transmitter and the antenna radiating system, expressed in decibels.

(8) Topographic maps (see also § 21.116) showing thereon:

(i) Exact station location.

(ii) Location of radials used in determining elevation of average terrain.

(m) In the Rural Radio Service and the Point-to-Point Microwave Radio Service, each application for initial installation of a radio station, or for installation of additional transmitters, or for authority to communicate with new points, shall be accompanied by the showing required by §§ 21.608 and 21.706, respectively.

(n) Each application requesting authority to establish operations on frequencies in the 72–76 Mc. band shall be accompanied by:

(1) A showing that the applicant agrees to eliminate any harmful interference which may be caused by his operation to television reception on either Channel 4 or 5, and if said interference cannot be eliminated within 90 days of the time the matter is first brought to his attention by the Commission, operation of the interfering fixed station will be immediately discontinued.

(2) In cases where it is proposed to locate a 72–76 Mc. fixed station less than 80, but more than 10, miles from the site of a television transmitter operating on either Channel 4 or 5, or from the post office of a community in which such channels are assigned but not in operation, a showing shall be made as to the number of family dwelling units (as defined by the United States Bureau of Census) located within a circle centered at the location of the proposed fixed station (family dwelling units of 70 or more miles distant from the television station antenna site are not to be counted) the radius of which shall be determined by use of the charts entitled, "Chart for Determining Radius From Fixed Station in 72–76 Mc. Band to Interference Contour Along Which 10 Percent of Service From Adjacent Channel Television Station Would Be Destroyed" (Charts for television channels 4 and 5 are set forth in § 21.103).

(3) In cases where more than 100 family dwelling units are contained within the circle (determined according to paragraph (2) of this section), the number of dwelling units therein shall be stated and a factual showing made that:

(i) The proposed site is the only suitable location.

(ii) It is not feasible, technically or otherwise, to use other available frequencies.

(iii) The applicant has a definite plan, which should be disclosed, to control any interference that might develop to television reception from his operations.

(iv) The applicant is financially able and agrees to make such adjustments in the television receivers affected as may be necessary to eliminate interference caused by his operations.

§ 21.16 *Additional statements.* The Commission may require an applicant or grantee to submit such documents and written statements of fact, under oath, as in its judgment may be necessary.

§ 21.17 *Form of amendments to applications.* Any amendment to an application shall be subscribed, verified, and submitted in the same manner, and with the same number of copies, as was the original application; provided, however, that amendments may be made in letter form, complying in all other respects with this rule.

§ 21.18 *Amendments of applications ordered.* The Commission may, upon its own motion or upon the motion of any party to a proceeding, order the applicant to amend his application so as to make the same more definite and certain.

§ 21.19 *Application for special temporary authorization.* (a) Special temporary authorization may be granted for the operation of a new or existing station in the Domestic Public Land Mobile Radio Services for a limited time, or in a manner and to an extent or for service other or beyond that authorized in an existing license upon proper application therefor.[8] Except as hereafter provided, no such request will be considered unless full particulars as to the purpose for which the request is made are stated and unless the request is received by the Commission at least 10 days prior to the date of proposed operation. A request received within less than 10 days may be accepted upon due showing of sufficient reasons for the delay in submitting such request. A request for special temporary authorization may be submitted as an informal application in the manner set forth in § 21.14.

(b) In cases of emergency found by the Commission, involving danger to life or property or due to damage of equipment, or during a national emergency proclaimed by the President or declared by the Congress or during the continuance of any war in which the United States is engaged and when such action is necessary for the national defense or safety or otherwise in furtherance of the war effort, or in cases of emergency where the Commission finds that it would not be feasible to secure renewal applications from existing licensees or otherwise to follow normal licensing procedure, the Commission will grant construction permits and station licenses, or modifications or renewals thereof, during the emergency found by the Commission or during the continuance of any such national emergency of war, as Special Temporary Licenses, only for the period of emergency or war requiring such action, without the filing of formal applications.

§ 21.20 *Defective applications.* (a) Applications which are defective with respect to completeness of answers to questions, execution or other matters of a formal character will not be received for filing by the Commission, unless the Commission shall otherwise permit, and will be returned to the applicant with a brief statement as to the omissions.

(b) Applications which are not in accordance with the Commission's rules, regulations or other requirements will be considered defective unless accompanied by a request of the applicant for a waiver of, or an exception to, any rule, regulation or requirement with which the application is in conflict. Such request shall show the nature of the waiver or exception desired and set forth the reasons in support thereof.

(c) Applications tendered for filing are given a file number. The assignment of a file number to an application is for the administrative convenience of the Commission and does not indicate the acceptance of the application for filing and processing.

§ 21.21 *Inconsistent or conflicting applications.* When an applicant has an application pending and undecided, no inconsistent or conflicting application

[6] See also § 21.111 (requirement for additional material in certain cases).

[7] For complete regulations relative to antenna clearance requirements, see Part 17 of this chapter.

[8] If the request looks to the assignment of a frequency in a manner other than as provided in the Commission's Table of Frequency Allocations, see § 2.103 (e) of this chapter.

filed by the same applicant, his successor or assignee, or on behalf or for the benefit of said applicant, will be considered by the Commission.

§ 21.22 *Repetitious applications.* (a) Where an applicant has been afforded an opportunity for a hearing with respect to a particular application for a new station, or for an extension or enlargement of a service or facilities, and the Commission has, after hearing or default, denied the application or dismissed it with prejudice, the Commission will not consider a like application involving service of the same kind to the same area by the same applicant, or by his successor or assignee, or on behalf of or for the benefit of the original parties in interest, until after the lapse of 12 months from the effective date of the Commission's order. The Commission may, for good cause shown, waive the requirements of this section.

(b) Where an appeal has been taken from the action of the Commission denying a particular application, another application for the same class of station and for the same area, in whole or in part, filed by the same applicant or by his successor or assignee, or on behalf or for the benefit of the original parties in interest, will not be considered until the final disposition of such appeal.

§ 21.23 *Amendments of applications.* (a) Any application may be amended as a matter of right, prior to the designation of such application for hearing, merely by filing the appropriate number of copies of the amendments in question duly executed.

(b) Requests to amend an application after it has been designated for hearing will be considered only upon written petition properly served upon the parties of record, and will be granted only for good cause shown.

§ 21.24 *Dismissal of applications.* (a) Any application may be dismissed without prejudice as a matter of right prior to the designation of such application for hearing.

(b) Requests to dismiss an application without prejudice after it has been designated for hearing will be considered only before public notice of the issuance of a proposed decision proposing denial of the application, upon written petition properly served upon all parties of record, and will be granted only for good cause shown. Such petition must be accompanied by the affidavit of a person with knowledge of the facts as to whether or not consideration has been promised to or received by the petitioner, directly or indirectly, in connection with the filing of such petition.

(c) An applicant not desiring to prosecute his application may request the dismissal of same wtihout prejudice. A request of an applicant for the return of an application which has been accepted for filing will be considered as a request to dismiss the same without prejudice. Where an applicant fails to respond to official correspondence or request for additional material, the application will be dismissed without prejudice.

§ 21.25 *Partial grants.* Where the Commission, without a hearing, grants any application in part, or with any privileges, terms, or conditions other than those requested, or subject to any interference that may result to the station if a designated application or applications are subsequently granted, the applicant will be informed of the reasons for such action and the action of the Commission shall be considered as a grant of such application unless the applicant shall, within 20 days from the date on which public announcement of such grant is made, or from its effective date if a later date is specified, return the instrument of authorization and file with the Commission a written statement rejecting the grant as made and setting forth the reasons why the application should be granted as originally requested. Upon receipt of such statement, the Commission will vacate its original action upon the application and reconsider the same. Upon such reconsideration, it will either grant or set the application for hearing in the same manner as other applications are set for hearing.

§ 21.26 *Grants without a hearing.* (a) Where an application for radio facilities is proper upon its face and where it appears from an examination of the application and supporting data that (1) the applicant is legally, technically, financially and otherwise qualified; (2) a grant of the application would not cause harmful interference to an existing station or stations for which a construction permit is outstanding within its service area; (3) a grant of the application would not preclude the grant of any pending applications; and (4) a grant of the application would serve the public interest, convenience or necessity, the Commission will grant the application without a hearing.

(b) In making its determination pursuant to the provisions of paragraph (a) of this section, the Commission will not consider any other application as being mutually exclusive with the application under consideration unless such other application was tendered for filing with the Commission not later than the close of business one business day preceding the day on which the Commission takes action with respect to the application under consideration.

(c) When any instrument of authorization is granted without a hearing, such grant shall remain subject to protest for a period of 30 days. During such 30 days, any party in interest may file a protest under oath directed to such grant and request a hearing on such application. Such protest shall be served by the protestant upon the grantee, shall contain such allegations of fact as will show the protestant to be a party in interest, and shall specify with particularity the facts relied upon by the protestant as showing that the grant was improperly made or would otherwise not be in the public interest. Within 30 days from the date of filing of such protest, the Commission will make findings as to its sufficiency in meeting the above requirements; and, where it so finds, will designate the application for hearing upon issues relating to all matters specified in the protest as grounds for setting aside the grant, except with respect to such matters as to which the Commission, after affording protestant an opportunity for oral argument, finds, for reasons set forth in its decision, that, even if the facts alleged were to be proven, no grounds for setting aside the grant are presented. The Commission may, in such decision, redraft the issues urged by the protestant in accordance with the facts or substantive allegations in the protest, and may also specify that the application be set for hearing upon such further issues and it may prescribe, as well as whether it is adopting as its own any of the issues resulting from the matters specified in the protest. In any hearing subsequently held upon such application, issues specified by the Commission upon its own initiative, or adopted by it, shall be tried in the same manner as provided in section 309 (b) of the Communications Act of 1934, as amended, but, with respect to issues resulting from facts set forth in the protest and not adopted or specified by the Commission on its own motion, both the burden of proceeding with the introduction of evidence and the burden of proof shall be upon the protestant.

(d) Pending the hearing and determination of any case arising under paragraph (c) of this section, the effective date of the Commission's action to which protest is made will be postponed to the effective date of the Commission's decision after hearing, unless the authorization involved is necessary to the maintenance or conduct of an existing service, or unless the Commission affirmatively finds, for reasons set forth in its decision, that the public interest requires that the grant remain in effect, in which event the Commission will authorize the applicant to utilize the facilities or authorization pending the Commission's decision after hearing.

§ 21.27 *Designation for hearing.* (a) If, upon examination of any application, the Commission is unable to find that the public interest, convenience and necessity would be served by a grant thereof, it will forthwith notify the applicant and other known parties in interest of the grounds and reasons for its inability to make such findings. Such notice will advise the applicant and all known parties in interest of the objections made to the application as well as the source and nature of such objections. The applicant will be given a reasonable period of time from the date of such notice within which to reply thereto. If the Commission, after considering such reply, shall be unable to find that public interest, convenience or necessity would be served by the grant of the application, it will designate the application for hearing on the grounds or reasons then obtaining and will notify the applicant and all other known parties in interest of such action and the grounds and reasons therefor.

(b) The parties in interest, if any, who are notified by the Commission of its action with respect to a particular application may acquire the status of a party to the proceeding by filing a petition for intervention showing the basis for their interest at any time not less than 10 days prior to the date of hearing.

(c) At any hearing subsequently held, the applicant shall have both the burden of proceeding with the introduction of evidence upon any issue specified by the Commission, as well as the burden of proof upon all such issues.

(d) Where a grant of the application would preclude the grant of an application or applications mutually exclusive with it, the Commission may, if public interest will be served thereby, make a conditional grant of one or more of such mutually exclusive applications and designate all of the mutually exclusive applications for hearing. Such conditional grant will be made upon the express condition that it is subject to being withdrawn if, at the hearing, it is shown that public interest will be better served by a grant of one of the other applications. Such conditional grants will be issued only where it appears:

(1) That some or all of the applications were not filed in good faith but were filed for the purpose of delaying or hindering the grant of another application; or

(2) That public interest requires the prompt establishment of radio service in a particular community or area; or

(3) The grant of one or more applications would be in the public interest and that a delay in making a grant to any applicant until after the conclusion of a hearing on all applications might jeopardize the rights of the United States under the provisions of an international agreement to the use of the frequency in question; or

(4) That a grant of one application would be in the public interest and that it appears from an examination of the remaining applications that they cannot be granted because they are in violation of provisions of the Communications Act, or of other statutes, or of the Commission's rules and regulations.

§ 21.28 *Transfer and assignment of station authorization.* A station authorization, the frequencies authorized to be used by the grantee of such authorization, and the rights therein granted by such authorization shall not be transferred, assigned, or disposed of in any manner, voluntary or involuntary, directly or indirectly, or by transfer of control of any corporation holding such authorization, to any person, except upon application to the Commission and upon finding by the Commission that the public interest, convenience and necessity will be served thereby. Requests for authority of the type referred to herein shall be submitted on the forms prescribed by § 21.29 (h) and shall be accompanied by the further showing required by § 21.29 (h).

§ 21.29 *Forms to be used—*(a) *Application for construction permit for base, auxiliary test and fixed stations.* A separate application for construction permit shall be submitted for each base, each auxiliary test, and each fixed station on FCC Form 401: *Provided, however,* That in the case of fixed stations to be installed at temporary locations, as set forth hereinafter in the applicable subparts of these rules, where the equipment utilized is of such design as to comprise a "packaged" unit which is ready for installation and use with only nominal construction, request may be made for waiver of the construction permit and for the immediate issuance of a license: *And provided further,* That an application for an auxiliary test station may be combined with that of the base station with which such auxiliary facility is to be associated when both are at the same location. Such applications shall be accompanied by the supplementary information set forth in § 21.15 as may be appropriate.

(b) *Application for license for mobile stations.* No construction permit is required for mobile stations. A separate application on FCC Form 401 shall be submitted for a license for the maximum number of mobile units expected to be placed in operation within the ensuing license period: *Provided, however,* In the Domestic Public Land Mobile Radio Service, an application for license for land mobile units to be licensed in the name of the base station licensee may be combined on the same application form with an application for the base station with which the land mobile units will be associated. In the preparation of such blanket applications, care should be exercised that data furnished therein in all particulars is clearly differentiated between the land mobile and base station installations. In any event, the mobile station license will be issued simultaneously with the issuance of the related base station license in the case of installations in the Domestic Public Land Mobile Radio Service. Applications for mobile stations in the Domestic Public Land Mobile Radio Service which are submitted by persons who propose to become subscribers to a common carrier service for public correspondence shall be accompanied by the supplementary showing set forth in § 21.15 (i).

(c) *Application for modification of construction permit.* Under circumstances requiring deviation from the terms of a construction permit, before such deviations are begun, application for modification of construction permit shall be submitted on FCC Form 401. No changes shall be effected until authorized by the Commission through issuance of an appropriate modified construction permit.

(d) *Application for extension of expiration date of construction permit.* Application for extension of time within which to complete construction of a station shall be filed on FCC Form 701 at least 30 days prior to the expiration date of such permit, if the facts supporting such application for extension are known to applicant in time to permit such filing. In other cases, such applications will be accepted upon a showing, satisfactory to the Commission, of sufficient reasons for filing within less than 30 days prior to the expiration date. Such applications will be granted upon a specific and detailed showing that the failure to complete was due to causes not under the control of the grantee, or upon a specific and detailed showing of other matters sufficient to justify the extension (see also § 21.31 (a)).

(e) *Application for station license.* Upon completion of construction or installation of a station in exact accordance with the terms and conditions set forth in the construction permit and upon satisfactory completion of equipment tests in accordance with § 21.212 (a), an application for license to operate the station should be filed on FCC Form 403 prior to the expiration date of the construction permit (see § 21.31 (a)).

(f) *Renewal of station license.* Unless otherwise directed or permitted by the Commission, each application for renewal of license other than special temporary authorizations shall be submitted on FCC Form 405 not less than 30 days nor more than 60 days prior to the expiration date of the license sought to be renewed. Expiring developmental authorizations may be renewed only upon a factual showing of need beyond the expiration date of the authorization sought be renewed. A blanket application may be submitted for renewal of a group of station licenses in the same service in those cases where the renewal requested is in exact accordance with the terms of the previous authorizations. The individual stations covered by such application shall be clearly identified therein, and sufficient copies of such blanket application shall be filed so as to provide at least two copies thereof for each station affected. Special temporary authorizations may be extended upon informal notarized requests. (See §§ 21.405 (b) and 21.511.)

(g) *Application for modification of station license.* An application for modification of any station license in these services may be filed at any time during the term of that license. Application for modification of a station license shall be made on FCC Form 403 and shall be submitted in duplicate not less than 60 days prior to the date contemplated for such modification, unless otherwise permitted.

(h) *Application for consent to assignment, or transfer of control of corporation holding radio station construction permit or license.* An application on FCC Form 702 or FCC Form 703, as the circumstances require, shall be submitted to the Commission when a construction permit or license, or the control of a corporation holding such permit or license, is to be transferred as a result of a voluntary act (contract or other agreement) or an involuntary act (death or legal disability) of the grantee of a permit or station license, or by involuntary assignment of the physical property of the station pursuant to a court decree in bankruptcy proceedings, or other court order, or by operation of law in any other manner. Applications filed on FCC Form 702 or FCC Form 703 shall be accompanied by a factual showing by the assignee of his legal, financial, technical and other qualifications to be the licensee of the radio facilities described in such application. Upon completion of an approved transfer, written notification thereof shall be filed with the Commission.

(i) *Application for authority to operate mobile units of Canadian registry in the United States.* Applications for authority to operate mobile units of Canadian registry within the United States shall be made upon FCC Form 410 which shall be filed with tse Secretary, Federal Communications Commission, Washington 25, D. C. Forms may be obtained from the FCC Secretary or from the Controller of Telecommunications, Department of Transport, Ottawa, Canada.

(j) *Applications for authority to operate mobile units in Canada.* Applications for authority to operate mobile units, which have been licensed in this service by the Commission, shall be made upon proper form and be filed with the Controller of Telecommunications, Department of Transport, Ottawa, Canada, from whom the application forms are obtainable.

§ 21.30 *Period of construction.* (a) Except for stations in the Point-to-Point Microwave Radio Service, each construction permit for a radio station in the Domestic Common Carrier Radio Services will specify a maximum of 60 days from the date of grant thereof as the time within which construction of the station shall begin, and a maximum of eight months from the date of grant as the time within which construction shall be completed and the station ready for operation, unless otherwise determined by the Commission upon proper showing in any particular case (see §§ 21.29 (d) and 21.31 (a)).

(b) For stations in the Point-to-Point Microwave Radio Service, the construction permit issued by the Commission will specify the date of grant as the earliest date of commencement of construction and a maximum of 18 months thereafter as the time within which construction shall be completed and the station be ready for operation, unless otherwise determined by the Commission upon proper showing in any particular case.

§ 21.31 *Forfeiture of station authorizations.* (a) A construction permit shall be automatically forfeited if construction has not been commenced within the time specified therein or if the station is not ready for operation within the term of the construction permit or within such additional time as the Commission may have allowed upon a proper showing, upon FCC Form 701 filed prior to the date sought to be extended, that failure to commence or complete construction was due to causes not under the control of the permittee (see §§ 21.29 (d) and 21.30 (a)).

(b) A license or special temporary authorization shall be automatically forfeited upon the expiration date specified therein unless prior thereto an application for renewal of such license or authorization shall have been filed with the Commission (see § 21.29 (f)).

§ 21.32 *License period.* Licenses for stations in the Point-to-Point Microwave Radio and Local Television Transmission Services will be issued for a period not to exceed five years; licenses for stations in the Domestic Public Land Mobile Radio and Rural Radio Services will be issued for a period not to exceed three years; except that licenses for developmental stations will be issued for a period not to exceed one year.[2] The expiration date of licenses of miscellaneous common carriers in the Domestic Public Land Mobile Radio Service shall be the first day of April in the year of expiration; the expiration date of licenses of telephone company common carriers in the Domestic Public Land Mobile Radio Service shall be the first day of July in the year of expiration; the expiration date of licenses in the Rural Radio Services shall be the first day of November in the year of expiration; the expiration date of licenses in the Point-to-Point Microwave Radio and Local Television Transmission Services shall be the first day of February in the year of expiration; and the expiration date of developmental licenses shall be one year from the date of grant thereof. When a license is granted subsequent to the last renewal date of the class of license involved, the license shall be issued only for the unexpired period of the current license term of such class.

[2] In the case of common carrier Television-STL and Television Pickup stations to which are assigned frequencies allocated to the broadcast services, the authorization to use frequencies shall, in any event, terminate simultaneously with the expiration of the authorization for the broadcast station to which such service is rendered.

### SUBPART C—TECHNICAL STANDARDS

§ 21.100 *Frequencies.* The frequencies available for use in the services covered by this part of the rules are listed in the applicable subparts of this part. Assignment of frequencies will be made only in such a manner as to facilitate the rendition of communication service on an interference-free basis in each service area. Unless otherwise indicated, each frequency available for use by stations in these services will be assigned exclusively to a single applicant in any service area. All applicants for, and licensees of, stations in these services shall cooperate in the selection and use of the frequencies assigned in order to minimize interference and thereby obtain the most effective use of the authorized facilities. In the event harmful interference occurs or appears likely to occur between two or more radio systems and such interference cannot be resolved between the licensees thereof, the Commission may specify a time sharing arrangement for the stations involved or may, after notice and opportunity for hearing, require the licensees to make such changes in operating techniques or equipment as it may deem necessary to avoid such interference. Frequency diversity transmission will not be authorized in these services in the absence of a factual showing, in each case, that the required communications cannot practicably be achieved by other means.

§ 21.101 *Frequency stability.* (a) The carrier frequency of each transmitter authorized in these services shall be maintained within the following percentage of the reference frequency, except as provided in paragraph (b) of this section:

| Frequency range | Frequency tolerance [1] (percent) |
|---|---|
| Below 1,000 Mc | 0.005. |
| 1,000 to 10,000 Mc | 0.05. |
| Above 10,000 Mc | To be specified in the authorization (but not less than 0.75). |

[1] Equipment authorized to be operated by a station on frequencies below 50 Mc on Sept. 4, 1956, shall be permitted to operate until Jan. 1, 1959, with a frequency tolerance of 0.01 percent. Equipment authorized to be operated on frequencies between 890 and 940 Mc on Sept. 4, 1956, shall be required to maintain a frequency tolerance within 0.03 percent subject to the condition that no harmful interference is caused to any other radio station.

(b) Hand or pack carried transmitters having a final stage plate power input of less than 3 watts shall maintain their carrier frequency within the following percentage of the reference frequency:

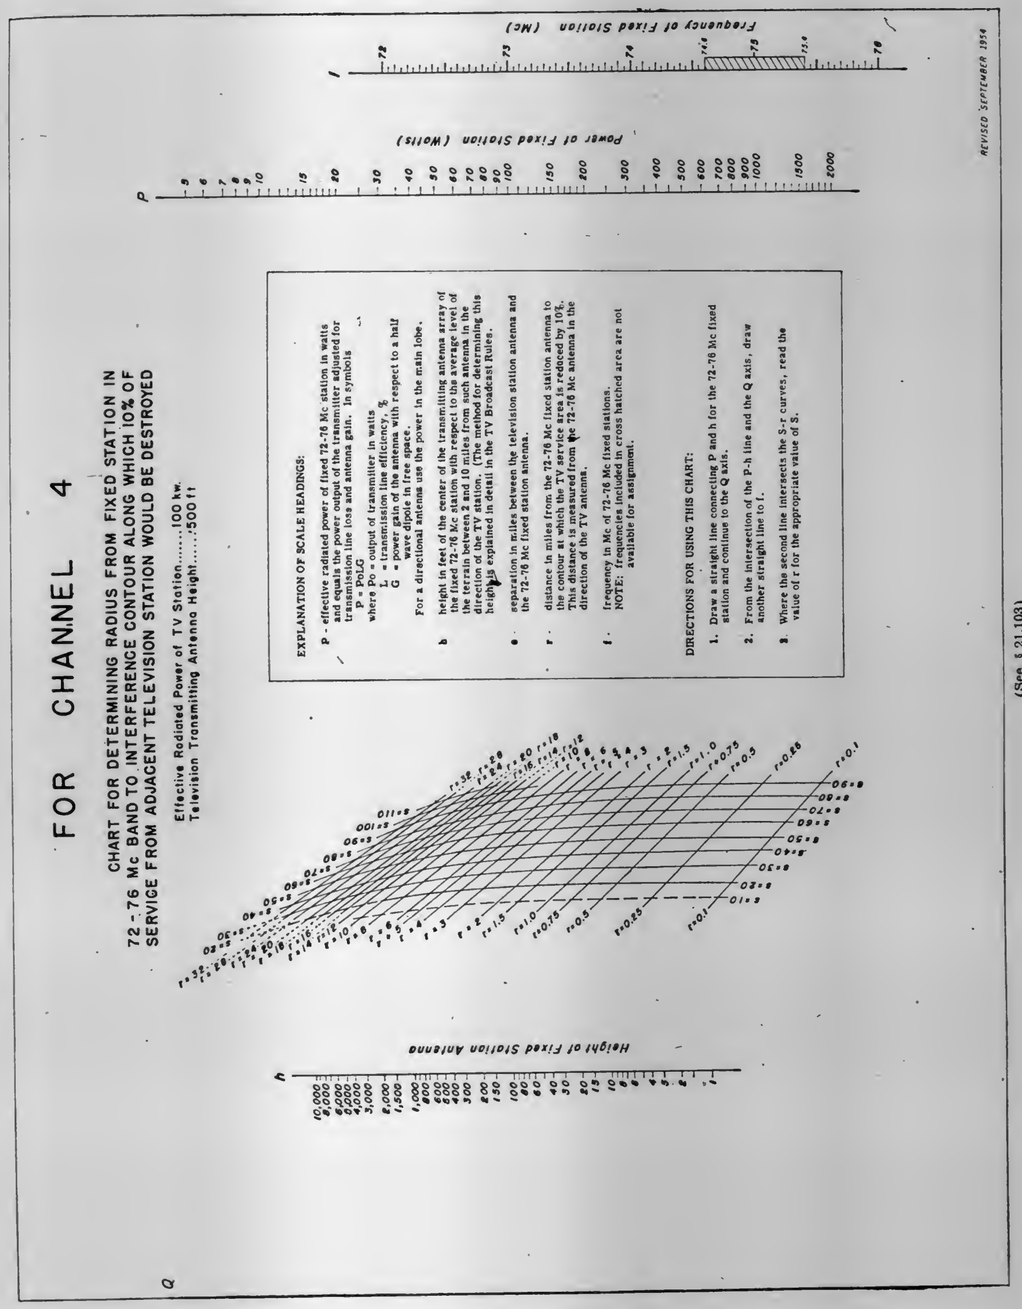
| Frequency range: | Frequency tolerance (percent) |
|---|---|
| Below 50 Mc | 0.02 |
| 50 to 500 Mc | .01 |

(c) The reference frequency of a station shall be deemed to be the assigned frequency, unless otherwise specified.

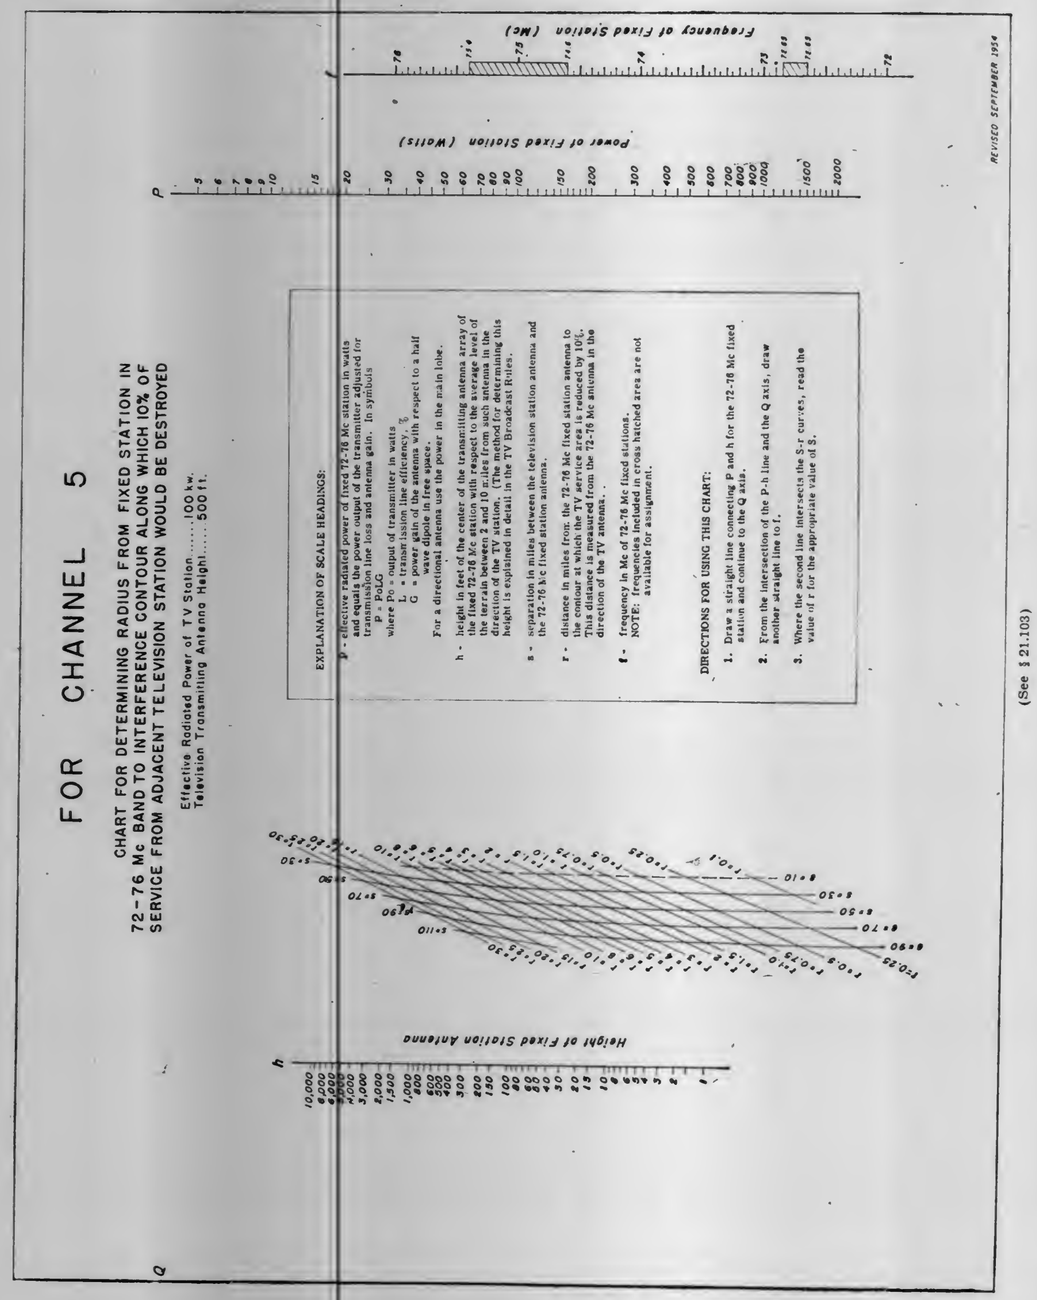
§ 21.102 *Frequency measuring or calibrating apparatus.* The frequency measuring or calibrating device used to determine compliance of transmitting equipment with the station authorization and the applicable rules and regulations shall be independent of the transmitter frequency control elements and shall have an accuracy within one-half of the allowed frequency tolerance of the transmitter being measured.

§ 21.103 *Standards and limitations governing authorization and use of frequencies in the 72–76 Mc band.* (a) Assignments on frequencies in the band 72–76 Mc will be made only to stations located 10 or more miles from a channel 4 or 5 television station (or from the post office of the city to which such television channels are allocated, in cases where a television station has not been authorized) and shall be subject to the condition that no harmful interference is caused to reception of such television stations. Applications for use of frequencies involving less than 10 miles separation from such television stations will be returned without action.

(b) Assignments on frequencies in the band 72–76 Mc will be made only upon the applicant's affirmative showing that he agrees to eliminate any harmful interference which may be caused by his operation to television reception on either channel 4 or 5 and, if said interference cannot be eliminated within 90 days of the time the matter is first brought to his attention by the Commission, operation of the interfering fixed station will be discontinued.



(c) In cases where it is proposed to locate a 72–76 Mc fixed station less than 80, but more than 10, miles from the site of a television transmitter operating on either channel 4 or 5 (or from the post office of a community to which such television channels are allocated, in cases where a television station has not been authorized), the fixed station shall be authorized only if there are fewer than 100 family dwelling units (as defined by the United States Bureau of Census) located within a circle centered at the location of the fixed station (family dwelling units 70 or more miles distant from the television station antenna site are not to be counted) the radius of which shall be determined by use of the following charts entitled "Chart For Determining Radius From Fixed Station In 72–76 Mc Band To Interference Contour Along Which 10 Percent of Service From Adjacent Channel Television Station Would Be Destroyed":



FOR CHANNEL 4

CHART FOR DETERMINING RADIUS FROM FIXED STATION IN 72-76 Mc BAND TO INTERFERENCE CONTOUR ALONG WHICH 10% OF SERVICE FROM ADJACENT TELEVISION STATION WOULD BE DESTROYED

Effective Radiated Power of TV Station.....100 kw.
Television Transmitting Antenna Height.....500 ft

(See § 21.103)

(d) In cases where more than 100 family dwelling units are contained within the circle (determined according to paragraph (c) of this section), the Commission may, in a particular case, authorize the location of a fixed station upon a factual showing that:

(1) The proposed site is the only suitable location.

(2) It is not feasible, technically or otherwise, to use other available frequencies.

(3) The applicant has a definite plan, which should be disclosed, to control any interference that might develop to television reception from his operations.

(4) The applicant is financially able and agrees to make such adjustments in the television receivers affected as may be necessary to eliminate interference caused by his operations.

(e) No station assignments shall be made in the frequency range 74.6–75.4 Mc.

(f) No station assignments shall be made in the frequency range 72.65–72.85 Mc within 80 miles from the site of a television transmitter operating on channel 5 (or from the post office of a community to which such television channel is allocated, in cases where a television station has not been authorized).

§ 21.104 *Types of emission.* (a) The types of emission which the various stations in the Domestic Public Radio Services (other than Maritime Mobile) may use are specified in the rules in this part governing the particular service. (See § 2.201 of this chapter for information concerning the manner of designating various classes of emission.)

(b) The use of FO and AO emission in the 72–76 Mc band will not be authorized, except for temporary or short periods necessary for testing incident to the construction or maintenance of a radio station.

§ 21.105 *Bandwidth.* Each authorization issued pursuant to these rules will show, as the emission designator, a symbol representing the class of emission which shall be prefixed by a number specifying the necessary bandwidth in kilocycles. This figure does not necessarily indicate the bandwidth actually occupied by the emission at any instant. In those cases where Part 2 of this chapter does not provide a formula for the computation of the necessary bandwidth, the occupied bandwidth may be used in the emission designator.

§ 21.106 *Emission limitations.*[10] (a) Any emission appearing on any frequency removed from the carrier frequency (or from the center frequency of the emission when an asymmetrical emission is authorized) by 50 to 100 percent of the authorized bandwidth, shall be at least 25 db below the unmodulated output power of the transmitter.

(b) Any emission (including harmonic) appearing on a frequency removed from the carrier frequency (or from the center frequency of the emission when an asymmetrical emission is authorized) by 100 percent or more of the authorized bandwidth shall be attenuated at least 43+10 $\log_{10}$ (output power in watts) decibels below the unmodulated output power of the transmitter.

(c) When an emission outside of the authorized bandwidth causes harmful interference, the Commission may, at its discretion, require greater attenuation than specified in the foregoing paragraphs of this section.

[10] Subject to determination of rule-making in Docket No. 11654.

§ 21.107 *Transmitter power.* (a) The power which a station will be permitted to use in these services will be the minimum required for satisfactory technical operation commensurate with the size of the area to be served and local conditions which affect radio transmission and reception. In cases of harmful interference, the Commission may, after notice and opportunity for hearing, order a change in the effective radiated power of a station.

(b) The rated power output of a transmitter employed in these radio services shall not exceed the values shown in the following tabulation:

| Frequency range: | Rated power output |
|---|---|
| Below 30 Mc | 50 watts. |
| 30 to 50 Mc | 350 watts. |
| 50 to 76 Mc | 50 watts. |
| 76 to 500 Mc | 250 watts. |
| 500 to 10,000 Mc | 100 watts. |
| Above 10,000 Mc | Unlimited. |

(c) The power of each transmitter shall be maintained as near as practicable to the power input or output, as the case may be, specified in the instrument of station authorization: *Provided,* That the power of each base station transmitter shall not deviate by more than 20 percent above and 25 percent below the authorized power. In the event it becomes impossible to operate within such limits of the authorized power, the station may be operated with reduced power for a period of 10 days or less, provided that if such operation continues longer than 10 days the Commission and the Engineer-in-Charge of the radio district in which the station is located shall be notified in writing immediately thereafter and also upon the resumption of normal power.

§ 21.108 *Directional antennas.* (a) Unless otherwise authorized upon specific request by the applicant, each station authorized under the rules of this part, other than base, mobile and auxiliary test stations operating in the Domestic Public Land Mobile Radio Service, shall employ a directional antenna adjusted with the center of the major lobe of radiation in the horizontal plane directed toward the receiving station with which it communicates: *Provided, however,* Where a station communicates with more than one point, a multi or omni directional antenna may be authorized, if necessary.

(b) Stations, other than base, mobile and auxiliary test stations in the Domestic Public Land Mobile Radio Service, which are required to operate with a directional antenna shall not radiate signals which exceed the following limits of beam width, measured in the horizontal plane at the half power points, for the major lobe of radiation:

| Frequency range: | Maximum beam width |
|---|---|
| Below 500 Mc | 80° |
| 500 to 1,500 Mc | 20° |
| 1,500 to 5,000 Mc | 12° |
| 5,000 to 10,000 Mc | 8° |
| Above 10,000 Mc | 3° |

(c) Each directional antenna system required by this section shall be adjusted so that in the horizontal plane the maximum radiation in any minor lobe is suppressed below the maximum level of signal in the major lobe by at least the amount shown below:

| Frequency: | Suppression of maximum signal in any secondary lobe below the maximum signal in the main lobe |
|---|---|
| Below 500 Mc | 10 db. |
| 500 Mc and above | 13 db. |

(d) In cases where passive reflectors are employed in conjunction with transmitting antenna systems, the foregoing paragraphs of this section also shall be applicable thereto. However, in such instances, the center of the major lobe of radiation from the antenna normally shall be directed at the passive reflector.

§ 21.109 *Antenna changes.* (a) In the event harmful interference is caused to the operation of other stations, the Commission may, after notice and opportunity for hearing, order changes to be made in the height, orientation, gain and radiation pattern of the antenna system.

(b) No replacement or change of antenna shall be effected without prior authorization from the Commission if such replacement or change will alter the gain or directivity of the antenna in the horizontal plane or its height above ground.

§ 21.110 *Antenna polarization.* (a) Stations operating in the 72–76 Mc band and each base, mobile and auxiliary test station operating in the Domestic Public Land Mobile Radio Service shall employ an antenna which radiates a signal the electrical component of which is vertically polarized.

(b) Unless otherwise authorized, each station operating on frequencies below 500 Mc (other than base, mobile and auxiliary test stations in the Domestic Public Land Mobile Radio Service, and stations operating in the 72–76 Mc band) shall employ an antenna which radiates a signal, the electrical component of which is horizontally polarized: *Provided, however,* That Rural Subscriber stations communicating with base stations may employ vertical polarization.

(c) Upon a satisfactory showing in each particular case that improved transmission will result and potentially harmful interference to other radio installations would be reduced, the Commission may authorize a station operating on frequencies below 500 Mc. (other than base, mobile and auxiliary test stations in the Domestic Public Land Mobile Radio Service, and all stations operating in the 72–76 Mc. band) to employ an antenna which radiates a signal, the electrical component of which is circularly or otherwise polarized.

(d) Stations operating in the Domestic Public Radio Services above 890 Mc are not limited as to the type of polarization of the radiated signal: *Provided, however,* That in the event harmful interference is caused to the operation of other stations, the Commission may, after notice and opportunity for hearing, order the licensee to change the polarization of the radiated signal.

§ 21.111 *Simultaneous use of common antenna structure.* The simultaneous use of common antenna structures by more than one Domestic Public Radio station, or by one or more Domestic Public Radio stations and one or more stations of any other class or service, may be authorized provided complete responsibility for maintaining the structure and for painting and illuminating the structure, when obstruction marking is required by the Commission, is assumed by one of the licensees. In each case involving the use of an antenna structure by more than one licensee, the applicant shall submit to the Commission, with his application, a signed and verified copy of the agreement between such parties setting forth which party has assumed the aforementioned responsibility (see § 21.15 (f)).

§ 21.112 *Marking of antenna structures.* No permittee or licensee who has been required to paint or light an antenna structure shall discontinue the required painting or lighting without having obtained prior written authorization therefor from the Commission.

§ 21.113 *Description of station location.* The location of the transmitting antenna shall be considered to be the station location. Applications for stations at specified fixed locations shall describe the transmitting antenna site by its geographical coordinates accurate to the nearest second of latitude and longitude, and also by conventional reference to street number, landmark, etc. Such coordinates shall be specified in terms of degrees, minutes and seconds.

§ 21.114 *Temporary fixed antenna height restrictions.* The antenna heights employed by mobile stations in the Local Television Transmission Service and by stations authorized to operate at temporary fixed locations shall not exceed the height criteria set forth in § 17.3 of this chapter, unless, in each instance, authorization for use of a specific maximum antenna height for each location has been obtained from the Commission prior to erection of the antenna. Requests for such authorization shall show the inclusive dates of the proposed operation and shall be accompanied by FCC Form 401–A completed in triplicate. (Complete information as to rules concerning the construction, marking and lighting of antenna structures is contained in Part 17 of this chapter.)

§ 21.115 *Method of determining average terrain elevation.* In determining the average elevation of the terrain, the elevations between 2 and 10 miles from the antenna site are employed. Profile graphs shall be drawn for 8 radials beginning at the antenna site and extending 10 miles therefrom. The radials should be drawn for each 45 degrees of azimuth starting with True North. At least one radial must include the principal community to be served even though such community may be more than 10 miles from the antenna site. Additionally, where feasible, radials should be drawn in the direction of any co-channel stations which are authorized within 75 miles of the antenna site. However, in the event none of the evenly spaced radials include the principal community to be served, or are in the direction of co-channel stations, such additional radials shall not be employed in computing the elevation of average terrain. Where the 2 to 10 mile portion of a radial extends in whole or in part over large bodies of water (e. g., ocean areas, gulfs, sounds, bays, large lakes, etc., but not rivers) or extends over foreign territory but the field intensity contour defining the limit of the service area in that direction encompasses land area within the United States (or territory under its jurisdiction) beyond the 10 mile portion of the radial, the entire 2 to 10 mile portion of the radial shall be included in the computation of elevation of average terrain. However, where the field intensity contour defining the limit of the service area in that direction does not so encompass United States land area (or territory under its jurisdiction) and (1) the entire 2 to 10 mile portion of the radial extends over large bodies of water or foreign territory, such radial shall be completely omitted from the computation of elevation of average terrain, and (2) where a part of the 2 to 10 mile portion of a radial extends over large bodies of water or over foreign territory, only that part of the radial extending from the 2 mile sector to the outermost portion of land area within the United States (or territory under its jurisdiction) covered by the radial shall be employed in the computation of elevation of average terrain. The profile graph for each radial should be plotted by contour intervals of from 40 to 100 feet and, where the data permits, at least 50 points of elevation (generally uniformly spaced) should be used for each radial. In instances of very rugged terrain where the use of contour intervals of 100 feet would result in several points in a short distance, 200 or 400 foot contour intervals may be used for such distances. On the other hand, where the terrain is uniform or gently sloping, the smallest contour interval indicated on the topographic map should be used, although only relatively few points may be available. The profile graphs should indicate the topography accurately for each radial, and the graphs should be plotted with the distance in miles as the abscissa and the elevation in feet above mean sea level as the ordinate. The profile graphs should indicate the source of the topographical data employed. The graph should also show the elevation of the center of the radiating system. The graph may be plotted either on rectangular coordinate paper or on special paper which shows the curvature of the earth. It is not necessary to take the curvature of the earth into consideration in this procedure. The average elevation of the 8 mile distance between 2 and 10 miles from the antenna site should then be determined from the profile graph for each radial. This may be obtained by averaging a large number of equally spaced points, by using a planimeter, or by obtaining the median elevation (that exceeded for 50 percent of the distance) in sectors and averaging those values.

§ 21.116 *Topographical data.* In the preparation of the profile graphs described in § 21.115, and in determining the location and height above sea level of the antenna site, the elevation or contour intervals shall be taken from United States Geological Survey Topographic Quadrangle Maps, United States Army Corps of Engineers maps or Tennessee Valley Authority maps, whichever is the latest, for all areas for which such maps are available. If such maps are not published for the area in question, the next best topographic information should be used. Topographic data may sometimes be obtained from State and municipal agencies. Data from Sectional Aeronautical Charts (including bench marks) or railroad depot elevations and highway elevations from road maps may be used where no better information is available. In cases where limited topographic data is available, use may be made of an altimeter in a car driven along roads extending generally radially from the transmitter site. Ordinarily, the Commission will not require the submission of topographical maps for areas beyond 15 miles from the antenna site, but the maps must include the principal community to be served. If it appears necessary, additional data may be requested. United States Geological Survey Topographic Quadrangle Maps may be obtained from the Department of the Interior, Geological Survey, Washington 25, D. C. Sectional Aeronautical Charts are available from the Department of Commerce, Coast and Geodetic Survey, Washington 25, D. C.

§ 21.117 *Transmitter location.* (a) Where appropriate to the kind of service to be afforded, the transmitter location should be as near to the center of the proposed service area as possible, consistent with the applicant's ability to find a site with sufficient elevation to provide reliable service throughout the area. Location of the antenna at a high point of elevation is desirable to reduce to a minimum the transmission shadow effect due to hills, buildings or other obstructions which may reduce materially the intensity of the station's signals in a particular direction. The transmitting site should be selected consistent with the purpose of the station, i. e., whether it is intended to serve a small city, a metropolitan area, a large region, or specified fixed points of communication. In providing the best service to an area, it is usually preferable to use a high antenna with low power rather than a lower antenna with higher power. The location should be so chosen that line-of-sight can be obtained from the antenna over the principal cities or specified fixed points of communication to be served.

(b) The transmitting location of a base station should be selected so that the area of interference-free service encompasses the urban population within the area to be served. It is recognized that topography, shape of the desired service area, and population distribution may make the choice of a transmitter location difficult. In such cases, consideration may be given to the use of a directional antenna system although it is generally preferable to choose a site where a nondirectional antenna may be employed.

(c) The applicant shall determine, prior to filing an application for a radio station authorization, that the antenna site specified therein is adequate to render the service proposed. In cases of questionable antenna locations, it is desirable to conduct propagation tests to indicate the field intensity which may be expected in the principal areas or at the fixed points of communication to be served, particularly where severe shadow problems may be expected. In considering applications proposing the use of such locations, the Commission may require site survey tests to be made pursuant to a developmental authorization in the particular service concerned. In such cases, propagation tests should be conducted in accordance with recognized engineering methods and should be made with a transmitting antenna simulating, as near as possible, the proposed antenna installation. Full data obtained from such surveys and its analysis, including a description of the methods used and the name, address and qualifications of the engineer making the survey, must be supplied to the Commission.

(d) Antenna structures should be so located and constructed as to avoid making them hazardous to air navigation. (See Part 17 of this chapter for provisions relating to antenna structures.) Such installation shall be maintained in good structural condition together with any required painting or lighting.

§ 21.118 *Transmitter construction and installation.* (a) The equipment at the operating and transmitting positions shall be so installed and protected that it is not accessible to, or capable of being operated by, persons other than those duly authorized by the licensee. In general, each transmitter used in the Domestic Public Radio Services shall be so constructed or installed that all controls thereon which may cause off-frequency operation or result in any unauthorized emission shall be protected from access by other than duly authorized holders of first or second class radio operator licenses.

(b) In any case where the maximum modulating frequency of a transmitter is prescribed by the Commission, the transmitter shall be equipped with a low-pass or band-pass modulation filter of suitable performance characteristics. In those cases where a modulation limiter is employed, the modulation filter shall be installed between the transmitter stage in which limiting is effected and the modulated stage of the transmitter.

(c) Each transmitter, other than hand-carried or pack-carried transmitter, employed in these services shall be equipped with an appropriately labeled pilot lamp or meter which will provide continuous visual indication at the transmitter when its control circuits have been placed in a condition to activate the transmitter. In addition, facilities shall be provided at each transmitter to permit the transmitter to be turned on and off independently of any remote control circuits associated therewith.

(d) Each station in these services, which is required to have a licensed radio operator or permit holder on duty and in charge of the station's operations during the normal rendition of service, shall be provided with at least one control point. Prior authority from the Commission is required for the installation of any control point which is to be more than 100 feet from the transmitter or which is to be at an address different from that of the transmitter.

(e) At each transmitter control point the following facilities shall be installed:

(1) A carrier operated device which will provide continuous visual indication when the transmitter is radiating, or, in lieu thereof, a pilot lamp or meter which will provide continuous visual indication when the transmitter control circuits have been placed in a condition to activate the transmitter: *Provided, however,* That the provisions of this subparagraph shall not apply to hand-carried or pack-carried transmitters.

(2) Facilities which will permit the operator to turn transmitter carrier on and off at will.

(f) Transmitter control circuits from any control point shall be so installed that grounding or shorting any line in the control circuit will not cause the transmitter to radiate, provided, however, that this provision shall not be applicable to control circuits of stations which normally operate with continuous radiation or to control circuits which are under the effective operational control of a radio operator 24 hours per day.

(g) Each station operating on frequencies above 500 Mc, which is authorized to operate during the normal rendition of service without a licensed radio operator or permit holder on duty and in charge of its operation (see also § 21.205 (1)), shall be provided with automatic alarm facilities that announce and identify the following conditions to a specified attended alarm center responsible for immediately dispatching qualified service personnel to the station for correction of any unsatisfactory conditions:

(1) Transmitter frequency deviation outside of the station's prescribed limits.

(2) Outage of the station.

(3) Automatic transfer of communications to standby facilities whenever such facilities are provided.

(4) Failure of any antenna obstruction marking light.

§ 21.119 *Limitation on use of transmitters for other services.* Transmitters licensed for operation for services governed by this part may not be concurrently licensed or used for non-common carrier communication purposes.

§ 21.120 *Type acceptance of transmitters.* (a) Except for transmitters used at developmental stations, each transmitter authorized after January 1, 1957, shall be of a type which has been type accepted by the Commission for use under the applicable rules of this part: *Provided,* That this requirement shall become applicable January 1, 1960, to transmitters authorized prior to January 1, 1957 to the same licensee.

(b) Any manufacturer of a transmitter to be produced for use under the rules of this part may request type acceptance by following the type acceptance procedure set forth in Part 2 of this chapter. Type accepted transmitters are included in the Commission's "Radio Equipment List, Part C". Copies of this list are available for inspection at the Commission's Office in Washington, D. C., and at each of its field offices.

(c) Type acceptance for an individual transmitter may also be requested by an applicant for a station authorization, pursuant to the type acceptance procedure set forth in Part 2 of this chapter. An individual transmitter will not normally be included in the Radio Equipment List, Part C, but will be enumerated on the station authorization.

§ 21.121 *Replacement of equipment.* The licensee of a station in this service may replace equipment without authorization from the Commission, provided that the replacement equipment is on the Commission's list of transmitters acceptable for licensing (see § 21.120) and that such equipment conforms to the terms specified in the current instrument of authorization and the applicable rules and regulations. Requests for authority to make other changes in equipment shall be submitted to the Commission in appropriate applications for construction permits or modifications thereof as the case may require.

### SUBPART D—TECHNICAL OPERATION

§ 21.200 *Station inspection.* The licensee of each station authorized in the Domestic Public Radio Services shall make the station and station records available for inspection by representatives of the Commission at any reasonable hour.

§ 21.201 *Posting of station authorizations.* (a) The station permit, license and any other instrument of authorization or order concerning the construction of a station at a specified fixed location or its manner of operation shall be posted so that all terms thereof are visible in a conspicuous place at the principal control point of the transmitter. At all other control points, a photocopy of such documents shall be posted in the aforementioned manner.

(b) If the station is authorized for mobile operation, the documents specified in paragraph (a) of this section shall be retained as a permanent part of the station record, but need not be posted.

§ 21.202 *Transmitter identification card.* An executed transmitter identification card (FCC Form 452–C, Revised) or a metal tag with the same information shall be affixed to each transmitter. In vehicular installations, it is preferred that the identification card or metal tag be affixed to the control equipment at the

transmitter operating position. The following information shall be entered on the card or metal tag by the permittee or licensee:

(a) Station call sign.

(b) Name of permittee or licensee.

(c) Location(s) of transmitter records.

(d) Frequency or frequencies on which the transmitter is adjusted to operate.

(e) Signature of the permittee, licensee, or responsible employee thereof. (The signature may be omitted when a metal tag is used.)

§ 21.203 *Posting of operator licenses.* (a) Whenever a licensed radio operator is required for the operation of a radio station, the license of each operator, other than an operator exclusively performing service and maintenance duties, shall be posted or kept immediately available at the place where he is on duty as an operator: *Provided, however,* That if an operator who is on duty holds a restricted radiotelephone operator permit of the card form (as distinguished from such document of the diploma form) or holds a valid license verification card (FCC Form 758–F) attesting to the existence of any other valid commercial radio operator license, he may have such permit or verification card in his personal possession or otherwise immediately available at the place where he is on duty as an operator.

(b) The license of every station operator who performs service and maintenance duties exclusively at that station shall be posted at the transmitter involved whenever the transmitter is in actual operation while service or maintenance work is being performed by him or under his immediate supervision and responsibility: *Provided,* That in lieu of posting his license, he may have on his person his license or a valid verification card.

§ 21.204 *FCC publications required for reference.* For reference purposes, the permittee or licensee of radio facilities in the Domestic Public Radio Services shall maintain and have available at its principal office in the city in which the facilities are located a current copy of Part 21 of this chapter (available at the Government Printing Office, Washington 25, D. C.).

NOTE: It is suggested that the following additional documents be obtained from the Government Printing Office and maintained for reference:

(1) Communications Act of 1934, as amended.

(2) Part 1 of this chapter, Practice and Procedure.

(3) Part 2 of this chapter, Frequency Allocations and Radio Treaty Matters; General Rules and Regulations.

(4) Part 13 of this chapter, Commercial Radio Operators.

(5) Part 17 of this chapter, Construction, Marking and Lighting of Antenna Structures.

(6) Part 45 of this chapter, Preservation of Records of Telephone Carriers.

(7) Part 61 of this chapter, Tariffs, Rules Governing the Construction, Filing and Posting of Schedules of Charges for Interstate and Foreign Communications Service.

(8) Part 63 of this chapter, Extension of Lines and Discontinuance of Service by Carriers.

§ 21.205 *Operator requirements.* (a) Any radio operator (including the holder of a restricted radiotelephone permit) in charge of a radio station in these services, shall be competent to maintain proper radio logs and records relative to such operations where they are required.

(b) When a radio station is radiating, all adjustments or tests during or coincident with the installation and servicing or maintenance of the transmitter and its associated radio equipment which may affect the quality of transmission or possibly cause the station radiation to exceed the limits specified in its instrument of authorization or in the rules pertaining to such station shall be made by or under the immediate supervision and responsibility of a person holding a first or second-class commercial (but not a temporary limited radiotelegraph second-class) radio operator license (either radiotelephone or radiotelegraph, or both, as may be appropriate for the type of emission being used), who shall be responsible for the proper functioning of the radio facilities.

(c) When a radio station is not radiating, any person may perform the above functions without direct supervision after having been authorized to do so by the station licensee. The facilities shall thereafter initially be placed in operation and be determined to be operating properly by a first or second-class licensed commercial (but not a temporary limited radiotelegraph second-class) radio operator.

(d) In all cases, except where manual radiotelegraph keying is employed, the person responsible for the technical installation, servicing and maintenance of a radio station in these services shall hold a first or second-class commercial radiotelephone license issued by the Commission.

(e) Where manual radiotelegraph keying is employed exclusively, the person responsible for the technical installation, servicing and maintenance of a radio station in these services shall hold a first or second-class commercial (but not a temporary limited radiotelegraph second-class radio operator license) radiotelegraph operator license issued by the Commission.

(f) In cases where manual radiotelegraph keying and other types of radio transmission are employed, the person responsible for the technical installation, servicing and maintenance of a radio station in these services shall hold a commercial (but not a temporary limited radiotelegraph second-class radio operator license) radiotelegraph operator license of first or second-class.

(g) During the course of normal rendition of service, a station employing manual radiotelegraph keying shall be operated only by a person holding a commercial radiotelegraph operator license or radiotelegraph operator permit issued by the Commission. Persons not holding such authorizations are forbidden to manipulate a manually operated telegraph key at such stations during periods of station operation.

(h) Any person may, after obtaining permission from the station licensee, operate the following types of stations during the course of normal rendition of service, under the circumstances set forth below:

(1) A mobile station, when communicating with or through a base station in the Domestic Public Land Mobile Radio Service.

(2) A base station, when operated from a dispatch point which is under the effective operational control of a licensed radio operator on duty at the transmitter control point.

(3) A rural subscriber or mobile station in the Rural Radio Service.

(i) Central office stations, Inter-office stations, Auxiliary test stations, and Base stations, including radio control stations which may be associated therewith, shall be operated during the course of normal rendition of service under the effective operational control of a person holding a valid restricted radiotelephone operator permit or higher class of commercial radio operator license issued by the Commission.

(j) TV-STL stations, TV Non-Broadcast Pickup stations, TV Pickup stations, Microwave Auxiliary stations, and Developmental stations shall be operated during the course of normal rendition of service under the effective operational control of a person holding a first or second-class commercial radiotelephone or radiotelegraph operator license (but not a temporary limited radiotelegraph second-class operator license) issued by the Commission.

(k) Notwithstanding any other provisions of this section, unless the transmitter and its associated equipment is so designed that none of the operations necessary to be performed during the course of normal rendition of service may cause off-frequency operation or result in any unauthorized radiation, such transmitter shall be operated by a person holding a first or second-class commercial radio operator license, either radiotelephone or radiotelegraph, as may be appropriate for the type of emission being used (but not a temporary limited radiotelegraph second-class license).

(l) Except under the circumstances specified in paragraphs (g) through (j) of this section, during the course of normal rendition of service, no person is required to be in attendance at a station installed at a specified fixed location when transmitting by self actuating means provided (1) licensed radio personnel responsible for the maintenance of the radio station are continuously available on call at a location which will assure expeditious performance of such technical servicing and maintenance as may be necessary, and (2) the quality of transmisison over such station is subject to the supervision of the licensee's responsible operating personnel for the radio system with which the unattended station is directly associated (see § 21.118 (g)).

(m) The provisions of this section authorizing certain unlicensed persons to operate mobile stations, rural subscriber stations, and base stations shall not be construed to change or diminish in any respect the responsibility of station licensees to have and to maintain effective operational control over the stations operating under their license (including all transmitter units thereof), or for the proper functioning of those stations in accordance with the terms of the instrument of station authorization and applicable rules and regulations.

(n) Any reference in this section to a commercial radio operator license or permit of any class issued by the Commission shall not be construed to include Aircraft Radiotelephone Operator Authorizations.

(o) A licensee of radio facilities in these services shall be required to have available on call at all times (either as an employee or through appropriate contractual arrangement with a person holding the requisite class or radio operator license) a licensed first or second class commercial radio operator (either radiotelephone or radiotelegraph, as may be appropriate for the type of emission being used) to perform necessary technical servicing and maintenance of the radio facilities expeditiously.

§ 21.206 *Inspection and maintenance of antenna structure obstruction marking and associated control equipment.* The licensee of any radio station which has an antenna structure required to be painted or illuminated pursuant to the provisions of section 303 (q) of the Communications Act of 1934, as amended, or Part 17 of this chapter, operate and maintain the structure marking and associated control equipment in accordance with the following:

(a) The required lighting of the antenna structure shall be observed at least once each 24 hours, either visually or by observing an automatic and properly maintained indicator designed to register any failure of such lights, to insure that all such lights are functioning properly as required, or, alternatively, there shall be provided and properly maintained an automatic alarm system designed to detect any failure of the lights and to provide indication of such failure to the licensee.

(b) Any observed or otherwise known failure of a code or rotating beacon light or top light not corrected within thirty minutes shall be reported immediately by telephone or telegraph to the nearest Airways Communication Station or office of the Civil Aeronautics Administration. Further notification by telephone or telegraph shall be given immediately upon resumption of the required illumination.

(c) All automatic or mechanical control devices, indicators and alarm systems associated with the tower lights shall be inspected at intervals not to exceed three months to insure that such apparatus is functioning properly.

(d) All lighting shall be exhibited from sunset to sunrise unless otherwise specified in the instrument of station authorization.

(e) A sufficient supply of spare lamps shall be maintained for immediate replacement purposes at all times.

(f) All towers shall be cleaned or repainted as often as is necessary to maintain good visibility.

(g) Entries concerning the operation and maintenance of marked antenna structures shall be made in technical log of the station as set forth in Section 21.208 (f).

§ 21.207 *Transmitter measurements.* (a) The licensee of each station shall employ a suitable procedure to determine that the carrier frequency of each transmitter operating in these services is maintained within the tolerance prescribed in § 21.101 or in the instrument of station authorization. This determination shall be made, and the results thereof entered in the technical log of the station, in accordance with the following:

(1) When the transmitter is initially installed.

(2) When any change is made in the transmitting equipment which may affect the carrier frequency or the stability thereof.

(3) At intervals not to exceed one year, for transmitters employing crystal-controlled oscillators, or oscillators regulated by temperature-controlled or temperature-compensated cavities.

(4) At intervals not to exceed one month, for transmitters not employing crystal-controlled oscillators, or oscillators regulated by temperature-controlled or temperature-compensated cavities.

(b) The permittee or licensee of each station shall employ a suitable procedure to determine that the power of each transmitter which operates below 500 Mc from a specified fixed location conforms to the requirements of the station authorization and the rules of this part. Where the transmitter is so constructed that a direct measurement of plate current in the final radio stage is not practicable, the power may be determined from a measurement of the cathode current in the final radio stage. When the power is determined from a measurement of the cathode current, the required record entry shall indicate clearly the quantities that were measured, the measured values thereof, and the method of determining the power from the measured values. This determination shall be made, and the results thereof entered in the station records, in accordance with the following:

(1) When the transmitter is initially installed.

(2) When any change is made in the transmitter which may cause the power to deviate by more than 20 percent above and 25 percent below the authorized power specified in the instrument of station authorization.

(3) At intervals not to exceed one year.

(c) The permittee or licensee of each station shall employ a suitable procedure to determine that the modulation characteristics of each transmitter and the signal radiated therefrom conform to the terms of the instrument of station authorization and to the applicable rules of this part. This determination shall be made, and the results thereof entered in the technical log of this station in accordance with the following:

(1) When the transmitter is initially installed.

(2) When any change is made in the transmitter which may affect the modulation characteristics.

(3) At intervals not to exceed one year.

(d) In the case of mobile transmitters, the determinations required by paragraphs (a) and (c) of this section may be made at a test or service bench: *Provided,* That the measurements are made under load conditions equivalent to actual operating conditions; *And provided further,* That after installation in the mobile unit, the transmitter is given a routine check to determine that it is capable of being received satisfactorily by an appropriate receiver.

(e) The determinations required by paragraphs (a), (b), (c), and (d) of this section shall be made by, or under the immediate supervision of, a person holding a first or second-class commercial radio operator license (but not a temporary limited radiotelegraph or second-class radio operator) who shall authenticate the accuracy of such entries by signing his name in the technical log of the station together with the class, serial number and expiration date of his license: *Provided, however,* That the licensee of the station may optionally have the required determinations made by any qualified engineering measurement service, in which case the required record entries shall also show the name and address of the engineering measurement service.

(f) The use of a frequency monitor in lieu of frequency checks will be recorded in the station log in the same manner and at the same intervals as required in paragraph (a) (3) or (4) of this section. Where automatic frequency monitors are employed which have an accuracy of at least one half of the required frequency tolerance of the transmitters with which they are associated, their use shall be deemed to meet the frequency checking requirements for the period during which they were so used.

§ 21.208 *Station records.* (a) Station records shall be kept in an orderly manner, and in such detail that the data required is readily available. Key letters, abbreviations or symbols may be used if proper meaning or explanation is set forth in the record.

(b) Each entry in the records of a station shall be signed by a person qualified to do so, having actual knowledge of the facts to be recorded.

(c) No record or portion thereof shall be erased, obliterated, or wilfully destroyed within the required retention period. Any necessary correction may be made only by the person originating the entry who shall strike out the erroneous portion, initial the correction made and indicate the date of correction.

(d) The records required by this part shall be retained for a period of at least one year: *Provided,* That:

(1) Records involving communications incident to a disaster or which include communications incident to, or involved in, an investigation by the Commission and concerning which the licensee has knowledge, shall be retained by the licensee until specifically authorized in writing by the Commission to destroy them.

(2) Records incident to or involved in any claim or complaint of which the licensee has knowledge shall be retained by the licensee until such claim or com-

plaint has been fully satisfied or until the same has been barred by statute limiting the time for the filing of suits upon such claims.

(e) For each station in these services the licensee shall maintain, a technical log of the station operation showing:

(1) The results and dates of the transmitter measurements required by § 21.207, and the information concerning the identity of the person making such measurements as required by § 21.207 (e).

(2) Pertinent details concerning any servicing or maintenance performed on a transmitter which may affect its proper operation, including the date thereof, as well as the class, serial number and expiration date of the license of the responsible radio operator who shall authenticate the accuracy of such log by signing his name therein.

(3) Pertinent details concerning time and nature of any failure or erratic transmitter operation, including operation of automatic alarm facilities (see also § 21.118 (g)).

(f) For each station having an antenna structure which is required to be obstruction lighted, appropriate entries shall be made in the station's technical log as follows:

(1) The time the required obstruction lighting is turned on and off each day, if manually controlled.

(2) The time the daily check of the proper operation of the obstruction lights was made.

(3) In the event of any observed or otherwise known failure of an obstruction light:

(i) Nature of such failure.

(ii) Date and time the failure was observed or otherwise noted.

(iii) Date, time and nature of the adjustments, repairs, or replacements made.

(iv) Identification of Airways Communication Station (Civil Aeronautics Administration) notified of the failure of any code, rotating beacon or top light not corrected within thirty minutes, and the date and time such notice was given.

(v) Date and time notice was given to the Airways Communication Station (Civil Aeronautics Administration) that the required illumination was resumed.

(4) Upon performance of the three-month periodic inspection required by § 21.206 (c):

(i) The date of the inspection and the condition of all obstruction painting, lights and associated obstruction lighting control devices, indicators and alarm systems.

(ii) Any adjustments, replacements, repairs, or painting made to insure compliance with the lighting and marking requirements and the date such adjustments, replacements, or repairs were made.

(g) For each station which is required to be operated by a licensed radio operator or by the holder of a restricted radiotelephone operator permit during the course of normal rendition of service, an operation log book shall be kept showing:

(1) The time and signature, upon entering duty at the station and again upon leaving duty, of the person or persons responsible for the operation of the transmitting equipment each day together with the class, serial number and expiration date of their radio operator license or permit.

(2) The time and duration of each transmission and the identity of the station or point to which the transmission was directed: *Provided,* That in lieu thereof, a chronological record of such essential information in the form of traffic tickets, or on a separate sheet, is permissible. When such records are kept in lieu of entries in the operating log book, the minimum retention period shall be as prescribed in paragraph (d) of this section, provision for shorter retention periods in other parts of the Commission's rules notwithstanding.

(h) The log entries concerning the class, serial number and expiration date of the radio operator licenses of the persons responsible for the technical performance and operation of a station, as required by the rules of this part, are not required to be repeated in the case of persons who are regularly employed as operators on a full-time basis at the station. However, log entries shall be authenticated by the signature of such person.

(i) Each entry in the station log shall be legibly made: *Provided, however,* That in any case where it is impracticable to make such entries in the logs immediately, rough logs may be kept in the form of notes or memoranda which shall be transcribed into the station log as soon as possible by the person qualified to do so who has actual knowledge of such facts recorded. The person so transcribing shall authenticate the entries by signing the transcription.

§ 21.209 *Communications concerning safety of life and property.* (a) Handling and transmission of messages concerning the safety of life or property which is in imminent danger shall be afforded priority over other messages.

(b) No person shall knowingly cause to be transmitted any false or fraudulent message concerning the safety of life or property, or refuse upon demand immediately to relinquish the use of a radio circuit to enable the transmission of messages concerning the safety of life or property which is in imminent danger, or knowingly interfere or otherwise obstruct the transmission of such messages.

§ 21.210 *Operation during emergency.* The licensee of any station in these services may, during a period of emergency in which normal communication facilities are disrupted as a result of hurricane, flood, earthquake, or similar disaster, utilize such station for emergency communication service in a manner other than that specified in the instrument of authorization: *Provided,* (a) That as soon as possible after the beginning of such emergency use, notice be sent to the Commission at Washington, D. C., and to the Engineer-in-Charge of the radio district in which the station is located, stating the nature of the emergency and the use to which the station is being put, and (b) that the emergency use of the station shall be discontinued as soon as substantially normal communication facilities are again available, and (c) that the Commission at Washington, D. C. and the Engineer-in-Charge shall be notified immediately when such special use of the station is terminated, and (d) that, in no event, shall any station engage in emergency transmission on frequencies other than, or with power in excess of, that specified in the instrument of authorization or as otherwise expressly provided by the Commission, or by law, and (e) that the Commission may, at any time, order the discontinuance of any such emergency communication.

§ 21.211 *Suspension of transmission.* Transmission shall be suspended immediately upon detection by the station or operator licensee or upon notification by the Commission of a deviation from the technical requirements of the station authorization and shall remain suspended until such deviation is corrected, except for transmission concerning the immediate safety of life or property, in which case transmission shall be suspended immediately after the emergency is terminated.

§ 21.212 *Equipment, service and maintenance tests.* (a) When construction and installation or modification of a station has been completed in accordance with the terms of a construction permit, the technical provisions of the application therefor and the applicable provisions of this part, the permittee is authorized, during the term of such construction permit, to test the equipment for a period not to exceed 10 days, except that permittees of point-to-point microwave stations may conduct such tests for a period not to extend beyond the expiration date of the applicable construction permit: *Provided,* That:

(1) The Commission's Engineer-in-Charge of the radio district in which the station is located is notified not less than 2 days in advance of the date on which the transmitter will first be tested in such manner as to produce radiation, giving the name of the permittee, station location, call sign, frequencies, time and date on which tests are to be conducted.

(2) The Commission reserves the right to cancel, suspend, or change the date of beginning or duration of such tests when such action is in the public interest, convenience or necessity.

(3) All necessary precautions are taken to avoid interference to any other authorized station.

(4) No service to the public may be furnished over the facilities being tested during the equipment test period.

(b) When construction and equipment tests are completed in exact accordance with the terms of the construction permit, the technical provisions of the application therefor, and the other applicable provisions of this part, and after an application for station license has been filed with the Commission showing the station to be in satisfactory operating condition, the permittee is authorized to conduct service tests in exact accordance with the terms of the construction permit until the application for station license is granted or otherwise disposed of in accordance with the Commission's rules: *Provided,* That:

(1) The Commission's Engineer-in-Charge of the radio district in which the station is located is notified not less than 2 days in advance of the beginning of the tests of the time and date when such tests are scheduled to begin.

(2) The Commission reserves the right to cancel, suspend, or change the date of beginning or duration of such tests when such action is in the public interest, convenience or necessity.

(3) Service tests shall not commence after the expiration date of the construction permit.

(4) Charges for service furnished during the service test period shall be made, pursuant to the provisions of legally applicable tariffs (see § 61.62 of this chapter, Rules Governing the Construction, Filing and Posting of Charges for Interstate and Foreign Communication Service).

(c) When a construction permit and license, or a construction permit and modification of license are issued simultaneously for a mobile station, units of such station may be placed in operation without equipment and service test notification to the Commission's Engineer-in-Charge of the radio district in which the station is located, unless otherwise specifically required.

(d) The licensees of all stations in these services are authorized to make such tests as may be necessary for the proper maintenance of the station: *Provided,* That all necessary precautions are taken to avoid interference with other authorized services. The time taken for such tests shall be held to a minimum.

(e) The authorization for tests embodied in paragraphs (a) and (b) of this section shall not be construed as constituting a license to operate but as a necessary part of the construction.

§ 21.213 *Station identification.* (a) Each station in these services, except as hereinafter provided, shall identify itself by transmitting its assigned call sign in connection with each communication or exchange of communication. In the event of a prolonged series of communications, a station shall identify itself at least every half hour. However, stations continuously engaged in a public telephone message, telegraph, radiophoto, or program transmission shall not be required to transmit identifying call signs when such identification would interrupt the continuity of the message, radiophoto or program that is being transmitted. In any such case, the identifying call sign shall be transmitted immediately following the conclusion of the message, radiophoto or program: *Provided,* That the requirement for transmission of station identification is waived for fixed stations automatically retransmitting by self-actuating means, and for fixed stations employing continuous radiation with multi-channel transmission.

(b) In lieu of the use of an official call sign, as prescribed in paragraph (a) of this section, a station may identify itself as follows:

(1) A mobile station in the Domestic Public Land Mobile Radio Service or Rural Radio Service may identify itself by the special mobile unit designation assigned by the licensee or its assigned telephone number, provided adequate records are maintained by the licensee to permit ready identification of the mobile station.

(2) A rural subscriber station may identify itself by its assigned telephone number, provided adequate records are maintained by the licensee to permit ready identification of the rural subscriber station.

(3) A station at a specified fixed location may identify itself by the name of the city in which the station is located.

(4) A TV pickup or TV-STL station may identify itself by the call sign of the broadcast station for which it is rendering service.

(c) Wherever it appears that the manner of identification used by a licensee in lieu of the official call sign is unsatisfactory, the Commission may require the licensee to change the method of station identification.

(d) Where transmission of station identification is required such transmission shall be capable of being received and understood at an appropriate receiver without the use of special channeling or transmission unscrambling devices: *Provided,* That:

(1) Where telephony is employed, station identification shall be by aural transmission or automatic tone signalling.

(2) Where telegraphy, radiophoto or facsimile transmission is employed, the station identification shall be transmitted at a speed not to exceed 25 words per minute at least 3 times in the International Morse Code as "QRA do" followed by the station call sign.

(3) Where television transmission is employed, station identification shall be transmitted either aurally or visually for a period of not less than 5 seconds, or via telegraphic transmission at a speed not to exceed 25 words per minute at least 3 times in the International Morse Code as "QRA do" followed by the station call sign.

### SUBPART E—MISCELLANEOUS

§ 21.300 *Business records.* Each licensee of radio facilities authorized under the rules of this part and required to file FCC Form L (see § 1.544 of this chapter) shall keep complete records of all phases of such operations distinctly separate and apart from any other business or activity conducted by the licensee.

§ 21.301 *National defense; free service.* Any common carrier authorized under the rules of this part may render to any agency of the United States Government free service in connection with the preparation for the national defense. Every such carrier rendering any such free service shall make and file, in duplicate, with the Commission, on or before the 31st of July and on or before the 31st of January in each year, reports covering the periods of 6 months ending on the 30th of June and the 31st of December, respectively, next prior to said dates. These reports shall show the names of the agencies to which free service was rendered pursuant to this rule, the general character of the communications handled for each agency, and the charges in dollars which would have accrued to the carrier for such service rendered to each agency if charges for such communications had been collected at the published tariff rates.

§ 21.302 *Answers to notices of violation.* Any person receiving official notice of a violation of the terms of the Communications Act of 1934, as amended, any other Federal statute or Executive Order pertaining to radio or wire communications or any international radio or wire communications treaty or convention, or regulations annexed thereto to which the United States is a party, or the rules and regulations of the Federal Communications Commission, shall, within 3 days from such receipt, send a written answer to the office of the Commission originating the official notice. If an answer cannot be sent, or an acknowledgment made within such 3-day period, acknowledgement and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay. The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. If the notice relates to some violation that may be due to the physical or electrical characteristics of transmitting apparatus, the answer shall state fully what steps have been taken to prevent future violations, and, if any new apparatus is to be installed, the date such apparatus was ordered, the name of the manufacturer, and promised date of delivery. If the installation of such apparatus requires a construction permit, the file number of the application shall be given or, if a file number has not been assigned by the Commission, such identification as will permit ready reference thereto. If the notice of violation relates to inadequate maintenance resulting in improper operation of the transmitter, the name and license number of the operator performing the maintenance shall be given. If the notice of violation relates to some lack of attention to, or improper operation of, the transmitter by other employees, the reply shall set forth the steps taken to prevent a recurrence of such lack of attention or improper operation.

§ 21.303 *Discontinuance, reduction or impairment of service.* (a) If the public communication service provided by a station in the Domestic Public Radio Services is involuntarily discontinued, reduced or impaired for a period exceeding 48 hours, the station licensee shall promptly give notification thereof in writing to the Commission at Washington 25, D. C., and the Commission's Engineer-in-Charge of the radio district in which the station is located. In such cases, the licensee shall furnish full particulars as to the reasons for such discontinuance, reduction or impairment of service, including a statement as to when normal service is expected to be resumed. When normal service is resumed, prompt notification thereof shall be given in writing to the Commission at Washington 25, D. C., and the Commission's Engineer-in-Charge of the radio district in which the station is located.

(b) No station licensee subject to Title II of the Communications Act of 1934, as amended, shall voluntarily discontinue, reduce or impair public communication service to a community or part of community without obtaining prior authorization from the Commission pursuant to the procedures set forth in Part 63 of this chapter. In the event that permanent discontinuance of service is authorized by the Commission, the station licensee shall immediately give notification of the effective date thereof in writing to the Commission's Engineer-in-Charge of the radio district in which the station is located and shall promptly send the station license to the Commission at Washington 25, D. C., for cancellation.

(c) Any station licensee, not subject to Title II of the Communications Act of 1934, as amended, who voluntarily discontinues, reduces or impairs public communication service to a community or part of a community shall give written notification to the Commission within 7 days thereof. In the event that service is permanently discontinued, the licensee shall give written notification thereof to the Commission's Engineer-in-Charge of the radio district in which the station is located and shall promptly send the station license to the Commission at Washington 25, D. C., for cancellation.

§ 21.304 *Tariffs, reports, and other material required to be submitted to the Commission.* Part 1 of this chapter, beginning with § 1.541, contains a summary of certain material and reports, including, but not limited to schedule of charges and accounting and financial reports, which must be filed with or submitted to the Commission.

§ 21.305 *Reports required concerning amendments to charters, bylaws, and partnership agreements.* Any amendments to charters, articles of incorporation or association, or partnership agreements shall promptly be filed with the Secretary, Federal Communications Commission, Washington 25, D. C. Such filing shall be directed to the attention of the Chief, Common Carrier Bureau.

§ 21.306 *Requirement that permittees and licensees respond to official communications.* All permittees and licensees in these services are required to respond to official communications from the Commission with reasonable dispatch and according to the tenor of such communications. Failure so to do will be given appropriate consideration in connection with any subsequent applications which the offending party may file and may result in the designation of such applications for hearing, or in appropriate cases, the institution of proceedings looking to the modification or revocation of the pertinent authorizations.

### SUBPART F—DEVELOPMENTAL AUTHORIZATIONS

§ 21.400 *Eligibility.* Developmental authorizations for stations in the Domestic Public Radio Services will be issued only to existing and proposed communication common carriers who are legally, financially and otherwise qualified to conduct experimentation utilizing hertzian waves for the development of engineering or operational data, or techniques, directly related to a proposed Domestic Public Radio Service or to a regularly established radio service regulated by the rules of this part.

§ 21.401 *Scope of service.* Developmental authorizations may be issued for:

(a) Field strength surveys relative to or precedent to the filing of applications for construction permits, in connection with the selection of suitable locations for stations proposed to be established in any of the regularly established radio services regulated by the rules of this part; or

(b) Development of proposed Domestic Public Radio Services to be governed by the rules and regulations of this part.

§ 21.402 *Adherence to program of research and development.* The program of research and development, as stated by an applicant in the application for construction permit or license or stated in the instrument of station authorization, shall be substantially adhered to unless the licensee is otherwise authorized by the Commission.

§ 21.403 *Special procedure for the development of a new service or for the use of frequencies not in accordance with the provisions of the rules in this part.* (a) An authorization for the development of a new common carrier service not in accordance with the provisions of the rules in this part may be granted for a limited time, but only after the Commission has made a preliminary determination with respect to the factors set forth in this paragraph, as each case may require. This procedure also applies to any application that involves use of a frequency which is not in accordance with the provisions of the rules in this part, although in accordance with the Table of Frequency Allocations contained in Part 2 of this chapter. (An application which involves use of a frequency which is not in accordance with the Table of Frequency Allocations in Part 2 of this chapter should be filed in accordance with the provisions of Part 5 of this Chapter, Experimental Radio Services.) The factors with respect to which the Commission will make a preliminary determination before acting on an application filed under this paragraph are as follows:

(1) That the public interest, convenience or necessity warrants consideration of the establishment of the proposed service or the use of the proposed frequency;

(2) That the proposed operation appears to warrant consideration to effect a change in the provisions of the rules in this part; and/or

(3) That some operational data should be developed for consideration in any rule-making proceeding which may be initiated.

(b) Applications for construction permits for stations which are intended to be used in the development of a proposed service shall be accompanied by a petition to amend the Commission's rules with respect to frequencies and such other items as may be necessary to provide for the regular establishment of the proposed service.

§ 21.404 *Terms of grant; general limitations.* (a) Developmental authorizations normally shall be issued for one year, or such shorter term as the Commission may deem appropriate in any particular case, and shall be subject to cancellation without hearing by the Commission at any time upon notice to the licensee.

(b) Where some phases of the developmental program are not covered by the general rules of the Commission or by the rules of this part, the Commission may specify supplemental or additional requirements or conditions in each case as it may deem necessary in the public interest, convenience or necessity.

(c) Frequencies allocated to the service toward which such development is directed will be assigned for developmental operation on the basis that no interference will be caused to the regular services of stations operating in accordance with the Commission's Table of Frequency Allocations.

(d) The rendition of communication service for hire is not permitted under any developmental authorizations unless specifically authorized by the Commission.

(e) The grant of a developmental authorization carries with it no assurance that the developmental program, if successful, will be authorized on a permanent basis either as to the service involved or the use of the frequencies assigned or any other frequencies.

§ 21.405 *Supplementary showing required.* (a) Authorizations for development of a proposed radio service in the Domestic Public Radio Services will be issued only upon a showing that the applicant has a definite program of research and development, the details of which shall be set forth, having reasonable promise of substantial contribution to these services within the term of such authorization. In addition to showing that the applicant is financially qualified or that adequate provision has been made to underwrite the costs of the proposed venture, a specific showing should be made as to the factors which the applicant believes qualify him technically to conduct the research and development program, including a description of the nature and extent of engineering facilities which applicant has available for such purpose.

(b) Expiring developmental authorizations may be renewed only upon the applicant's compliance with the applicable requirements of paragraphs (a) and (b) of § 21.406 relative to the authorization sought to be renewed and upon a factual showing that further progress in the program of research and development requires further radio transmission and that the public interest, convenience or necessity would be served by renewal of such authorization.

§ 21.406 *Developmental report required.* (a) Upon completion of the program of research and development, or, in any event, upon the expiration of the instrument of station authorization under which such investigations were permitted, or at such times during the term of the station authorization as the Commission may deem necessary to evaluate the progress of the developmental program, the licensee shall submit, in duplicate, a comprehensive report on the following items, in the order designated:

(1) Report on the various phases of the project which were investigated.

(2) Total number of hours of operation on each frequency assigned.

(3) Copies of any publication on the project.

(4) A listing of any patents applied for, including copies of any patents issued as a consequence of the activities carried forth under the authorization.

(5) Detailed analysis of the result obtained.

(6) Any other pertinent information.

(b) In addition to the information included in paragraph (a) above, the developmental report of a station authorized for the development of a proposed radio service shall include comprehensive information on the following items:

(1) Probable public support and methods of its determination.

(2) Practicability of service operations.

(3) Interference encountered.

(4) Pertinent information relative to merits of the proposed service.

(5) Propagation characteristics of frequencies used, particularly with respect to the service objective.

(6) Frequencies believed to be more suitable and reasons therefor.

(7) Type of signals or communications employed in the experimental work.

(c) Normally, development reports will be made a part of the Commission's public records. However, an applicant may request that the Commission withhold from the public certain reports and associated material relative to the accomplishments achieved under developmental authorization, and, if it appears that such information should be withheld, the Commission will so direct.

### SUBPART G—DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

§ 21.500 *Eligibility.* Authorizations for base stations and auxiliary test stations to be operated in this service will be issued to existing and proposed communication common carriers. Authorizations for mobile stations on land or on board vessels will be issued to communication common carriers or to individual users of the service. Applications will be granted only in cases where it is shown that (a) the applicant is legally, financially, technically and otherwise qualified to render the proposed service, (b) there are frequencies available to enable the applicant to render a satisfactory service, and (c) the public interest, convenience or necessity would be served by a grant thereof.

§ 21.501 *Frequencies.* The following frequencies are available to the Domestic Public Land Mobile Radio Service for the use set forth in this section.

(a) For assignment, in accordance with the Zone Allocation Plan, to stations of communication common carriers which are also in the business of affording public landline message telephone service, for General and Dispatch Communications (provided that Signaling Communications may also be furnished by any facility rendering such General or Dispatch service). The frequencies specified may be used in adjoining zones within moderate distances of the respective zone boundaries to permit continuous service to mobile units transiting such zone boundaries.

Zone I—Base station frequency: 35.66 Mc, Mobile and Auxiliary Test station frequency: 43.66 Mc.

| | |
|---|---|
| Connecticut | New Jersey. |
| Delaware. | New York. |
| District of Columbia | Pennsylvania. |
| Lake Ontario. | Rhode Island. |
| Maine. | Vermont. |
| Maryland. | Virginia. |
| Massachusetts. | West Virginia. |
| New Hampshire. | |

Zone II—Base station frequency: 35.34 Mc, Mobile and Auxiliary Test station frequency: 43.34 Mc.

| | |
|---|---|
| Alabama. | Mississippi. |
| Florida. | North Carolina. |
| Georgia. | South Carolina. |
| Louisiana. | |

Zone III—Base station frequency: 35.42 Mc, Mobile and Auxiliary Test station frequency: 43.42 Mc.

| | |
|---|---|
| Illinois. | Lake St. Clair. |
| Indiana. | Lake Superior. |
| Kentucky. | Michigan. |
| Lake Erie. | Ohio. |
| Lake Huron | Tennessee. |
| Lake Michigan. | Wisconsin. |

Zone IV—Base station frequency: 35.54 Mc, Mobile and Auxiliary Test station frequency: 43.54 Mc.

| | |
|---|---|
| Iowa. | North Dakota. |
| Minnesota. | South Dakota |
| Montana. | Wyoming. |
| Nebraska. | |

Zone V—Base station frequency: 35.30 Mc, Mobile and Auxiliary Test station frequency: 43.30 Mc.

| | |
|---|---|
| Arkansas. | Oklahoma. |
| Kansas. | Texas. |
| Missouri. | |

Zone VI—Base station frequency: 35.38 Mc, Mobile and Auxiliary Test station frequency: 43.38 Mc.

| | |
|---|---|
| Arizona. | Nevada. |
| California. | New Mexico. |
| Colorado. | Utah. |

Zone VII—Base station frequency: 35.26 Mc, Mobile and Auxiliary Test station frequency: 43.26 Mc.

| | |
|---|---|
| Idaho. | Washington. |
| Oregon. | |

Zone VIII—Base station frequency: 35.50 Mc, Mobile and Auxiliary Test station frequency: 43.50 Mc.

| | |
|---|---|
| Indiana. | New York. |
| Lake St. Clair. | Ohio. |
| Michigan. | Pennsylvania. |
| New Jersey. | The Great Lakes. |

Zone IX—Base station frequency: 35.62 Mc, Mobile and Auxiliary Test station frequency: 43.62 Mc.

| | |
|---|---|
| Arkansas. | Texas. |
| Oklahoma. | |

(b) For assignment, to stations of communication common carriers engaged also in the business of affording public landline message telephone service, for General and Dispatch Communications (provided that Signaling Communications may also be furnished by any facility rendering such General or Dispatch service): [11]

| Base station frequencies (Mc): | Mobile and auxiliary test station frequencies (Mc) |
|---|---|
| 152.51 | 157.77 |
| 152.57 | 157.83 |
| 152.63 | 157.89 |
| 152.69 | 157.95 |
| 152.75 | 158.01 |
| 152.81 | 158.07 |
| 454.45 | 459.45 |
| 454.55 | 459.55 |
| 454.65 | 459.65 |
| 454.75 | 459.75 |
| 454.85 | 459.85 |
| 454.95 | 459.95 |

(c) For assignment to stations of communication common carriers not also engaged in the business of providing a public landline message telephone service for General and Dispatch Communications (provided that Signaling Communications may also be furnished by any facility rendering such General or Dispatch service): [11]

| Base station frequencies (Mc): | Mobile and auxiliary test station frequencies (Mc) |
|---|---|
| 152.03 | 158.49 |
| 152.09 | 158.55 |
| 152.15 | 158.61 |
| 152.21 | 158.67 |
| 454.05 | 459.05 |
| 454.15 | 459.15 |
| 454.25 | 459.25 |
| 454.35 | 459.35 |

(d) For assignment to base stations of communication common carriers for use exclusively in providing a one-way signaling service to mobile receivers:

35.58 Mc
43.58 Mc

(1) Wherever feasible, the frequency 35.58 Mc shall be assigned for use in any area prior to any assignment of the frequency 43.58 Mc.

(2) If an applicant for authorization to provide an exclusive one-way signaling service provides, or proposes also to provide, General or Dispatch service in accordance with paragraphs (a), (b), and (c) of this section, the application for a one-way facility should be supported with full information to show why the proposed signaling service could not be provided in connection with the base station facilities used for such General or Dispatch service.

[11] Control stations which were authorized to use these frequencies on September 4, 1956, may be authorized to continue operation on such frequencies until the investment in such facilities has been amortized, but in no event beyond April 1, 1961, under the condition that harmful interference is not caused to stations in the Domestic Public Land Mobile Radio Service and the Rural Radio Service. In any case where use of these frequencies is required by an applicant in the Domestic Public Land Mobile Radio Service or the Rural Radio Service for the purpose of providing any of the basic services relating thereto (i. e., for stations other than developmental or control), continued operation of control stations thereon will not be authorized beyond the term of the then effective authorization therefor.

(e) For assignment to stations using radio facsimile as an integral portion of common carrier message telegraph pick-up or delivery procedure:

*Base, Mobile and Auxiliary Test Station Frequencies (Mc)*

35.22
35.46
43.22
43.46

(f) The following frequencies are available for assignment to control and repeater stations functioning in conjunction with the Domestic Public Land Mobile Radio Service, on a shared basis with certain other radio services: [12]

*72–76 Mc Band* [1]

| Mc | Mc | Mc | Mc |
|---|---|---|---|
| 72.02 | 72.82 | 73.62 | 74.42 |
| 72.06 | 72.86 | 73.66 | 74.46 |
| 72.10 | 72.90 | 73.70 | 74.50 |
| 72.14 | 72.94 | 73.74 | 74.54 |
| 72.18 | 72.98 | 73.78 | 74.58 |
| 72.22 | 73.02 | 73.82 | 75.42 |
| 72.26 | 73.06 | 73.86 | 75.46 |
| 72.30 | 73.10 | 73.90 | 75.50 |
| 72.34 | 73.14 | 73.94 | 75.54 |
| 72.38 | 73.18 | 73.98 | 75.58 |
| 72.42 | 73.22 | 74.02 | 75.62 |
| 72.46 | 73.26 | 74.06 | 75.66 |
| 72.50 | 73.30 | 74.10 | 75.70 |
| 72.54 | 73.34 | 74.14 | 75.74 |
| 72.58 | 73.38 | 74.18 | 75.78 |
| 72.62 | 73.42 | 74.22 | 75.82 |
| 72.66 | 73.46 | 74.26 | 75.86 |
| 72.70 | 73.50 | 74.30 | 75.90 |
| 72.74 | 73.54 | 74.34 | 75.94 |
| 72.78 | 73.58 | 74.38 | 75.98 |

[1] Assignments made to stations on frequencies in this band are subject to the condition that no harmful interference will be caused to operational fixed stations or reception of television stations on channels 4 or 5. (See § 21.103.)

(g) For assignment to control and repeater stations functioning in conjunction with the Domestic Public Land Mobile Radio Service, on a shared basis with other radio services:

[12] A repeater station normally will not be authorized unless the land mobile radio system with which it is associated is continuously open for public correspondence and the emissions of the repeater station are under the operational surveillance of the land mobile system's licensed operating personnel.

*890–940 Mc Band*—Continued

| Mc | Mc | Mc | Mc |
|---|---|---|---|
| 934.5 | 936.0 | 937.5 | 939.0 |
| 935.0 | 936.5 | 938.0 | 939.5 |
| 935.5 | 937.0 | 938.5 | |

Stations operating on these frequencies will not be protected from such interference as may be experienced from the emission of industrial, scientific, and medical equipment on 915 Mc in accordance with § 2.104 (a) of this chapter.[13]

§ 21.502 *Classification of base stations.* Base stations of miscellaneous common carriers in the Domestic Public Land Mobile Radio Service shall be classified, as set forth below, according to their transmitting antenna height above average terrain, and according to their effective radiated power in the horizontal plane of the antenna.

| Antenna height above average terrain (feet) | Class of station | | | | |
|---|---|---|---|---|---|
| 400 to 500 | C | B | B | A | A |
| 300 to 400 | C | C | B | B | A |
| 200 to 300 | D | C | C | B | B |
| 100 to 200 | D | D | C | C | B |
| 0 to 100 | E | D | D | C | C |
| | 30 Effective (watts). | 60 | 120 radiated | 250 | 500 power |

§ 21.503 *Geographical separation of co-channel stations.*[14] Base stations of miscellaneous common carriers operating co-channel in this service shall normally be separated by not less than the distances shown below:

| Class of station | Minimum mileage separation between co-channel stations | | | | |
|---|---|---|---|---|---|
| A | 75 | | | | |
| B | 68 | 61 | | | |
| C | 64 | 56 | 48 | | |
| D | 60 | 53 | 45 | 36 | |
| E | 56 | 50 | 42 | 29 | 23 |
| | A | B | C | D | E |
| | Class of station | | | | |

In any particular case, where it appears that unusual radio wave propagation conditions are involved, the Commission may require greater separation than indicated in the above table, or make assignments at lesser station spacing.

§ 21.504 *Service area of base station.* The limits of reliable service area of a base station are considered to be described by a field strength contour of 37 decibels above one microvolt per meter for stations engaged in two-way communication service with mobile stations and 43 decibels above one microvolt per meter for stations engaged in one-way signaling service. Service within that area is generally expected to have an average reliability of not less than ninety percent.

[13] A repeater station normally will not be authorized unless the land mobile radio system with which it is associated is continuously open for public correspondence and the emissions of the repeater station are under the operational surveillance of the land mobile system's licensed operating personnel.

[14] Reference may be made to § 3.611 (d) of this chapter. Radio Broadcast Services, for methods of computing mileage separations between station locations.

§ 21.505 *Antenna height limit for base stations.* In view of the fact that the predominant need for mobile communication service can usually be met by base stations within the classification set forth in § 21.502, and because widespread coverage is undesirable in areas where no substantial need exists for mobile communication service through a distant base station, base stations will not be authorized to employ transmitting antennas in excess of 500 feet above average terrain unless, upon an affirmative showing by the applicant, circumstances are established which warrant authorization of an antenna structure of greater elevation.

§ 21.506 *Power limitations.* Stations in this service shall not be permitted to exceed 500 watts effective radiated power and shall not be authorized to use transmitters having a rated power output in excess of the limits set forth in § 21.107 (b). A base station standby transmitter having a rated power output in excess of that of the main transmitter of the base station, with which it is associated, will not be authorized.

§ 21.507 *Bandwidth and emission limitations.* (a) Stations in this service shall normally be authorized to use only type A3 or F3 emission for radiotelephony, and type A1, A2, F1 or F2 emission for selective signaling: *Provided,* That stations operating in accordance with the provisions of § 21.501 (e) shall also be authorized to employ type A4 or F4 emission. The authorization to use type A3, F3, A4 or F4 emission shall be construed to include the use of the tone signals or signaling devices whose sole function is to establish and maintain communication between stations using radiotelephony or facsimile transmission. Stations using selective signaling in the one-way signaling service must be authorized to employ telegraph type emission appropriate to the type of transmission employed. The use of F0 and A0 emission in the 72–76 Mc band will not be authorized, except for temporary or short periods necessary for testing incident to the construction or maintenance of a radio station. (Further reference should be made to §§ 21.103 to 21.105, inclusive.)

(b) The maximum bandwidths which will normally be authorized for the various types of emission permitted in this service on frequencies below 500 Mc are set forth as follows:

| Type of emission: | *Authorized bandwidth* |
|---|---|
| A1 | 1 kc |
| A2 | 3 kc |
| A3 | 8 kc |
| A4 | 12 kc |
| F1 | 3 kc |
| F2 | 3 kc |
| F3 | 40 kc |
| F4 | 40 kc |

(c) On frequencies above 500 Mc, the bandwidth authorized shall not exceed 400 kc for each derived communication channel and may be restricted to lesser bandwidth when appropriate to the type of operation involved in any particular case.

(d) Other types of emission or bandwidth in excess of those specified in paragraph (b) of this section may be authorized upon an adequate showing of need therefor. An application requesting such authorization shall fully describe the modulation characteristics (for FM include maximum modulating frequency and maximum frequency deviation) emission and bandwidth desired, shall specify the bandwidth to be occupied, and shall state the reasons why such emission or bandwidth is required.

(e) The authorization to employ any of the various types of modulated emission in this service shall be construed to include authority to employ unmodulated emission only for temporary or short periods necessary for equipment testing incident to the construction and maintenance of a radio station.

§ 21.508 *Modulation requirements.* (a) The use of modulating frequencies higher than 3000 cycles per second for radiotelephony or tone signaling is not authorized on frequencies below 500 Mc.

(b) The use of modulating frequencies higher than 5000 cycles per second is not authorized for facsimile transmission on frequencies below 500 Mc.

(c) When amplitude modulation is used, the modulation percentage shall be sufficient to provide efficient communication and shall normally be maintained above 70 percent on peaks, but shall not exceed 100 percent on negative peaks.

(d) When phase or frequency modulation is used for radiotelephony on frequencies below 500 Mc, the deviation arising from modulation shall not exceed plus or minus 15 kc from the unmodulated carrier.

(e) Each single channel radiotelephone transmitter having more than 3 watts plate power input to the final radio frequency stage, initially authorized or installed at the station in this service after July 1, 1950, shall be provided with a device which will automatically prevent modulation which may be caused by greater than normal audio level and which is in excess of that specified in paragraphs (c) and (d) of this section.

(f) Upon a satisfactory showing that it is not technically feasible to employ a modulation limiter, as required by paragraph (e) of this section, and upon a satisfactory showing that other suitable measures will be observed to prevent modulation in excess of the limits specified in paragraphs (c) and (d) of this section, the Commission may authorize transmitters to operate without modulation limiters when used for facsimile transmission.

§ 21.509 *Permissible communications.* (a) Mobile stations in this service are authorized to communicate with and through base stations only. Such communication between base and mobile stations shall be upon frequencies which are paired in the manner set forth in §§ 21.501 (a), 21.501 (b), and 21.501 (c).

(b) Base stations in this service are normally authorized to communicate with associated land mobile stations in the same service: *Provided, however,* That base stations may also render service to properly licensed transient land mobile stations normally associated with another common carrier base station, including mobile units of Canadian registry. Under specific authorization from the Commission, service may be rendered to stations on board vessels. Authority to provide service to vessels may be granted upon a showing that the rendition of service to vessels will not degrade, by kind or extent of usage, the service which would be available, in the absence of service to vessels, to land vehicles receiving or subsequently requesting such services in the area: *Provided,* That any authorization to render service to vessels, other than itinerant vessels requiring service in other areas where VHF public coast service is not available, shall automatically terminate at the expiration of 60 days after inauguration of VHF public coastal service in the area involved. Applications for authority to communicate with vessels shall be accompanied by a showing of the following:

(1) The total number of land mobile units being served through the base station.

(2) The total number of land mobile units to which it is reasonably expected that such service will be furnished at any time in the next 12 months.

(3) The total number of stations on board vessels initially proposed to be served through the base station.

(4) The total number of stations on board vessels to which it is reasonably expected that such service will be furnished at any time in the next 12 months.

(5) Other public radio facilities available in the area providing service to mobile stations on board vessels.

(6) Such other information as may be deemed pertinent, showing that communication with vessels will not degrade or deny service to land vehicles receiving or requesting land vehicular communication service over the radio facilities of the base station, and that such service to vessels is necessary and desirable.

(c) Applications requesting renewal of authority to render service to vessels shall be accompanied by a current showing of information as required in paragraph (b) of this section.

(d) Mobile stations in this service may not be operated aboard aircraft.

(e) Base stations in this service may render one-way signaling service to receivers installed aboard vessels and aircraft without special authorization from the Commission.

(f) Base stations in this service may be authorized to communicate with Rural Subscriber stations in the Rural Radio Service, where the use of wire lines is not practicable or feasible. Authorization for the rendition of such service may be granted upon a satisfactory showing that it will not degrade the mobile communication service rendered by the base station. Applications for authority to communicate with a Rural Subscriber station shall be accompanied by a supplementary showing as set forth in § 21.608. Such showing, and the request for modification of the related base station license, may be incorporated in the application for construction permit for the fixed point to which communication is to be effected.

(g) The base and mobile station facilities authorized in this service shall not be used in connection with any taxicab operations wherein the license is directly or indirectly interested through stock ownership or otherwise.

(h) Pursuant to the provisions of the "Convention Between the United States of America and Canada, Relating to Operation by Citizens of Either Country of Certain Radio Equipment or Stations in the Other Country," United States licensed mobile units in this service which are in Canada may be authorized by the Canadian Government to communicate with or through Canadian licensed common carrier base stations in the land mobile radio service or with base stations licensed under the rules of this part. Canadian licensed mobile units in the common carrier land mobile radio service which are in the United States may communicate with and through United States licensed base stations in this service provided authority for such communication has been granted by the Commission upon proper application therefor. (See § 21.29 (i) and (j).)

(i) Unless otherwise prohibited by agreements, laws, rules, regulations, etc. of the foreign country concerned, base stations in this service are not prohibited from rendering trans-border communication service for hire to mobile units in that country which are properly licensed to operate in the common carrier land mobile service of either country.

(j) Auxiliary test stations in this service shall normally be operated upon mobile station frequencies only for the purpose of determining the performance of fixed receiving equipment remotely located from the base station with which it is associated or where the receiving equipment is located with the base station and both are remote from the control point of the station: *Provided, however,* That a transmitter used in an auxiliary test station may be used as a standby transmitter upon the frequency of the base station with which it is associated whenever such base station is out of service for maintenance or repair.

§ 21.510 *Base stations may be authorized only as part of integrated radio system.* Base stations will be authorized only as a part of an integrated communication system wherein mobile units associated therewith are also licensed to the base station licensee (see § 21.15 (i)).

§ 21.511 *Communication service to own mobile units.* (a) Upon filing an application for renewal of station license for a base station in this service, a miscellaneous common carrier applicant shall show that, during the preceding license period, at least an average of 50 percent of the mobile units on any channel to which communication service has been rendered by a base station have been used by persons not directly or indirectly controlling or controlled by, or under direct or indirect common control with the applicant. If an applicant is unable to meet such criterion, he shall show what efforts have been made to achieve use of the service by the public and offer such further showing or explanation as he may deem appropriate.

(b) Wire-line communications common carriers may be authorized to es-

tablish land mobile radio facilities under this part of the rules for the purpose of providing communication facilities for their own use incident to construction and maintenance of public communication facilities: *Provided, however,* That the use of the authorized facilities on such frequencies shall be on a secondary basis and subject to use by public subscribers at any time when required for the rendition of public communication service.

§ 21.512 *Priorities for service to subscribers.* (a) Subscriptions to mobile telephone service shall be afforded in the following order of precedence and in chronological order of filing of request for service within each of the following customer categories:

(1) *Category 1: Public safety and health.* Official federal, state, county and municipal government agencies protecting the public safety and health; private organizations and persons engaged primarily in protecting the public safety and health such as physicians, hospitals, ambulance services, volunteer fire departments, American Red Cross, licensed protective patrols and armored cars and similar agencies.

(2) *Category 2: Public service.* Contract carriers, common carriers, and public utilities (exclusive of taxicab and livery service), for communications other than correspondence of the general public.

(3) *Category 3: Quasi public service.* Emergency repair organizations, not included in Category 1, protecting health and property; press associations, newspapers and broadcasting stations.

(4) *Category 4: Physically handicapped.* Persons who because of physical handicaps, operate specifically equipped vehicles and are unable to leave such vehicles without assistance.

(5) *Category 5: Industrial.* Gas or oil producing or drilling operators; producers and distributors of fuel and lumber and other construction materials and equipment; food processing, distribution and storage organizations; producers of substantial quantities of food; business concerns engaged in construction of housing and industrial or public works; taxicabs and livery service.

(6) *Category 6: Traveling public.* Trains and watercraft where service is made available to passengers.

(7) *Category 7: All others.*

(b) After initial establishment of service in accordance with the table of priorities in paragraph (a) of this section when facilities in a given area are insufficient to furnish service to all who desire mobile radiotelephone service, applications for new or additional mobile units shall be ranked within the categories in order of date of filing and service shall be afforded such applicants as facilities become available, in descending order of precedence.

§ 21.513 *Location of message center.* The message center shall be so located that the major portion of the local exchange landline telephone calls, on behalf of subscribers to the service, to and from the message center, shall cost no more than the local message rate.

§ 21.514 *Responsibility for operational control and maintenance of mobile units.* (a) The licensee of a base station in this service shall be responsible for exercising effective operational control over all mobile units with which it communicates. The proper installation and maintenance of such mobile units shall be the responsibility of the respective licensees thereof.

(b) A mobile unit normally associated with and licensed to a specified base station will be deemed, when communicating with a different base station pursuant to legally effective tariff provisions, to be temporarily associated with and licensed to such different base station and the licensee of such different base station shall, for such temporary period, assume the same licensee responsibility for such mobile unit as if such unit were regularly licensed to it.

§ 21.515 *Control points and dispatch points.*[15] (a) Dispatch points may be installed or removed without authorization. Dispatch point circuit facilities shall be installed in conformance with the requirements of paragraph (c) (2) of this section.

(b) To insure the maintenance of station control, means shall be provided whereby each dispatch point is maintained under the continuous effective operational supervision of one or more control points.

(c) At each control point for a base station or fixed station in this service, the following facilities will be installed:

(1) Equipment to permit the responsible radio operator to monitor aurally, at such intervals as may be necessary to insure proper operation thereof, all transmissions originating at dispatch points under his supervision and of stations with which the radio station communicates.

(2) Facilities which will permit the responsible radio operator either to disconnect immediately the dispatch point circuits from the transmitter or immediately to render the transmitter inoperative from any dispatch point associated therewith.

[15] Reference should be made to § 21.118 for additional control point requirements and also to § 21.205 concerning operator requirements.

## SUBPART H—RURAL RADIO SERVICE

§ 21.600 *Eligibility.* Authorizations for central office stations and interoffice stations will be issued to existing and proposed communication common carriers. Authorizations for rural subscriber stations will be issued to communication common carriers or to individual users of the service. Applications will be granted only in cases where it is shown that (a) the applicant is legally, financially, technically and otherwise qualified to render the proposed service, (b) there are frequencies available to enable the applicant to render a satisfactory service and (c) the public interest, convenience or necessity would be served by a grant thereof.

§ 21.601 *Frequencies.*[16] (a) The following frequencies are available primarily to the Domestic Public Land Mobile Radio Service and, on a secondary basis, to stations in the Rural Radio Service, provided no harmful interference is caused to stations in the Domestic Public Land Mobile Radio Service:

| Central office and Inter-office station frequencies (Mc): | *Rural subscriber and inter-office station frequencies (Mc)* |
|---|---|
| 152.03 | 158.49 |
| 152.09 | 158.55 |
| 152.15 | 158.61 |
| 152.21 | 158.67 |
| 152.51 | 157.77 |
| 152.57 | 157.83 |
| 152.63 | 157.89 |
| 152.69 | 157.95 |
| 152.75 | 158.01 |
| 152.81 | 158.07 |
| 454.05 | 459.05 |
| 454.15 | 459.15 |
| 454.25 | 459.25 |
| 454.35 | 459.35 |
| 454.45 | 459.45 |
| 454.55 | 459.55 |
| 454.65 | 459.65 |
| 454.75 | 459.75 |
| 454.85 | 459.85 |
| 454.95 | 459.95 |

(b) The following frequencies are available for assignment to rural subscriber, central office and inter-office stations in this service on a shared basis with other radio services:

*890–940 Mc Band*[1]

(Subject to determination of Docket No. 10797)

| *Mc* | *Mc* | *Mc* | *Mc* |

| 901.0 | 913.5 | 926.0 | 938.5 |
| 901.5 | 914.0 | 926.5 | 939.0 |
| 902.0 | 914.5 | 927.0 | 939.5 |
| 902.5 | 915.0 | 927.5 | |

[1] Stations operating in the 890–940 Mc band will not be protected from such interference as may be experienced from the emissions of industrial, scientific, and medical equipment on 915 Mc, in accordance with § 2.104 (a) of this chapter.

[16] Inter-island and intra-island point-to-point telephone and point-to-point telegraph stations which were licensed, on September 4, 1956, in the Fixed Public Services outside the continental limits of the United States shall be licensed in this service and may be authorized to continue the use of the previously authorized frequencies on the condition that harmful interference will not be caused to services operating in accordance with the table of frequency allocations.

(c) In the Territory of Hawaii, the following frequencies are available for assignment to Inter-Office stations:

*76–108 Mc Band*

| *Mc* | *Mc* | *Mc* | *Mc* |

| 101.66 | 103.78 | 105.90 | |
| 101.70 | 103.82 | 105.94 | |

(d) Within the geographic areas in which the frequencies in paragraphs (a) and (b) of this section may be assigned, and under the same limitations of shared usage and reservations concerning interference set forth therein, such frequencies may also be assigned to radio relay stations in the Rural Radio Service upon a satisfactory showing as to why it is impracticable to achieve the requisite communication without the use of radio relay stations operating on such frequencies.

§ 21.602 *Transmitter power.* Stations in this service shall not be authorized to use transmitters having a rated power output in excess of the limits set forth in § 21.107 (b). A standby transmitter having a rated power output in excess of that of the main transmitter with which it is associated will not be authorized.

§ 21.603 *Types of emission.*[17] (a) Stations in this service within the continental limits of the United States normally shall be authorized to use only types A1, A2, A3 or F1, F2 and F3 emission for radiotelephony. However, multi-channel type of amplitude or frequency modulated emission for radiotelephony may be authorized upon a satisfactory showing of need therefor and provided that the criteria concerning bandwidth of emission set forth in § 21.604 (b) are satisfied.

(b) In addition to the types of emission which may be authorized under the provisions of paragraph (a) of this section, stations in this service outside the continental limits of the United States may be authorized to employ A4 and F4.

(c) The authorization for use of A3 and F3 emission shall be construed to include the use of tone signals or signaling devices whose sole function is to establish and maintain communication between stations.

(d) Other types of emission not described in paragraph (a) of this section may be authorized upon a satisfactory showing of need therefor. An application requesting such authorization shall fully describe the emission desired, shall indicate the bandwidth required for satisfactory communication, and shall state the purpose for which such emission is required.

[17] Further reference should be made to §§ 21.103 to 21.105, inclusive.

§ 21.604 *Emission limitations.* (a) The maximum bandwidths which will normally be authorized for single channel operation in this service are set forth below:

| Type of emission: | *Authorized bandwidth* |
|---|---|
| A1 | 1 kc |
| A2 | 3 kc |
| A3 | 8 kc |
| A4 | 12 kc |
| F1 | 3 kc |
| F2 | 3 kc |
| F3 | 40 kc |
| F4 | 40 kc |

(b) Bandwidths of emission greater than shown in paragraph (a) of this section may be authorized for multi-channel operation upon an adequate showing of need therefor and provided a showing is made that the efficiency of frequency utilization per derived communication channel is equivalent to or greater than on a single channel basis. An application requesting such authorization shall fully described the modulation, omission and bandwidth desired and shall specify the bandwidth to be occupied.

§ 21.605 *Modulation requirements.* (a) The use of modulating frequencies higher than 3000 cycles per second for single channel radiotelephony or tone signaling on frequencies below 500 Mc is not authorized.

(b) When amplitude modulation is used, the modulation percentage shall be sufficient to provide efficient communication and shall be normally maintained above 70 percent on peaks, but shall not exceed 100 percent on negative peaks.

(c) When phase or frequency modulation is used for single channel radiotelephony on frequencies below 500 Mc, the deviation arising from modulation shall not exceed plus or minus 15 kc from the unmodulated carrier.

(d) Each single channel radiotelephone transmitter having more than 3 watts plate power input to the final radio frequency stage and initially in-

stalled at a station in this service after the effective date of these rules shall be provided with a device which will automatically prevent modulation in excess of that specified in paragraphs (b) and (c) of this section which may be caused by greater than normal audio level.

§ 21.606 *Permissible communications.* (a) Rural Subscriber stations normally are authorized to communicate with and through the central office station with which they are associated. However, where the establishment of central office station facilities in this service is shown to be impracticable, Rural Subscriber stations may be authorized to communicate with and through a specified base station in the Domestic Public Land Mobile Radio Service pursuant to the provisions of § 21.509 (f).

(b) Central Office stations may communicate only with Rural Subscriber stations.

(c) Inter-Office stations may communicate only with other Inter-Office stations.

(d) The foregoing paragraphs of this section shall not be construed to prohibit stations in this service from communicating through radio relay stations authorized pursuant to the provisions of § 21.601 (d).

§ 21.607 *Priority of service.* Within the Rural Radio Service, the frequencies set forth in § 21.601 are intended primarily for use in rendition of public message service between Rural Subscriber and Central Office stations and to provide radio trunking facilities between central offices. However, the frequencies may also be used for the rendition of private leased line communication service provided that such usage will not reduce or impair the extent or quality of communication service which would be available, in the absence of private leased line service, to the general public receiving or subsequently requesting public message service from a central office.

§ 21.608 *Supplementary showing required with application for inter-office stations.* (a) Each application for initial installation of a radio station in this service, or for installation of additional transmitters, or for authority to communicate with new points, shall be accompanied by a statement showing how the proposed construction, etc., will serve the public interest, convenience and necessity. (When a series of related applications is filed for authority to construct a coordinated radio system or additional channels thereon, the supporting data may refer to all of the proposed stations or transmitters in such system.) Among other things, such statement should include information concerning:

(1) The number of communication circuits (telephone, telegraph, etc.) to be derived initially from the radio facilities proposed to be established. In the case of a radio system involving one or more circuit branching points, indicate the number of such circuits to be derived in each section of the system.

(2) The availability, adequacy, and reliability of existing public communication facilities along the route or in the area proposed to be served by the proposed radio facilities, operated by the applicant or any other carrier, indicating:

(i) The type of each communication facility (open wire, cable, radio, etc.).

(ii) The number of communication circuits of each type, listed in paragraph (a) (1) of this section, currently being derived from each of these facilities in the limiting cross-section or cross-sections, as appropriate.

(iii) Current traffic load trends, as indicated by periodic traffic load studies, including an estimate as to future circuit requirements.

(iv) Where more than 24 circuits are to be derived from the proposed construction, list the principal circuit groups currently operated, the number of circuits in each group, and the estimated number of circuits required in each group to meet load demands for the ensuing one year, two year, or five year period, as may be appropriate in order to provide adequate justification for said increases.

(b) Where specific information required by paragraph (a) of this section has been submitted in connection with applications filed under Part 63 of this chapter, duplication information in support of applications submitted pursuant to this Part is not required provided appropriate references are made therein. After an application for the initial establishment of a radio station or for the addition of transmitters on an existing system has been granted, and where the number of communication circuits (i. e., telephone, telegraph, etc.) is to be expanded without otherwise affecting the terms of the applicable radio station authorization, authority to install necessary channelizing equipment shall be secured by an application filed pursuant to section 214 (a) of the Communications Act of 1934, as amended, and Part 63 of the Commission's rules and regulations, in those cases where the applicant is subject to the provisions of section 214.

§ 21.609 *Supplementary showing required with applications for central office stations and rural subscriber stations.* Each application in this service should be accompanied by a statement showing why it is impracticable to provide the required communication service by means of wire line facilities, including the estimated cost of such facilities as compared with radio facilities, operating or maintenance difficulties, or similar factors which indicate the desirability of providing service by means of radio facilities. Additionally, where it is proposed to provide rural subscriber service through a base station, a showing should be made that the proposed rural subscriber service will not adversely affect the availability or adequacy of service to mobile subscribers.

§ 21.610 *Rural subscriber and central office stations at temporary fixed locations.* (a) Authorizations may be issued upon proper application for the use of frequencies listed in § 21.601 (a) by rural subscriber stations and central office stations for rendition of rural radio service to subscribers at temporary locations under the following conditions:

(1) When a fixed station is to remain at a single location for less than six months, the location is considered to be temporary.

(2) When a fixed station authorized to operate at temporary locations is to remain at a single location for more than six months, an application for modification of the station authorization to specify the permanent location shall be filed within thirty days prior to expiration of the six month period.

(3) The station shall be used only for rendition of communication service at a remote point where the provision of wire telephone facilities is not practicable.

(4) The antenna height employed at any location shall not exceed the criteria set forth in § 17.3 of Part 17 of the rules unless, in each instance, authorization for use of a specific maximum antenna height for each location has been obtained from the Commission prior to erection of the antenna. Requests for such authorization shall be accompanied by FCC Form 401–A completed in triplicate.

(b) Applications for authorizations to operate rural subscriber stations and central office stations at temporary locations under the provisions of this section shall be made upon FCC Form 401, and may be accompanied by completed FCC Form 403 for simultaneous consideration provided the equipment to be used is of "packaged" design. Blanket applications may be submitted for the required number of rural subscriber and central office transmitters.

§ 21.611 *Notification of station operation at temporary locations.* The licensee of stations which are authorized pursuant to the provisions of § 21.610 shall notify the Commission's Engineer-in-Charge of the radio district wherein operation is to be conducted, at least two days prior to installation of the facilities, stating:

(a) The call sign and specific location of the transmitter.

(b) The identity and location of the station with which it will communicate.

(c) The exact frequency to be used.

(d) The commencement and termination dates of operation from each location. A copy of the foregoing notification shall be posted with the station license.

## SUBPART I—POINT-TO-POINT MICROWAVE RADIO SERVICE

§ 21.700 *Eligibility.* Authorizations for stations in this service will be issued to existing and proposed communication common carriers. Applications will be granted only in cases where it is shown that (a) the applicant is legally, financially, technically and otherwise qualified to render the proposed service, (b) there are frequencies available to enable the applicant to render a satisfactory service, and (c) the public interest, convenience or necessity would be served by a grant thereof.

§ 21.701 *Frequencies.* (a) The following frequency bands are available for assignment to radio stations in this service on a shared basis with stations in the Local Television Transmission Service:

3700–4200 Mc
5925–6425 Mc
10700–11700 Mc

(b) The following frequencies are allocated for assignment to fixed stations in this service on a shared basis with other radio services:

*890–940 Mc Band* [1]

| Mc | Mc | Mc | Mc |
|---|---|---|---|
| 890.5 | 903.0 | 915.5 | 928.0 |
| 891.0 | 903.5 | 916.0 | 928.5 |
| 891.5 | 904.0 | 916.5 | 929.0 |
| 892.0 | 904.5 | 917.0 | 929.5 |
| 892.5 | 905.0 | 917.5 | 930.0 |
| 893.0 | 905.5 | 918.0 | 930.5 |
| 893.5 | 906.0 | 918.5 | 931.0 |
| 894.0 | 906.5 | 919.0 | 931.5 |
| 894.5 | 907.0 | 919.5 | 932.0 |
| 895.0 | 907.5 | 920.0 | 932.5 |
| 895.5 | 908.0 | 920.5 | 933.0 |
| 896.0 | 908.5 | 921.0 | 933.5 |
| 896.5 | 909.0 | 921.5 | 934.0 |
| 897.0 | 909.5 | 922.0 | 934.5 |
| 897.5 | 910.0 | 922.5 | 935.0 |
| 898.0 | 910.5 | 923.0 | 935.5 |
| 898.5 | 911.0 | 923.5 | 936.0 |
| 899.0 | 911.5 | 924.0 | 936.5 |
| 899.5 | 912.0 | 924.5 | 937.0 |
| 900.0 | 912.5 | 925.0 | 937.5 |
| 900.5 | 913.0 | 925.5 | 938.0 |
| 901.0 | 913.5 | 926.0 | 938.5 |
| 901.5 | 914.0 | 926.5 | 939.0 |
| 902.0 | 914.5 | 927.0 | 939.5 |
| 902.5 | 915.0 | 927.5 | |

2450–2500 Mc [1]
16000–18000 Mc [2]
26000–30000 Mc

[1] Stations operating on these frequencies will not be protected from such interference as may be experienced from the emissions of industrial, scientific, and medical equipment on the frequency of 915 Mc, in accordance with § 2.104 (a) of this chapter.

[2] Stations operating on frequencies between 17850 Mc and 18000 Mc will not be protected from such interference as may be experienced from the emissions of industrial, scientific and medical equipment operating on the frequency 18000 Mc, in accordance with § 2.104 (a) of this chapter.

(c) The following frequencies are allocated for assignment to control stations in this service on a shared basis with other radio services, upon a satisfactory showing that it is impracticable to use wire lines:

*72–76 Mc Band* [1]

| Mc | Mc | Mc | Mc |
|---|---|---|---|
| 72.02 | 72.70 | 73.38 | 74.06 |
| 72.06 | 72.74 | 73.42 | 74.10 |
| 72.10 | 72.78 | 73.46 | 74.14 |
| 72.14 | 72.82 | 73.50 | 74.18 |
| 72.18 | 72.86 | 73.54 | 74.22 |
| 72.22 | 72.90 | 73.58 | 74.26 |
| 72.26 | 72.94 | 73.62 | 74.30 |
| 72.30 | 72.98 | 73.66 | 74.34 |
| 72.34 | 73.02 | 73.70 | 74.38 |
| 72.38 | 73.06 | 73.74 | 74.42 |
| 72.42 | 73.10 | 73.78 | 74.46 |
| 72.46 | 73.14 | 73.82 | 74.50 |
| 72.50 | 73.18 | 73.86 | 74.54 |
| 72.54 | 73.22 | 73.90 | 74.58 |
| 72.58 | 73.26 | 73.94 | 75.42 |
| 72.62 | 73.30 | 73.98 | 75.46 |
| 72.66 | 73.34 | 74.02 | 75.50 |

*72–76 Mc Band*—Continued

| Mc | Mc | Mc | Mc |
|---|---|---|---|
| 75.54 | 75.66 | 75.78 | 75.90 |
| 75.58 | 75.70 | 75.82 | 75.94 |
| 75.62 | 75.74 | 75.86 | 75.98 |

[1] Assignments made to stations on frequencies in this band are subject to the condition that no harmful interference will be caused to operational fixed stations or reception of television stations on channels 4 or 5 (see § 21.103).

(d) The frequency 27.255 Mc is available for assignment to microwave auxiliary stations in this service on a shared basis with other radio services. Assignments to stations on such frequency will not be protected from such interference as may be experienced from the emissions of industrial, scientific, and medical equipment operating on the frequency 27.12 Mc, in accordance with § 2.104 (a) of this chapter.

§ 21.702 *Transmitter power.* Stations in this service shall not be authorized to use transmitters having a rated power output in excess of the limits set forth in § 21.107 (b) and a standby transmitter having a rated power output in excess of that of the main transmitter with which it is associated will not be authorized.

§ 21.703 *Bandwidth and emission limitations.* (a) Stations in this service operating on frequencies in the 72–76 Mc band shall be authorized to employ only amplitude modulated or frequency modulated emission for radiotelegraphy, radiotelephony and facsimile.

(b) Stations in this service operating on the frequency 27.255 Mc shall be authorized to employ only amplitude modulated or frequency modulated emission for radiotelephony.

(c) Except as limited by paragraphs (a) and (b) of this section, stations operating in the frequency bands listed in § 21.701 may be authorized to use amplitude modulated, frequency modulated or pulse type of emission for radiotelegraphy, radiotelephony, facsimile and television. In addition, the use of unmodulated emission may be authorized in appropriate cases.

(d) The authorization to employ any of the various types of modulated emission below 890 Mc in this service shall be construed to include authority to employ unmodulated emission only for temporary or short periods necessary for equipment testing incident to the construction and maintenance of a radio station.

(e) The maximum bandwidths which will normally be authorized for single channel operation on frequencies below 500 Mc in this service shall not exceed the limits set forth below:

| Type of emission: | *Authorized bandwidth* |
|---|---|
| A1 | 1 kc |
| A2 | 3 kc |
| A3 | 8 kc |
| A4 | 12 kc |
| F1 | 3 kc |
| F2 | 3 kc |
| F3 | 40 kc |
| F4 | 40 kc |

(f) On frequencies in the 890–940 Mc band, the bandwidth authorized shall not exceed 400 kc for each derived communication channel and may be restricted to lesser bandwidth when appropriate to the type of operation involved in any particular case.

(g) The maximum bandwidth normally authorized in this service in the following frequency bands shall not exceed the limits set forth below:

| Frequency band: | *Authorized bandwidth* |
|---|---|
| 2450–2500 Mc | 20 Mc |
| 3700–4200 Mc | 20 Mc |
| 5925–6425 Mc | 30 Mc |
| 16000–18000 Mc | 100 Mc |
| 26000–30000 Mc | 200 Mc |

(h) The bandwidths authorized on frequencies above 500 Mc shall be appropriate to the type of operation in any particular case. An application requesting such authorization shall fully describe the modulation, emission, and bandwidth desired and shall specify the bandwidth to be occupied.

§ 21.704 *Modulation required.* (a) When amplitude modulation is used, the modulation percentage shall be sufficient to provide efficient communication and shall normally be maintained above 70 percent on peaks, but shall not exceed 100 percent on negative peaks.

(b) Each single channel transmitter operating on frequencies below 500 Mc shall be provided with a device which will automatically prevent modulation in excess of the maximum bandwidth specified in the instrument of station authorization.

§ 21.705 *Permissible communications.* Stations in this service are authorized to render any kind of communication service provided for in the legally applicable tariffs of the carrier, unless otherwise directed in the applicable instrument of authorization or limited by § 21.703.

§ 21.706 *Supplementary showing required with applications.* (a) Each application for initial installation of a radio station in this service, or for installation of additional transmitters, or for authority to communicate with new points, shall be accompanied by a statement showing how the proposed construction, etc., will serve the public interest, convenience and necessity. (When a series of related applications is filed for authority to construct a coordinated radio system or additional channels thereon, the supporting data may refer to all of the proposed stations or transmitters in such system.) Such statement must include information concerning:

(1) The nature and classification of the communication services to be provided (e. g., telegraph, telephone, program transmission for radio, television broadcasting, or theatre television, etc.).

(2) The number of communication circuits in each category (telephone, telegraph, etc.) to be derived initially from the radio facilities proposed to be established. In the case of a radio system involving one or more circuit branching points, indicate the number of such circuits to be derived in each of the controlling sections of the system.

(3) The availability, adequacy, and reliability of existing public communication facilities along the route or in the area to be served by the proposed radio facilities operated by the applicant, indicating:

(i) The type of each communication facility (open wire, cable, radio, etc.).

(ii) A list of the principal communication circuit groups currently being derived from each of these facilities in the limiting cross-section or cross-sections, as appropriate.

(iii) Current traffic load trends, as indicated by periodic traffic load studies, including an estimate as to future circuit requirements.

(iv) Where more than 24 circuits are to be derived from the proposed construction, list the principal circuit groups currently operated, the number of circuits in each group, and the estimated number of circuits required in each group to meet load demands for the ensuing one year, two year, or five year period, as may be appropriate in order to provide adequate justification for said increases.

(b) Where specific information required by paragraph (a) of this section has been submitted in connection with applications filed under Part 63 of this chapter, duplicate information in support of applications submitted pursuant to this Part is not required provided appropriate references are made therein. After an application for the initial establishment of a radio station or for the addition of transmitters on an existing system has been granted, and where the number of communication circuits (i. e., telephone, telegraph, etc.) is to be expanded without otherwise affecting the terms of the applicable radio station authorization, authority to install necessary channelizing equipment shall be secured by an application filed pursuant to section 214 (a) of the Communications Act of 1934, as amended, and Part 63 of this chapter, in those cases where the applicant is subject to the provisions of section 214.

§ 21.707 *Stations at temporary fixed locations.* (a) Authorizations may be issued upon proper application for the use of frequencies listed in §21.701 (a) and (b) by stations in the point-to-point microwave radio service for rendition of temporary service to subscribers under the following conditions:

(1) When a fixed station is to remain at a single location for less than six months, the location is considered to be temporary.

(2) When a fixed station authorized to operate at temporary locations remains at a single location for more than six months, an application for modification of the station authorization to specify the permanent location shall be filed within thirty days prior to expiration of the six month period.

(3) The station shall be used only for rendition of communication service at a remote point where the provision of wire facilities is not practicable.

(4) The antenna height employed at any location shall not exceed the criteria set forth in § 17.3 of Part 17 of the rules unless, in each instance, authorization for use of a specific maximum antenna height for each location has been obtained from the Commission prior to erection of the antenna. Requests for such authorization shall be accompanied by FCC Form 401–A completed in triplicate.

(b) Applications for authorizations to operate stations at temporary locations under the provisions of this section shall be made upon FCC Form 401, and may be accompanied by completed FCC Form 403 for simultaneous consideration provided the equipment to be used is of "packaged" design. Blanket applications may be submitted for the required number of transmitters.

### SUBPART J—LOCAL TELEVISION TRANSMISSION SERVICE

§ 21.800 *Eligibility.* Authorizations for stations in this service will be granted to existing and proposed communication common carriers. Applications will be granted only in cases where it is shown that (a) the applicant is legally, financially, technically and otherwise qualified to render the proposed service, (b) there are frequencies available to enable the applicant to render a satisfactory service, and (c) the public interest, convenience or necessity would be served by a grant thereof.

§ 21.801 *Frequencies.* (a) The following frequencies are available for assignment to television pickup and television STL stations operated by communication common carriers:

7062.5 Mc
7087.5 Mc
7112.5 Mc

(b) In the event a television broadcast station licensee engages a communication common carrier to provide a pickup or STL service, the frequencies available to the broadcast station licensee under the apportionment set forth in § 4.602 (a) of Part 4 of this chapter pertaining to "Experimental and Auxiliary Broadcast Services" may be assigned, under the limitations set forth in Part 4, to the communication common carrier in the Local Television Transmission Service for the purpose of providing such service to the broadcast station licensee.

(c) The frequencies available for assignment under the provisions of paragraphs (a) and (b) of this section shall be used only for the transmission of program material, or communications immediately related thereto, intended for use by television broadcasting stations.

(d) On a shared basis with other radio services, frequencies in the following bands are available for assignment to television STL, television pickup, and television non-broadcast pickup stations in this service:

2450–2500 Mc
16000–18000 Mc
26000–30000 Mc

Stations operating on frequencies in the 2450–2500 Mc band will not be protected from such interference as may be experienced from the emissions of industrial, scientific, and medical equipment operating on the frequency 2450 Mc, in accordance with § 2.104 (a) of this chapter. Stations operating on frequencies between 17850 Mc and 18000 Mc will not be protected from such interference as may be experienced from the emissions of industrial, scientific, and medical equipment operating on the frequency 18000 Mc, in accordance with § 2.104 (a) of this chapter.

(e) On a shared basis with other radio services, frequencies in the following bands are available for assignment to television nonbroadcast pickup stations in this service:

3500–3700 Mc [1]
6425–6575 Mc [1]
11700–12200 Mc [1]

[1] Use of this frequency band is subject to the final action taken in Docket No. 10797.

(f) Frequencies in the following bands are available for assignment to television STL stations in this service on a shared basis with stations in the Point-to-Point Microwave Radio Service:

3700–4200 Mc
5925–6425 Mc
10700–11700 Mc

(g) On a shared basis with other radio services, frequencies in the following bands are available for assignment to television STL stations in this service:

16000–18000 Mc [1]
26000–30000 Mc

[1] Stations operating on frequencies between 17850 and 18000 Mc will not be protected from such interference as may be experienced from the emissions of industrial, scientific, and medical equipment operating on the frequency 18000 Mc, in accordance with § 2.104 (a) of this chapter.

(h) The following frequencies in the 27.23–27.38 Mc band are allocated for assignment to microwave auxiliary stations in this service on a shared basis with other radio services.

27.255 Mc [1]

[1] Assignments to stations in this band will not be protected from such interference as may be exeprienced from the emissions of industrial, scientific, and medical equipment operating on 27.255 Mc, in accordance with § 21.104 (a) of this chapter.

§ 21.802 *Assignment of frequencies to mobile stations.* The assignment of frequencies to mobile stations in this service shall not be limited to a single licensee within any area. However, geographical limits within which mobile units may operate may be imposed by the Commission.

§ 21.803 *Transmitter power.* Stations in this service shall not be authorized to use transmitters having a rated power output in excess of the limits set forth in § 21.107 (b) and a standby transmitter having a rated power output in excess of that of the main transmitter with which it is associated will not be authorized.

§ 21.804 *Bandwidth and emission limitations.* (a) Stations in this service operating on frequencies in the 27.23–27.28 Mc band shall be authorized to employ only amplitude modulated or frequency modulated emission for radiotelephony. The authorization to use such emission shall be construed to include authority to employ unmodulated emission only for temporary or short periods necessary for equipment testing incident to the construction and maintenance of the station.

(b) Stations in this service operating on frequencies above 940 Mc may be authorized to use amplitude modulated, frequency modulated or pulse type of emission for radiotelephony and television. In addition, the use of unmodulated emission may be authorized in appropriate cases.

(c) The maximum bandwidths which will normally be authorized for single channel operation on frequencies below 500 Mc in this service shall not exceed the limits set forth below:

| Type of emission: | *Authorized bandwidth* |
|---|---|
| A3 | 8 kc |
| F3 | 40 kc |

(d) The maximum bandwidths which will normally be authorized in this service in the following frequency bands shall not exceed the limits set forth below:

| Frequency band: | *Authorized bandwidth* |
|---|---|
| 2450–2500 Mc | 20 Mc |
| 3500–4200 Mc | 20 Mc |
| 5925–6575 Mc | 30 Mc |
| 6875–7125 Mc | 25 Mc |
| 10700–12200 Mc | 50 Mc |
| 16000–18000 Mc | 100 Mc |
| 26000–30000 Mc | 200 Mc |

(e) The bandwidths authorized on frequencies above 500 Mc shall be appropriate to the type of operation in any particular case. An application requesting such authorization shall fully describe the modulation, emission, and bandwidth desired and shall specify the bandwidth to be occupied.

§ 21.805 *Modulation requirements.* (a) The use of modulating frequencies higher than 3000 cycles per second for single channel radiotelephony or tone signaling on frequencies below 500 Mc is not authorized.

(b) When amplitude modulation is used, the modulation percentage shall be sufficient to provide efficient communication and shall normally be maintained above 70 percent on peaks, but shall not exceed 100 percent on negative peaks.

(c) When phase or frequency modulation is used for single channel radiotelephony on frequencies below 500 Mc, the deviation arising from modulation shall not exceed plus or minus 15 kc from the unmodulated carrier.

(d) Each single channel radiotelephone transmitter having more than 3 watts plate power input to the final radio frequency stage and initially installed at the station in this service after the effective date of these rules shall be provided with a device which will automatically prevent modulation in excess of that specified in paragraphs (b) and (c) of this section which may be caused by greater than normal audio level.

§ 21.806 *Remote control operation of mobile television pickup stations.*[12] (a) Mobile television pickup stations (including non-broadcast) may be operated by remote control from fixed locations for periods not to exceed 6 months, provided the Commission's Engineer-in-Charge of the radio district wherein operation is to be conducted shall be notified in writing by the licensee prior to operation of the facilities by remote control. A copy of such notification shall be kept with the station license and shall contain the following information:

(1) The call sign and specific location of the transmitter.

(2) The exact frequencies to be used.

(3) The location of the transmitter control point.

(4) The commencement and termination dates of operation from the specified location.

(b) The Commission may, upon adequate showing by the licensee as to why the television pickup operations should not be conducted under a fixed station authorization, renew the authority granted under the provisions of paragraph (a) of this section.

[12] Reference should be made to § 21.114 concerning mobile station antenna height restrictions and to paragraphs (c), (f) and (g) of § 21.118 concerning control points.

[F. R. Doc. 56-4970; Filed, June 27, 1956; 8:45 a. m.]

## TITLE 22—FOREIGN RELATIONS

### Chapter I—Department of State

[Departmental Reg. 108.290]

### PART 2—FEES FOR SERVICES

Part 2 of Departmental Regulation 108.238 entitled "Fees for Services," published in the FEDERAL REGISTER of November 30, 1954 (19 F. R. 7720–7721), as amended, is amended to read as follows:

Sec.
2.1 Schedule of fees.
2.2 Requesting services and forwarding remittances.
2.3 Effective date.

AUTHORITY: §§ 2.1 to 2.3 issued under R. S. 161; 5 U. S. C. 22. Interpret or apply sec. 501, 65 Stat. 290; 5 U. S. C. 140.

CROSS REFERENCES: For fees in connection with passport services, see Part 51 and § 103.1 of this chapter. For fees in connection with visa services, see Part 44 and § 103.1 of this chapter. For the Tariff of United States Foreign Service Fees covering invoice services, passport services, visa services for aliens, services to vessels and seamen, and miscellaneous notarial and other services, see § 103.1 of this chapter. For regulations concerning deposit of funds, see Part 9 of this chapter.

§ 2.1 *Schedule of fees.*

| Item No. | Description of service | Fee |
|---|---|---|
| 1 | a. For each search for a record and for making a copy or extract thereof, by photostat or otherwise (single page) | $1.50 |
| | b. For each additional copy of the first page, for 25 copies or less, for each copy of the second page, for 25 copies or less and for each copy of each additional page, for 25 copies or less | .60<br>.20 |
| | c. For each copy in excess of the 25 copies of each page | |
| | (This fee does not apply to such customary activities as issuance of copies of records (1) from supplies kept for distribution, such as press releases and information leaflets; (2) as part of normal and generally reciprocal services performed by the Library of the Department at the request of similar agencies or institutions; or (3) in lieu of or as enclosures to letters with the purpose of saving costs in preparing mail.) | |
| | (The routine servicing of requests of persons having permission to do research in the records under section 183.2 of the Manual of Regulations and Procedures of the Department of State is not to be considered as searching within the meaning of this item. Any copying performed under this proviso, including the first copy of any first page, shall be at the rate indicated in Item No. 1b or 1c, and authenticating at the rate under Item No. 3.) | |
| 2 | For each signed statement of negative result of a search for a record (Item 1 above) | 1.00 |
| 3 | For certifying under official seal that a copy or extract made by the Department from its records is a true copy | 1.00 |
| | (Fees for searching and for copying, if required, are an additional charge under Item 1.) | |
| 4 | Authenticating a Federal, State or Territorial seal, or certifying to the official status of an officer of the United States Department of State or of a foreign diplomatic or consular officer accredited to or recognized by the United States Government, on any document submitted to the Department for that purpose | 2.50 |
| 5 | Any service described in Items 1, 2, 3, or 4 above, when— | |
| | a. Required for official use by an agency of the Federal Government or of any of the States or their subdivisions or of the District of Columbia, or of any of the territories and possessions of the United States | No fee |
| | b. Required for official use by a foreign government, or by an international agency of which the Government of the United States is a member, or by a foreign official to whom the United States has granted diplomatic or consular status, in circumstances where furnishing the service is an appropriate courtesy | No fee |
| | c. Performed in response to a subpoena or other order of a court. (However, fees are chargeable when the service is for the benefit of a party in interest and a court order or subpoena is issued in his behalf.) | No fee |
| | d. Performed in providing to a party in interest, one copy of the transcript of a hearing held before a panel, board, or other authority of the Department | No fee |
| | e. Performed in providing to a party in interest, for delivery to and retention by an agency of the Federal Government, one copy under seal of a personal document (viz., consular form report of birth, certificate of witness to marriage, or report of death of an American citizen, etc.) | No fee |
| | f. Performed in providing to a near relative or legal representative, one copy under seal of a consular form report of death of an American citizen | No fee |

§ 2.2 *Requesting services and forwarding remittances.* (a) Request for services, accompanied by remittance of the exact total fee chargeable (as well as by a stamped addressed return envelope if certified mail, registered mail, air mail, or special delivery mail service is desired), shall be addressed to the Authentication Officer, Department of State, Washington 25, D. C.

(b) Remittances shall be in the form either of (1) check or bank draft drawn on a bank in the continental United States, or (2) postal money order, or (3) cash. Remittances shall be made payable to the order of the Department of State. The Department will assume no responsibility for cash which is lost in the mail.

(c) Fees must be paid in full prior to issuance of requested documents. If uncertainty as to the existence of a record, or as to the number of sheets to be copied, precludes remitting the exact fee charge-

able with the request the Department of State will inform the interested party of the exact amount required.

§ 2.3 *Effective date.* The charges hereby established will become effective on July 1, 1956 with respect to all services rendered pursuant to requests received in the Department of State on or after the effective date.

Dated: June 20, 1956.

I. W. CARPENTER, Jr.,
*Assistant Secretary-Controller.*

# PROPOSED RULE MAKING

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

### [ 43 CFR Part 194 ]

POTASSIUM PERMITS AND LEASES

MISCELLANEOUS AMENDMENTS

Notice is hereby given that pursuant to the authority vested in the Secretary of the Interior under sections 1 to 7 of the act of February 7, 1927, as amended (44 Stat. 1057, 30 U. S. C. 281-287), it is proposed to amend certain sections of the potassium regulations approved May 6, 1955, as amended August 25, 1955. The proposed amendment of the sections is set forth as appendices to this notice.

Interested persons may submit, in triplicate, written comments, suggestions, or objections with respect to the proposed amendment of the sections to the Bureau of Land Management, Washington 25, D. C., within 30 days from date of publication of this notice in the FEDERAL REGISTER.

WESLEY A. D'EWART,
*Assistant Secretary of the Interior.*

JUNE 21, 1956.

1. Section 194.13 is amended by adding thereto new paragraph (c) as follows:

§ 194.13 *Reward for discovery.* * * *

(c) If the permittee dies before the lease is issued, the lease will be issued to the executor or administrator of the estate if probate of the estate has not been completed; if probate has been completed, or is not required, to the heirs or devisees; and if there are minor heirs or devisees, to their legal guardian or trustee in his name, provided there is filed in all cases the following information:

(1) Where probate of the estate has not been completed:

(i) Evidence that the person, who as executor or administrator submits forms of lease and bond, has authority to act in that capacity and to sign such forms.

(ii) Evidence that the heirs or devisees are the heirs or devisees of the deceased permittee and are the only heirs or devisees of the deceased.

(iii) A statement over the signature of each heir or devisee concerning citizenship and holdings similar to that required by § 194.4 (c) (1) and (4).

(2) Where the executor or administrator has been discharged or no probate proceedings are required:

(i) A certified copy of the will or decree of distribution, if any, and if not, a statement signed by the heirs that they are the only heirs of the permittee and citing the provisions of the law of the deceased's last domicile showing no probate is required.

(ii) A statement over the signature of each of the heirs or devisees with reference to citizenship and holdings similar to that required by § 194.4 (c) (1) and (4), except that if the heir or devisee is a minor, the statement must be over the signature of the guardian or trustee.

(3) Where there is a legal guardian or trustee:

(i) A certified copy of the court order authorizing the guardian or trustee to act as such and to fulfill in behalf of the minor or minors all obligations of the lease or arising thereunder; statements by the guardian or trustee as to the citizenship and holdings of each of the minors and as to his own citizenship and holdings, including his holdings for the benefit of other minors similar to that required by § 194.4 (c) (1) and (4).

2. Section 194.19 is amended, as follows:

§ 194.19 *Bid deposits.* The successful bidder at a sale by public auction must on the date of sale deposit with the Manager of the Land Office, or other officer conducting the sale, and each bidder at a sale by sealed bids must submit with his bid the following: Certified check, cashier's check, bank draft, money order or cash for one-fifth of the amount of the bid by him, and a statement over the bidder's own signature with respect to citizenship and interests held similar to that prescribed in § 194.4.

3. Section 194.20 is amended, as follows:

§ 194.20 *Award of lease.* Upon receipt of the high bid at, and at the close of, an oral auction, or the opening of the sealed bids, the Manager, subject to his right to reject any and all bids, will award the lease to the successful bidder, who will be notified accordingly. Four copies of the lease will be sent to the successful bidder, who will be required within 30 days from receipt thereof to execute them, pay the balance of the bonus bid, the first year's rental, and the cost of publication of the notice of lease offer as specified in § 194.18, and file a bond as required by § 194.15. If a bidder, after being awarded a lease, fails to execute it or otherwise comply with the applicable regulations, his deposit will be forfeited and disposed of as other receipts under the Mineral Leasing Act of February 25, 1920 (41 Stat. 437), as amended. If the lease awarded to the successful bidder is executed by an attorney acting in behalf of the bidder, the lease must be accompanied by evidence that the bidder authorized the attorney to execute the lease. If the bidder dies before the lease is issued, evidence such as specified in § 194.13 (c) must be filed before it can be determined to whom the lease may be issued.

4. Section 194.24 is amended by adding thereto new paragraphs (c) and (d), as follows:

§ 194.25 *Transfers, including subleases.* * * *

(c) No transfer will be approved if the transferee is not qualified to take and hold a permit or lease or if his bond is insufficient. A minor, except a minor heir or devisee of a permittee or lessee, is not qualified to hold a permit or lease and a transfer to a minor will not be approved.

(d) In order for the heirs or devisees of a deceased holder of a permit or lease, an operating agreement, or a royalty interest in a permit or lease, to be recognized by the Secretary as the holder of the permit or lease, agreement or interest, there must be furnished the appropriate showing required under § 194.13 (c).

[F. R. Doc. 56-5105; Filed, June 27, 1956; 8:50 a. m.]

## Fish and Wildlife Service

### [ 50 CFR Part 33 ]

TREMPEALEAU NATIONAL WILDLIFE REFUGE, WISCONSIN

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given pursuant to the Administrative Procedure Act approved June 11, 1946, that the Department of the Interior intends to rescind the regulations authorizing the hunting of deer on the Trempealeau National Wildlife Refuge, Wisconsin, as contained in §§ 33.251, 33.252, and 33.253, Title 50, Code of Federal Regulations (11 F. R. 11509).

All interested persons who desire to submit written data, views, or arguments in connection with the rescinding of the above regulations should file same with Mr. John L. Farley, Director, Fish and Wildlife Service, Washington 25, D. C., not later than 30 days after publication hereof in the FEDERAL REGISTER.

WESLEY A. D'EWART,
*Assistant Secretary of the Interior.*

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### [ 7 CFR Part 940 ]

[Docket No. AO 102-A3]

HANDLING OF PEACHES GROWN IN THE COUNTY OF MESA IN COLORADO

DECISION WITH RESPECT TO PROPOSED AMENDMENTS TO AMENDED MARKETING AGREEMENT AND ORDER

Pursuant to the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders (7 CFR Part 900), a public hearing was held at Palisade, Colorado, on March 15, 1956, after notice thereof was published in the FEDERAL REGISTER (21 F. R. 1290), on proposed amendments to Marketing Agreement No. 88, as amended, and Order No. 40, as amended (7 CFR Part 940), hereinafter referred to as "marketing agreement" and "order," respectively, regulating the handling of peaches grown in the County of Mesa in the State of Colorado, to be made effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 68 Stat. 906, 1047).

On the basis of evidence introduced at the hearing, and the record thereof, the Deputy Administrator, Agricultural Marketing Service, on June 7, 1956, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision in this proceeding. The notice of the filing of such recommended decision, affording opportunity to file written exceptions thereto, was published in the FEDERAL REGISTER (F. R. Doc. 56-4619; 21 F. R. 4016). No exception to said recommended decision was filed.

The material issues, findings and conclusions, and the general findings of the recommended decision set forth in the FEDERAL REGISTER (F. R. Doc. 56-4619; 21 F. R. 4016) are hereby approved and adopted as the material issues, findings and conclusions, and general findings of this decision as if set forth in full herein.

*Marketing agreement and order.* Annexed hereto and made a part hereof are two documents entitled, respectively, "Agreement Amending the Amended Marketing Agreement Regulating the Handling of Peaches Grown in the County of Mesa in the State of Colorado" and "Order Amending the Amended Order Regulating the Handling of Peaches Grown in the County of Mesa in the State of Colorado," which have been decided upon as the appropriate and detailed means of effecting the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the aforesaid rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.
